REVERE HOUSE,
BOWDOIN SQUARE,
AND
TREMONT HOUSE,
cor. of Tremont and Beach streets, Boston.
The most centrally located First Class Hotels in the city. These favorite resorts of the officers of the Army and Navy have been refitted in the most thorough manner, and the business conduct and economy of the two hotels are still unsurpassed in the country. Mr. Wm. Bingham, Jr., having purchased the entire business of the late proprietor, they are now under the superintendence of
BINGHAM, WHEELER & CO.

ASTOR HOUSE.
STETSON & CO.,
PROPRIETORS,
Broadway, NEW YORK.

TAYLOR'S SALOON.
This elegant establishment, at the corner of Broadway and Franklin streets, is one of the curiosities of New York; and, although it is called the Saloon, it is not confined to the interior, but extends to the city, who have not yet witnessing its internal magnificence, and experiencing the exquisiteness of its cuisine, will have deprived themselves of a rare treat. It has very appropriately been termed an "Epicurean Palace" for, for we presume, there is scarcely a delicacy that the season affords that is not served up, which it can be found there, if it be possible to obtain it.

FUTAW HOUSE,
BALTIMORE, MD.
JAMES H. GAITHER,
E. B. COLEMAN, Proprietor.

UNITED STATES HOTEL,
PENNSYLVANIA AVE., (near the Capitol)
WASHINGTON, D. C.
M. H. BEAN & CO., Proprietors.

We take pleasure in calling the attention of ARMY and NAVY OFFICERS, and business men generally, to this hotel. The Proprietors spare no effort to their patrons.

THE ST. LOUIS HOTEL,
CHESTNUT STREET,
Between Third and Fourth Streets,

PRESENTATION SWORDS,
REGIMENTAL COLORS, Etc.
TIFFANY & CO.,
550 & 552 Broadway, New York.
DEPOT OF GENERAL EQUIPMENT.
Compiling everything pertaining to the Personal and Camp Furniture of an Officer, and thus avoiding the necessities of active service, or the purchase of uniform and material, will do well to examine the large collection of Foreign and Domestic Arms, Uniforms and Accoutrements on hand.

CAUTION FROM THE AMERICAN WATCH COMPANY.
It having come to our knowledge that imitations of the American Watch have been put upon the market in great numbers, calculated by their small appearance, to injure the reputation of our genuine productions—we respect our interests and the public interest in common, we again publish the trade marks by which our Watches may be known, viz.:
We manufacture four styles of Watches—
"AMERICAN WATCH CO.,
"WALTHAM & ROYAL CO., Waltham, Mass.,"
engraved on the inside plate.
The names on the cases are
"APPLETON, TRACY & CO., Waltham, Mass."
engraved on the inside plate.
The name has the same
"APPLETON, TRACY & CO., Waltham, Mass."
engraved on the inside plate.
All the above styles have the name "American Watch Co." painted on the dial, and are warranted in every respect.
The reason has the name
"P. L. KELLEY, Keene, Mass."
engraved on the inside plate, and is not named on the dial.
All the above Watches are made and sold at various sizes, and are sold in gold or silver cases, as may be required.
It is hardly possible for us to accurately describe the numerous imitations in which we have shields. They are usually inscribed with names so nearly approaching our own as to deceive the unwary and unaccustomed buyer. Some are represented as made at "Waltham," others as "Boston Watch Co.," and in numerous cases the word "American" is omitted. Don't "Watch," to be sold as our Pratt's or Wilcox's. Don't "Watch," to be sold as our Pratt's or Wilcox's. Don't "Watch," to be sold as our Pratt's or Wilcox's

ARMY AND NAVY JOURNAL.

Army and Navy Personal ..... 524 | Marriages and Deaths 551

THE work of the week has been chiefly that of organization and preparation. In Virginia there is hardly so much as a cavalry scout to break the lull of the hour, and on the Rebel part, even the restless MOSBY has for a brief season relapsed into quiet. Everywhere, however, the busy note of preparation betokens the approach of a campaign of extraordinary importance. The new policy of concentration will henceforward fix public attention chiefly on two points alone—the stronghold at Chattanooga, and the Army, or, rather, the armies, in Virginia. The movements in the West and Southwest, it is true, are really the only stirring events of the week. But while these latter excite temporary interest, it will soon be obvious that they cannot from the nature of things be at any time of permanent importance; nor will they be thoroughly effective until the great campaign is opened between Washington and Richmond.

The work of remodelling and consolidating the Army of the Potomac is proceeding quietly and well. The jarring and ill-feeling which many predicted as the result of that step, have not been exhibited. A scheme so radical undertaken two years since would have provoked acrid discussion and bitter jealousy; but since then, our Army has become an Army of soldiers. By a wise sympathy in the feelings of the soldier, the transformed corps are permitted for the present to retain, if not their original nomenclature, at least the familiar badges, berne through many battles. The work of consolidation has reached the Western Army; and here again the modification of the original order so as to affix the name of "Twenty-fifth" to the united Eleventh and Twelfth, instead of "First" as originally proposed, will be observed with pleasure.

The Lieutenant-General, accompanied by several staff officers, has prosecuted a careful tour and survey of the forces in Virginia. The command of General BUTLER was visited in the circuit. General W. F. SMITH accompanied the Lieutenant-General to the latter point, and will have, it is understood, the military leadership of the forces on the Peninsula. Meanwhile, Commissioner OULD, after so often objecting to holding any communication with General BUTLER, has had a lengthy conference with the latter at Fortress Monroe, whither a flag of truce boat steamed him. There is a bright prospect of exchange for the Richmond prisoners.

Apart from the necessary delay during reorganization, the excessive rains of the week have been adequate to keep the Potomac Army in quiescence. The roads are now drying and the swollen streams rapidly subsiding. On the southerly side of the Rapidan, General LEE seems still to continue the work of fortification, several new works being observed at what is called Clark's Mountain, opposite Mitchell's Station, and in the vicinity of Raccoon Ford.

FROM the Red River we learn that, on the 21st of March, General JOHN A. MOWER ascended the river above Alexandria as far as Natchitoches, where he met the enemy in some force, repulsed him, and captured 282 prisoners, including twenty officers, Edgar's Texas battery of four pieces complete, 150 horses, and other spoils. The prisoners were of the Second Louisiana cavalry. The movement was continued, and up to the latest dates, General MOWER had captured in all seventeen cannon.

General FRANKLIN's forces—LEE's cavalry being the advance—have arrived at Alexandria, and General A. J. SMITH left that place on the 27th of March, in pursuit of the enemy. The Rebels retreated to Shreveport, to the protection, as it was thought, of certain iron-clads which they are reported to possess at that point. In their retrograde movement we observe a repetition of the old policy, pursued so successfully last year, during General BANKS' circuitous march to Port Hudson. It is not the enemy's move to make serious fight, or to risk large forces, in that quarter of the Confederacy. They systematically retire before our forces, till the latter are tired of the pursuit, when they follow us back again, re-occupying what we abandon on the return. Such was the story of Brashear City. And therefore—although the Rebel General HARRISON is reported to be moving on Shreveport to reinforce that point—we shall not be surprised to learn that, instead of a resistance by Rebel gunboats, the place has been abandoned without a struggle.

Indianola, Texas, has been evacuated, and the occupation of the Rio Grande in great force is no longer to be considered of prime importance. Our troops in the Gulf Department have been too much scattered. Concentration there, as well as here, should be the word of the hour.

AFFAIRS in Kentucky and Tennessee have been unfortunate of late; and, although the raids of FORREST cannot affect the general plan of the summer campaign, either on the enemy's part or on our own, his plundering and marauding excursions cause no little chagrin. His success, too, may induce a still more serious inroad upon Kentucky: the assembling of a considerable hostile force at Pound Gap, under BUCKNER, gives color to such a surmise. The insecurity it begets throughout loyal Kentucky is a great part of the mischief of FORREST's operations. Tennessee and Kentucky are full of rumors, among which is the unnecessary apprehension that FORREST is already moving on Fort Donelson.

The 6th Tennessee Cavalry had an unsuccessful meeting with a superior Rebel force on the 30th ult., near Somerville, Tenn., and retired, with a loss of three officers and seventy-five men. On the 2d of April, GIBBSON's cavalry again encountered the enemy under similar disadvantage near the same place, and fell back. But the attack was to be renewed.

Deserters state that LONGSTREET's baggage has been already dispatched to Richmond, and his troops have received marching orders for the same locality.

AT Ringgold, Ga., all is quiet, and the policy of JOHNSTON unknown. His force is roughly estimated at 35,000 men. Rebel cavalry encamp in force at the foot of Rocky Faced Ridge, from Tunnel Hill to Varnes Station and Red Clay, and also at Nickajack Gap, six miles below Ringgold. Thus the hostile forces are cautiously drawing nearer. It is reported in Vicksburgh that POLK's forces are resuming their old lines on the Big Black and Yazoo.

COLONEL CLAYTON's expedition to Mount Elba, on the Salem River, Ark., 25 miles southerly from Pine Bluff, was successful. At Longview, 20 miles southwest of Elba, the telegraph bridges were destroyed; a train of thirty-five wagons, loaded with camp and garrison equipments, ammunition, stores, &c., was burned, and 320 prisoners captured. On the 30th, he engaged General DOCKING's command of 1,200 men, from Monticello, routed him with a loss of 100, captured 300 horses and wagons, besides small arms, and two stands of colors. Our loss, not over fifteen.

We get nothing yet from General STEELE, who, as our readers will remember, was reported some time since to be moving southward in Arkansas, with rather more than 30,000 men.

MAJOR E. B. HUNT, one of the most distinguished officers of the Engineer Corps, and one whose valuable contributions to science are familiar to very many of our readers, died while engaged in experiments with an invention in submarine warfare, to which he had devoted years of thoughtful study and application. His death was caused by no imperfection in the Sea Miner—that was the name he gave his subaqueous projectile invention—but was the result of unaccountable oversight in the shutting of a valve which should have been open, and the escaping of gases from the explosion of the gunpowder. It was one of those accidents which unfortunately are frequent in experiments with explosive mixtures, and like so many of them, was fatal in its results.

The Sea Miner was therefore lost by the inventor at just that stage of its history when it needed only little further experimenting to prove its practical importance, and secure its employment in actual warfare. We are therefore pleased to learn that Professor TWINING, a well-known scientific gentleman of New Haven, has received authority from the Navy Department to examine into the merits of the invention, its condition and progress, and, in consultation with Mr. THOWBRIDGE, of the Scientific Agency, a gentleman who was thoroughly acquainted with the plans and purposes of the inventor, to report upon the Sea Miner. It seems that the absence of special appropriations may come in to prevent the continuance of the experiments. But we hope this will not be allowed to remain an obstacle. If the Sea Miner is, as we believe it is, an invention which promises the most valuable results, and one of the most practicable and original inventions in submarine warfare, the comparatively small expense which would attend its perfection, should not be allowed to weigh for one moment against the manifest advantages which would attend the realization of the plans of Major HUNT. It would also seem due to the devotion of the noble Engineer, that the project to which he had devoted his best thought and most careful study, and which ultimately cost him his life, should not fall through neglect. We feel sure the Navy Department will lend every facility in their power to those who are interested in the success of the Sea Miner, and we hope that Department will not long have to plead the absence of the appropriation which is necessary to enable it to conduct the experiments and secure the results.

THE able letter of the Secretary of the Navy to the Senate, on the deficiency of seamen in the naval service, is a conclusive argument in favor of some summary method of transferring from the Army to the Navy such enlisted men as are experienced in the duties of sailors. The letter is published in full in another place, and we would ask for it an attentive perusal by every reader.

RIFLED ORDNANCE.*

No. III.

MAJOR-General TULLOH, Inspector of Artillery previous to July, 1861, in the course of examination seemed to know very little about the guns, and thought "the vent-pieces" had been very much improved; there has been great difficulty in getting metal sufficiently strong to stand, but "that has been now got over;" but at page 130 he says, "he would prefer a muzzle-loader to a breech-loader if of equal "range and equal accuracy," because with the breech-loader "there are difficulties about the gas escaping, and the "vent-pieces blowing away, and the breech-screws and "things of that kind."

Rear-Admiral DACRES, was inclined to speak favorably of the gun, and thought that about one-tenth of the ammunition of a ship should be of the Armstrong gun, but he stated, "there had been several accidents, and one very serious "one on board the *Marlborough*." "They say it arose from "the vent-piece not being properly screwed up." "There are "ways laid on for keeping them tight, but happened on several "occasions." He then gives the names of three vessels of his own squadron, where accidents had recently occurred, but he is in favor of the breech-loader for naval purposes, because he is "in favor of rifled guns," "and if you want it to last, "you cannot have a rifled gun unless it was a breech-loader." "My own idea is, that the Whitworth and the French guns "will not last;" and yet in reply to subsequent questions, it appeared that this witness had no knowledge of any other rifled gun, but his evidence was considered by system to reply to the question as to "the liability of the vent-piece "not being properly screwed up at night," "No, it is not "an eye-sight question, it is a mechanical matter of so "many taps."

The next officer called in was Captain HEWLETT, the commander of the troop ship *Excellent*. His practice had been very extensive with the guns of all calibres, and he had a "high opinion of them with respect to range, accuracy and "perfect safety, with common care;" "four or five vent-"pieces had blown out on board the *Excellent*." "The "breech-loader has many advantages, but you could get "a good safe muzzle-loader, the projectile going home with "ease after a continuous fire, and if it was a safe gun, I "think possibly I should prefer the muzzle-loader." In reply to question 3328. And there is evidence given of three or four vent-pieces having been shot out in quick quarters. He says, "I think that would be very likely to happen from not "screwing the vent-pieces up; possibly from not seeing the "marks."

In answer to question 3333, he again expresses his preference for a good muzzle-loader, and to 3382, "Sometimes "there is a little difficulty in screwing the vent-pieces up, "but nothing to cause you to cease firing." In the heat of action he thinks there would be no difficulty about the vent-piece being screwed home; "because they bear marks; we "always take the precaution of having the marks on, and "they should be screwed home." Being asked "what is the "general opinion in the navy?" he says, "I think they are "rather adverse to the guns, they are rather frightened of "them from two or three little accidents."

We must on the whole receive the testimony of this officer as rather unsatisfactory; though having the very best opportunities for a practical knowledge of the gun, he evades giving direct replies, and although expressing himself as pleased with the gun, he would prefer a muzzle-loader.

Captain COCHRANE, R. N., next comes.

Has had experience with the Armstrong 12-pounder, the 20-pounder, the 40-pounder and the 100-pounder. As to the 12-pounder and the 40-pounder when his ratings was so cumbly known, their precision of fire up to 2300 yards was certain at an object about 15 feet square.

His experience has been in a gunboat vessel, the crew of which were admitted as better than the general average. "When the vent-pieces have been made so soft as not to "crack, there is a tendency to bind, and a probability of "jamming. When they are made so highly tempered they be-"come brittle, they can get to crack." As to the 110-pounder, "I am not at ease about the vent-pieces, for I have seen "many that have broken." "One difficulty in the use of the "Armstrong gun is that unless you take it in the first instance "you have no chance of hitting, or at least very little chance "There is no ricochet firing that would be likely to help you, unless you ricochetted very close, as the shot always "tends to deflect away to the right." He "would not have "much confidence in a ship armed with Armstrong guns"; had "never seen a muzzle-loading rifled gun burst," but everything else being equal would prefer "the breech-load-"er; no question about it, provided it was all safe," though of the Armstrong gun he says, "I have always felt that I "would rather that the manufacturer of the gun should fire it "than that I should."

This officer had been astonished at seeing the immense number of 110-pounder guns that had been made while they were not perfect in their vent-pieces. His examination was a long one, and elicited no facts except that he as a gunnery officer showed less acquaintence with his business than should have been expected of him.

Captain JAMES WAINWRIGHT, R. N., examined:

* Report from the Select Committee on Ordnance.

In commander of the *Black Prince*. Of the Armstrong gun he says:—"It is a gun that I should be sorry to see generally introduced into the navy." He will think his practice from the Armstrong gun is so accurate in bad weather as the practice from the smooth-bore. The only opportunity I had of testing one gun against another, under similar circumstances (excepting that the Armstrong gun had rather an advantage, being mounted on a higher plane —on a pivot carriage) was at a 6-inch gun at about 1,000 yards, and then the smooth-bore carried off the prize. We found the smoke exceedingly unpleasant in the *Black Prince* of the Armstrong guns." Being asked, and there is hardly any living there. Our ports were very much contracted, and the smoke was absolutely choking; whether it is owing to the grease in the lubricating wad, or whatever else, it is more choking than any gunpowder that I know of. The *Black Prince* is the first ship where guns was, that the shots turned off to the right, every one of them. My opinion, and that of the majority of officers with whom I have talked, is that if the Armstrong should not be generally adopted. I think that the rifled gun (speaking of the Armstrong gun) is more liable to accidents than the smooth-bore gun; and I think that any accidents occurring to the ship or the guns, from any inherent fault in the construction of the ordnance, would be most serious consequence, to occur on board a ship. I mean that I consider it would have a worse effect on a ship's crew to have one of their own shells burst on board, than one of the enemy's. The Armstrong guns are much more complicated than the others. It is training of a particular nature that is required for the Armstrong gun, the general action he would prefer the muzzle-loader—the old smooth-bore. According to the experiments on the target, the Armstrong gun has a much greater effect at short range than the 110-pounder; and that, I think, is owing to the 110-pounder never striking end on."

In reply to the question, as to whether the expenditure of nearly £3,000,000 in the manufacture of Armstrong guns had been usefully incurred, he says: "I like the gun to a "certain extent, but I should be very sorry to see it gener-"ally introduced."

And, as to whether the Government were justified in making so large an expenditure upon the guns "before "being satisfied by experience of their efficiency," he replied: "I should say not, as far as I have been able to "judge."

The evidence of Captain WAINWRIGHT is given in a short and precise manner, without any evasions or qualifications, and is the more valuable as from an officer of good observation and judgment, whose opinions seem not to have had any bias from any quarter.

The next testimony bearing upon the comparative merits of the Armstrong gun is that of the Duke of SOMERSET, First Lord of the Admiralty, who says:—

"The Armstrong gun at a great distance may have had greater power at Shoeburyness, for the purpose of 200 yards, it certainly had not the greatest power; our old 68-pounder is a more powerful gun than the Armstrong gun. *I have nothing better now for three quarters than the 68-pounder.*"

Speaking of the general opinions of naval officers on the subject, he says:—

"But I think that for chase guns and pivot guns on deck, they approve the Armstrong gun. The reports which I have had from Sir ALEXANDER MILNE are not very favorable to the Armstrong gun between decks, I think; partly from the offensive smoke, which they say would, at night quarters, and in the movement and hurry of action, they think they see the difficulty of getting at it; and also that it is difficult to see at night quarters that they are properly screwed up; and other objections of that kind, which, I think, are serious objections to the use of these guns generally as broadside guns."

With regard to the condition of the vent-piece of the 110-pounder, he says:—

"I am not satisfied with any of the guns that we have yet. They are now the latest to recommend the introduction of guns rifled on the Armstrong principle for special "service in the field." And Sir WM. ARMSTRONG, in reply to question, 3,649—"Can you state upon what series of ex-"periments the 110-pounder gun was approved?"—said, "None at all; there was such an excessive pressure for rifled "guns at that time that there was no time for experiments." This reply was confirmed by the Duke of SOMERSET.

It also appears that Captain HEWLETT, who testified so strongly in favor of the gun, is one of those by whose recommendation it was so largely introduced into the navy; and who, on one occasion, reported: "I should therefore beg to "suggest that no unnecessary time should be lost in placing "ARMSTRONG'S 40-pounders on the upper decks of all ves-"sels, substituting them for the present revolving guns."

Captain SCOTT, who, it seems, was the inventor of a rival gun, offers the same objections as have been already noticed; but he says, in reference to Captain HEWLETT'S testimony, that that officer had no opportunity of comparing the rifled gun with other guns. And very well observes, that the "reports of different officers who were said to be distinguished, were, 'that the gun was wonderful,'—that is "'could do everything but speak;' and therefore people were "led away. It was a commonly received thing that the "gun was wonderful in its effects."

We have thus gone carefully through with all the testimony elicited by this Committee bearing upon the question of the character and qualities of the gun which has of late years so completely absorbed the British mind—the gun which was regarded as rivalling all others. In glancing through the evidence of Mr. WHITWORTH, Captain BLAKELY, Captain SCOTT, and other inventors, it appears that the position of Sir WM. ARMSTRONG was such as enabled him to effectually exclude all competitors; for he was the consuming engineer of the entire affair, and, being an inventor, it is not probable that he would give a fair hearing to his rivals,—particularly as one of them, Captain BLAKELY, claimed that ARMSTRONG had infringed on his patent.

In the sifting of the evidence we are able to lay before our readers, it is impossible to avoid, in any other conclusion than that the Committee which first decided in favor of the Armstrong gun adopted a very complicated gun, without any sufficient trial, without any fair test in comparison with other rifled guns; and without regard to expense, the British Government has been hastily plunged into the manufacture of a weapon on which they have spent

for the guns,	£2,538,547
and for the ammunition,	£671,486,
	£3,211,033,

making a grand total of fifteen and a half millions of dollars, on an "experiment" which has now proved a failure.

THE NATURAL INCREASE OF COMBATANTS.

In the United States, North and South, during the year 1861, (according to the computations of the Census Superintendent) about 277,600 male whites reached and passed the age of eighteen, and 129,600 arrived at and passed the age of forty-five—leaving a difference of 148,000 arriving upon the military age. This latter number, when diminished by the natural deaths (about one per cent.) of the whole military class, and increased by the accessions from immigration, would express the annual increase of the military population in a time of peace; but during a year of war, the failure losses by war must also be deducted. In accordance with this statement the following approximation is presented for the increase during 1861; and the same principles will evidently apply for subsequent years:

Entering on the age of eighteen	277,600
Passing over 45 years of age	129,600
Difference	148,000
Deduct natural deaths (about one per cent.)	12,000
Annual home increase	136,000
Add for immigration in 1861	31,500
Total military increase in 1861	167,500

From this last number, the losses by war in 1861, beyond the usual number in peace, should be deducted to complete the estimate for that year. But the immigration from foreign countries in 1861 was less than one-half of what it reached in 1863, and it will probably reach a still greater volume this year—a large proportion of it being of the military age.

Of the actual annual increase throughout the whole country, of *males entering* upon the military age, from the home element (say an increase of 100,000) it is difficult to make an approximement between the States under Rebel control and those within the Union lines. But it would certainly be unsafe or give the Rebel States, as they now stand, more than 25,000 as their annual increase of males of the military age. This entirely ignores the foreign immigrant element, which has not latterly entered the South. Of this military age, therefore, the whole of the military ages, from home and foreign sources, may thus be computed at about 100,000—making from this number certain deductions for men actually killed in battle.

THE ARMAMENT OF THE BRITISH NAVY.

DURING a recent debate in the English Parliament on the navy estimates, Mr. H. BERKELEY called attention to the state of the armament of the Royal Navy; and, enumerating the various failures which had been experienced with the Armstrong guns, complained that after the expenditure of three millions of money and six years of trials and experiments the country had to go back to the old 68-pounder. The result was that their iron-plated ships were armed with the 68-pounder and the Armstrong 110-pounder, which could not be fired at full charges, while the French ships of war were armed with breech-loading rifled cannon, which, at a distance of 1,100 yards, had pierced through and through a target equal to the side of *La Gloire*. He also observed that the guns of the United States Navy were superior to their own.

Another member asked whether there had been any trial in England of the French breech-loading cannon firing 30lb. spherical shot and 50lb. cylindrical shell, which fired by French accounts answered so well that they pierced 4½ inches of iron at 1,000 yards.

CORRESPONDENCE.

THE CAPTURE OF MORGAN.

To the Editor of the Army and Navy Journal:

SIR—In your issue of the 13th of February, this notice appears:—"Brigadier-General Shackelford, who has captured Morgan, has resigned. You are not the first who has been led to believe General Shackelford deserves all, or the greater part of the praise due in that "affair." That "honor may be given where honor is due," and that your readers may become acquainted with the facts, and judge for themselves, I give below, a plain statement of the whole matter as it came to my knowledge, and for which I can vouch.

Before Morgan crossed the Cumberland River, Brigadier-General Judah, commanding the 1st Division of 23d army corps, ordered Brigadier-General E. H. Hobson, commanding 2d brigade of 2d division, to move from Columbia to Tompkinsville, Ky., to watch the fords on the Cumberland River, and to keep him informed of Morgan's movements. Hobson *was not* ordered to follow Morgan, but was left for Scottsville, and if Morgan crossed, and expected to attack Morgan at Gallatin, Tenn. General Hobson arrived at Tompkinsville on Ray's Cross Roads, 18 miles from Glasgow: leaving his infantry at this place, proceeded to Tompkinsville with 600 cavalry, and occupied the place. General Judah could cross Cumberland River and join him at Tompkinsville. When General Judah arrived, General Hobson reported to him that Morgan was moving up the Cumberland, and would cross at Burkesville. Hobson *was stated* on General Judah giving him orders to move immediately to Burkesville, and prevent Morgan's crossing into Kentucky. Judah *ordered* Hobson to move his brigade to Marrow-Bone, ten miles southwest of Burkeville, and to picket at that point, and Burkesville. Hobson arrived at Marrow-Bone on the 1st of July, his advance driving Rebel pickets from the place. On the 2d of July Judah left Columbia, with many of his staff, and the Rebels repulsed. During the whole of that day Hobson fought Morgan's command. He also ascertained that Morgan was crossing force at Burkesville and Clyd's Ferry, 9 miles below Burkeville. Hobson informed Judah of the movements and *stated* that he *had* Morgan, and stated that he had ordered General Shackelford to bring from Ray's Cross Roads to assist him.

Shackelford left her with 1,000 men at 12 P. M. July 2d. Hobson did not put him on duty, but told him to rest and feed his men, and be ready to move at an early hour next morning. Judah, on the 3d, ordered Morgan's command next morning off Lloyd's Ferry, and prevent him from uniting his two brigades; this he would do in violation of Judah's orders, and that he (Judah) was there to prevent Morgan from entering and devastating the State. Hobson dispatched General Judah that he supposed to be at Ray's Cross Roads, 14 miles in the rear, his plans, and the disposition he intended to make of his forces, and stated it was in violation of orders. Shackelford left for General Judah met the couries 6 miles from Marrow-Bone, and sent an aide all full speed with verbal orders to General Hobson to suspend all military operations, and countermand all orders for the moving of troops. General Hobson reluctantly obeyed, and stated to General Judah that Morgan would unite his forces, and get considerably ahead. If he (Judah) did not order the troops to move and attack Morgan. After the fight Shackelford returned to Glasgow. Hobson and Shackelford united at Campbellsville and proceeded to Lebanon, Ky., leaving Judah south of Green River before he could cross. He then proceeded to Louisville and reported to Judah.

General Hobson never had command of the cavalry at Lebanon, consisting of his own, Shackelford's, Woodyard's and Kanz' commands, and to pursue and capture Morgan's command, and disperse it, consisting, &c., for his command. Upon receiving this order Hobson continued the pursuit, and directed all the movements of the troops under him.

Morgan having stripped the country through which he passed, of horses, &c., Hobson labored under many disadvantages. Shackelford overtook and engaged Morgan with fifteen men—if no more than that number could keep up with Shackelford—at Corydon, Ind., on the 9th of July, Hobson attacked, routed, scattered and whipped Morgan; having followed him for *twenty-one days and nights*. Hobson fought Morgan from the Cumberland to the Ohio, and convinced Morgan could not cross the river, and would attempt to get to the rear, and take the back track. To prevent this Hobson ordered Colonel Moore, Shackelford and Colonel Woolford to occupy positions four miles from the river, and attack Morgan's force, part of which was moving to that point. Also to pursue in every direction, and loose no time in capturing Morgan's scattered and demoralized forces. Hobson followed, flanked, and annihilated at this point to the capture of four hundred and seventy-five men. Colonels Kanz, Sanders and Lieutenant-Colonel Jacobs were ordered to follow up Morgan's scattered forces, and drive them in the direction of Shackelford and Woolford, all of whom captured a large number, and secured quite a number of prisoners.

It is evident that General Hobson was in command of the forces, from the time he left Columbia until its close, as he had been placed in command by Major-General Burnside, and received no countermanding orders; although it is but fair to state that Hobson got information from time to time from Generals Burnside and Boyle.

Major Poe, of the 9th Kentucky Cavalry, is the officer who captured Morgan in person; Sergeant Drake, 8th Michigan Cavalry, and a Sergeant of the 9th Michigan Cavalry, captured Colonel Basil Duke, Colonel Howard Smith and one hundred and sixty line officers and privates.

General Hobson could not, of course, lead in every direction after he had broken up, and routed Morgan at Burlington Island. It was his duty to see to his wounded; to give orders to the pursuing forces, and to see the prisoners were properly secured and cared for, as well as other details, that none but a commanding general are likely to be familiar with, or think of.

There are many other interesting incidents concerning the action of Generals Hobson, Shackelford, Manson and Judah, Colonels Woolford, Kanzs and others; but it is not my purpose to go into a detailed history, further than to give—what I have endeavored to give above—plain and truthful statement of facts connected with the pursuit and capture of Rebel General John H. Morgan.

Justice.

Louisville, Ky., March 24th, 1864.

SPOTS ON THE UNIFORM.

To the Editor of the Army and Navy Journal:

SIR—In a recent number of one of our illustrated papers, there is an article which attracted my attention, and which I think should receive the consideration of every soldier. The paragraph of which I speak was a short sketch of the youngest sergeant in the army—Sergeant Cline—promoted for a so-called gallant act; and he is entitled to a Brevet Colonel, and then shooting him. It seems, according to the story, that Sergeant Cline was ordered to stop by the Colonel, and did halt and order arms; having thus thrown his pursuer off his guard, he quietly killed him, and for this he is now a non-commissioned officer.

If the case has been correctly stated, it seems to me that the paper did better have said nothing about it. Is there anything gallant in killing a man after he has surrendered. If I halt an enemy and he surrenders, I commit murder by shooting him then; and it is not equally murder for the enemy to surrender and then to shoot me? The profession of arms has been called an honorable one; we should be of all others the last to bring that profession into disrepute. Our newspapers are continually talking about guerrillas and bushwhackers, and recounting their many sins, and yet many of our people found fault with the Paraguay expedition, because of their apathy in not turning out *en masse* to shoot down "the murderers." Many of these squealers think they are doing right; that they are doing what Burns of Gettysburgh was, one is lauded for—defending the citizens from a ruthless invasion by a foe.

Such incidents as the one suggesting this note betray a want of discipline. It is true that men will get excited in battle, and particularly so officers; but the greatest mischief is done when Fire Zouaves. It is useless to expect discipline when officers "cuss" their men only at times, and the men "clean" each other; never themselves or their uniforms. Indeed, observation seems to show that most of the evils in our army can be attributed to this cause. Our men are as good as can be desired, and can be brought to as high a state of discipline and drill in the volunteer as in the regular army, but the officers can be taught to at least imitate gentlemen, and gain the respect and confidence, rather than the good will and votes of their men.

People were actually gratified when they saw compelled to outrage their lives to the keeping of one who knows less than they do of the profession they have taken to learn. Men may be taught to obey officers whom they neither respect nor trust, simply by the exercise of brute force and coercion; but such men will be of much more service to the State and to themselves than if they were not. Very big cowards will do very well in the front, if only they are encouraged by those above them. Well disciplined troops have done their duty true safety to be in the knowledge and capacity of their commanders, as I have seen somewhere at last.

In Melville's novel, "The Interpreter," an Austrian General tells a very good story of which I quote the point: "If they [the men] see a few hundred shot, they should have been under cover; but we never got the order and "there we stood. . . . I was watching my troop "anxiously enough, and I heard one make a low remark. "Look at Johann Fritz! what a hold one he is; he thinks "nothing of the fire; see, he holds his horse at the front "flank item, and seems to make him kick. Johann is a "blockhead, he replied; he has never been under fire before "and does not know his business; but you, old comrade, we deserve to be made corporals; for we set quiet "here on our horses though we are most cursedly afraid."

Evidently the Austrian army had proper ideas of discipline and of a soldier's duty. Nearly all who have thought at all about the matter, will, I think agree in saying that defects in the drill, in the police and in the manners of the army to the neglect, wilfulness or ignorance of the officers. It is a curious fact, but for all that true, that those who are most adept at movement are the ones who have already had the most promotions. Give a sergeant a lieutenancy, and his first thought is how he can get a captaincy, another bar; and then he leaves as steps to the eagle. The star is the convenient way by which to retire to private life. In the eagle, indications are made for probable seniority, judging capability, education and all other titles to promotion are passed aside. It is every man for himself; wherever there is most influence gets the most prize; swords and maces the most bad speeches, incessant of any blood but that of the Queen's English.

Cricket and baseball are called manly games, partly because in them each fellow plays for his side, and for himself. Is my cannot be that the manliness be learned in imitation of our officers? How many fight for the country, and not for self, bounty or position? I am inclined to think very few.

Brigmilk.

THE SETTLEMENT OF ACCOUNTS.

To the Editor of the Army and Navy Journal:

SIR—The old system of accounting by each officer transmitting abstracts, vouchers, &c., direct to Washington, however well adapted for a small army and a time of peace, has been proved altogether too cumbrous for a large army and a period of war. Almost every quartermaster who has had a large amount of business to transact during the present war despairs of arriving at a settlement within a reasonable time, if ever. Even the receipt of accounts at Washington has not been acknowledged until twelve months or more after they have been sent. Then, perhaps, some omission or error is pointed out which could readily have been corrected at that time; but the changes incident to army movements—the dismissals, resignations, deaths, &c.—frequently

make a correction one or two years after almost impossible; and, if possible, at a great outlay of time, expense of travel, and much vexatious delay.

To obviate the inconvenience of long unsettled accounts, we would make every subordinate officer accountable to his superior in rank and position. The present organization of the staff departments is well adapted to this plan, and requires but little change. Each quartermaster should receive instruction, on entering upon his duties, from his superior in rank; a line he should make his returns monthly, and as soon as such returns are made out so as to satisfy the superior, a certificate in triplicate should be given by the superior, giving a concise summary statement for each of the three classes of accounts—viz.: 1st. Cash; 2d. Quartermaster's property; 3d. Clothing, camp and garrison equipage. One copy of the certificate of settlement to be sent to the Quartermaster-General; one copy retained by the officer making the settlement, to take the place of vouchers; and one copy retained by the officer certifying to the same, to be used by him in compiling a return to his superior, showing in a concise form the proceedings or transactions of the quartermaster under him.

In this way each regimental or detachment quartermaster would be accountable to the quartermaster next in rank and position—if in a brigade, to the brigade quartermaster; if not brigaded, to the nearest post-quartermaster.

The brigade quartermaster would make a consolidated return of his settlements with his regimental quartermasters, accompanied by their vouchers and abstracts, to his division quartermaster, if in division; or if not, then to the nearest depôt quartermaster, to whom he would also forward his own abstracts and vouchers, and receive certificates of settlement monthly.

The division quartermaster would make a consolidated return to the corps quartermaster of his settlements with his brigade quartermasters, accompanied by their vouchers, returns, abstracts, and receive his certificates.

The corps quartermaster would again consolidate the returns, and thus present to the Quartermaster-General a concise view of all the transactions in his corps. The department quartermaster would grant certificates of settlement in like manner.

The department quartermaster would consolidate and present to the Quartermaster-General a concise view of the transactions in his department for each month, and receive from him a monthly certificate of settlement.

The Quartermaster-General would, as he may have before him, in a small compass, a concise view of all the quartermaster operations of the various military departments. He could consolidate the whole, and present to the Secretary of War a monthly return, or an annual report, made up from actual returns. He could also settle with the United States Treasury.

The post-quartermasters in like manner would become accountable to the depôt quartermaster, and the depôt quartermasters to the department quartermaster.

Duplicate receipts, transfers, reports of persons, &c., would be unnecessary, and the consolidation of papers beyond the monthly certificates avoided.

To avoid objections on the score of rank, each position should have an officer of a certain rank assigned to it, thus:—

Regimental quartermaster, to be a first lieutenant.		
Brigade	"	captain.
Division	"	major.
Corps	"	lieut.-colonel.
Department	"	colonel.
General	"	brig.-general.

Quartermasters doing post or depôt duty should be majors, and those to whom they report—the depôt quartermasters—should be lieutenant-colonels.

To secure promotion, each quartermaster should commence in a regiment, and the promotion be made in regular order, and as nearly as possible according to rank.

On this plan each officer would be under the immediate supervision of his superior, who certainly would be in a better position to judge of the correctness of accounts, having himself familiar with the transactions, and more or less cognizant of the circumstances, orders, &c., under which each transaction occurred. Frauds, under such a close supervision of superior officers, could seldom occur, and errors would be detected while the occurrence of cases fresh in the memory and material at hand to correct them. Any officer neglecting to make proper returns would soon be brought to account; and, if careless or incident, reported for trial, and dismissed by proper authority. On the other hand, proficient officers would have a fair prospect of promotion.

I have instanced the Quartermaster's Department as the one most needing this reform, but, under modifications, it found to succeed, could be applied to the other staff departments; and thus the whole expenditures of the Army could be readily traced at from actual returns, and within a reasonable time of their occurrence. A. Q. M.

LOUISVILLE, KY., March 31, 1864.

A CARD.

To the Editor of the Army and Navy Journal:

SIR:—In your paper of the 26th inst., you publish an order which does not grant wrong, I enclose you a copy of my reply, taken from the *National Intelligencer* of March 28th, which I think you should publish with the order. Again I will further state that I was not attorney for MULDER, and never received a cent for him, or from him, nor from any other soldier. I never had a soldier's claim in my hands.

TO THE PUBLIC.

THE statement in the "order" from the WAR Department, dated 16th inst., published on the 23d instant, that it had been "satisfactorily proved" that I had taken from one EDWARD MULDER a sum of money "in form of a commission for collecting" an amount "due him by the United States Government," is *false* in every particular, as the records of the Department show, and this *should* have been known at the War Office when the "order" was issued. Having waited a reasonable time for a retraction of the statement and revocation of the "order," I am compelled, in justice to myself, to make this publication.

WASHINGTON, March 26, 1864. JOHN F. CALLAN.

A CORRECTION.

To the Editor of the Army and Navy Journal:

SIR:—In Brigadier-General CARLTON'S official report of operations in the Navajo country, under Colonel CANBY, it is claimed that "this is the first time any troops, whether from the country belonged to Mexico or since we acquired it, have been able to pass *through* the canon De Chilly." " " " It was reserved for Colonel CANBY to be the first to succeed," &c., &c.

In 1850 Co. "K," R. M. R. (3d Cavalry), and two companies of the 1st Infantry, under Captain John G. WALKER, R. M. R., entered the canon where Colonel CANBY left it—the only trail near the head by which animals can ascend—and marched through the canon to its mouth, encamping one night in it, near Mitzs' column. We then returned and explored on foot all that portion of the head of the canon through which we could not take animals. Very respectfully,

JOHN V. DUBOIS,
Col. U.S.A., Capt. 3d Cavalry.

SAINT LOUIS, March 29th, 1864.

THE METROPOLITAN FAIR.

THE FAIR for the benefit of the United States Sanitary Commission now in progress in this city, opened on the 4th instant with one of the finest military displays ever witnessed in New York. At least ten thousand troops, regulars and volunteers, were in line, and when they were drawn up on each side of Fourteenth street for inspection, they presented a double line of glittering bayonets extending a distance of a mile and a half. A prominent feature of interest was the appearance of a larger body of regulars than has been seen in New York for many years, affording an opportunity for comparison between the two branches of our national military force.

In the Fair itself there is much, apart from the general magnificence of the display, to enlist the special interest of military and naval men. Perhaps the most attractive department is that of the Ordnance and Trophies.

The walls of the apartment are elegantly hung with flags which have been captured at different times from nations with which we have been at war, the largest number being English naval flags. Mexico has also contributed a large number. The centre of the room is occupied by a 100-pounder Parrott gun, around which are grouped specimens of smaller cannon—the huge Parrott towering above them like a Brobdignagian among the inhabitants of Lilliput. Among the latter are several guns captured from the English and Mexicans. The display of small arms, new and old, and curious for sale, is exceedingly rich and interesting. We noticed, among the other curiosities, the original Bowie-knife—the classic weapon of the South—a rude, heavy blade, with a stag-horn handle. It had a very ugly appearance.

An interesting feature of the department is two splendid swords presented by Messrs. TIFFANY & Co., for presentation to the military and naval officer who shall receive the largest number of votes. Two books have been opened for the purpose of recording the names of those who wish for the privilege of expressing a choice between the two swords, and the interest appears to be rapidly on the increase, especially in relation to the sword for the military officers. The name of nearly every general of note appears, but the contest lies between the friends of Generals GRANT and MCCLELLAN. On Wednesday morning, when the returned votes had been recorded, the numbers being slightly in favor of General GRANT. The other book excited less interest. Only 131 names had been inscribed when we turned the page last, and of these 68 were for Admiral FARRAGUT, and 39 for Commodore DAVID PORTER.

The central object of interest in the superb Art-gallery is a group of three flags, one of which is to be presented to Major-General DIX. It is made of blue silk, and in the centre is a patriotic device by LEUTZE, around which is handsomely embroidered the order of General DIX: "*If any man dares to haul down the flag, shoot him on the spot.*" The other flags have an historic interest, one of them being the flag of the revenue cutter *McClelland*, in reference to which this order was issued, the other, the Rebel flag which was found on board the vessel when she surrendered by Admiral FARRAGUT at New Orleans. At a table in front of this group of flags Mrs. General DE TROBRIAND is seated, in charge of a handsome album, containing the autographs of the President, the Vice-President, Generals MCCLELLAN, FREMONT, BURNSIDE, and other distinguished officers and civilians. Any person is permitted, on payment of a dollar, to add his name to this illustrious list. The book is to be presented to General DIX, and the funds thus collected to the Sanitary Commission.

The Naval Gallery, which has been arranged with great taste and elegance under the direction of Mr. WEBB, contains many objects of interest. Among them is a beautifully finished model of the Russian frigate *General Admiral*. It is perfect in every detail, and so graceful and elegant in its lines that one can almost fancy it was built to serve as the royal yacht of a fairy Queen. It attracts much attention. Arranged about the room are models and sections of various famous ships belonging to the mercantile or Naval service. The model that attracts most attention is that of the *Dunderberg*—a vessel which excited much curiosity among our English and French Naval visitors last fall. Models of the various Monitors are arranged along the wall in the department of Machinery; and in the Lingerie Department are shown a relic of the first Monitor,—a cane made of the wood of the capstan of that ill-fated vessel. The head was carved from wood of the Charter Oak. This interesting relic has been sold for 50 dollars.

COLONEL HENRY VAN RENSSELAER.

COLONEL HENRY VAN RENSSELAER, Inspector General of the United States Army, died on Wednesday, March 23d, at his residence in Albany, after a long and painful illness.

Colonel VAN RENSSELAER was graduated from the Military Academy at West Point in 1831, having passed through the four years' discipline of that school without incurring a single demerit. This fact indicates the character of the man—his even-poised sense of duty, which would not permit the neglect of an obligation once assumed. Though young when entering the Academy, he formed and held resolutely to the purpose of complying in all respects, as far as possible, with its requirements. The writer dwells thus upon this rare trait of character, for it was shown to us at the Military Academy at the time, whose good fortune it was to become the room-mate of Colonel VAN RENSSELAER, and who became acquainted with his habits. It is evidently that diligence of application, that fidelity to the most minute as well as the more important details of duty, which go to make up that character which is useful and honorable in man, whether soldier or citizen. Mr. VAN RENSSELAER did not graduate with high honors, but was appointed in 1831, a daughter of Hon. J. A. KING, of Jamaica, L. I., he went to take possession of a patrimonial landed estate in St. Lawrence Co., where he spent many years in the active pursuits of agriculture, and dispensing a liberal and elegant hospitality.

In 1841 he was elected a member of the House of Representatives from his district, and served with his accustomed punctuality and diligence through the three sessions of the 27th Congress. During this period he was a warm supporter for him, and he returned willingly to his home and his social enjoyments at Albany.

For some years past, however, and as his family grew up, Mr. VAN RENSSELAER had been an inhabitant of this city, and was well known in the fashionable social circle of the retired private life. But when the Rebel cannon against Fort Sumter aroused our Northern blood and national fidelity, he was not unmindful of the duty which he owed to himself as a patriot, he at once wrote to General Scott, then in command of our forces, to ask for an opportunity, if a vacancy should occur, to offer his services anew for the national cause. The General immediately sent for him to Washington, which he did, and was there met by the rank of Brigadier-General, made him chief of his staff.

Of his position he faithfully and intelligently discharged the duties until the reorganization of the Army, under the pressure of physical infirmities, of his high command. Upon the recommendation of his General, however, he was promoted to the position of Inspector of the Army, with the rank of Colonel, was at once conferred by the President upon Colonel VAN RENSSELAER. In the latter position he has been engaged in the laborious Army, with the rank of Colonel, was at once conferred by the and to them he, in fact, yielded up his life—refusing, though suffering under illness, to ask for a furlough—while the official calls upon him were urgent.

The insidious disease made rapid progress. Informed of his wretched illness—and appreciating impending imminent death—his wife and daughter hurried to Cincinnati, but only had the consolation of ministering by his dying bed.

He met the last enemy unflinchingly, and prepared for it as a Christian soldier. In his last delirious moments his mind still ran upon his public duties—upon the condition of the regiments, and the progress of the war—and he died in the cause of his country, an earnest and unblemished soldier.

The buildings connected with the office of the Medical Purveyor at Washington are undergoing imminent change, his wife and daughter hurried to Cincinnati, but only had and the stores of every description, which were dispensed for camp and hospital purposes, during the last year, amounted in value to five millions of dollars. The hospital stores and medicines furnished to the Army of the Potomac during the last year numbered 22,653 boxes; of blankets 68,193; of iron bedsteads 20,110; mattresses 2,616; pillows 2,536; chairs 1,754; brooms 5,622; hand litters 3,704; buckets 2,336; cook stoves 105; coldrons 95; bath tubs 74; bedside tables 881; cool beds 360; barrels and casks 1,211. Over 1,000 bales of hay were required for camp bedding 508, and other packages about 700. The number of persons employed in the Purveyor's Department is twenty-five.

AMONG the entertainments in behalf of the Sanitary Commission at Washington, we have had an interesting exhibition of sixty of the pupils of Mrs. PLUM'S Gymnasium in 14th street, whose performance netted some seven hundred and fifty dollars for the Commission. The exhibition was a success, the sixty pupils going through their manœuvres in the most graceful, with the precision and regularity of disciplined soldiers.

WE must again caution our friends against paying subscriptions for the ARMY AND NAVY JOURNAL to unauthorized persons. The best way in all cases is to send direct to the office. We have at present no travelling agents. Mr. JAMES HALE, who formerly acted in this capacity, has closed his connection with the JOURNAL.

THE MILITARY TOPOGRAPHY OF THE UNITED STATES.

We desire to sketch a brief outline of the most striking topographical features of our country as they affect military operations. From the extent of the subject, we must necessarily confine ourselves to those which come within the domain of strategy, for no reasonable limit that we could assign would permit us to enter upon the consideration of those minute details of the surface which must determine tactical manœuvres, nor does any one person possess all the information requisite for such a discussion.

So far as military purposes are concerned, we may regard our country as divided into eight great zones, each almost as empire in extent. These are:

1. The Pacific Zone, consisting of the area between the Pacific Ocean and the coasts of the Cascade and Sierra Nevada Range.

2. The Desert Zone, contained between the last named chain and the Rocky Mountains.

3. The Great Central Zone, included between the Rocky Mountains and the Mississippi River.

4. The Lake Zone, bounded by the upper Mississippi on the west, the northern Alleghanies and the Adirondacks on the east, the great Lakes on the north, and the Ohio River on the south.

5. The North Atlantic Zone, between the Lake Zone and the Atlantic, extending south to the Potomac.

6. The South Atlantic Zone, between the Alleghanies and the ocean, south of the Potomac, and including Florida.

7. The Mountain Zone, made up of the Alleghanies, with their spurs and included valleys, south of the Potomac.

8. The Mississippi Zone, extending from the Ohio River to the Mexican Gulf, and from the lower Mississippi to the Alleghanies.

We purpose commencing our description with the most remote zones, reserving to the last those of more immediate interest, and which require the most detail in their discussion.

The PACIFIC ZONE is a long and narrow tract, some 1,200 miles from north to south, and varying from 30 to 200 miles in width. Its peculiar topographical features result from the closeness with which its bounding range of lofty mountains approach the sea, its small area being much broken by the spurs of these mountains and the parallel coast range, which often borders the ocean, and is sometimes coincident with the main chain. Where these ranges are most widely separated they sometimes contain between them quite extensive and comparatively open valleys, such as those of the San Joaquin and Sacramento in California, and the Willamette in Oregon. Such valleys offer facilities for settlement and cultivation, present avenues for communications, and consequently afford alike the greatest inducements and the most favorable field for military operations, should that country ever become the theatre of hostilities. Of all the rivers of this great extent of country, the Columbia alone breaks through the bounding mountain chain and drains the region beyond. All the others rise in this chain, and generally take the most direct course to the ocean. In consequence of the great elevation of the mountains, and the short distance to the coast, they usually assume the character of torrents, and are not available for purposes of navigation, except for short distances in canoes and light barges.

The principal exceptions to this rule are the San Joaquin, the Sacramento, the Willamette and the Cowlitz, which for very considerable distances have their courses parallel to the coast, are less rapid, have deeper channels, and, especially the three last, are susceptible of navigation to a useful extent. These four rivers are marked features in the topography of this region, and define with considerable exactness the area which can in the future be the scene of military operations on a scale of some magnitude. As a general rule this region is covered by a dense and luxuriant growth of heavy timber and underbrush, which in its natural state presents no insuperable obstacle to the movements of large bodies of troops, especially in Northern California, Oregon and Washington Territory. Cultivation is gradually removing this difficulty in the valleys; but very many years must elapse before extended movements of large bodies of troops can become practicable or necessary in the zone in question. There are few good natural roads of any extent, and the work of road making is here, generally, an exceedingly difficult undertaking.

This zone is subdivided by nature into several portions, which may be regarded as distinct centres of military operations and command.

1. *The Puget's Sound District.* This includes the Olympus Peninsula and the country bordering on the Sound, as far south as the head of the Cowlitz and Shoalwater Bay. It is densely wooded; exceedingly rough; has not a single navigable stream, and is not likely to possess any military interest, except in connection with the fine harbors it contains.

2. *The Columbia and Willamette District,* which includes the lower Columbia Valley as far up as the Cascades, the Cowlitz, and the country as far south as the head of the Willamette. The Columbia is the only avenue of approach to this region, which can be traversed only in the valleys.

3. *The Klamath District,* extending from the head of the Willamette to Eel River and the head of Pitt River. This is a very rough region, intersected by the Umpqua, Klamath and Rogue Rivers. It has some indifferent harbors on its coast, and possesses no military interest except that it commands the only practicable land route between San Francisco and the valley of the Columbia.

4. *The San Francisco District,* which comprises the greater part of California, and extends from the head of the Pitt to that of the Sau Joaquin River. This district is undoubtedly the most tempting and the most favorable to military operations of the Pacific coast. Yet, even here, operations must be confined almost entirely to the valleys, the key to which is in the harbor of San Francisco. The Santa Clara, Monterey and San Luis Obispo region might perhaps be regarded as a separate district, which offers more facilities for operations than is usual along the coast; but it is not probable that that region would be availed of except as an avenue of approach to the other portions of the district, and the only good harbor it possesses is that of Monterey.

5. *The San Diego District,* extending from Santa Barbara to the Mexican boundary. The most important feature in this district is the excellent harbor of San Diego. It possesses no streams worthy of mention. A portion of it is rather favorable for military operations, but it is too thinly settled at present to possess much interest. It may hereafter become of military importance with the development of our naval power, the extension of the railway system, and the increase of wealth and population.

It does not now seem possible that the Pacific coast can become a theatre of operations during the existing war, and the probability is that it will never be exposed to any other attack than one coming from the sea. In the present state of the world, no nation could gain anything by inland operations in Oregon and Washington Territory, and none possess the ability to transport to that coast a sufficient force to attempt the invasion of California. Although there is no present probability that our neighbors to the north and south on the Pacific coast can give us any trouble, it would render our military position complete and safe for all time were we to acquire possession of Vancouver and the adjacent islands on the north, and of Lower California on the south. So long as we have no railway connecting the Pacific with the Mississippi, and are compelled to rely upon the sea as the means of communication for commercial purposes, a maritime enemy would find it worth while either to blockade our ports, or, indeed, to gain possession of them by a naval attack; and in fact such an operation would be a necessary prelude to any attempted invasion. It is clear, then, that our first efforts should be directed to placing in a thorough state of defence the harbors of San Francisco, San Diego, Monterey and the mouth of the Columbia, and afterwards one or two favorable points on Puget's Sound, while some of the less important harbors should be provided with batteries sufficient to keep off single cruisers and privateers. Such arrangements would secure that region against invasion, and cover our naval establishments.

The naval control of the Pacific has become a matter of very great importance, and the resources we now possess on that coast will, if properly developed, enable us to gain and retain that supremacy with ease. No other nation possesses such facilities; and it is our interest to avail ourselves of them, in order to protect our commerce and our communications with California, as well to be able to destroy the commerce of our enemies on that ocean. A decided control there would go far towards preventing wars with European nations in the future. The recent developments in Mexico render this course imperative, and there can be no excuse for us if we do not in season avail ourselves of the naval advantages we possess, by establishing extensive dock-yards on the Pacific coast, and collecting the means of preparing at the shortest notice a fleet on formidable as to ensure to us the certain control of the Pacific and Indian Oceans.

A CORRESPONDENT labors under the impression that this journal, in a late article, detracted from the praise due the Army of the Potomac for its services since the commencement of the Rebellion. If we have ever said anything likely to give such an idea, we failed to express our feelings. For there is no army in whose achievements we have greater pride than in that noble army, which has had the hard, and often unappreciated task of defending the National Capital, and contending, at heavy odds, with the ablest general, and most compact army of the Rebels, on a soil singularly difficult for successful military operations, and always hampered by the double duty of fighting LEE, and covering Washington. We have so often discussed the difficulties of the Army of the Potomac, and defended it against ignorant assault, that we are surprised that our opinions should be misunderstood by any one.

WE compassionate these general officers who honor the not uncommon name of SMITH. When a General SMITH is in prosperity, it is all well enough: each SMITH has a share of the applause, and is pointed out as the wearer of the bay. But if misfortune overtakes one, they must also share and share alike. It to happens that there are seven general officers who bear this illustrious name. They are: Major-General WILLIAM F. SMITH, who did *not*, as so many papers persist in declaring, make a cavalry raid from Memphis or anywhere else, and who has been appointed Major-General of Volunteers, and not in the Regular Army as other newspaper writers still assert; Brigadier-General WILLIAM S. SMITH, who made the cavalry raid; Brigadier-General ANDREW J. SMITH, who is making his name conspicuous in connection with the Red River Expedition; MORGAN L. SMITH, GREEN CLAY SMITH, JOHN E. SMITH, and THOMAS C. H. SMITH. We believe this completes the list.

A VERY good suggestion is made by a contemporary, that inasmuch as the Congressional Committee on the Conduct of the War have proved, after sifting them, that the stories prejudicial to General MEADE are destitute of truth, that august body turn its attention to the farcical out and punishment of the authors of the mischievous tales. Such a work would do much to mitigate the dislike which the Army entertains towards the Congressional inquisitors.

A GENERAL Order from Major-General CADWALADER, commanding the city of Philadelphia, directs that all officers in the military service, excepting general officers, who remain in Philadelphia for a longer period than twenty-four hours, shall, on reporting at a provost-office after arriving in the city, report in person to the Provost-Marshal, at Fifth and Buttonwood-streets, that their names and addresses may be registered, and passes issued, for the convenience of themselves and the officers of the patrols. Officers who may be on duty within the command, and absent from their post or camp, will be required to produce authentic passes or leaves, signed by the officers under whose immediate command they may be serving, whenever the same may be demanded by the officers on patrol duty. The names of all officers in the city without competent authority will be immediately reported to headquarters for such further action as may be deemed necessary.

ANOTHER important step in the re-organization of the Army is announced in the General Order of the War Department, dated April 4th, which we gazette this week. The Eleventh and Twelfth Corps are consolidated under the command of Major-General HOOKER; HOWARD relieves GRANGER, in command of the Fourth Corps, who reports to the Adjutant-General for assignment to duty; SLOCUM reports to SHERMAN; STONEMAN to SCHOFIELD; SHERIDAN takes command of the cavalry of the Army of the Potomac; and SCHOFIELD the Twenty-third Corps. The next announcement will probably be of the assignment of Major-General W. F. SMITH to a command on the Peninsula; and Major-General MCDOWELL and others to commands which are not yet made public, if, indeed, definitely decided upon.

DEFICIENCY OF SEAMEN.

LETTER OF SECRETARY WELLES.

NAVY DEPARTMENT, March 30, 1864.

SIR:—I have the honor to acknowledge the resolution of the Senate passed on the 23th instant, directing the Secretary of the Navy to inform the Senate "how many, if any, seamen or ordinary seamen have been transferred from the Army to the Navy; how many volunteers for war are now awaiting completion of muster, and what further legislation is necessary in order to supply any deficiency of men for the naval service which now exists."

No transfers of seamen from the Army to the Navy have been effected under the recent law on the subject, as vigilant free vessels of war are now awaiting complements of men. Not only are these thirty-five vessels awaiting crews, but the terms of many seamen now in service have run out and the men detained to man our ships, though justly entitled to their discharge. Were there men not detained many of the vessels on blockade duty would go out of service. This state of things is to be deplored, and is in a great measure, if not entirely, attributable to unfriendly legislation.

The Enrollment Act of last Congress not only cast aside the old established policy of the Government, which had absolutely and exclusively encouraged enlistments in the view of strengthening the Navy, but it went further, and as to utterly ignored the naval service, declaring that no one in service was permitted to be credited on the quotas of those communities from which they were drawn when the draft came to be enforced. As a consequence, the municipal authorities of every seaport and township, and the whole local influence tended to discourage enlistments in the Navy. In addition to these unfriendly features of the law, the distinction of extraordinary bounties for Army enlistments, while not a dollar was paid to the Navy, operated to discredit the naval service and hold out strong inducements for the military service.

When the attention of this Department was called to the Enrollment Act under the operation of the first draft, and the manner in which it was being executed, the fact that a rigid enforcement of the law in the principal ports in the cities upon the Navy was so obvious that attempts were at once made to procure such modifications of the draft, or the manner of its execution, as would relieve the Army, withdrawal of seamen from their profession and the interruption or absorption of those in the mercantile service employed in supplying the Navy. That the military authorities objected, with the strict letter of the law permitted no exemption of seamen from the draft, to credit to any part of the naval requirements, nor in the execution of the law was there any relaxation of the enrollment act whereby the Navy could be strengthened and men retained. Boards of enrollment were made by the Executive of several maritime States, and by many of the municipal authorities in the enrolling districts, which would recruit ought justly to be credited on their quotas under the draft, but it was not allowed, and consequently the local influences became averse to the enlistment of men for the Navy itself soon began to feel the effects of this new policy.

Vessels that were intended for foreign service to protect our commerce, some of which should have sailed last autumn, are yet detained for complements of our whole force is required for the blockade. The primary importance and duty of the Department is to maintain the efficiency of the blockade, and all other naval requirements must be held in important object. The numerical waste of the Navy as small as compared with the Army, and the class from which our seamen are to be drawn is necessarily limited. A sailor is an expert, educated to his profession by years of training, and when withdrawn from his proper duty, no inexperienced person can make good his place.

Convinced as the Department has ever been that it could not have been the intention of Congress, by the unfriendly clauses of the Enrollment Act to strengthen the Army at the expense of the Navy, no reasonable objects were left untried to induce a revision which would relieve it. Many letters were called for by the draft, the small force requisite for sustaining the efficiency of the Navy. It was especially desirable that experienced seamen should be retained in the element to which they had been educated, and to which they were naturally and indispensably drawn by the school away by high bounties and local influences to another service. But the disinclination to relinquish any portion of the men attached to this military service was so strong that until the meeting of Congress, when I felt it my duty to present the difficulties that existed, and to invite the early and considerate action of the Executive and Congress on the subject. Accordingly, in my annual report of December last, I made mention of the embarrassments which existed, and stated that we had not a sufficient supply of seamen for the immediate and important duties then pressing upon us, and added that—

The operation of the draft has been, in some respects, detrimental to the naval service. No exemption of sailors or mariners having been provided for in the law, at the last Congress; these men, who may be deemed and are experts fostered and encouraged by previous enactments, and whose no sufficient supply can be obtained, are liable to be withdrawn from the element to which they have been educated, and where they are eagerly looked for, to serve as infantry soldiers. In this respect not only a hardship is inflicted on the men, but the Navy and the country are injured. It has been the true policy of the Government, as it is now to encourage and cherish its supply of seamen. By express provision of the act of May, 1795, "all mariners actually employed in the sea service of any citizen or citizens within the United States" were exempted from military duty. Bounties have been paid for enlistments in the former laws, not only non-of-wars men, but all mariners, have been exempt from militia service, it being considered that they performed an equivalent duty, or were liable to be absent when a draft took place. Under the recent enactment, petty officers, acting engineers, and others indispensable to a ship's complement and efficiency, have, as well as seamen, been subject to the draft while on shipboard and in naval service. Some of them on distant stations have been enrolled, drafted, and put to great inconvenience in their efforts to obtain relief, not unfrequently subjecting their commands and the service to serious embarrassment. It certainly could not have been intended by Congress that persons in actual service afloat should be withdrawn from the Navy, where they were faithfully discharging indispensable duties, and then be compelled, under long penalties of fine and imprisonment, to find.

In enforcing the draft in any community which has furnished a large number of men for the naval service, the effect produced by the means from the quota required for the Army. Of the thirty-four thousand seamen in the naval service, a large proportion are from the maritime towns on the seaboard. A committee of the town will be disposed to do so, and by omitting to make any provision on the subject, state that their township shall have furnished to the Army a certain number of men, when in fact it has only furnished a hundred because the manner required. But in addition to these there have gone to the Army about two thousand seamen, who under the new call for volunteers no allowance is made for seamen who have gone to the Army. Many of these men have tried to relief for the men that they have supplied to the Navy, and to settle the question of credits in the Navy, but have been uniformly considered and acted upon, the existing law will tend to the prejudice of the Navy, and to the benefit of the Army, unless it is to go into the Army as of equivalent importance to the service to which they belong. The principle of the draft to commence of enlistments in the Army, and to the prejudice of the Navy. The high bounties for enlistments in the Army, and the facility with which a soldier, although their services would be vastly more useful to the country as seamen, are the causes why the Navy suffers from the enactment. The result is, that there are many sailors in the Army, serving as soldiers, who, if they were in the Navy, would be seamen or other canoes, who desire to be transferred to the Navy, and to whom the Department would be glad to give the opportunity, but they have no authority to grant it. It is unfortunate that the law does not authorize such transfer. As it is difficult to procure educated, trained, and efficient seamen for the service we are wanted—and skilful and experienced sailors are worth more to the country and the Government than to the Army, where the highest merit of great benefit if the law authorized such transfer to be made. Every consideration of humanity, as well as of policy and natural strength, for it is unjust on the ocean that our rightful position as a nation is to be maintained by the sailor on the sea, and everywhere true to his flag. When, in the early days of the rebellion, he received the bounty offered by the State in which he lived, which they owned and host sworn allegiance, they could not obtain the same bounty in the Navy. Many of them were induced to enlist under those circumstances, and came into service and went to the Army of the Potomac, and other armies, when they would have preferred to go to the Navy which protects its commerce. Such should be our clear policy. Such should be the law. Such is the policy expounded by our Navy and the pressing demand for seamen, it is a golden duty not only to protect the seamen we have, but to draw to the naval recruits and encourage such transfers and, at the same time, in so far as duty to the country will allow, to grant furloughs to the men to enable them to go to their homes, and there to collect as soldiers on their enlistment. No other class of men in the land, I think, would strengthen the Army by weakening its naval power.

Information has been received by the Department which for some years gave direction to public affairs so shaped the measure of Government as to make the Navy subservient to the Army, that it was a branch of the service which could have no sympathy in a declaration of war, and that the Navy was to be allowed to grow into contempt—knowing, moreover, that there were no salaries in the disaffected region, there was a general desire to enter the naval establishments, and in their whole policy and action, were hostile to the Navy. But the unanimous sentiment of the country, on all parties, the great service which the Navy has everywhere rendered in the cause of the Union, and the universal pride and confidence felt by almost and at home, demand it should have all due encouragement.

The naval force employed in the capture of the forts on and below the Mississippi expedition, was about 24,000. The number of recruits since then added to the Navy is 34,000, or 10,000 more than were. From causes, to some of which allusion has already been made, the difficulty of obtaining seamen has been so constant and increasing, that the service has been great, and at times vessels have been detained in port for want of men, to the great injury of service. The lack of sufficient seamen arises from no diminution in the monthly number of enlistments, but from the increased wastage in the service. During the year just the average number of enlistments was 1,500 per month, and the total number of enlistments was over 2,000 per month. Unfortunately, the policy which it has been the endeavor of the Government to carry out in the case of the Navy by allowing extraordinary bounties to soldiers, by subjecting seamen to the draft, and by other measures, to discredit the service of the Navy if they desired to do so, and by omitting to make any provisions to relieve them from the embarrassments which operate to check the seamen to men out ships. The large bounties offered by the Government to induce enlistments in the Army, and the more equal of a maritime character, as I have specified in a single instance, in allowing the member from whom naval enlistments would naturally be expected.

The practicable remedy for the present deficiency seems to me the operation of our laws, still further draw upon the limited number whose profession is the sea, and who are now only call to the defense of policy, be encouraged by the Government to enter the Navy, and that all laws which operate to their discredit in the service be entirely withdrawn by draft. Besides the exhausting government expenditures which the present system involves, it is subversive of active competition of commercial enterprise.

The present and pressing want is that of procuring seamen to numbers sufficient to man our ships in such as to call forth the action of Congress. The Department has no right to call to its aid mercial to that branch of the public service which it is the policy of every wise government to encourage. There is no greater or more rapid substitute, as inducements to enter the service, have had the effect of inducing many to enter the army without patriotism, but for those extraordinary inducements, would have entered in the Navy. The Department, therefore, has no alternative but to ask the action

sons have constituted one of the most laborious duties of this office, and I can bear testimony to the patience and impartiality with which they have been conducted.

To the restoration of these officers through the instrumentality of a court-martial, as proposed by the bill, several seemingly insuperable obstacles present themselves.

1. Their places, after dismissal, were, in almost every instance, filled by appointments legally and properly made. How is it possible to restore them to positions of vacant, but which are fully occupied by others?

2. The regiments, by many of these officers, have been disbanded. In reference to this claim, how could it be practicable to enforce the provisions of this bill?

3. These officers are now as much out of the service as if they had never belonged to it, and this by force of orders in every respect legal and valid. The restoration to the service of the PRESIDENT would certainly reinstate the officers in cases where the sentences were nullified; but is it competent for Congress to make such restoration? I think clearly not.

4. The orders being unrevoked, and the officers being out of the service, they can only be restored by re-appointment. Under the Constitution, however, the larger part of these appointments can be made by the Government of the States, and the remainder by the PRESIDENT. Is there any principle or precedent which would justify Congress in an attempt to exercise these functions of the President and Governors, by substituting for such presidential and gubernatorial action, the simple declaration of a general court-martial?

5. The Government could not investigate through courts-martial the facts which would justify the bill annexed. To go for trial, without such a draft upon the officers of the Army needed for active field service as must greatly impede the efficiency of the campaign now in full progress in every part of the theater of the war. To this should be added the fact that the witnesses to the transactions to be examined into are, doubtless, many of them dead, and others so scattered by the fortunes of war as to be unavailable—a condition which would make it impossible to try, except the action of the court-martial sitting in judgment on these officers, many of them long past, as satisfactory or reliable.

All of which is respectfully submitted.

J. HOLT,
Judge Advocate General.

ARMY AND NAVY PERSONAL.

BRIGADIER-General J. P. Hatch has gone to Jacksonville, to relieve Brigadier-General Seymour.

MAJOR-General Pleasonton has arrived at St. Louis and reported to Major-General Rosecrans.

MAJOR-General Schofield is now in Washington on the 6th. He testifies before the Committee on the Conduct of the War.

BRIGADIER-General John R. Kenly, U. S. Volunteers, has been assigned to the command of the district of Delaware, Headquarters Wilmington.

CAPTAIN Ellis, who for some months past Chief of Cavalry in the Department of the Northwest, has been ordered to Washington, to serve in the Cavalry Bureau.

LIEUTENANT Adams, of the Marines, was drowned at Cairo, Ill., off the wharf-boat, on the 31. The body was recovered.

LIEUTENANT-Colonel Bullitt, of the 34 Kentucky, has been relieved as President of the court-martial sitting at Louisville, and ordered to re[illegible] his regiment.

GENERAL Crawford takes command of the Pennsylvania District, in the room of Major-General Warren's 5th Corps, forming the 33 Division.

MAJOR Benjamin B. Foster, Assistant Adjutant-General to the staff of Major-General Thomas, has been ordered to report for duty to the Adjutant-General at Washington, D. C.

COLONEL Louis Di Cesnola, the commander of the 4th N. Y. Cavalry, who was captured at Aldie on June 17th, 1863, has been released from a Rebel prison, and is now on his way to the front. He arrived in this city yesterday.

CAPTAINS Robert H. Ramsey and Henry Stone, Assistant Adjutant Generals, U. S. Vols., have been assigned to duty on the staff of Major-General Thomas, commanding the department of the Cumberland.

COLONEL Clarence Buel, recently commandant of the 193d N. Y. Volunteers, has left the Army and has undertake formal application to study theology as a candidate for holy orders in the Episcopal church.

GENERAL Rufus Ingalls, Quartermaster of the District of Washington, having obtained a leave of absence for the purpose of visiting New York, Colonel M. N. Wiswell will be Acting Quartermaster during his absence.

MAJOR John Mendenhall, Judge-Advocate Fourth Army Corps, and Captain 4th U. S. Artillery, has been appointed Assistant Inspector-General of the Fourth Army Corps, and Lieut.-Colonel Arthur C. Ducat, Assistant Inspector-General, resigned from the Army.

CAPTAIN J. H. Williams, 1 Provost-Marshal of the District of Cairo, has been arrested at Memphis, Tenn., by an army officer, and sent to Memphis, to answer before Major-General Hurlbut for offences not yet made public. Lieutenants Chambers, arrested for suspension from rank and pay for the term of two months by court-martial, for disobedience of orders, has been released from arrest and ordered to return to duty.

CAPTAIN Johnson, of the Ninety-third New York regiment, attached to headquarters of the Army of the Potomac, has been appointed Lieutenant-Colonel of the One Hundred and Fifteenth New York regiment. His commission is dated back to November 15, 1863.

COLONEL Browning, of the 41st Massachusetts, has been appointed Assistant Provost-Marshal for the Department of the Gulf. Governor Hahn has appointed Captain John J. Swift, of the same regiment, Adjutant-General for the State of Louisiana.

A BOARD of officers, to consist of Captain E. Reynll, 5th U. S. Cavalry; Captain C. H. Tompkins, Quartermaster U.S.A.; and Assistant Surgeon J. Cooper McKee, U.S.A., has been ordered to meet at Washington on the 7th inst., to examine into the veterinary wants of the service.

GENERAL McCallum, inspector of railroads, recently took possession of the Orange and Alexandria road, and of all the unfinished locomotives of the Portland company's works. They were being constructed for the Grand Trunk road.

LIEUTENANT-Colonel A. S. Austin, Chief Commissary of Subsistence, Cavalry Corps, Army of the Potomac, has been sentenced by court-martial to be dismissed the service. The sentence has been approved by Major-General Meade. Lieutenant-Colonel Geo. H. Wood, C. S., late of the 3d Corps, has been assigned to duty as Chief Commissary of the Cavalry Corps.

CAPTAIN Sullivan, who for three years past has been in charge of the Commissary of Subsistence depot in Baltimore, has been ordered to relieve Captain Kellogg, Commissary at Sing Sing Prison, who is to be transferred to the Middle Department. Until the arrival of Captain Kellogg, Captain German, Commissary at Harrisburg, will take charge of the depot at Baltimore.

BRIGADIER-General Nath. Kimball is assigned to the command of all the troops on the North Arkansas River, with headquarters at Duvall's Bluff. He is peculiar to the citizens of his district, he says, the loyal shall be protected and sympathizers with the rebellion, though they may have taken the oath of allegiance, shall not be recognized or treated as rebels, unless they conform in word and act with the spirit of that oath.

MAJOR-General D. C. D. C. Gd, formerly commanding the 13th Army corps in the Department of the Gulf, and who has recently been relieved by Major-General McClernand, has been assigned to the command of the Major-General Sigel's department. It is said that General Ord is to command the forces in West Virginia in the field, ranking General Sigel in this respect, and that he is to be in command of the department, but will not conduct active military operations.

SURGEON W. H. Thom, U. S. Vols., has been relieved from further duty as Surgeon-in-Chief of the 3d Division, 11th Army Corps, and ordered to duty in charge of General Hospital No. 19, Nashville, Tenn., relieving Surgeon Jno. W. Foyle, U. S. Vols., who has been ordered to report in person to Major-General Rosecrans, Commanding, 23 Division, 4th Army Corps, for assignment to duty as Medical Director of the same.

THE following orders are officially announced as of the staff of Lieutenant-General Grant:—Lieutenant-Colonel C. S. Comstock, senior Aide-de-Camp, with the rank of Brevet-Colonel; Captain Orville E. Babcock, and Brevet-Major F. T. Dent, 4th U. S. Infantry, Aides-de-Camp, with the rank of lieutenant-colonel; Lieutenant-Colonel W. L. Duff, 2d Illinois Cavalry, Lieutenant-Colonel-General; Major W. R. Rowley, Aide-de-Camp, and Captain Adam Badeau, Military Secretary, Aide-de-Camp, private secretaries, with the rank of lieutenant-colonel.

IN a general order, dated at Headquarters of the Northern District, March 30th, Major-General Rousseau has appointed Lieutenant-Colonel J. B. Fry, Assistant Adjutant-General of all the forces in the district, in accordance with instructions from General Grant. Colonel Fry's reputation as a military engineer will be highly gratifying to his numerous friends in Philadelphia. Lieutenant Willett was formerly Adjutant in the General Staff, in the Department of Missouri and Tennessee, and has been in active service throughout the war. He bore a gallant part in many of the Western battles, and is undoubtedly one of the best engineers in the service.

THE following changes have been made in the Department of the:—Col. Wm. P. Carlin, 38th Illinois, 22d Illinois Regt., assigned to the command of the post of Cairo; Captain J. R. Pallmeday, of the 16th Iowa, relieved from duty as Provost-Marshal of the post of Cairo, and takes the place of Captain Williams, relieved as District Provost-Marshal; Captain Charles Odlin, 2d U. S. Cavalry, takes the place of Captain Talmadge, as Provost-Marshal of the post; Captain Jos. Hagg, of the 34th New Jersey, is assigned to duty as Provost-Marshal of Mound City, in place of Lieutenant Cutler, 122d Illinois, relieved. The naval station, headquarters, and district staff officers, remain at Cairo as heretofore.

ASSIGNMENTS IN THE QUARTERMASTER'S DEPARTMENT.

THE following assignments to duty of officers of the Quartermasters' Department, or doing duty therein, are announced. No changes will be made in these assignments except upon application issued at Quartermasters in the Army of the Potomac.

Headquarters Army.—Lieutenant-Colonel R. N. Batchelder, Chief Quartermaster; Captain C. S. McEuen, Assistant, do.

1st Division.—Captain A. H. Young, Assistant Quartermaster, Volunteers; 1st Brigade—Captain Nathan Barker, Assistant Quartermaster, Volunteers; 2d Brigade—Captain A. Baker, 2d U. S. Artillery; 3d Brigade—Lieut. Lessingwell, do.; 4th Brigade—Lieutenant Jacob Bice, Acting Assistant Quartermaster.

2d Division.—Captain George A. Shallenberger, Assistant Quartermaster, Volunteers; 1st Brigade—Lieutenant C. W. Fabens, Acting Assistant Quartermaster; 2d Brigade—Captain J. Lockhart, do.; 3d Brigade—Captain George W. Meade, Assistant Quartermaster, Volunteers.

3d Division.—Captain George W. Johnes, Assistant Quartermaster, Volunteers; 1st Brigade—Captain W. D. Vatchee, Acting Assistant Quartermaster; 2d Brigade—Captain T. P. Johnston, Assistant Quartermaster, Volunteers.

5th Division.—Captain R. P. Johnson, Assistant Quartermaster, Volunteers; 1st Brigade—Lieutenant Miles Farwell, Acting Assistant Quartermaster; 2d Brigade—Captain J. C. Abbott, Assistant Quartermaster, Volunteers.

Artillery Brigade.—Captain W. H. D. Cochrane, Assistant Quartermaster Volunteers.

Fifth Army Corps.—Lieutenant-Colonel W. H. Owen, Chief Quartermaster; Lieutenant A. T. Howden, Assistant, do.

1st Division.—Captain A. L. Thomas, Assistant Quartermaster, Volunteers; 1st Brigade—Captain S. R. Hamill, Assistant Quartermaster, Volunteers; 2d Brigade—Captain S. I. Wright, do.; 3d Brigade—Captain W. T. Hoskins, do.

2d Division.—Captain R. C. Swoope, Assistant Quartermaster, Volunteers; 1st Brigade—Captain S. B. Hayes, Assistant Quartermaster, Volunteers; 2d Brigade—Captain S. B. Preston, Assistant Quartermaster, Volunteers; 3d Brigade—Lieutenant T. A. McDonald, Acting Assistant Quartermaster.

3d Division.—Captain E. B. W. Bestieaux, Assistant Quartermaster, Volunteers; 1st Brigade—Captain S. Yardley, Assistant Quartermaster, Volunteers; 3d Brigade —Captain E. G. Staples, do.

4th Division.—Captain M. H. Mandeville, Assistant Quartermaster, Volunteers; 1st Brigade—Captain J. B. Winslow, Assistant Quartermaster, Volunteers; 2d Brigade —Captain E. P. Fitch, do.; 3d Brigade—Lieutenant A. S. Worden, Acting Assistant Quartermaster.

Artillery Brigade.—Captain J. D. Cruttenden, Assistant Quartermaster, Volunteers.

Sixth Army Corps.—Lieutenant-Colonel C. W. Tolles, Chief Quartermaster; Captain J. H. Platt, Assistant, do.

1st Division.—Captain S. M. Fanning, Assistant Quartermaster, Volunteers; 1st Brigade—Lieutenant C. Sayre, Acting Assistant Quartermaster; 2d Brigade—Captain W. H. Dandy, Assistant Quartermaster, Volunteers; 3d Brigade—Captain S. Pinney, do.; 4th Brigade—Lieutenant George W. Ford, Acting Assistant Quartermaster.

2d Division.—Captain John M. Rench, Assistant Quartermaster, Volunteers; 1st Brigade—Captain James Starr, Assistant Quartermaster, Volunteers; 2d Brigade—Lieutenant C. H. Austin, Acting Assistant Quartermaster; 3d Brigade—Lieutenant C. B. Whittemore, Acting Assistant Quartermaster; 4th Brigade—Captain H. W. Fersing, Assistant Quartermaster, Volunteers.

3d Division—Captain I. W. Hunt, Assistant Quartermaster, Volunteers; 1st Brigade—Captain J. W. Goodridge, Assistant Quartermaster, Volunteers; 2d Brigade—Captain J. C. Shelton, do.

Artillery Brigade.—Captain W. H. Lambert, Assistant Quartermaster, Volunteers.

Cavalry Corps.—Lieutenant-Colonel J. B. Howard, Acting Chief Quartermaster.

1st Division.—Captain J. H. Kallman, Assistant Quartermaster, Volunteers; 1st Brigade—Lieutenant C. Pitcher, Acting Assistant Quartermaster; 2d Brigade—Lieutenant J. E. Whelan, do.; Reserve Brigade—Lieutenant William Dean, do.

2d Division—Captain R. R. Corson, Assistant Quartermaster, Volunteers; 1st Brigade—Lieutenant J. H. Knight, Acting Assistant Quartermaster; 2d Brigade—Lieutenant J. K. Robinson, do.

3d Division.—Capt. M. J. Ludington, Assistant Quartermaster, Volunteers; 1st Brigade—Lieutenant J. G. Vidl, Acting Assistant Quartermaster; 2d Brigade—Lieutenant Wm. Hall, Acting Assistant Quartermaster, Volunteers.

Reserve Artillery.—Captain W. E. Morford, Chief Quartermaster, A. Q. M., Volunteers; Lieutenant E. H. Welch, Assistant Chief Quartermaster.

1st Brigade, Horse Artillery.—Captain William Goldie, Assistant Quartermaster, Volunteers.

2d Brigade, Horse Artillery.—Captain Ira F. Payson, Assistant Quartermaster, Volunteers.

By direction of Major-General McPherson, the following names have been assigned to the different batteries on the staff of Major-General Logan, Mich., constituted under charge of Captain John M. Wilson, Chief Engineer: —First, Fort Logan, to be known as "Fort Grant." Second. The batteries will be named as follows, commencing on the right:—No. 1, situated in rear of former office of Michael Reynolds, Assistant of Mr. Quartermaster "Battery Moore;" No. 2, site of former headquarters of Major-General Grant, "Battery Rawlins;" No. 3, staple gun, rear of Samuel Jones, "Battery Dodine;" No. 4, site of Gil Castle, "Cattle Battery;" No. 5, Crawford-street, "Battery Crocker;" No. 6, Crawford-street, "Battery Clark;" No. 7, Jackson road, "Battery Wilcox;" No. 8, Jackson road, "Battery Boomer;" No. 9, intersection of Jackson road and Winn Bayou, "Battery Sherman;" No. 10, north side of Winn Bayou, opposite Battery Sherman, "Battery Crocker;" No. 11, extreme left of line, "Battery Benson;" No. 12, rear of Samuel Jones, "Battery Mason South;" No. 13, 42 Spanish fort, "Battery Hickenlooper."

THE following paragraph appears in the London *Globe*:—"We have no hesitation in believe that, on receiving intelligence of Mexico, the Emperor Maximilian will address from Miramara a formal notification of his accession to the throne to all the foreign powers with which he has been wont to establish diplomatic relations. Among the number are the United States of America.—Mr Dudley Mann, the American Minister in Paris, having already intimated the readiness of his Government to accredit a representative in Mexico, and receive a representative at the Emperor's court."

There is every reason to believe that Mr Dugro has given no intimation of the character that referred to, and that his Government has not authorized him to give any such.

By General Orders, dated March 30th, from Headquarters Army of the Potomac, previous orders are re-for modified as fo allow two wall tents for the officers of a battery; to direct that 100, instead of 140 rounds, per man of small-arm ammunition, be carried constantly on hand; and that three instead of five wagons be furnished to every 1,000 men for the transportation of small-arm ammunition. Forty rounds per man will be carried in the cartridge boxes.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give an early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to technical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made by United States Postage Stamps, by Postmasters' Certificate or other drafts, which should be made payable to the order of the Proprietor, W. E. Church.

Subscribers will fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their present address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 192 BROADWAY, CORNER OF JOHN STREET.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, APRIL 9, 1864.

The editorial and business offices of the ARMY AND NAVY JOURNAL will be removed about the 20th of April to No. 39 Park Row, TIMES Building, directly opposite the City Hall Park.

THE MEXICAN TRAGI-COMEDY.

THE shifting scene and circumstance of the Mexican drama, do not lose their interest or importance with the progress of time. The leading characters—perhaps in this instance some might call him the scene-shifter—is the greatest actor of the age; his principal supporters—some might call them his puppets—are little enough in their way; the mere extras of both sides are frisky, occasionally; the stage is a splendid one; the music is high; the on-lookers are pleoid, if not pleased. But there is an element of doubt as to how the thing will close—whether the chief figure will stride from the stage royally and in triumph, or whether he will fall prone and discomfited—whether the curtain will fall while his men-at-arms are marching off to the sound of the kettle, or while they skedaddle with the cry of *sauve qui peut*.

It is now the third year of the Franco-Mexican war, and we shall presently have the third act of the performance. The first act may be said to open with the landing of the Franco-Anglo-Spanish armies at Vera Cruz, in December, 1861, and close with the departure shortly afterwards of the forces of two of those allies, leaving only the French behind. The second act opens with the first clash of arms, and closes with the apparently complete subjugation of Mexico. The third act is about to open with the crowned apparition of MAXIMILIAN; but of its closing, and of the closing of the tragi-comedy—Heaven only can tell. It may be that *other* men-at-arms than have yet appeared, will spring upon the stage, and that the climax will be such as to dumbfound gods and men.

The latest facts and fancies as regards military and political affairs in Mexico, and Mexican affairs in Europe, seem to be these: First, that organized opposition to French arms ceased with the fall of Puebla; that French garrisons hold firmly the capital and all the important strategic positions on the coast and in the mountains; that French ships are in the Gulfs of Mexico and California, blockading the Eastern and Western lines of the country; that JUAREZ is a fugitive in Northern Mexico; that many of his generals and other officers, with their troops, have abandoned him in despair; that those who still adhere to his fortunes, like Generals URACA, ORTEGA, DIAZ, DOBLADO, NIGRETE, CORTINA, and others, are unable to venture beyond anything but guerrilla operations; and that some of the Mexican leaders, as Generals ALMONTE and WOLL, have taken sides with the intervention; that the French commander BAZAINE, holds the country so firmly under his control, that he banished the old chieftain SANTA ANNA, who had returned to his native shore, from exile, and who offered his able support to the intervention—banished him because of the indiscretion of uttering an unauthorized pronunciamiento.

From Europe we learn that the new Emperor MAXIMILIAN was about ready to sail for Mexico, to take possession of his throne; that, in a personal interview he had with the French EMPEROR, everything was settled to the satisfaction of both parties; that a French frigate had been dispatched to Trieste from Toulon, to serve as his escort on the voyage to Mexico; that a loan of three hundred millions of francs had been effected, out of which loan the expenses of the French invaders were to be partially reimbursed, and the remainder of which were to be paid by MAXIMILIAN in installments after his enthronement. With regard to the future military relations of France to the new Mexican empire, we are given to understand that the French army is to be withdrawn from Mexican soil as soon as possible after MAXIMILIAN'S arrival, and that its place is to be supplied by a force drawn from two sources:—1. A foreign legion, in the service and pay of MAXIMILIAN; 2. A body of native Mexicans, such as can be hired to uphold the usurpation. The Foreign Legion, which is to consist at first of 6,000 men, is being made up in part from the army of Paris, and the first installment of 500 men were being embarked at Cherbourg a fortnight ago. The applications from officers for service in the legion were numerous,—the pay in this corps being double that in the French army, and the promotions were rapid.

It is stated in a French journal that the legion will be composed in part of Senegal savages, obtained from the small French colony on the Gambia, in Western Africa; and this will astonish no one who remembers the means which the French EMPEROR adopted, to get a force of Egyptian negroes for his own service in Mexico, and the great value of which that force has been to him. As to a Mexican native force for MAXIMILIAN, he will find a considerable body on hand which has been organized under French auspices, and under ALMONTE; and as MAXIMILIAN will undoubtedly adopt the Continental mode of raising armies by conscription, he can soon get all the military force that he will require. The Mexican officers who were captured at the fall of Puebla, and carried to France, have all, or nearly all, taken the oath of allegiance to the new EMPEROR, and at latest advices one hundred and sixty-four of them had embarked at Cherbourg to return to their native land, and probably to enter the new service. These various elements will constitute a rather *bizarre* army, it is true; but in time and by discipline it may be licked into consistency and shape. It is given out, we know not with what truth, that General WOLL, formerly of the Mexican service, will be chief in command of the army of MAXIMILIAN.

Such in brief are the aspects of the Mexican question at this time.

The relations of this Government to the whole matter have necessarily been affected, at least temporarily by the great internal struggle in which we ourselves have been engaged. The attitude of the Government, as we understand it, has been simply that of a passive though not by any means a careless spectator. We have in no way countenanced the order of things established by foreign force; but have accredited, and do still accredit, a minister to the JUAREZ or Republican government, though of course it has been impossible that he should follow up that government in its successive flittings. One of the Senators from California has from time to time introduced resolutions into the United States Senate, favoring war against France, if that power did not withdraw its troops from Mexico; but no support has ever been accorded to these efforts. On Monday last, however, the House of Representatives took action of a kind that will certainly be sustained by the entire Nation, as, remarkable to say, the measure was sustained and voted for by all parties and by every man in the House. The resolution, calm and dignified in tone, but unmistakable in its significance, reads thus:—

Resolved, That the Congress of the United States are unwilling by silence to leave the nations of the world under the impression that they are indifferent spectators of the deplorable events now transpiring in the republic of Mexico; regarding as they do the facts that it does not accord with the people of the United States to acknowledge a monarchical government erected on the ruins of any republican government in America, under the auspices of any European power.

Next to the Southern Rebellion, no question is of greater interest to the Army and the entire country than this of Mexico. One main object of the intervention, as publicly avowed by its imperial author, was to arrest the growth of the power of this Republic. He was blind both to our present power and to our manifest destiny when he put forth the remark.

CONTRABAND NEWS.

A MARKED feature of the first year of the war was the universal passion among our people for obtaining and improperly disclosing information of military plans and movements, without any regard to its disastrous effects. In a questionable spirit of enterprise, and stimulated by cupidity, a portion of the press has done its part towards getting official intelligence in such way as to make important facts entirely current under pledge of secrecy. But the fault was not entirely that of the press. It lay rather at the door of the public, which persisted in rewarding by pecuniary patronage such journals as were most successful in this unscrupulous work, offering a premium, in effect, for the premature disclosure of projects set on foot at the theatre of war. It is easy to remember the naïve frankness and nonchalance with which the details of the marching orders of troops, their numbers, disposition and availability were telegraphed North, and greedily spread abroad through the reading world. The illustrated weeklies contributed to the evil by publishing plans and diagrams of our camps, and of the various roads leading therefrom, of the defensive artillery in our field-works and forts. Perhaps not a single corps or department commander failed to experience annoyance or injury from army correspondents. The incarceration of several members of the Reporting first emerged from its chrysalis untamed and untameable spirit of the 'reporter, that military regulations are not always to be transgressed with impunity.

The progress of the war has wrought a surprising change in this, as in all other respects. As commanding officers have learned to keep better their secrets, so have those who by position become the recipients of confidential information, been more temperate in its public use. It is striking, however, to see how, as the central interest in the war once more swings back to the old trampled battle-ground in Virginia, with the impending campaign, some of the evils developed in the primary stage of the war again re appear in modified form; and, in addition, the public anxiety for what is forcibly called "contraband "military news." In the conduct of the war in the West the campaigns around Chattanooga and Chickamauga were not thoroughly hawked about from mouth to mouth before commencement or before execution. Except in a rapid, though satisfactory, way in military circles, took the greater part of the country by surprise. But when the Lieutenant-General turns eastward, the old prurient desire to publish the strategy of the year in advance becomes manifest. The re-organization of the Army is known as quickly in Portland as in Washington. General GRANT is alleged to have complained that the Rebel journals printed the new assignments and dispositions in the consolidation of the Potomac Army before the bulletin from the War Department reached his headquarters. And, at all events, the main features of the scheme under consideration in the Capital appeared at Richmond before the plan had been perfected or the official orders grounded thereon had been issued.

To a certain extent, indeed, it is impossible to avoid the rapid transmission of intelligence to the enemy. From the outset they had superior facilities for procuring it, from causes we need not stay to enumerate. Their system of espionage also has been carefully perfected, until its operations have more than once been a matter of chagrin to our readers. Everybody recalls the story of the Rebel sentries who were wont to shout the substance of our marching orders across to our men picketing the hither bank of the Rappahannock and Rapidan.

To aim at absolutely preventing the enemy from receiving intimations of our plans, or knowledge of the strength and location of our forces, would be manifestly preposterous, as against all military experience. And, indeed, we think the Rebel facilities in this regard have always been greatly exaggerated. Certainly of late there has been nothing so wonderful or mysterious in these facilities as many people are disposed to surmise. A regular perusal of the files of Southern newspapers shows considerable ignorance of our military status on their part, and an obvious reliance on Northern journalists as a medium of news. And we venture to say that our own means of learning the dispositions of the enemy, in more than one Department, are superior to anything they possess. The *leaks* at Baltimore and Washington, so justly com-

plained of in the early war, have been tolerably well stopped. The present theory of concentration and cooperation in military manœuvres has its good effect also in securing the benefits of secrecy.

It is well also to keep in mind that a great part of the matter sent North from the front as "within the positive knowledge of the writer," who claims to enjoy the private confidence of "the highest authorities," is mere guess work. If, indeed, it were anything else, it would call for and receive the severest reprehension as a violation of honor. Shrewd conjectures at the possible moves on the military chess-board are sufficiently harmless, perhaps, so long as they do not lead to base disclosures important to the enemy or embarrassing to our leaders. So much harm may be conceded to the private "on his own" enemy than the Yankee Nation the *habeas corpus*, but you must not destroy its time-honored privilege of guessing.

We have for a couple of years or more ceased to pay any attention whatever to the ceaseless, preposterous and malignant falsehoods with which Englishmen entertain each other when treating of military affairs in America. But we cannot help indulging a feeling of contempt when we see that their organs are falsifying equally ridiculously and grossly about one or both of the belligerents in the Dano-Germanic war. It happens that the interests and prejudices of the British governing classes are for the time being on the Danish side, and as a consequence there is no absurd or malicious misrepresentation of the allies or their armies that is not uttered, printed, credited, and relished. Nothing more characteristically *English* has ever been uttered about our war. We find in a sentence of a pretentious cockney writer, who, in dilating upon the operations in Northern Europe, speaks of the intense pleasure which the Germans have felt over the "glory of a battalion of Prussians engaging in a fierce, prolonged and ultimately successful struggle with a couple of Danish entries." It may be that this language was intended to be slightly hyperbolical, but it is such hyperbolism as is swallowed for literal fact by nine out of ten Englishmen; and it is the continued assertion and belief of such falsehood and nonsense about all other people that make English criticism and conceit contemptible.

The people of New York were surprised and delighted at the handsome appearance and admirable drill of the detachments of Regulars, which formed part of the military procession which inaugurated the opening of the Sanitary Fair. We do not know that New York has ever before seen together on parade, so many of the soldiers of the Regular Army; and they, perhaps, may not have been aware that that small body of troops which formed the nucleus of our present vast military organization, and whose officers, field, staff and line, furnished the material for our allied generals, was one of the best drilled, best disciplined, and hardest worked armies in the world. Scattered over a wide territory, occupied principally in Indian warfare—one of the most dangerous as it is one of the least glorious kinds of warfare, so far as popular recognition is concerned—they everywhere did honor to their flag and their service. But they were removed from the attention of the people, and were too often forgotten. Legislators abused them not unfrequently, and very few appreciated the labor which was spent in giving to the small military organization, its thoroughness and excellence. When the war broke out, and in spite of the defection of many officers, scarcely a general's guard of the whole number could be drawn off to fight against the flag which they honored and the Government, which over-timid men were afraid they might pervert to despotic ends. Then, as always before, their record was honorable, and though the country perhaps did not fully record them the honor they deserved, it was not unmindful of their loyalty and soldierly devotion. During the present war the Regulars have everywhere sustained their character for discipline and for gallantry. As the soldiers of the Nation, and not of any particular State, they have in some respects suffered in the lack of those especial attentions which the State Governments have given their troops; but they have had good officers, and they have been not ill cared for. The people may have failed to fully recognize their valor and record their services, though we are sure they have not failed to feel confidence in the announcement that "the "Regulars would be engaged." We are glad the people of New York have had an opportunity of seeing them march through its streets, carrying their torn battle-flags, inscribed with the names of the engagements in which their valor was conspicuous. It was pleasant to hear them cheered and admired, and we know there are none who will rejoice more in their honors than their comrades of the Volunteer Army who have fought side by side with them on many fields, and have earned equal laurels, and deserve equal praise. But they get their praise daily. That of Regulars comes but rarely.

The use of *fifty* pounds of powder as a service charge in the fifteen inch guns with which the Monitors are equipped, has inaugurated a new era in Naval warfare. The experiments made with guns against iron targets have clearly shown that all attempts to produce a gun to be really effective on iron-clad vessels, except by making them capable of being fired with enormous charges of powder, have been and will be futile. Patent projectiles and ingenious methods of rifling will not *crush* in the sides of the iron-clad; that wonderful agent, gunpowder, and plenty of it, too, alone can accomplish this. The engineer may as well attempt to propel a large steamer at high speed without consuming coal in proportion to the result obtained, as for the artillerist to produce the effect he is striving for on the sides of the iron-clad without using enormous charges of powder.

The effect of the four hundred, and thirty pound spherical ball fired from the fifteen-inch gun within the impregnable turret of the *Weehawken*, with a charge of thirty-five pounds, on the sides of the iron-clad *Atlanta*, is well known. It was the *smashing* effect of the enormous projectile that carried the day.

When Ericsson designed the *Monitor* he stated that it was part of his system that guns of large calibre, using enormous charges of powder, should be installed within his impregnable turrets. Now this desirable end has been attained.

It may be a matter of congratulation to the country, that not only do we possess a whole park of four-hundred-and-thirty-pounders, which can be safely fired in service with over fifty pounds of cannon powder, but we also possess impregnable floating gun-carriages on which to mount them.

We observe that although the English have not yet produced a successful heavy gun, they are turning their attention to the construction of mechanism with which to handle them when brought to such a degree of perfection that their path will not be from the trial ground to the scrap heap; but they are destined by this, as they have been in the other great epochs in Naval warfare, viz., the introduction of horizontal shell-firing; and the application of the steam engine to war vessels, to *follow*, not to *lead*. They have already copied our cylindrical turrets, and by the time their artillerists have constructed an efficient gun, we have afloat to turn copy the mechanism with which we successfully manipulate, in actual warfare, our twenty-ton gun.

The *Moniteur de l'Armée* of March 16th pays a handsome tribute to the gallantry of American general officers in the present war. It first premises that our major and brigadier-generals correspond respectively to the French commanders of division and brigade, while major-generals in command of departments are nearly allied in function to the French marshals. An exact equivalent to the latter rank is found in that of the "general" in the Confederate service. The *Moniteur* then says of the mortality among officers:—"These losses, relatively very considerable, and to "which our European wars could, happily, furnish no "parallel, show the enthusiasm with which American "soldiers are led to battle, and what models of daring "their officers have always set them."

Such language from the French official military organ is no ordinary commendation. We note, however, that some prominent names are lacking to the *Moniteur's* necrological list, as, for example, those of Brigadier-General Edmund Kirby, who fell at Chancellorville, and Brigadier-General George C. Strong, who died of wounds received before Wagner. There are also some other inaccuracies in the *Moniteur's* article. Colonels Miles, Webster and O'Brien are ranked as brigadier-generals, while on the other hand, Major-Generals Meade, Meagher and Reno are set down as brigadiers. Commander Renshaw also is erroneously styled commodore. The list, however, is in the main correct—creditably so, indeed, compared with the inaccuracies of most of the English journals, in speaking of the rank of American officers.

"By order of the President," the following officers have been mustered out of their appointments as Brigadier-Generals of Volunteers:—Brigadier-Generals Andrew Porter, C. P. Stone, W. R. Montgomery, H. M. Naglee, and T. T. Garrard. We are sure the Army and the country will share the surprise with which we receive this information. Among these names are some of officers whose qualifications and services are of such high character that it is hard to understand how they have merited the disgrace which is thus inflicted upon them. We presume the reasons for their dismissal will before long be made public, for the Army will feel interested to know what offences are regarded as worthy of such punishment.

General Porter entered the service from civil life on the 27th of May, 1846, as a First Lieutenant of mounted rifles. On the 14th of May, 1861, he was appointed Colonel of the Sixteenth regiment of infantry, and on the 17th of May, 1861, Brigadier-General of Volunteers. At the commencement of active operations by the Army of the Potomac under General McClellan, he was appointed Provost-Marshal-General of that Army, continuing in that office until relieved at his own request on account of illness. He is a native of Pennsylvania, and now falls back upon his commission in the Regular Army. General Stone entered the Army from the Military Academy as brevet Second Lieutenant of Ordnance, 1st July, 1845, being appointed from the District of Columbia, though born in Massachusetts. He resigned on the 17th of November, 1856, and was on the 14th of May, 1861, reappointed, receiving a commission as Colonel of the Fourteenth regiment of infantry, and as Brigadier-General of Volunteers on the 17th of May, 1861. Upon the organization of the Army of the Potomac, under General McClellan, he was appointed to the command of a division on the upper Potomac, where his command was subjected to the unfortunate disaster at Ball's Bluff, which led to his incarceration in Fort Lafayette, from which he was discharged and restored to command without a trial. He has since been on duty under General Banks in the Department of the Gulf. General Montgomery was appointed Brigadier-General of Volunteers on the 17th of May, 1861. He held no commission in the Regular Army, though originally a graduate of the Military Academy. General Naglee is also a graduate of West Point. He resigned from the Army after a short service, but entered it again as an officer of Volunteers during the war with Mexico. He is a native of Pennsylvania, and a resident of California. He was appointed Brigadier-General of Volunteers 4th of February, 1862, and assigned to the command of a brigade in Hooker's division. During the Peninsula campaign he commanded the First brigade of General Casey's division of Keyes' corps. He was subsequently in command at Norfolk, Va., but has been for some time without a command.

General Garrard was appointed Brigadier-General of Volunteers from Kentucky on the 29th of November, 1862, from civil life.

We commence this week the consideration of a subject which seems to us of prime importance at this time. It is that of the Military Topography of the United States. In Europe, where the territory has been trodden for countless generations by busy communities, and where almost every foot of soil has been swept over by armies, the topography of the continent is thoroughly understood. But our national domain is so new and so widely spread that its topography is a subject upon which very few are at all well informed. The war has been the best teacher of home geography; yet there is still such a degree of ignorance on the subject in its military relations, that we can but think its thorough consideration will be welcomed by all intelligent readers. We open the discussion with a rapid view of the topographical features of the Pacific Slope, a portion of the country of less present military interest than others, but which must necessarily come within the range of a series such as we have undertaken. In later articles we shall treat of the topography of portions of less remote interest, and those which are now the seat of active military operations.

FOREIGN MILITARY AND NAVAL MATTERS.

THE Iron-clad battery *Implacable*, built at Nantes, and recently launched, is to be covered with two tiers of guns of a new model.

An entirely new apparatus for lowering boats at sea, the invention of an officer of Chatham Dockyard, has been fitted to the *Rombay*, now getting ready for commission.

A STATUE to the memory of the late commander of the Russian Black Sea fleet is about to be erected at Sebastopol. Otto and the other officers who perished to commemorate the loss of both Admiral LAZAREFF and fleet.

An armor-plated frigate, intended for the Danish Government, has been launched by Messrs. THOMPSONS, of Govan on the Clyde. She is to be fitted with engines of 600 horse-power, and her burden is 3,500 tons, her length being 250 feet. Her armor-plates are 9½ in. thick, with a strong backing of teak and iron-plating.

THE EMPEROR has been busy inspecting the different regiments composing the garrison of Paris. Five regiments have left Lyons for the camp at Chalons. These regiments will be replaced, as Lyons is an old district to be left denuded of a strong military force. The number of young men inscribed on the conscription list for this year amounted to 325,000—being 4,000 in excess of the number inscribed last year.

ANONYMOUS pamphleteers have of late been vicariously attacking the organization of the administrative department of the French army, but they will be withdrawn out a rebuke from the *Moniteur*, which announces that these attacks, so far from serving the cause they profess, will have the effect of making writers of the army who participate in them the extremest chastisement it is in the power of the Minister of War to inflict upon them.

THE FRENCH Imperial Prince lately entered on his ninth year; and a journal makes the remark that His Highness was born after the taking of Sebastopol, and before the war was concluded, between victory and peace. The Imperial birthday was kept with more than great solemnity. Red ribbons were given to no less than seventy-eight mayors and to a large number non-commissioned officers; whilst 323 military medals were distributed through the service.

THE EMPEROR, having heard of the great advantage to be derived from the use of the gun-cotton prepared by Baron LENCK, of Wolsberg, requested the learned professor to come to Paris to experiment with the new mode of its preparation. The Baron has arrived in Paris, and the EMPEROR is so well pleased with the invention, which promises to revolutionize the system in artillery practice, that he conferred on the Baron the cross of Commander of the Legion of Honor, and presented him with a snuff-box of rich diamonds.

FROM a report of the Italian Parliament, it appears that the Italian fleet is now composed of 14 iron-clads, 34 screws, 26 paddle steamers, and 18 sailing vessels, the whole carrying an aggregate force of 1,400 guns, 21,930 men. If this be a correct report, the Italian navy is becoming a formidable force. General CIALDINI has been several times at Turin, and the Ministers have just decided on organizing two *corps d'armée* of 50,000 men each; one on the Mincio, and the other on the Po.

The London *Times*, commenting upon the late experiments with the Armstrong 600-pounder, laments that while iron-plates are subjected to every conceivable test, it appears to be the fear of the British Government to discover the number of destructive charges a gun can stand, not how many effective rounds may be fired in it. Big Will can fire off about twenty times last year. Hence while England has gone on improving her iron-plates and manufacturing guns on various systems, she has not now a single piece of ordnance which actual experiments have proved to be worthy of entire confidence.

IN 1862 Mr. LAIRD, in addressing his constituents, Mr. LAIRD as to what was the depth from the deep had water-line at the fore and after parts of her Majesty's ships *Achilles* and *Ocean*—namely, the top of the armor-plating, and what depth of side above that was unprotected by armor, Lord PAGET said:—"As regards the *Enterprise*, the armor-plating is only to the water-line, and that part of the ship which contains her batteries. With respect to the *Research*, which is a much larger vessel, she has armor-plates right down to the beams of the lower deck. It is not think it desirable to state the exact number of feet and inches but he may perhaps assist you for; but, if he will come to the Admiralty, I shall be very happy to show him the full details of each ship."

THE promotion of RIGAULT DE GENOUILLY to the rank of Admiral of the French navy calls out some remarks about the history of the grade. The title dates from the year of the Revolution, and before it is equivalent to that of marshal in the army, as that of Rear-Admiral with us is equivalent to Major-General. At certain epochs it was confined to princes of the blood, and conferred valuable privileges, and was frequently held by one who never exercised his authority upon the sea. Such a one was Prince MURAT, who was Grand-Admiral without any control over the navy. In 1814 its old privileges were revived and the Duke of ANGOULEME bore it, but it was abolished altogether in 1830. Since then the grade of Admiral has been restored, but to be worn by but a very small number in number.

A SPANISH journal, *El Boletin de Comercio*, published at Santander on March 5, contains the following most extraordinary statement:—The Paris correspondent of a Democratic journal reports the following fact:—M. LESPIOT, a first-class surgeon of the invading army in Mexico, had a hundred Mexican prisoners in his hospital, and fearing that they were likely to rejoin the guerrilla bands as soon as they could, he cut off half the fore-finger of every one of them in order to render them incapable of handling a musket. This barbarous act was perpetrated six months ago, and no journal has ever dared to mention it. He is, however, rewarded, and numerous decorations have been given by M. LOND, as assistant-surgeon, who, rather than be an accomplice of the crime, resigned his commission, which was refused him, and till after he had been kept in close arrest for two months.

SOME experiments recently took place on the shore at Cushy, near Dublin, with a 64-pounder rough-iron gun, made by the Mersey Steel and Iron Company for Mr. MACKAY, of Liverpool. With a projectile weighing 100lb. and a charge of 20lb. of powder the initial velocity obtained was 1,508 feet per second. Although the wad blew in fitful squalls half a gale across the range, several shots went through the targets, which were placed at distances of 1,000 and 1,500 yards. The weight of the gun is about nine tons, and the bore is 8·12 inches in diameter. The peculiarity of the gun is, as reported Mr. MACKAY is that the shot are plain cylinders, and although the gun is rifled, the projectile has no corresponding adjustment. The ordinary service powder produced quite sufficient to keep the shot true in its course, as shown by the holes in the targets, which were the exact diameter of the shot.

THE last number of the *Courrier du Mexique* relates an interesting military episode. ROMERO, a chief of the republican guerrilla party, stopped a diligence, in which was the correspondence of the general-in-chief. The diligence was defended by seven soldiers and a sergeant, who, however, were soon forced to gain a neighboring house, where ROMERO summoned them to surrender, whereon the sergeant answered that, when one were uniform, one never surrendered. By this time it was nightfall, and at the end of this speech, he ordered a general discharge. From six until eleven in the morning a fire was kept up by both parties. At last the house was uncovered, and ROMERO commanded an assault. Still dreading the Gallic bayonet, he directed the cabin to be set on fire, and it was speedily reduced to ashes. Then it was forced to come out and lay down arms, even in uniform. In this siege one man was killed; the soldiers have lost seven, and the sergeant.

A LETTER from Turin in the *Debats* says:—I have endeavored to obtain some exact information as to the present real state and bearing of the armaments which are attributed both to Austria and to Italy, and I think you may rely on the correctness of the account I now give you. On the part of Austria there has been no extraordinary movement. Hungary she has confined herself to completing the artillery stores and other supplies in the fortified places, and to placing on a war footing the Military Frontier regiments of infantry which had been before reduced from a motive of economy. Numerous additional sidings have also been constructed on the Southern Railway in order to be able in case of need, to have bodies of troops conveyed without deranging the ordinary traffic on the line. Austria has not made any extraordinary military call made for volunteers nor any corps d'armée formed, but she has also completed her supply of stores, and has taken extraordinary steps to be ready to act if required. The garrisons of Lombardy and of Romagna have been reinforced by withdrawing some battalions of the South, where the population is now nearly suppressed. Such is the exact truth; both sides keep themselves on the defensive and in readiness to repel any attack which may either still be made, and both are probably sincere when each country says that it will not assume the initiative of a war.

THE *Monitor de la Flotte* contains a long article on the *Plongeur*, a submarine vessel that PATERNE was the first person who, in America and at HAVRE, attempted submarine navigation. Some years later the French firm BOURGEOIS & MASSON LES *Nautilus*. The crew of the *Nautilus* were provided with air by means of leather pipes, which terminated in floats, and one of these floats, on the day she dragged the floats under water, and all souls on board nearly perished. A Doctor PATERNE came with a new invention and engines to be worked without steam. The combustible proposed by the doctor was found too liable to explode, and his invention was shelved. Captain BOURGEOIS, of the French navy, built then came in 1858, and since that time he has been perfecting and making trials. In May of last year he launched the *Plongeur*. This vessel was to carry water to be fed with compressed air, and experiments were begun to try if existence below was possible under the conditions imposed by the inventor. The *Plongeur* was submerged; but, by way of precaution, a large iron chimney communicating with the hold was permitted to keep its black muzzle above water. This was fortunate for the crew, for the compressed air blew out a certain dead-light, and the vessel began to fill, the ship's company only escaping through the chimney, effecting their escape by the safety funnel. Great improvements have been made since this trial, and the *Plongeur* has since been out at sea, or rather, she was under the sea.

A NOVEL but not very important experiment was recently made at Sheobaryness for the purpose of testing the merit of a target of compressed wool. Mr. NASMYTH, the inventor of this target, enunciated a confident opinion that a good thickness of pressed wool would offer an amount of resistance to rifled projectiles sufficient to justify its adoption. Government in making experimental inquiries on the subject, the target was a wrought-iron tube, open at both ends, 18 inches in diameter and 3 feet 6 inches long. The wool end of the target was constructed by filling it up an end, and filling it with wool as tightly as it could be compacted with the hand. The tube was full. It was then laid down, one end towards the gun, so as to present the appearance of a white circular target 18 inches in width. The gun was an Armstrong 100-pounder, with a ten pound charge. The projectile not only passed completely through the tube, but it buried itself in the bank 20 feet behind. The second shot was fired from a 68-pounder, with the usual service charge, and the same result was obtained. There the shots demonstrated to conclusively the utter worthlessness of the wool target as a means of resistance, that Mr. NASMYTH conceived in the impossibility of further experiments. It is said that this result exactly fulfilled the expectations of the Iron-plate and Ordnance Committees, who, however, conceived it worth while to make the wool experiment for the purpose of exploding an absurd theory fervent. The London *Times* objects to this costly method of proving the known because it is not conclusive, and argues, in addition, that had the experiment been in every respect a successful one, it would puzzle the brains of the inventor how to invent a method for applying to the sides of the huge English iron-clad, which are already sufficiently unwieldly, ten or twelve feet of wool-packing, and that, looking for its peace of mind the experiment was not a success.

ONE of the assistant surgeons of the London Hospital gives some interesting items of surgical intelligence from the seat of war in Schleswig. Nearly all the wounded of the battle of Oversee, which was fought about fourteen miles north of Schleswig, both Christians and Germans, were brought to the town, and distributed in eleven different public buildings, some very well suited to the purpose. They were under the superintendence of Prussian military surgeons. The hospitals (lazaretten) are spread over a considerable distance, more than two miles apart. The wounded are in the hands of Prussian and Saxony with various parts of Germany. The correspondent says the generally healthy appearance of the wounds was quite remarkable, as was also the absence of internal complications, especially as the greater number of the severely wounded, the slightly wounded having already been sent south. The wounds are all dressed twice in the twenty-four hours, the limb thoroughly cleansed with a strong stream of warm water by means of the "irrigator." Water is ball has passed through a limb, which by means of this apparatus is simply to traverse the same, thus perfectly washing it out, and apparently affording great relief to the patient. This plan appears to be the best and most simple and effective for cleansing deeply-seated, irregular channels, as well as large surfaces, removing from them decomposing tissues and other substances, and being at risk of infection as there is with sponges, and the method itself being more economical. The wounds are usually dressed with lint, and covered over with cotton wool. A poultice he had never seen in Schleswig. Plaster of Paris is universally employed in compound fractures. In the case of the latter assembly is answered very well; the patient could bear to have the limb moved about, and all seemed in a fair way to recover. Some of the wounds required to the elbow, and shoulder; only one amputation. In fact, amputation is resorted to only at the very last extremity. Dr. NICHOLSON is carrying out the principles of the recently published work. It appears that he never amputates, nor does even primary resections. The writer was not favorably impressed with the results of the new method. All the patients here have an allowance of wine. He had seen several bayonet and sword wounds in both Danes and Austrians.

DANISH WAR ITEMS.

A dispatch from Berlin says the entire reserve of the Austrian Navy has been called out.

The Austrians have made a requisition in Jutland for 1,000 beds and 1,000 blankets.

An Austrian man-of-war has captured a Danish Indiaman, bound for Constantinople, with a valuable cargo of coffee.

The *Niels Juel* has been cruising off Helgoland, but the *Skipping Gazette* says there is no existing blockade either of the Elbe or the Weser.

The Prussian official journal contains a long list of names of officers and men on whom the King has conferred military distinctions for their services during the operations in Schleswig.

The Crown Princess of Prussia has forwarded 600 rix dollars to the Ladies' Schleswig-Holstein Society established at Hamburg for the relief of the sick and wounded soldiers of the allied army.

The Prussian batteries opened on the village of Düppel on the morning of March. Four pontoon bridges were captured, after a heroic resistance on the part of the Danes. At last accounts the bombardment still continued.

Field-Marshal VON WRANGEL has sent to the Crown Princess of Denmark a Danish cannon ball which fell near the Crown Prince while he was making a reconnoissance, and that her royal highness has caused the ball to be placed in her drawing-room at the Potsdam Palace.

The King of Sweden is inclined to draw the sword in aid of Denmark, but his people are averse to war. In a recent address to the King the inhabitants of Stockholm expressed the hope that his Majesty would exhaust all means to procure an amicable adjustment of the war before throwing his own sword into the scale.

The Swedish Government has made preparations to close the harbors of Stockholm and Carlscrona against hostile fleets by means of rafts, which will be fastened together by gun chains. Great activity prevails in the naval department, and numerous gun-boat-of-war, ships and corvettes will be immediately fitted out and armed.

Reports have been received by the Danish Minister of War from the Danish Augustenburg, giving a precise enumeration of the Danish losses in killed, wounded and missing from the commencement of the war until the engagement before Duppel on the 18th ult. They amount to a total of 47 officers, two regimental surgeons, and 1,924 men.

Two Austrian vessels of war will operate in the Baltic in conjunction with three Prussian vessels which have been lying at Brest. Their instructions will be to protect the German mercantile marine to prevent the blockade of the mouths of rivers, and where it is necessary to capture the Danish cruisers. The combined fleet will be under the command of Commodore WULLERSTORF of the Austrian Navy.

A London correspondent says: The Danish army writes that the operation of relieving the pickets from duty hardly ever takes place without an exchange of rifle shots by way of mutual politeness. In some instances the Danes have found good humor of these Teutonic people gets the better of the pill intended for them, they watch each other's movements, and recently Danes and Prussians, after exchanging shots with their rifles, were actually pelting each other with snowballs, with the help of which they commenced a regular snow-ball battle.

A naval engagement took place on the 16th of March in the Baltic, near the island of Rugen, between five Danish steamers and two Prussian men-of-war, with some gunboats. The Prussian version of the affair is somewhat uncertain as very sharp, and describes it as resulting in the "withdrawal of the Danish vessels." It is certain that the Prussians were closely pursued by the Danes, but apparently succeeded in gaining shelter. The loss of the Prussian vessels is reported as trifling. The Danish official account says that the Danes were the victors. The Danish squadron was observed off Eckernforde, on the east coast of Schleswig, and a telegram from Hamburg states that it was feared that a bombardment of the town by the Danes took place, and troops were therefore at once dispatched thither. The Danes are evidently determined to maintain the aggressive actively at sea.

The wanton demolition by the allied Germans of the colossal monument of granite and bronze which was some years ago erected, by subscription, to the memory of Frederick, whole country, over the graves in the cemetery of Fleusburg of the officers and soldiers who fell in the glorious war in defence of their King and country, has caused the deepest indignation throughout Denmark. In *Fosterlandet* there is an article from the pen of the celebrated Danish historian, "On the Vandalism of the Demolition of the Schackenborg Monument at Flensburg," in which a retrospect is taken of the destruction of the most celebrated monuments of art in conquered countries; and attention is directed to the practice, which has become abandoned since the times of the Romans, had been again introduced by Napoleon I. in his ever memorable Italian campaigns, when he ordered the bronze horses belonging to the church of Treppa, and which he subsequently continued to follow, at the expense of Germany, after the battles of Austerlitz and Jena. The professor of archæology at Copenhagen remarks that while the Germans then poured forth against such "Vandalism," when, among others, SCHILLER, the most national of German poets, denounced it in the public Press of Berlin.

The military correspondent of the Vienna *Presse* shows that if the allied Germans wish to capture Fredericia as well as Duppel, some time will be required for the siege. Pontoniers, they will undertake a work which will cost them an immense amount of money, and delay them at least two months. Besides the fortress of Fredericia, the Danish line, possesses a front line of five thousand paces, has the sea in the flank and rear, and is protected by a strong fleet from the island of Funen. Field-telegraphs are laid throughout the entire circle occupied by the besieging forces, and a line is also constructed from Fredericia to Copenhagen, in consequence the method of communicating between the two places by means of ship signals is now abolished. Brocdter is particularly praised for the manner in which he has put into a steeple there they can overlook the Danes as far as Sondeburg. This steeple has now been converted into a complete observatory, from which the movements of the enemy, and already it has been found useful to the allies in making discoveries, as from there the country that is immediately know the distance of the batteries and other important features in the landscape.

The apprehension expressed by this correspondent appear to have been justified by events. On March 19th the Germans made a reconnoissance against Fredericia, and drove the Danish outposts into the works. On the 20th and 21st they they commenced bombarding the city, and succeeded in setting it on fire several times. The greatest impression was made on the fortress. The latest intelligence is that the Germans abandoned the siege.

A DISCUSSION ON IRON-CLADS.

AT one of the March meetings of the British Institution of Naval Architects several valuable papers upon Naval subjects were read by well-known gentlemen. The first paper was by Admiral Sir G. B. SHARPEY, and it "was on "The Forms, Armaments, Materials, and Construction of Vessels of War."

The Admiral commenced by alluding to correspondence in which he had been engaged in 1858, when he begged the Admiralty to ascertain whether it would be consistent with which would combine the speed and handiness of a rapid steamer with the power of carrying the most powerful artillery and gun-power of the floating battery then in use, together with the great longitudinal strength and form required for sailing at a blow. He stated at the time that the consequences which would ensue from the adoption of such a class of vessels would produce an entire change in naval warfare, as well as in the materials and mode of construction of ships; render old line-of-battle ships useless; make dockyards, arsenals, and stock, and almost the coast defences to a state of inefficiency, and, lastly, blockading countries' ports, and conveyance of troops in large ocean steamers of transports would be impossible.

The Admiral then went on to explain that he had a decidedly adverse opinion of the utility of monster iron-clad ships. As the vessels were only experiments, he thought it must unwise that so many should be building at one time, involving as they did a vast outlay, the enlargement of our docks, and preparations in our arsenals which, if they proved failures, would entail a dead loss upon the country. Was he not right in supposing that the Government had not yet proved satisfactory? Taking the *Warrior* as the representative of her class, if it was pierced in one or other of its unprotected ends, such as the bow, it would fall into the bulkhead so pierced, and so the pierced end would probably sink, but the ship would not sink, the opposite end being kept in the same proportion. This sudden alteration would eventually alter her manœuvring powers and speed, and so put her more under the control of the enemy, who, in smash, by sudder or pour in its own shot with impunity. The comfort under such circumstances could only end in one way. He was for a fleet of vessels of a less and easier seagoing qualities should be purchased at the expense of so serious an increase in fighting qualities. A partial protection were a necessity it would be better placed at the bow, however a vessel of the bulk of the *Warrior* must always be a chasing vessel, and not a retreating one, and the weakest point was to the strongest part of the enemy. Then, again, it was a very great mistake to suppose that speed was the first requisite in a fighting vessel. The *Achilles*, *Caledonia*, *Ocean*, *Minotaur*, and *Hercules*, it might be a necessity, but in a purely fighting machine what was the use of being the fastest cruiser in a squadron, unless you could overtake it? The *Prince Consort*, and the unfortunate position it got into on its late voyage to Portsmouth, was a case in point, and a proofs of the justice of his remarks. He was glad to find so good an authority as Mr. REED agreeing with him as to the value of the *Warrior* class, and he was pleased to the *Warrior* and other iron-clad vessels of its class.

But in condemning the iron class, the Admiral excepted the smaller vessels, such as the *Research* and *Hecate*, Mr. REED, especially those of the former. But, after all, one important fact was left out. The *Warrior* was capable of what it artillery proved their vulnerability they would be worse than useless. The Admiral's own plan has been altered, and he now proposes to build vessels of 6,000 tons, in which it was proposed to use 300 or 400-pounder guns and upwards, and always to fire on a line with the keel, and be so placed that the recoil should bring the gun-carriage; there recoil to be met by a succession of powerful buffer springs, the guns of the same placed in front, to check the counter-recoil. These guns to be placed elastically or together, and be so arranged as to suit the training of the ship. Armor-plating, 6 inches thick, to be used, to be made of wood it must be rendered non-inflammable, while water-tight bulkheads or linings of massive cork would prevent any danger from shot. In making the model of a ship the gun-carriage, the great difficulties connected with the horizontal tracking of heavy guns, and the uncertainty and sense of motion would be removed. A twin screws would then enable the ship to turn with the utmost ease, and with little loss of speed.

In conclusion, the speaker repeated the recommendation he made in 1855-61—viz., the nomination of a commission composed of the leading officers of the country, who were specially fitted for the investigation by education, profession, and talent. Such a commission appointed in times past would have saved the country untold expenditure now would save many more, as well as much of that not less important element, time.

Mr. SCOTT RUSSELL said he was afraid that all armor-plated ships were a compromise between qualities that were desirable and those that were undesirable. He agreed that in the *Warrior* and others of her class had faults, but in considering her present position it should be recollected what was the set of things. At the time she was built, the overloading vessels with iron plates, and so the wise plan was adopted of beginning by degrees. Now they knew much more that there was no danger to be apprehended in such cases from overloading, and no doubt in the future similar vessels would be better protected.

Mr. MOORE had arrived at a very different conclusion respecting the *Prince Consort* to that of Admiral SHARPEY. The ship was built by Mr. REED, and he had communicated with her, and the very bad weather, were points which had not been sufficiently considered by those who spoke in condemnatory terms.

A discussion also took place upon the practical value of gunboats, the general opinion being decidedly in their favor for rapid movements in shallow waters.

Admiral SIR EDWARD BELCHER next read a paper upon "The General Construction of Armor-plated Ships." The Admiral's opinion was not absolutely adverse of iron-clads, but only in so far as they deprived the practical naval officer of the use of his professional skill in the old wooden vessels, and he did not like any compromises between wooden and iron by the introduction of a sort of basket-work of both. What he wished them to recollect was that the greater part of the navy was composed of wooden vessels, and that they possessed many qualities, the fact that so, in days gone by, they had successfully fought against stone forts, they ought not now to be afraid of iron monsters, seeing that they had speed and so many other advantages in their favor. As to their boasted ram, he doubted whether they could ever be very useful against anything but a disabled vessel or one lying at anchor. At any rate, the ram must come to a vessel first; and to prevent the probability of that, he would have them to ensure safety, be advocated water-tight bulkheads, with the power of sudden turning, stopping, and manœuvring which the twin-screw principle had so materially aided. The great advantages of iron-clads were best seen when oppressed by a terrible gale, when the wooden ship must run for it or else, wounded below water-mark, the stowage had to be lightened by throwing stores overboard. In the course of the conversation which followed, the opinion was given that the ram which vessel against the Danish iron-clad *Rolf-krake* were only 12-pounders.

Mr. NORMAN SCOTT RUSSELL read a paper on "The Mortars of Tortesi and Brosdaldo Guns," the opinions expressed in which were to the general effect that the former would do for the smaller class of vessels, but that Brosdaldo were better adapted to heavy armaments.

A PICTURE OF THE HORRORS OF WAR.

A CORRESPONDENT with the Danish army at Sönderborg, writing on the 6th, says:

Those who would wish to see even a common-place example of what may be called the "horrors of war" should visit Dybbol. Since the armistice it is the most wretched spot of most of the localities of the eastern coast of this happy Alsatian peninsula. The style of building even of the meanest peasant dwellings is of perfect neatness to the beholder. The people's love for a thatch, as the best shelter from the storms of winter, and the universal partiality evinced for high slanting roofs, quaint gables, vanes, and chimney stacks, do not detract from the solidity of the masonry, from the substantial character of the timber, or from even the most unpretending abode. The Danish hoer is fond of home, and finds in the bosom of his resting family sufficient resources for the enjoyment of long hours of leisure. The Lutheran religion, free from wrangling dissent, sits easy to the mind of the peasant people; each village forms but one congregation, one community. The church is the bond of union; the clergyman is the common father, friend, and counsellor. Clergyman, in the true sense, is but a model farm; the clergymen it but one small degree removed above the common birds that roost, and feed, and live in such simple contentment as are the obliging of paternal deputies in olden times; but such comparisons as these lie in their nature, and are incompatible with the exigencies of modern freedom and the tendencies of perpetual progress. and no trifling proof of the truth has it been found in these lie in their unconsciousness of its inestimable value, in their readiness to take it for granted that they are no better off than other people, and in their inability to form their quiet enjoyment of existence is the common lot of all mortals.

But I perceive that I have digressed to give you an idyl about a living Danish village I was losing sight of my object, which was to write an elegy on a dead one. Dybbol was all I have described, standing up to the Fall of February; but Dybbol is no more. The inhabitants have migrated *en masse*, I know not whither. The door of every cottage is open, the fire-place is lifeless, a hideous filth upon every threshold. Many of the houses are still standing, the church has no roof, the steeple is shorn of its fair form, wilfully or accidentally been set to it here and there. But the silence and desolation are the more eloquent from that very reason, and the ruthlessness of the work is not one of natural decay. The Danish soldiers have neither wantonly destroyed nor profaned the humble dwellings; the Prussians, who have taken the place of the former, possessed not the heart, had no leisure for much mischief; but child and spoiler seem immediately to set in in the house from which mess, its owner, and family. The former have passed on through the lanes and alleys of the dead village took me to the hospitals, to the temporary residence of the Danish and Sundewett, turned into barracks, and I stepped into the churchyard, where soldiers were busy digging rifle pits and resting on their spades for a while to count upon what which the forefathers of the hamlet slept. Dybbol church is a large, strong edifice, and its churchyard has a commanding aspect; it has been selected as an excellent outwork to the Dybbol Hill bastions. It is sure to be a hotly contested spot, and the brave men that were turning the soil were, perhaps, only preparing the graves on which they might fall, never to rise. I had no sooner set my foot on the churchyard than a full-scale, but not an actual one met me that that Prussians were lurking about hardly 200 paces away, and that no man could stand and look out on the from the spot, and that no man could stand and look out on the from the spot, and that no man could stand and look out on the from the spot

MILITARY AND NAVAL MATTERS IN CONGRESS.

SENATE.

A RESOLUTION offered by Mr. GRIMES, of Iowa, was adopted, requesting the PRESIDENT to communicate to the Senate the names of all persons who have been sentenced by courts-martial for frauds or peculations against the Government, and pardoned by him since the first of December, 1863, together with the sentences from which his pardon relieved them; and also the names of all persons likewise sentenced by courts-martial for military offences other than fraud or peculation, and similarly pardoned; also a communication from the Secretary of the Navy, in reply to a resolution of Mr. GRIMES, relative to the number of men transferred from the military to the naval service, &c., was received, and ordered to be printed. We give the resolution and answer, bearing on the law of neutrality, was offered by Mr. ANTHONY, of Rhode Island, that the Committee on Foreign Relations be instructed to inquire into the expediency of so amending the neutrality law as to make it reciprocal to each Government, extending entire neutrality to those to which return the same, and to others to extend some of neutrality that they extend to us. A bill was reported by Mr. SHERMAN for the adjustment and settlement of claims for expeditions committed by the French prior to July 31, 1861. An important debate took place on the 6th inst. on the bill to increase the emoluments in the Revenue, but no action was yet taken on the bill.

The Secretary of War has sent a communication to the Senate, denying that any order had been given to General DIX to the Provost-Marshal of Baltimore in November, 1861, prior to the election in that month, by which a pass for the better organization of the Quartermaster's Department, was reported adversely from the Military Committee.

HOUSE.

A very important bill for the prevention of collisions was introduced on the 1st, by Mr. KELLEY, of Massachusetts, and passed by the House. The bill fixes the rules for preventing collisions between all steamers, tugs, &c. Mr. KELLEY explained that the object of the bill was to contribute towards a uniform international code. A letter from Lord LYONS called the attention of the State Department to the subject, and enclosed a code of rules adopted by Great Britain, to go into force in June, 1863, and expected to be adopted by our Government. This code was submitted to the Navy Department, and by it referred to a board, which gave the code a very careful consideration. The bill has been recommended by the Treasury Department. Copies of the bill submitted by Mr. KELLEY will be sent to different parts of the country, and the attention of persons interested in commerce called to it. Great Britain and France had adopted the code, and the Government and all the maritime powers would do so, thus making it international. All the responses to the Committee expressed but one opinion, and that was in favor of the code. It was a nearly perfect as it could be made. No opposition was made to the passage of the bill.

The following resolution relative to bounties was adopted on the 6th inst.:

Resolved, That the Committee on Military Affairs be requested, if in their judgment advisable, to report to this House a bill so amending the several laws and the act approved July 4, 1864, providing for the granting of bounties to "any volunteer who may be received into the service of the United States" as to provide that the whole benefits of such amount of bounty may be extended to all volunteers per their honorable discharge prior to the passage of said act, approved July 22, 1861, and who were killed or wounded, and, in the latter case, honorably discharged from the service on account of wounds received, the same to be paid in like manner as is provided for in the said act of July 22, 1861.

A resolution was also adopted which was offered January 14th by Mr. ARNOLD, directing the Secretary of War, if not incompatible with the public interests, to furnish a statement of the number of men called into the military service of the United States since the issuing of the late quota of each State under each call; the number furnished under also the number tendered under each call; the length of time for which they were accepted; the number of men furnished an excess over its quota; and how many and what State or States did not furnish its quota, and the number deficient. A resolution, offered January 7th, was likewise adopted, requesting the President of the United States, if not incompatible with the public interests, to communicate to the House the reasons why Major N. B. LEAR, lately stationed at Cincinnati, was ordered to report to Fort Leavenworth, also, whether said order contained any reflection upon the capacity or fidelity to the Constitution of said MAJ.EAR have been filed in any of the Departments. A resolution offered February 29th, by Mr. HOOPER, of Mass., was also adopted. It directed the Secretary of War, if not incompatible with the public interests, to furnish to the house information as to the amount of moneys received up to the present time in commutation by drafted men; also, what disposition has been made of such moneys. If substitutes have been procured for drafted men, how many; where and who have been procured as substitutes; what sum has been paid for each, and whether for white or black, and from what State each.

The house also laid on the table a resolution, offered February 8th, by Mr. HOOPER of Mass., directing the Secretary of War to communicate to the house the whole number of regiments of troops raised by the United States since the commencement of the present rebellion, and the time when each regiment was organized, and the number of privates in each regiment. 2. The amount paid for bounties, pay, and equipments of each regiment, and all other sums paid in connection with the organization thereof. 3. In what battles negro regiments have been engaged, and what regiments have been so engaged, and how many belonging to each regiment have been killed. 4. How many wounded in such battles, discriminating between the different battles.

A resolution offered by Mr. HOLMAN, of Indiana, directing the Committee on Military Affairs to report the bill increasing the pay of privates of the Army, was referred to that committee. The request of Mr. ROSS, of Massachusetts, for ten days leave of absence for the Committee on the Mississippi, in order to inspect sites for a Navy Yard on the Mississippi, in order to report a bill to that effect, or a joint resolution, in regard to the Mexican buttons, was passed unanimously. We give it elsewhere.

ARMY GAZETTE.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

TO BE BRIGADIER-GENERALS OF VOLUNTEERS.

Colonel Patrick Connor, of the 3d California, dated March 26, 1865.
Lieutenant-Colonel Gilbert R. Pass, of the 8th Infantry, April 18, 1864.

Colonel Samuel A. Rice, 33d Iowa Vols., August 4, 1863.

Colonel William Hoffman, 3d Maryland Vols., August 11, 1863.

Colonel Manning M. Force, 20th Ohio Vols., August 11, 1863.

Colonel Robert A. Cameron, 56th Illinois Vols., August 11, 1863.

Colonel John M. Corse, 6th Iowa Vols., August 11, 1863.

Colonel James C. Rice, 130th New York Vols., August 11, 1863.

Colonel Henry L. Eustis, 24th Massachusetts Vols., Sept. 12, 1863.

Colonel Henry E. Maynadier, 4th U. S. Artillery, Sept. 19, 1863.

Andrew J. Hamilton, of Texas, September 19, 1863.

Colonel Thomas Kilby Smith, 55th Ohio Vols., Sept. 19, 1863.

First Lieutenant George A. Custer, of the 5th cavalry, June 29, 1863.

TO BE LIEUTENANT-COMMANDER IN THE NAVY.

Lieutenant Edward P. Lull, to be a Lieutenant-Commander in the Navy, from the 6th of November, 1863, vice Lieutenant-Commander Paul Shirley, resigned.

BOUNTIES FOR SUBSTITUTES.

WAR DEPARTMENT, WASHINGTON, March 31, 1864.

Opinion.

The act of March 3, 1863, providing and calling out the national force, provides that any person enrolled and drafted may furnish a substitute, who shall be credited on the draft, and to whom the pay and allowances provided by law as if he had originally been drafted and had performed the service himself.

Section 12 of said act provides that any person enrolled and duly credited, and called into service, shall be placed on the same footing, in all respects, as a volunteer from the State in the service, including allowance pay and bounty, as this (March 3, 1863) provided by law. And the act further provides that the payment of bounty to volunteers for three years or the war was the statute approved July 22, 1861, which provides that the bounty shall be paid to her that act should have served for a period of two years or during the war, and to which the bounty of one hundred dollars is added thereto. Therefore, a substitute, whether procured by a person who has been drafted or who has volunteered, if he serve two years and until discharged, is entitled to receive from the Government the bounty of $100, and pay and allowances for the same terms and conditions as are applicable to bounties paid to volunteers.

WILLIAM WHITING,
Solicitor of the War Department.

FURLOUGHS TO APPLICANTS FOR APPOINTMENTS AS REGULARS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, WASHINGTON, March 29, 1864.

General Orders No. 125.

Furloughs, not to exceed thirty days in each case, to the non-commissioned officers and privates of the volunteer service who have passed the free military school at Philadelphia, may be granted by the commanding officers of their regiments, when in the opinion of such commanding officers the interests of the service will not suffer thereby, and the necessity of the applicants are such as to warrant their immediate application for appointments in the regular army, and the recommendations of appointment by the regiments of colored troops.

By order of the SECRETARY OF WAR.
E. D. TOWNSEND, A. A. G.

PAY OF OFFICERS RESIGNING OR DISMISSED.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, WASHINGTON, March 16, 1864.

General Order No. 103.

1. An officer on leave who resigns, will be paid to the date given in the leave, unless he is ordered to report.

2. An officer on duty who resigns, will be paid to the date at which he is relieved from duty, unless the date inclusive of the resignation be continued on duty till that time; otherwise, to the date when he was relieved from duty.

3. An officer on leave when he is dropped or dismissed from the military service, will be paid to the date inclusive of the order dropping or dismissing him, provided no other time be specified in the order of leave. If he report before the date of the order, he will be paid to the date of his reporting.

4. An officer on duty or in hospital when he is dropped or dismissed from the military service, will be paid to the date at which the order dropping or dismissing him was received at his post or hospital, if no other time be specified in the order. If the order be received by him as an officer, and, in such case, to the date so specified.

5. The commanding officer of a regiment or corps will be paid to the date when the order approving the sentence was received at the post where the officer was serving, unless the order fixed a later time, or in the order promulgating it, as the termination of his service and pay.

By order of the SECRETARY OF WAR.
E. D. TOWNSEND, A. A. G.

ENLISTMENT IN THE MARINE CORPS AND NAVAL SERVICE.

WAR DEPARTMENT, PROVOST-MARSHAL-GENERAL'S OFFICE, WASHINGTON, March 16, 1864.

CIRCULAR No. 16.—In accordance with a "Resolution relative to the enlistment in the Marine Corps and Naval Service," recently adopted, approved Feb. 24, 1864, Provost-Marshals, in addition to their other duties, will perform the following duties relative to Marine Corps:

1. Upon the application of any person to be enlisted in the Naval service, or in the Marine Corps, the Provost-Marshal will furnish to such applicant a blank form of application for enlistment, and to such applicant pass the examining surgeon provided for recruiting and enlisting the Army, and will furnish to such surgeon a blank form of descriptive list and letter of transmittal to the commanding officer of the station, stating the name of the applicant for enlistment to which he is to be credited. When the man shall have presented himself at the Naval rendezvous for examination, the commanding officer will notify the Provost-Marshal that the person has been received or rejected.

2. When any person between the ages of 18 and 35, and not less than five feet four inches in height, shall have served in the Army for the full enlistment, and are of robust health, he may be taken at 45 years of age, applies to be enlisted in the Marine corps, the Provost-Marshal shall cause such persons to be physically examined by the Surgeon of the Board of Enrollment, and if such applicant pass the examination prescribed for drafted men and volunteers, he shall be sent to the nearest recruiting rendezvous for the Marine corps, with a descriptive list and letter of transmittal to the recruiting officer in charge, stating the name of the applicant to which he desires and is to be credited. When the man shall have presented himself at the Naval rendezvous for examination, the commanding officer will notify the Provost-Marshal that the person has been received or rejected.

3. Separate abstracts and accounts for subsisting and lodging, and for the transportation of these persons to the rendezvous, will be kept by the Provost-Marshal, and will be sent at the end of every month to the Provost-Marshal-General.

4. Able or ordinary seamen enlisted in the Naval service receive an advance of twenty-five dollars. This advance is to be retained from the prize money to which they may be entitled. This advance money will be paid by the Naval officers. Recruits enlisting in the Marine corps do not receive advance pay or bounty from the United States, but are entitled to prize money. Men who have served a term in Marine corps are received on the quotas for draft the same as men for the Army.

5. The rendezvous established for the Naval service are as follows, viz.:—Portsmouth, N. H.; Boston, Mass.; New York, N. Y.; Philadelphia, Penn.; Baltimore, Md.; Washington, D. C.; Erie, Penn., Sandusky, Ohio; Chicago, Ill., and St. Louis, Mo.

6. The rendezvous established for the Marine corps are as follows, viz.:—Portsmouth, N. H.; Boston, Mass.; New York, N. Y.; Brooklyn, L. I.; Navy Yard; Philadelphia, Penn., Navy Yard; Baltimore, Md.; Washington, D. C., Navy Yard; Pittsburg, Penn.; Washington, D. C., Marine Barracks.

7. Provost-Marshals will give proper publicity, by advertisements, to the subject of recruiting for the Navy and Marine corps, and will send the blanks to the Provost-Marshal-General.

JAMES B. FRY, Provost-Marshal-General.

CHANGES AND ASSIGNMENTS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, WASHINGTON, Monday, April 4, 1864.

By direction of the President of the United States the following changes and assignments are made in Army corps commands:—

Major-General D. E. Sickles is assigned to the command of a Corps of the Army of the Potomac.

The 3d and 2d Divisions are consolidated and will be called First Army corps. Major-General J. Hooker is assigned to command.

Major-General Gordon Granger is relieved from the command of the Fourth Army corps and will report to Major-General Hooker for assignment in his stead.

Major-General Schofield is assigned to the command of the Twenty-third Army corps.

Major-General Meade will report to Major-General Sherman, commanding the division of the Mississippi, and Major-General Sherman will report to Major-General Halleck, commanding the Military Division of the Ohio, for assignment.

The Chief Engineer will report by letter to the Adjutant-General for duty.

Captain George Porter, United States Ordnance Department, is relieved from duty as Aide-de-Camp to Lieutenant-General Grant, and will rejoin his proper station.

By order of the SECRETARY OF WAR.
E. D. TOWNSEND, Assistant Adjutant-General.

That portion of the order relative to the consolidation of the 1th and 12th corps has been annulled so as to denominate the consolidation the Twentieth Army corps, and the 4th Division of Twenty-

CONFEDERATE BILLS, &c.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, WASHINGTON, March 8, 1864.

General Orders No. 69.

All Confederate bills, notes or bonds in the hands of officers or soldiers of the United States Army, will be sent to the Adjutant-General of the army, with a special statement how and from whom they were received, and the value in Confederate money the same is stated to be; and if any portion has been expended, the amount and to whom paid, and the value in Confederate currency of the disbursements, and also in the field, independent posts, regiments and companies, and on what in the execution of the order.

By order of the SECRETARY OF WAR.
W. A. NICHOLS, A. A. G.

DISMISSALS

For the week ending March 26, 1864.

Captain Irving Haley, 5th Ohio cavalry, to date March 24, 1864, for disobedience of orders in refusing to obey orders of superiors, and conduct unbecoming an officer and gentleman.

Captain De Witt C. Hamilton, 2d Missouri cavalry, 20th Independent battery New York Vols., to date January 14, 1864, with loss of all pay and allowances, for unsoldierly conduct in submitting that commission from the Governor of New York.

First Lieutenant Thomas R. Rees, 15th Illinois cavalry, to date March 22, 1864, for drunkenness and conduct unbecoming an officer and gentleman.

First Lieutenant Hiram A. Weed, 23d Pennsylvania Vols., to date March 24, 1864, with loss of all pay and allowances, for a pretended false and fraudulent account against the Government.

First Lieutenant Augustus Wilson, 1st Dakota Vols., to date March 24, 1864, for habitual drunkenness.

Second Lieutenant Lewis Brockwood, 10th Missouri cavalry, to date March 24, 1864, with loss of all pay and allowances, for a pretended claim of Mississippi, after receiving orders not to do so.

Second Lieutenant Charles Wilson, 1st Dakota Vols., to date March 25, 1864, with loss of all pay and allowances, for gross immorality and his conduct unbecoming an officer and gentleman, and especially for association with the officers and men of his regiment.

Second Lieutenant Wm. H. Bowen, 1st Dakota Vols., to date March 26, 1864, with disgrace, for presenting false and fraudulent accounts against the United States.

Surgeon E. L. Perkins, 34th Missouri cavalry, to date March 24, 1864, for habitual drunkenness and neglect of duty. Surgeon Perkins is E. L. Perkins, 19th Missouri cavalry.

Assistant Surgeon Thomas Hall, Commissary Subsistence of Vols., to date March 25, 1864, for conduct unworthy an officer and gentleman, and conduct to the prejudice of good order.

Second Lieutenant Philip R. Freedl, 8th New York artillery, to date March 26, 1864, with loss of all pay and allowances, for a pretended false and fraudulent account against the Government.

First Lieutenant Alfred Wilson, 1st District of Columbia cavalry, to date March 26, 1864, with loss of all pay and allowances, for a pretended false and fraudulent account against the U. S.

United States, in consequence of desertion as a private from Co. E of the 1st New York cavalry, and subsequent arrest as an deserter of the 1st New York cavalry.

Captain Thomas G. Ruby, 12th regiment Veteran Reserve corps, to date March 26, 1864, for habitual drunkenness.

The following officers, to date March 7, 1864, for absence without leave, having been published officially and failed to appear before the commission:

Surgeon Wm. Hall, 34th Missouri Vols.

Surgeon J. S. McConaughy, 17th Missouri Vols.

Surgeon Henry Bergen, 1st New York Vols.

The following officers, to date February 29, 1864, for the causes mentioned, having been published officially and failed to appear before the commission:—

Absence without leave.

Captain Asaph H. Sweet, 9th Kentucky Vols.

First Lieutenant Christian Stenner, 11th Pennsylvania Volunteers (Reserve), 1st Pennsylvania Vols.

Lieutenant H. H. Thrcher, 9th Ohio Vols.

First Lieutenant Wm. Hall, 1st New York Dragoons.

Second Lieutenant Michael Redmond, 11th New York Vols.

Failing to report to commission after leaving hospital, as ordered.

Captain W. H. Elfort, 2d Kentucky cavalry.

For enlisting a man physically disqualified for service, who had been previously discharged for that cause, and re-enlisting him.

First Lieutenant Samuel E. Reese, 16th Pennsylvania cavalry.

DISMISSALS APPROVED.

The orders of dismissal heretofore issued in the following cases have been approved:—

Lieutenant-Colonel Henry Finnegan, 3d regiment Corps d'Afrique; to date September 12, 1863, for disobeying the orders of his commanding officer upon the field of battle, at Fort Hudson, on the 27th day of May, 1863.

Captain W. H. Daley, 2d regiment Corps d'Afrique, to date February 15, 1864, for drunkenness on duty, breach of arrest, and conduct unbecoming an officer and gentleman.

Second Lieutenant Peter Wessenstin, 16th Pennsylvania Vols., to date February 15, 1864, for being drunk on duty, and for striking a picket post in the advance in the night time; going before the officer upon the field of battle, at Fort Hudson, on the 27th day of May, 1863, and ordering himself; firing his pistol, to the alarm of the

night, and remains absent until three o'clock in the morning, in derogation of his duty as an officer.

Captain Charles W. Alvord, 1st Louisiana mounted infantry, to date March 14, 1864, for having appeared drunk on the public streets of New Orleans.

DISHONORABLE MUSTER OUT.

Upon the reports of his regimental commander and the Governor of Ohio, Captain Thomas Rowe, 77th Ohio Vols., has been dishonorably mustered out of service, to date September 29, 1863, for absence without leave.

DISMISSALS REVOKED.

The orders of dismissal in the cases of the following cases have been revoked:—

Captain A. B. Hart, 2d regiment U. S. sharpshooters, he having been previously honorably discharged upon tender of resignation.

Second Lieutenant Wm. Hall, 2d Ohio heavy artillery, New York, and he is honorably discharged, as of the date of the order of dismissal.

Captain B. B. Chaffee, 4th Michigan Quartermaster of Vols.

Captain John Trible, 6th Illinois Vols.

Assistant Surgeon Harrison Hall, 4th Ohio Vols., and he is honorably discharged.

RESTORED TO COMMISSION.

The following officers, heretofore dismissed, are restored, provided the reasons therefor shall not in the judgment of the Governors of respective States:—

Major J. Q. Anderson and Major B. Reinhold, 19th Pennsylvania cavalry, will rank from the date at which they rejoin their commands.

Major W. W. Wilson, 126th Illinois Vols.

Captain D. C. Hotchkiss, 2d Wisconsin Vols.

Captain C. H. Hendrie, 16th New York Vols.

First Lieutenant Samuel Saylor, 1st Ohio heavy artillery, published February 3, 1864, to rank next after Lieutenant Wm. Cosby, dated January 30, 1864, as First Lieutenant Samuel Taylor, 1st Ohio heavy artillery.

Captain Wm. Bowden, 20th New York cavalry.

First Lieutenant Stephen L. Hubbard, 22 Massachusetts heavy artillery.

Second Lieutenant E. L. Palmer, 16th regiment Veteran Reserve Corps.

NOTICE TO DELINQUENTS.

The following officers will please report at the headquarters of the Army for the offences hereinafter specified, are hereby notified that they will be dismissed the service of the United States, unless within fifteen (15) days from April 4, 1864, they appear before the Military Commission, of which Major-General Darius N. Couch, Brigadier-General Ricketts, U. S. V., is President, and make satisfactory defence to the charges preferred against them:

For giving dispilotte discharges to enlisted men in violation of paragraph 165, Revised Army Regulations.

Captain Benjamin Berrien, 75th Ind. Vols.

First Lieutenant Edward Hayes, 46th New York Vols.

Colonel Robert F. Taylor, 11th Ind. Vols.

For failing to report under arrest at Headquarters Military District of Washington, as ordered.

Captain John M. Knott, Pennsylvania Reserves.

Conduct unbecoming an officer and a gentleman.

Lieutenant Louis W. Jackson, 1st Connecticut artillery:

Absence without leave.

Second Lieutenant S. Mitchell, 3d Wisconsin, 4th New York Vols.

First Lieutenant Rudolph Meyer, 68th New York Vols.

Second Lieutenant Wm. Bradley, 1st Ohio heavy artillery, New York.

First Lieutenant Jesse J. Bowers, 16th Pennsylvania cavalry.

Second Lieutenant Edward Morris, 2d Ohio battery.

EXEMPT FROM DISMISSAL.

The following named officers charged with offences and heretofore published are exempt from dismissal from the service of the United States, the military commission instituted by special orders No. 53, series of 1864, War Department, Adjutant-General's Office, to whom satisfactory defence has been made in their respective cases, namely:—

Colonel Benjamin F. Smith, 11th Ohio Vols., to be dismissed.

Captain Jacob V. Gish, 16th Pennsylvania Vols., to be dismissed.

First Lieutenant Andrew T. Brown, 139th Pennsylvania Vols.

SENTENCES OF COURTS-MARTIAL.

Lieutenant Frank Bergen, 1st U. S. Artillery, Commissary of Musters, Department of the South, to be dismissed the service for drunkenness and frequenting saloons and coalitions of War Department Gilmore, commanding the Department of the South.

First Lieutenant Samuel Saylor, 1st Ohio Vols., to be dismissed the service for neglect of duty and conduct prejudicial to good order and military discipline.

Second Lieutenant Alpheus H. Reeder, 61st Pennsylvania Vols., to be cashiered for absence without leave, and conduct unbecoming an officer and a gentleman, and conduct to the prejudice of good order and military discipline.

Second Lieutenant Eugene Sullivan, 6th New York cavalry, to be dismissed the service for absence without leave. The sentences in all of the above cases have been approved by Major-General Meade, commanding the Army of the Potomac.

Lieutenant-Colonel A. S. Austin, Chief Commissary of Subsistence, cavalry corps, Army of the Potomac, to be suspended from rank for thirty months for absence without leave.

Second Lieutenant F. F. Null, 12th New Jersey Vols., to be cashiered for conduct unbecoming an officer and a gentleman, and prejudicial to good order and military discipline, and violation of the 83d article of war.

Major James F. Ryon, 6th Pennsylvania Vols., to be dismissed the service for conduct prejudicial to good order and military discipline.

Lieutenant-Colonel Charles Townsend, 126th New York Vols., to be suspended from rank and pay for a period of six months, for absence without leave.

The sentences in all of the above cases have been approved and confirmed by Major-General Meade, commanding the Army of the Potomac, with the exception of that of Lieutenant-Colonel Townsend, from rank to Lieut.-Colonel Townsend's case has been remitted.

MEDICAL DEPARTMENT.

ORDERED.

Surgeon Artemus Chapel, U. S. Vols., has been relieved from duty in the Army of the Potomac, and ordered to report in person without delay to the commanding general of the Middle Department, Major-General Schenck, Baltimore, Md., for assignment to the General Hospital at Camden, Baltimore, Md., relieving Surgeon H. H. Burdick, U. S. Vols., who will report in person without delay to the commanding general of the Department of the Susquehanna for duty in Chief of Philadelphia.

Hospital steward Powell, to examination.

Gaylord, 2d Illinois, and Corporal Stewart Mitchell, 126th Russell, 5th Guilford Vols., have been discharged the service with a view to their reenlistment in the Veteran Reserve Corps.

SUSPENDED.

The order directing Surgeon Wm. J. McKibben, to report to the commanding general of the Department of the Susquehanna, has been suspended until further orders in consequence of his request for examination of appointees for commissions in the Veteran Reserve Corps are completed.

LEAVE OF ABSENCE

Leave of absence has been granted the following officer:—

Assistant Surgeon C. B. Taylor, 10 days.

Assistant Surgeon W. H. Eudes, Emory Hospital, Washington, D. C., to include the 9th of April.

NAVY GAZETTE.

CIRCULAR.

NAVY DEPARTMENT, WASHINGTON, March 6, 1864.

Section 7 of an act approved February 24, 1864, for crediting and paying certain seamen, and for other purposes, provides "that all the bounty money which any mariner or seaman relisting from the United States Navy, shall have received from the United States, or from the State in which he enlisted in the Army, shall be deducted from the prize money to which he may become entitled during the time required to complete his military service; and section 2 of a public resolution, approved February 9, 1864, provides that there shall be paid to each enlisted able or ordinary seaman hereafter enlisted into the naval service for a period not less than one year a bounty, to be refunded to the Treasury from any prize money to which such person may become entitled." In the forwarding prize lists to the department, commanding officers will see that a note is made against each relisted man, that the bounty in any cases under any or the other of the above sections, and for the same be stated on all vouchers for prize money, and that the rolls of vessels and receiving ships be carefully examined, and the names of all entitled to another, and on all shipping articles and enlistment returns.

GIDEON WELLES, Secretary of the Navy.

Acting Master Thomas Pickering, to the grade of Acting Volunteer Lieutenant.

REVOKED.

The appointment of the following officer has been revoked:—

Acting Master's Mate Wm. Hall.

NAVY YARDS.

[The Editor would be glad to receive correspondence relating to Naval affairs, and to the condition of Navy Yards, for publication under this head.]

BROOKLYN NAVY YARD.

The steam gunboats *Buckthorne* and *Matchabelt* went into commission on the 7th instant, and are now lying at anchor in the East River, ready for service. The *Matchabelt*, which has been lying at the Yard for some time, will now take the tow into the Sprouts, and is now undergoing repairs upon her bottom. The steam-frigate *Brooklyn*, also the iron-clads *Canonicus* and *Passaic*, are still here. The steam-frigate *Niagara*, Commodore Thomas A. Jenkins, returned on the 3d from an unsuccessful cruise in search of the missing Italian frigate *Re d'Italia*, having been out fifteen days. The officers report having experienced a continuation of gales, during which the ship rolled fearfully, her lower yard-arms dipping at every roll. She encountered a number of vessels, which all more or less complicated all the fires, and during a heavy gale March 2d, she lost a part of her rigging. The *Niagara* is said to be unpopular with most of her officers, and that since the commodore came on board, he has not been on speaking terms with any one of the officers, as per at the Charlestown Navy Yard she is almost useless to go to sea in heavy weather. She is now anchored in the East River.

PORTSMOUTH NAVY YARD.

The riggers are aboard the *New Hampshire*, and some of the standing rigging is up, and the officers' quarters are being completed. The *Agawam* has received an additional armament of two 9-inch, and will probably leave soon. The *Vandalia*, receiving ship, is getting recruits daily. Some officers are ordered to the *Alabama*. The work in the Yard is going on briskly. The following changes are announced:—Acting Master J. Randall is attached from the *Tahoma* and ordered to the *Vandalia*. Acting Master Andrew A. Ward is detached from the *Vandalia* and ordered to the *Philippi*.

OTHER NAVY YARDS.

We have nothing of much importance to report from other Navy Yards. Rear-Admiral Lee has ordered the *Sabine* to be ready to launch at Portsmouth, N. H., on the 16th instant. All the other vessels of the first batch of Government built iron-clads, the *Canonicus*, *Passaic*, *Montauk*, *Patapsco*, and *Nahant*; and the *Ironsides* at the Navy Yards the new ships, which were ordered some time since, are under way. The *Ketamazon*, at Brooklyn, has her nine all up, and is going into frame rapidly.

PRIZE CASES ADJUDICATED.

The following prize cases have been sent to the Fourth Auditor's Office by the Solicitor of the Navy for settlement. From the money will be ready for distribution in a short time:—

UNITED STATES TREASURY.

NEW YORK, March 24, 1864.

By direction of the Secretary of the Treasury, I hereby give notice that I am prepared to receive subscriptions on account of UNITED STATES BONDS authorized by the Act of March 3, 1864, bearing date March 1, 1864, redeemable at the pleasure of the Government after ten years, and payable forty years from that date, bearing interest at the rate of seven 3-10ths, payable on Bonds not over one hundred dollars annually, and on all other Bonds semi-annually, in coin.

Subscribers will receive either Registered or Coupon Bonds, as they may prefer.

Registered Bonds will be issued of the denominations of Fifty Dollars ($50), One Hundred Dollars ($100), Five Hundred Dollars ($500), One Thousand Dollars ($1,000), Five Thousand Dollars ($5,000), Ten Thousand Dollars ($10,000); and Coupon Bonds of the denominations of Fifty Dollars ($50), One Hundred Dollars ($100), Five Hundred Dollars ($500), and One Thousand Dollars ($1,000.)

Subscribers will be required to pay, in addition to the amount of their subscription, the accrued interest, in lawful money, the accrued interest in coin on the United States notes, or certificates of Deposit bearing interest, for each, for premium until further notice from the first day of March or September, as the case may be, until the day of subscription and payment.

Upon the receipt of subscriptions, I will issue my certificate of deposit therefor in duplicate, the original of which will be forwarded by the subscriber to the Secretary of the Treasury, Washington, with a letter stating the kind (Registered or Coupon) and the denomination of Bonds required.

Upon the receipt of the original certificate at the Treasury Department, the Bonds subscribed for will be transmitted to the subscribers respectively, as soon as the same can be prepared.

It is expected that the first deliveries of Coupon Bonds will be made not later than the fourth (4th) of April.

A NEW BOOK ON THE RIFLE.

D. APPLETON & CO.,
Nos. 445 and 443 Broadway, New York,
PUBLISH THIS DAY:
HINTS TO RIFLEMEN,
By
H. W. S. CLEVELAND.
1 vol., 18mo, cloth.
Illustrated with 25 Extensive Engravings.
Price $1 50.

This volume has been prepared by the author of "Hints to Horsekeepers," and will satisfy all "The Use of the Rifle" in order to meet a demand which has arisen from the great increased employment of the war. The only recent American works on the subject are Gardner's and Berdan's, which are chiefly to military readers, and the best foreign works are not calculated for the American system of target shooting. A very large number of new guns have appeared lately, the comparative merits of which the persons have no opportunity of testing. At the same time the number has very greatly increased of those who are impressed with the importance of making themselves familiar with the use of rifles, and who have no time to select from the numbers offered for sale.

The volume contains an exposition of the principles upon which the best performance depends, so that any one may judge, after a little trial, how far they are adhered to in any case. Accurate descriptions of the best American rifles are given, with the reasons for their success, with more than 30 engravings. The whole subject is presented in such a manner as to prove interesting to the general reader.

Sent free by mail on receipt of price.

U. S. NAVY.

NEW YORK COUNTY VOLUNTEER COMMITTEE OFFICE, NEW BUILDINGS, cor. Chambers-st. and Broadway.

5,000 RECRUITS WANTED FOR THE NAVY.

COUNTY BOUNTY OF $250 AND $100,
CASH DOWN.

The United States authorities having, in order to fill up the Navy, authorized the undersigned to act in that branch of the service, and guaranteed that recruits for the Navy shall be credited to the town or the places where they elect to be credited the same as if they enlisted in the military service, the undersigned, therefore, are now prepared to pay recruits for the Navy the following bounties, and on the following terms, viz.:

Those entitled to the county bounty only.

When enlisting for one year.....$125
When enlisting for one year, and re-enlisting for another year before discharge.....$250

ANY PERSON BRINGING A RECRUIT FOR THE N. Y. NAVY TO THIS OFFICE WILL RECEIVE A COUNTY PREMIUM OF $15.

Seamen and ordinary seamen, who will be shipped for two years, will receive, in addition to the above bounty of $250, three months' pay in advance, and three months' extra pay as Government bounty.

Landsmen, who will be shipped for

First-class Firemen.....$30 per month.
Second-class Firemen.....$26 per month.
Coal-passers.....18 per month.
Ordinary Seamen.....14 per month.
Ordinary Seamen.....14 per month.
Boys.....16 per month.

Boys will not be under sixteen nor over eighteen years of age, stout, in good health, and not below four feet nine inches high. In all cases the consent of the parents or guardians must be first obtained.

The Navy Agent and the Master Commandant are the only persons authorized to act as recruiting officers in this city.

All recruits thus enlisted, and receiving the bounties above specified, are credited to the quota of the City and County of New York.

APRIL 9, 1864.

THE NATIONAL MILITARY JOURNAL.

THE UNITED STATES
ARMY AND NAVY JOURNAL,
AND
GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

Officers of the Army and Navy will find in the Journal the only paper in the United States exclusively devoted to Military and Naval affairs, and the only one in their interest which has ever received military favors and influence in this country to enable it to meet, with so long felt, of an organ which should scrupulously represent them in the Press. Starting under the most favorable auspices, enjoying the encouragement and aid of the Government and people in this country, serving parties and partisanship of all kinds, and receiving but with singleness of purpose to the impartial discussion of the important questions of the day, and the collection of correct information, it has, in less than six months, established for position as the authoritative organ of military discussion and criticism in the United States. The rapidity with which it has secured a circulation, hardly exceeded by that of any paper of its class in the world, and the agreement with which it has been greeted in the Army and Navy, and by the more intelligent of civilians, would seem to the necessity for such a Journal, and afford gratifying evidence that the effort to establish a paper which should stand side by side in ability and completeness with the best of the military Journals of Europe and France, has not been in vain. As a Gazette of Military and Naval matters, it is proving itself indispensable to every soldier and sailor; while as a weekly chronicler and server of the war it must be invaluable for its accurate history of the progress of events, for the judicious suggestions and discussions. Its articles are from the pens of the ablest military writers, and its special production of original matter is a feature which will establish that that of any periodical ever issued in this country.

TERMS.

The terms of the paper are FIVE DOLLARS a year, PAYABLE IN ADVANCE; THREE DOLLARS for SIX MONTHS. SINGLE COPIES TEN CENTS. For sale by all newsdealers. It is published weekly at the office of publication, on the publication days, convenient for binding, and printed in the best type, and on fine paper.

HOWES & BOUVIER,
184 Broadway.

CHICKERING & SONS,

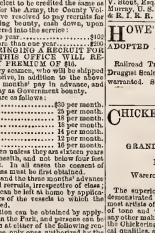
MANUFACTURERS
OF
GRAND, SQUARE, AND UPRIGHT
PIANO-FORTES,

WAREROOMS, 652 Broadway, New York.

The superiority of these Instruments is amply attested by the testimony of Professors and Artists of the highest musical taste of the day, who claim for them excellence of tone and workmanship, decidedly manifested by any other makers. Mr. Gottschalk's constant use of Chickering Pianos has secured for them the highest musical qualities, and resulted in establishing the justice of the very flattering testimonials in which they are noted.

MESSRS. C. & SONS have been awarded 50 FIRST MEDALS, over all competitors, for the superiority of their instruments, their claims resting upon the combined qualities of great power, brilliancy and purity of tone, and singing quality of touch.

MULLIGAN'S PATENT MESS KETTLE.



ARRANGED FOR FOUR OFFICERS.
PRICE $20.00 EACH.
Endorsed by the best officers in the service.
Manufactured by 379 FIRST STREET, NEW YORK.
LILLIE & SCRIBNAN.

BALTIMORE AND OHIO RAILROAD

RE-OPENED!

THE great National thoroughfare is again open for LIGHT AND TRAVEL. The cars and locomotives destroyed are being replaced by new running stock, and all recent improvements and conveniences for travel are again in substantial condition, the well-earned reputation of this Road, for SPEED, SAFETY AND COMFORT, will be more than sustained under the management of the present Board of Directors. The unpaid attractions of natural scenery heretofore noted in this route, the numerous points of interest, will before have associated numerous points on the Road. Among the latter the Harper's Ferry, with its public but instructive interest.

The Ohio River, with Cleveland and Pittsburgh, Parkersburg, Cincinnati and Louisville Railroads all connect with this Road, and by way System of Railways and Steamboats, with the Southern States, Washington City and the Lower Potomac. Also Steamboat with Fortress Monroe, Norfolk and New York.

TWO DOLLARS additional on Through Tickets to Baltimore or the Northern Cities, give the privilege of visiting WASHINGTON CITY en route.

This is the ONLY ROUTE by which passengers can secure Through Tickets to Washington City.

J. H. SULLIVAN,
General Western Agent, Bellaire, O.
L. M. COLE,
General Ticket Agent, Baltimore.
J. W. SMITH,
Master of Transportation, Baltimore.

Nos. 443 and 445 Broadway,
Have just published
PRACTICE IN APPEAL AND ORIGINAL DEPARTMENT OF THE GOVERNMENT,
By ROBERT SEWELL.
1 vol. 8vo. law sheep, $5 50.

From the U. S. Pension Office.
"A careful examination of its pages of this book satisfies to Pension Law and Practice has led me to the conclusion that for the purpose of attorneys and claimants before this Office, no more valuable work can be found. The omission of all matters of matter, and the attempt to meet all inquiries as to the details of practice, are among the very Pension Laws which now has any great interest for claimants or attorneys, may be specified as of particular value. The clear style, the useful tone, in which you have treated the various topics contained in the book, also should also commend the work to general favor, and I can certainly commend it to the attention of all persons interested in the various matters of which it treats."

Sent free by mail to any address on receipt of the price.

SAMUEL V. NILES,
(Late of the Court of General Land Office.)
MILITARY, NAVAL, AND
GENERAL AGENCY.
(Established in 1851.)
OFFICE AND RESIDENCE, 293 1st. bet. 20th & 21st sts.
Washington, D. C.

Having had the exclusive charge of the "*Revolution, War and Wars*" 1812, *Bounty Land Bureau, General Land Office*, for several years, and being familiar with the business of the various branches of this Department, and of the Navy, and of the Adjutant-General's Bureau, offers his services to the public as an Attorney and Counsellor in the adjustment and collection of

DEMANDS AND CLAIMS AGAINST THE GOVERNMENT

in all departments, especially claims growing out of the present war.

Particular attention given to Pensions due to Officers, Soldiers, Sailors, Marines, and Heirs of the Army and Navy of the United States, and the widows, children, mothers and sisters of those who have been killed, or died from wounds and sickness contracted in the service.

Claims for indemnity for property destroyed, and for quarters, fuel, forage, and extra pay, will be forwarded, and solicitation &c., and for horses lost, died, killed, or worn out in the service of the Army, Adjutant of Pay, and Prize Money due Officers, Soldiers, Sailors, Marines, and Seamen, or the Heirs, &c., &c.

Any business before the *General Land Office, Indian Office*, or other Departments, and before the *Court of Claims*, requiring the services of an Attorney, will meet with prompt attention.

REFER TO
Hon. Thomas A. Hendricks, U. S. Senate, *late Com. G. L. O.*, Bloomington, Ind.; Hon. Wm. Pitt Kellogg, *Com. G. L. O., Chicago, Ill.*; Hon. Joseph S. Wilson, *late Com. G. L. O.*, Washington City; Hon. Joseph Casey, Whiting, *late Com. Pen., Washington City*; Riggs & Co., *Bankers, Washington*; J. Rittenhouse, Fsq. & Co., *Bankers, Washington, D. C.*

Correspondence solicited from Attorneys at Law, and respectfully solicits from them a share of their business.

Office hours from 9 A. M. to 4 P. M.

Detailed information will be given when so required as to conditions relating to claims together with the necessary blanks, and such instructions as may be required to conform to any modifications of the laws, or the requirements of the Departments in relation thereto.

No fees once required.

All letters, to secure prompt attention, should contain postage stamps.

Address SAMUEL V. NILES, Attorney,

Officers visiting the necessities of active service, or the perfection of their outfit, should call, will do well to examine this large collection of Foreign and Domestic Arms, Uniforms and Miscellaneous Trappings.

CAUTION FROM THE AMERICAN

WATCH COMPANY.

It having come to our knowledge that imitations of the American Watch have but upon the market in great numbers, calculated, by that upon the market to deceive the purchaser, we respectfully caution the public—to protect our own interests as well as those imposed upon, we have published the marks by which our Watches may invariably be known.

We mention the name and styles of the Watches. The trust has the name

"AMERICAN WATCH CO., Waltham, Mass."

engraved on the inside plate.

The name may be on the dial, as

"APPLETON, TRACY & CO., Waltham, Mass."

"AMERICAN WATCH CO., Waltham, Mass."

The trains has the name

"P. S. BARTLETT, Waltham, Mass." engraved on the inside plate.

All the above styles have the name "American Watch Co." painted on the dial, and are warranted in the movements.

The escape has the name

"P. S. BARTLETT, Waltham, Mass." engraved on the inside plate, and is not named on the dial.

All the above Watches are made of various grades, and are sold in gold or silver cases, as may be required.

It is hardly necessary for us to comment more upon the numerous imitations to which we have alluded. They are made in Europe, and in this country, by poaching our name as to escape the observation of the unsuspecting. Some are made to represent the Watch by the "Union Watch Co., of Boston, Mass."—no such company exists. Some are made to imitate "Bartlett's Watch," to be sold as our Fourth or Wm. Ellery style, others as the "Appleton Watch"—but others are named the "Appleton Watch Co." other's the "P. S. Bartlett," instead of "P. S. Bartlett," besides many varieties named in such a manner as to convey the idea, only, to the purchaser the production of the American Watch Company.

Little attention on the part of buyers will protect them from gross imposition.

ROBBINS & APPLETON,

Agents for the American Watch Company,

161 Broadway, New York.

JAMES S. SMITH,

Nos. 15 Dutch-st., 504 Broadway,

New York.

BEAUFORT, S. C., and VICKSBURG, Miss.

OVER the whole field of war, — save only the stormy trans-Mississippi region — there has seemed to rest unusual quiet during the last week. It results from the gradual withdrawal of forces northward and eastward to the two great armies sullenly confronting each other in Virginia, and on the boundary of Georgia. Distant department commanders no longer have the troops, even had they the disposition, to take advantage here and there of the apparent weakness of the enemy. It is rather, indeed, the enemy who strikes, and his are Parthian shafts, sent back almost in the act of flying. We may be sure that no temporary diversions will prevent hostile concentration in Virginia. We, too, must do as well, though a fort or regiment be sacrificed. They can be spared if success attend the great movement, while as trifles if we fail. With attention undiverted by minor operations, the public have had opportunity to concentrate their observation upon the monitary signs we have already had of the rapid unfolding of that great campaign on which our fortunes are staked. There have been scouts and reconnoissances in considerable force, attended by cavalry skirmishing. Picket lines have been pushed forward, and once suddenly withdrawn. Changes in position made in divisions were quickly detected and mated by the enemy. These were rather the cautious, preliminary sparrings of well-trained boxers, leading warily out to measure distances, than the grim and heavy strokes of decisive contest. A cavalry scout from Vienna lately visited Leesburgh, Rectortown and Upperville, skirmishing near the latter point with MOSEBY's men, and capturing 23 of them, besides some stores. On Friday of last week our forces burned Madison Court House. In driving a small body of the enemy through the town, the cavalry were upon them bounce; and, to effect a dislodgement, it became necessary to destroy the fine town. On Monday our forces occupied West Point, on York River—a significant movement.

But the latest Washington dispatches warn us that the great Virginia campaign is not only opening, but already opened. The reports are, that on Tuesday night our army, under General MEADE, broke camp and began to cross the Rapidan. The crossing was made at Jacob's, Culpepper, Germania and United States fords, and was effected without serious opposition. A battle, therefore, is at any moment imminent, if the enemy is disposed to meet us. There are many rumors but few facts to assist the chronicler. We must wait upon the developments of the next few days, without attempting to prophesy upon the movements of General LEE or the results of our operations.

As the all-important contest draws near, the interest therein becomes intense. The general temper of the people has been hopeful and ever confident, in spite of the reverses of previous campaigns. In Washington and Richmond the excitement is more feverish, and prolific of rumors. The latest dispatch reads that "high military authorities fear LEE will attempt to escape to Richmond," from the celebrated "anaconda grasp" which is again "gradually closing around him." With all the other anxieties of the hour, high military authorities ought to spare themselves this cruel suspicion till a later period in the developments of the campaign.

So many threatened points compel the enemy to bring every available man to Virginia. LONGSTREET, so often reported there, seems certainly to have arrived with his corps. BEAUREGARD has passed beyond Wilmington. On a review of the military situation, some weeks since, our belief was stated that May would open on an army under LEE near 100,000 strong, and such would seem to be the case, with reinforcements drawn, as they are, from the West as far as Mississippi, and from the South as far as Florida. From the latter State two brigades, under General COLQUETT, are said to have gone, leaving hardly more than 1000 men behind. With the enemy the game is even deadlier than with us. A Richmond paper of the 29th declares "this is the last year of the war, whichever wins."

Turning to Chattanooga, we find our position buttressed almost impregnably. The enemy's flanking force in East Tennessee has been so reduced as no longer to render dangerous an advance on Dalton, though the seizure of Bull's Gap might make Tennessee and Kentucky more secure from a raid in our rear. A power of such magnitude, and in such a position, is to be regarded with hardly less interest than the Army of the Potomac. We shall hear from Tunnel Hill and echo to the cannon in Virginia. On Friday a reconnoising force drove the enemy's pickets back on the Ringgold road nearly to Tunnel Hill, with some loss. On Alabama, on the other hand, General READY threatens our works at Decatur, commanded by General DODGE. The enemy holds a strong position in the Courtland Road.

Skirmishing still takes place in North Carolina, and, Newburn is menaced. The latter place can only be carried by a large army, after desperate assault and at fearful loss. It is well protected by forts and gunboats. Its chief military reliance, perhaps, is Fort Totten, which has complete range of the town and of a considerable position of the House, as well as of the level country about the town, from which the woods are cut away. A fleet of gunboats (wooden) cruise in the Trent and Neuse, reinforced by those driven from Albemarle and Pamlico sounds.

On Wednesday, the 28th ult., the town of Washington was evacuated. This move can at least be only regarded as a bitter necessity. The town itself was un-important, but it commanded a region populated with negroes and loyal whites. Such of them as escape, can take only their lives with them. Such as remain will feel the merciless hand of partisan rangers who seem of late to possess no impulse but the bloody fury of extermination. There was also a possibility of holding the town. It is questionable whether the Rebels are to have much more time for whetting their appetite for general battle by demonstrations in North Carolina, before they will be needed in Virginia. Washington was very strong, and in its works General FOSTER successfully repelled the enemy a year ago. Still, its recent occupation was precarious. The gunboats were no longer to be relied on, with the new element of Rebel rams introduced into the contest. The bluffs on which the Rebels planted batteries last year, and cut communications between Washington and Newbern, might again be occupied by them. Finally, the garrison was needed to reinforce Newbern, and therefore the surrender was made. The suddenness of the move is, after all, the principal cause of annoyance. Long ago it might have been leisurely abandoned with profit. The present compulsory evacuation is the natural sequence of the fall of Plymouth.

Later news states the burning of the beautiful city by our retreating forces, with the destruction of millions of dollars in various property, including Government stores. The wretched inhabitants were rendered houseless. The garrison is said to have been 4,000 strong, the investing enemy much weaker.

Newbern should be held at all hazards, and for the presents seems safe. Its defences are under able charge of General PALMER, Major-General PECK having been relieved of command. It is stated also that General BEAUREGARD has assumed command of the enemy's forces in the State. Published correspondence shows that long since the NAVY Department urged the abandonment of the outposts in North Carolina, and expressed their fears of the building of Rebel rams. On whomsoever rests the responsibility for past disasters, we trust events hereafter in North Carolina will be such as to need no exculpatory evidence for those engaged in them.

From no other department are reports of military manœuvres so untrustworthy as from that of the Gulf. Contradictory despatches arrive by each steamer, and on turning for explanation to letters of public reporters, these in most cases furnish only a string of leisurely mendacity. To complicate matters, come news from Washington, designed to bolster up the Southwestern campaign, but only conjectural in their facts. In case of our loss, it is safe to double all the figures of the Gulf reporters. In case of victory, instead of comment on its fruits, we have fulsome tributes to the "Saviour of Louisiana," which their object can hardly enjoy. The first news was, that our forces had met a temporary check, soon to be over. Next, that the commanding General had gained a great victory — one of the daily press at once, in a well-written article, renominating him for the Presidency. Next, that the Army had lost 4000 men, 30 cannon, and 200 wagons in three days' fighting, and was retreating to Grand Ecore. This was confirmed. Next, that we were again *en route* for Shreveport. Next, that the Rebels were marching on Grand Ecore, where we were strongly entrenched, and whence we were going to meet them. Next, that we had safely retreated to Alexandria. Next, that there was "no possibility" of such retreat. The latest is, that we were at Alexandria, having been attacked on the retreat by the Rebels at Cane River, the former battleground. The enemy were repulsed with a loss of 1000 men and nine cannon. Our gunboats, it is said, are safe.

The repulse of General BANKS and his retreat to his base, have rendered the situation of General STEELE and his force perilous. At last accounts, however, he was making his way to Shreveport. Having been reinforced by General THAYER's column, he had occupied Camden, by outgeneralling the enemy. A late report represents him as partially defeated by MARMADUKE, with a loss of 1000 men, 200 wagons and 7 cannon. But the news is not confirmed.

Recently a badge has been adopted for the Tenth Corps, under Major-General Gillmore. Its design is most appropriate, being an outline representation of a square fort, with bastions. The badge is punched with a matrix, from red, white and blue flannel, the first division wearing the red, the second the white, and the third the blue.

As a sanitary measure no exhumation of dead will be permitted at the Government burial grounds in Washington from May to October 16.

TOPOGRAPHY OF THE LAKE ZONE.

THE topography of the Lake Zone* presents few features of marked interest. It may be regarded as an extensive plateau, of which the surface is generally undulating, sometimes even hilly, but never mountainous in the strict sense of the term. In its natural state this region was densely wooded in the northern, eastern and southern portions, while in the centre prairies often occurred, which in the Illinois form the marked characteristic of the State. The tendency of settlement is to produce the gradual introduction of trees upon the bare prairies, and to thin out or destroy the dense forests. The water courses often cut deeply into this plateau, and the escarpment thus formed presents, when viewed from the valley, the appearance of hills of considerable elevation. This is particularly the case along the banks of the Ohio and the upper portion of the Mississippi, where the frequency of deep ravines draining into the main streams, and the abundance of timber give a peculiarly impracticable character to the country for some miles back from the valleys. This is to a certain extent the case with many of the rivers.

So far as general operations are concerned, the rivers, lakes and forests are the only topographical features that need be considered.

It is probable that any foreign power will ever find it either desirable or possible to pass the mountainous region which, with but little interruption, forms the eastern boundary of the Lake Zone, and under existing circumstances it is only the southern portion of that boundary which is liable to attack by the rebel armies. This is so difficult a region for large bodies of men to traverse, and affords such great facilities for defensive purposes, that it may be regarded as quite secure, except against the raids of small parties which can be successfully undertaken only when the whole of Western Virginia is wrested from our grasp. Another element of security possessed by this portion of the frontier of the Lake Zone is the circumstance that an army moving towards it from the South must pass for at least 200 miles through a sterile and mountainous region, where good roads are not numerous, and where it is not possible to procure supplies for any considerable body of men. The Ohio River, which forms the southern boundary of the Zone in its ordinary stages of water, navigable throughout its entire extent; its affluent, the Alleghany, is navigable as far as the New York State line. In dry seasons the navigability of the Ohio and its affluents is frequently suspended for long integrals of time, yet because the obstructions to navigation, especially in the main section of the Ohio, are in the form of bars, separated generally by pools of considerable depth, the river even in the lowest stages of water presents a formidable obstacle to the operations of a large army.

From Pittsburgh to the vicinity of Portsmouth, which is the most shallow portion of the Ohio, the river taken in connection with the nature of the country to the south and east will probably prove a sufficient barrier against any attempt at invasion in force.

Below this portion the fords practicable in low water are so few, and the intervening pools so extensive, that it becomes a comparatively easy task to control the river by means of gunboats and detachments of troops. Besides, a slight rise of the water, probable at any time, renders the stream navigable for light draught gunboats, which would effectually prevent the passage of a hostile army, unless under cover of extensive fortifications armed with very heavy guns.

The Mississippi from the mouth of the Des Moines to Cairo presents even a more formidable obstacle than the lower Ohio. So long as we possess our present unimpaired naval control of the Western waters, and have our gunboats properly distributed, it is hardly possible that any serious attempt can be made to invade the Lake Zone through Kentucky or Missouri. Of course the gunboats alone would not suffice to guard completely against the danger, but with their aid a small number of good troops would be enabled to frustrate any attempt of this nature, which could in no event be undertaken by the enemy unless a considerable portion of Kentucky and Missouri were firmly in their possession. Except in such a contingency it is improbable that a repetition of MORGAN'S raid even would be attempted, so disastrously did it terminate for all the rebels concerned in it.

The affluents of the Ohio and lower Mississippi in this Zone are of such limited and uncertain navigability that they would afford but little aid to an invading force, even were it possessed of the requisite steamers, and had nothing to fear from our gunboats. Their valleys are often, especially in the lower portions, so destitute of good roads and so densely wooded, that it would be difficult for an army to follow them. The more important of these affluents, such as the Big and Little Kanawha, Wabash, Miami, Scioto, Muskingum, etc., form favorable lines of defence in the case of movements parallel to the main rivers into which they flow, and, while they would tend to limit laterally the operations of an invading army moving parallel to them, would at the same time aid much in securing his flanks.

The great lakes, Superior, Huron, Erie and Ontario, with the connecting rivers, or Straits of St. Mary, St. Clair, Detroit, Niagara, and finally the St. Lawrence, form the barrier which divides the Lake Zone from the inhabited British Provinces. The control of the great lakes, with the power to use them undisturbed either for the purposes of commerce, or to transport large armaments across their waters must, of course, rest with the nation possessing the naval supremacy on each. It may be worth while to examine briefly the value and results of such a naval preponderance, and the chances to be taken into consideration in forming an opinion as to where it would probably rest in the event of war between this country and Great Britain. The lake navigation affords the only present means of bringing to market the copper and iron of Lake Superior and of supplying the mining region with the means of bringing into use the vast resources in timber of Northern Michigan and North Eastern Wisconsin. The greater part of the produce of which Chicago and Milwaukee are the depôts takes the lake route to the Eastern markets. The same thing is true with regard to Detroit, Toledo, Cleveland, and other ports on Lake Erie. The commerce on Lake Ontario though large is not so important.

The loss of our naval supremacy on the lakes would be the destruction of this vast commerce, only a portion of which could be accommodated by the existing lines of railway. In a purely military view, the interests at stake are hardly less great. All our frontier cities would be exposed to the attacks of hostile fleets, and the inroads of the land forces conveyed by them. We should, at best, lose the power of acting offensively upon the enemy's shores of the lakes, and be confined to the defensive. The English have, by means of their canals, the ability to run any number of gunboats from the ocean to the upper lakes, while we must rely entirely upon our facilities for constructing a new fleet on the lakes themselves. Unless, then, we should at the very outbreak of hostilities seize, by a land attack, the Welland, St. Lawrence and Rideau Canals, we should at once find ourselves hopelessly inferior in naval power, and would for a long time experience all the evils of such a situation. Our facilities for building vessels on the lakes are so much greater than those possessed by the English, that if the canals were seized or destroyed our supremacy on the water could not be doubtful for a moment. It would seem to be no more than a proper precaution to maintain in security the locks on the means of constructing and arming steamers in case of necessity.

It is new proper to consider separately the importance of each part of this chain of lakes.

Since the Canadian shore of Lake Superior is still a wilderness, and the canal around the Sault Ste. Marie is on our side, we may regard the lake as practically American. The English have no interests there to defend; and there is nothing there inviting our attack. As things now are we have merely to protect the miners in their labors, and secure the transit of the results of their work and of their supplies. This can best be effected by acquiring the command of the waters of Lake Huron, because it is improbable that a land expedition would be made against so remote a point as the Sault Ste. Marie. There should, however, be at the Sault a small fort with a garrison sufficient to protect our canal against small parties, and with batteries to command the adjacent river. We need not anticipate in our generation any attempt at invasion by either party across the St. Mary's River, because it is too remote from the settlements, and leads to nothing.

Lake Michigan lies entirely within our territory, and leads to such rich and vulnerable points that its entrance should be carefully guarded. The Straits of Mackinaw afford the means of accomplishing this with the aid of batteries, armed with heavy rifled guns, and one or two iron-clads. The secure closing of these straits would not only cover from attack a rich and valuable portion of our territory, but enable us to make full and unmolested use of the facilities afforded on the shores of Lake Michigan for the construction of war vessels to control the frontier lakes. The importance of Lake Huron consists chiefly in the fact that it forms one of the links of the water communication from Lake Michigan to Buffalo, and as its shores have no large cities or dense settlements on either side it will not for a long time be the scene of large operations, except as controlling the avenue of approach to more important points.

The St. Clair and Detroit Rivers are of more consequence. It is important to us to secure the Huron and Erie entrance of the former, with the defensive stations which shall prevent the passage of hostile fleets, and cover any crossing to the Canada side that may be desirable for our land forces. It is not probable that any attempt at an extended invasion would be made by the English in this quarter, as they would be exposed to losing their communications were we to threaten Fort across the Niagara, or should we gain possession of Toronto. The most they would be likely to attempt would be the destruction of Detroit, to prevent which it might be necessary for us to occupy the opposite bank until Toronto was in our possession.

The control of Lake Erie is of great importance to us. Both parties seem to gain complete possession of the Welland Canal. Should we not possess the naval supremacy on Lake Ontario, a land expedition upon Hamilton and Toronto would be natural from this base.

Lake Ontario is, upon the whole, the most important of all the lakes to us. It is the key to the entire line of the St. Lawrence to defend. It remains to be considered that part of the St. Lawrence which skirts New York. This river is not fordable, and can be crossed only upon military bridges or with the aid of steamers, except in the winter. No English army would risk crossing it here for the purpose of penetrating any distance into the interior, because the country on our side in that quarter offers no temptation corresponding to the risk. We should probably find it advantageous to seize and hold Prescott, in order to cover Ogdensburgh and secure the railway junction at that place. The rivers emptying into the lakes are not of a nature to facilitate the invasion of our territory, and are so inconsiderable in extent that they would exercise only a local or tactical influence upon military operations.

It is not probable that the English would ever attempt the invasion of our country from Canada; the most they could do would be to endeavor to detach our commerce and base cities by means of their fleet, and to shell Detroit, Buffalo and Ogdensburgh, if we remained on the defensive.

From what has been said it is clear that we should do our best to render our naval control of the lakes secure; that the Sault Ste. Marie, Mackinaw and the St. Clair should be fortified; that our first steps on the breaking out of hostilities should be to seize the Welland Canal, Toronto, Kingston and Prescott. Our superiority in numbers should lead us to take the offensive boldly and promptly. Since Northern Wisconsin and Michigan are out of the pale of probable military operations for another generation, it has not been thought necessary to dwell upon their topo-

* According to our previous division, the Lake Zone is bounded by the Upper Mississippi on the west, the northern Alleghanies and the Adirondacks on the east, the great Lakes on the north, and the Ohio River on the south.

graphy; it will suffice to say that they partake of the undulating character of the rest of the zone; that they are well provided with streams, dotted with numerous small lakes, and mostly covered with a dense growth of heavy timber. The settlements and roads are few. The only hills approaching the dimensions of mountains in the Lake Zone are on the border of Lake Superior, where they attain an elevation of nearly 2,000 feet.

The Lake Zone is exceedingly well adapted for military operations on a large scale, and it is so rich in the resources necessary for the supplies of armies that it offers great inducements to the attempts of our enemies. But it possesses such elements of strength in the numerous and brave people who developed its resources and in its peculiar situation, that it is most probable that it will never be called upon to take any other part in active hostilities than to serve as the great depôt from which men and supplies are to be drawn for employment in other portions of our territory. It may be regarded as quite certain that it will be liable to no more serious danger in our day than the temporary inroads of predatory bands.

NEW PUBLICATIONS.

MODERN INVENTIONS AND THE ART OF WAR.*

The author of this small brochure, which, notwithstanding its unpretending size, has attracted considerable attention in France and England, commences by stating that at certain epochs, and as the result of important discoveries, the science of war has undergone radical modifications and changes. The most complete change, no doubt, resulted from the invention of gunpowder, which caused the gradual disappearance of the bow and sling. Even the lance and sword did not escape completely from the change. Says the author, "*deux grands hommes et deux grandes armées*" to reelevate cold steel to the estimation in which it was formerly held. FREDERICK the Great was the first general, after the invention of gunpowder and its application to the purposes of war, to know exactly the value of fire; while NAPOLEON, according to our author, was the first warrior who taught his troops how to use with most effect "*la terrible baionnette.*" The English and Russians might feel disposed to quarrel with the latter statement. With the Russians, the bayonet took a form in favorite weapon. It was SUWAROFF who first instructed his men to make a bayonet thrust in *tierce*, and then change to *carte* before withdrawing the weapon, the point of which was thus made to describe a small circle within the body of the unfortunate victim!

Without lingering on the epochs of the past, which, as he observes, are distinctly marked by the history of campaigns and battles, the author proceeds to a contemplation of the future. We are now, he says, in a state of transition. The application of steam to ocean navigation, and the "*projectile tonnant,*" to use his own expression, of firearms, have already begun to produce important modifications in military science. The combination of these inventions has resulted in iron-clad ships, and must eventually lead to radical changes in the established system of naval warfare which will involve every branch of the service. The change introduced by steam is illustrated by references to modern navel expeditions. It is well known, he writes, that in 1830 the Algerian expedition was on the point of failure, because of contrary winds, and was attended with more chances under steam than was the Chinese expedition of 1860, or the Mexican expedition of 1862. Steam has reduced ocean expeditions to the sole question of finance. His remarks on the application of railroads to military purposes, and even his speculations on the probable influence of railroads on the future of campaigning, might have been suggested by our own experience in the present war. Under the heading of "*Inventions d'un ordre secondaire*" he treats of improvements in the commissariat, and of balloon reconnoissances. He traces the beginning of the modern revolution in means to the application of the steam principle. No effective pistol revolver could have been developed had the old flint-lock never been superseded, and the same thing is true of nearly all the modern refinements in fire-arms. The general introduction of the rifle, he thinks, will render cavalry, as a body, of very little importance hereafter, and asserts that the full effects of rifled small arms will be displayed by independent fire-firing and skirmishing. And as it will never do, so he argues, in future for troops to stand up wall-fashion, a few hundred yards apart, and pepper at each other as in the days of "Brown Bess," he thinks that the bayonet will eventually be more highly appreciated than ever before. Celerity and audacity, he says, other conditions being equal, will be sure to win the day. He slights cavalry, and would do away with heavy cavalry altogether. He considers that in future, between armies not greatly dissimilar in composition, an "artillery duel" may be expected to precede a trial of strength between infantry and cavalry.

* Influence des Inventions Modernes sur l'Art de la Guerre. Anonymous. DAUVE, Paris.

"THE DISCOVERY OF THE SOURCE OF THE NILE."

The full meaning of that problem which is commonly called the exploration of the source of the Nile, is not to be understood from its bare statement. The mere purpose of searching out the particular point on the world's surface where the illustrious river has its headwaters, indicates an enterprise stimulated quite as much by feminine curiosity as by philosophical inquiry or manly adventure. But in truth there are many questions of science, and particularly of geography and ethnology, involved in the investigation; and Central Africa is rather the object of pursuit than the single mountainous stream which broadens into the famous, many-mouthed "father of waters."

Captain SPEKE's book being the freshest, is therefore one of the most interesting records of travel in Central Africa. It is doubly so from the fact that he has, so far as the evidence hitherto goes, discovered at last the great secret hidden for ages, and has traced the White Nile, which of late has been justly regarded as the main stream, with the Blue Nile only an affluent, back to its origin. This origin or source, we may say, is the Victoria N'yanza, a sea-like lake through which the Equator runs. The point where the Nile emerges is at some beautiful falls called "The Stones," and christened also Ripon Falls by the English discoverer. The southerly end of the lake, however, may be regarded as the real source of the Nile, for it is the extreme body of water which its current empties into the Mediterranean. This extremity of N'yanza is situated in 3 deg. south latitude. In other words, the magnificent river has a course of more than 2,300 miles. On Captain SPEKE's map, the great fresh water lake Victoria N'yanza is outlined chiefly by excluding Lake Baringo and Baringo, on the east between 31½ deg. and 35 deg. east longitude.

And here it may be remarked, that the best way to study the course of this expedition is to trace it on the maps. A very good chart of the region traversed is contained in KEITH JOHNSTON'S, F. R. S. E., given all that is necessary for this purpose. Another map, prepared by MALTE-BRUN, is to found in the *Nouvelles Annales des Voyages*, published in Paris; it is very interesting and instructive to the student of Central Africa. The latter journal contains a fuller topography of the countries explored by the two Nilotic explorers. It differs also, of course, somewhat in the longitude of localities, arising from difference in the standard of measurement. But it is founded directly on Captain SPEKE's map, drawn by Mr. JOHNSTON.

Captain SPEKE, after his first journey with Captain GRANT, on leaving England proceeded to Zanzibar, organized his expedition, and started for the interior. This was in October, 1860. He reached Gondokoro, and again was civilized men, in February, 1863. His bad various adventures with his men, of whom seven died, were killed, and the great majority deserted. Captain GRANT also suffered from fever, and could not render as efficient aid as desirable in the explorations.

We will not attempt to follow the adventurer through all his checkered narrative. It was not till the 28th of January, 1862, that he struck upon N'yanza. The story at this point is particularly full and valuable. The ceremonies of the court of Mtésa, at which he was an honored guest for more than four months, are not a little amusing. Things sometimes revolting to our more delicate humanity. In July of the same year he succeeded in escaping from the detention of the monarch and his court, who could as ill comprehend the intense interest of the white man in the source of the Nile, as some of the Indians of the Mound builders in sympathies with enthusiastic strangers travelling two thousand miles to stand on its summit.

Captain SPEKE had already seen the lake N'yanza on his former tour through Central Africa with the expedition of Captain BURTON. Our readers will be familiar with this previous expedition, and also with the unfortunate controversy between Captains SPEKE and BURTON on its return to England. It was with increased eagerness that Captain SPEKE made his second journey to the lake. He describes "The Stones" as the most interesting sight to him in Africa—the roar of the waters, the thousands of passenger fish leaping at the falls, the fishermen on all the rocks with rod and hook, hippopotami and crocodiles lying sleepily on the water, the ferry at work above the falls, cattle driven down to drink—all this spoke of civilization. "Small hills, grassy-topped, with trees in their folds, and gardens on the lower slopes—as interesting a picture as one could wish to see."

The royal court in Uganda is faithfully pictured, with the grovelling manners of the courtiers and people, and the cruelty of the King, to us almost inconceivable. The cheapest thing in the region was human life. The rule of punishment seems to be that of the bloody lawgiver, who thought the least peccadillo deserved death, and he had no power for the greatest. As one of a hundred examples in the volume—the author having performed the feat of shooting four cows which were quietly walking about in the court-yard (for his rifle and revolver were an inestimable help to Captain SPEKE's welcome), was greeted with great applause and astonishment by the royal assembly. The KING at once loaded a carbine and gave it, full-cocked, to a page, with direction to shoot some man in the outer court. The urchin at once did so, and returned in great glee from his murderous feat as happy as a boy who had caught a trout. "Has KING GRIFFITH said well?" "Oh, yes, capitally." On hearing of the coming of the white man, the KING "caused fifty big men and four hundred small "ones to be executed, because he said his subjects were so "bumptious they would not allow any visitors to come near "him, else he would have had within men before."

The author found that in Uganda "fattening was the "first duty of fashionable life," and one domestic picture is of a lass of sixteen, "sucking at a milk-pot, on which the "father kept her at work by bolding a rod in his hand." Her mother was a royal wife, and lived richly, inside of a stand, excepting on all fours. The Captain was anxious to get her height, but shrank from having her laid on the floor, evidently fearing, like FALSTAFF, that once there, there would be no lovers sufficient to raise her up again. But with infinite management he got her to stand against her seat, "when she sank down again, fainting, for her blood "had rushed into her head." Her measuration is noted as follows:—Round the arm, 1 ft. 11 in.; chest, 4 ft. 4 in.; thigh, 2 ft. 7 in.; calf, 1 ft. 8 in.; height, 5 ft. 8 in.

The nature of the country; the thieving disposition of the natives, of which the author had unpleasant personal proof; the traditions, history, modes of government, and ceremonies of the different races; the social and religious condition of the people, with their superstitions and incantations; the private lives and public wars of the tribes, all receive some notice in this volume. Statistical and scientific indices accompany it, amongst which the list of plants collected by Captain GRANT, between Zanzibar and Cairo, is noteworthy for its thoroughness and value. Besides the fauna and flora of the country, the zoography, as that its geography are, as has already been stated, especially praiseworthy.

Ever since the days of MUNGO PARK and BRUCE the great African continent has been full of interest for scientific travellers. OWEN and CUMMING, BARTH and DUPUYE, have added to the general interest. DR. LIVINGSTONE, especially, has given of late a powerful impetus to the popular study of that region, and it was left only for DU CHAILLU, the great gorilla hunter, to stimulate public curiosity to the highest pitch. Captain SPEKE has added no slight contribution to the labors of his predecessors.

THE SMALL HOUSE AT ALLINGTON. By ANTHONY TROLLOPE. New York: HARPER AND BROTHERS.—Whether ANTHONY TROLLOPE's works will "live," is a question the literary discussion of the decade can not speedily settle. There seems, however, to be no question that they will *sell*—a fact patent to both author and publisher, and as pleasant as patent. This volume, from the novelist's prolific pen, is characterized by the traits of its predecessors. His characters are clear-cut and natural. They belong to the *Vanity Fair* style of modern heroes and heroines, who cannot endure to be tricked out in the theatrical costumes and court robes of the ancient romance. The author being versed in the manners of society, his books have a pleasant spice of worldly wisdom which is much appreciated. And indeed THACKERAY is no little to say of TROLLOPE, though he needed no reputation but his own to stand on. But as the "good-will, stock and fixtures, including customers," are sometimes transferred in the shop-keeping world from hand to hand, so the popularity of the *Vanity Fair* of THACKERAY may be induced to turn with greater interest now to the pages of TROLLOPE, who has a portion of the other's vigor, truth and humanity.

MR. TROLLOPE holds, or held, a civic office under Government, and also editorial chair in the *Cornhill Magazine*. Besides performing these duties, this author continues to turn out a continuous stream of literature in the form of novels. They must be perforce characterized by looseness of style and ease of thought. But they are found to be pleasant and entertaining reading.

THE JOURNAL DES ARMES SPECIALES ET DE L'ETAT-MAJOR, for February 15, contains an elaborate mathematical discussion on Hooped Cannon, by F. B. ROCHETTA, lieutenant of artillery. Shorter contributions are on *Fusiguile*, or, Arms of Precision and of all Systems, by CAPTAIN ——; a translation of Captain PETRIE's compilation of the Organization, Composition and Strength of the Army of

* Journal of the Discovery of the Source of the Nile. By JOHN HANNING SPEKE, Captain H. M. Indian Army.

Quelques Chapitres de l'Histoire du Bassin des Sources du Nil, avec L'Itinéraire des Découvertes des Capitaines SPEKE et GRANT. Par V. A. MALTE-BRUN. Paris, 1863.

Great Britain; New Studies on Rifled Guns for Infantry, translated from the German of Captain Fleischer by Captain Tarbell; New Mining Powder; Resistance of Metals used in Ordnance, from the work of M. Schneffler, by M. Seebold, civil engineer; Military News.

The Report of the U. S. Christian Commission for the Army and Navy for 1863 is before us. The total contributions to the Commission for the year have been $712,427 85, of which $502,339 20 were in money, and $385,829 07 the estimated value of stores. The object of the Commission is to secure for the Army and Navy a "combination of benefits for body and soul." This it aims to accomplish by distributing Bibles, hymn-books, tracts, and other religious reading in the camps, and by sending delegates to preach and converse with soldiers and sailors, as well as to give medicines and delicacies to the wounded and sick.

The Annual Report of the Adjutant-General of Massachusetts for the year 1863, in a document of over 1,000 pages, containing a full and interesting account of the services of the State and her troops. General Schouler has succeeded in making a very readable volume by going beyond the mere compilation of statistics. Besides its matter, some account is given of the achievements of each regiment and battery of the State, including those discharged after nine months' service. The record of many of these achievements has already passed into permanent history—an unstained record, of which the State has cause to be proud. A noticeable degree of attention is paid by the report to starting the condition and services of the colored soldiers, and especially of the 54th regiment, which behaved so gallantly before Wagner and at Olustee. Reports from the Quartermaster-General, Surgeon-General, and Master of Ordnance accompany the volume.

A NOTABLE ARTILLERY DRILL.

After the exercise of as much diplomacy as preceded the Dano-German war, the rival manufacturers of great guns in England have at last been brought face to face, and on April 4, a series of experiments was inaugurated at Shoeburyness which is expected to settle the question whether the Whitworth or Armstrong system provides the most accurate and effective weapon.

The history of the successive steps in the contest, which has resulted in this competitive trial is curious and instructive. Ten or twelve years ago William Armstrong, then a lawyer in Newcastle, conceived and developed the principle which made a rifled musket so effective ought to produce similar results upon a larger scale, and in 1854, soon after the battle of Inkerman, submitted proposals to the Duke of Newcastle for the manufacture of a gun which was simply an enlarged rifle. In his proposals the 6-pounder and the first Armstrong gun was produced. Although the drawing of it given in the report on ordnance was not flattering, Ze novelty attracted attention, particularly as affairs did not progress satisfactorily in the Crimea, and the hope that it might develope some principles which should restore to artillery the influence in the field which it formerly possessed and of which the recent improvement in small arms had partially deprived it, the Duke of Newcastle entered warmly into Mr. Armstrong's views, and his guns were ordered. One of these, an eighteen-pounder, was tried with satisfactory results, and Lord Panmure, then the head of the War Department, promptly ordered three more with a view to test their capacity to endure the wear or tear of the field service. Meanwhile the tests of the guns already completed were vigorously prosecuted with results what were regarded as most astonishing, and in 1858—five years after Mr. Armstrong's first proposals were made to the Duke of Newcastle, he had the gratification of seeing his light guns for field service adopted by the government upon the recommendation of the House of Commons Ordnance Committee; while General Peel, then Secretary of State for War was instituting experiments to test the merits of the Armstrong gun of heavier calibre, for the navy and fortifications. Without awaiting the results of these experiments, however, General Peel's successor ordered the adoption of these heavy guns at once, and the assignment of the Armstrong patents to the crown was followed by the appointment of their original owner to the various offices of Director of Rifled Ordnance, Engineer to the War Department and Superintendent of the Royal Gun Factory. But the Newcastle lawyer labored to deserve the honors thus heaped upon him by honestly endeavoring to remove the defects which experience proved existed in his system, and he modified them so rapidly and in so many important particulars that the original gun was almost lost sight of. Among the guns which he successively manufactured and experimented upon with varying but not altogether satisfactory results, were those of all kinds and sizes from a 3-pounder to a 600-pounder. Some were made upon the "coil system," others upon the "solid-forged system;" some were muzzle-loaders, but the majority breech-loaders. Shot and shell even more various in form and material were at the same time experimented upon. They were made of cast iron, wrought iron, hard iron, soft iron, hard steel and soft steel, with and without "lead bathers;" with and without lead coating; but all his efforts proved unavailing, and the dissatisfaction caused in the service by some of the imperfections which practical experience developed were strengthened by a knowledge of the fact that Mr. Whitworth had invented a system of rifling gune which many believed resulted in the production of even more accurate weapons, which were to a great extent free from some of the fatal defects in the guns made under Sir William Armstrong's direction.

Mr. Whitworth has a world-wide reputation as an exceedingly ingenious and successful maker of engine tools. By the urgent and repeated requests of Lord Hardinge he was finally induced to try his skill in the manufacture of guns, and set himself to work in a practical, common-sense way by erecting a shop and a rifle-range at Manchester, where he tested all the best guns. Of one thing he satisfied himself very speedily, that the principle which had been the basis of his great success in the manufacture of engine tools, accuracy even to the millionth part of an inch, would lead to the same result in the production of guns, and he first demonstrated the fact by his famous Whitworth rifle, which is now regarded in England at least as the most perfect weapon of its kind in use. The one-pound gun was produced, next the 6-pounder, and at a later period still the 12-pounder. In this weapon the standard of excellence attained in the rifle was introduced with unerring exactness with the field guns.

As we have already stated, it is to test the superiority of the two systems that the trials now in progress at Shoeburyness have been instituted. It is not exaggeration to say that they will be more exhaustive and thorough than any similar experiments which have been made. Sir William Armstrong subjects six 70-pounders and six 12-pounders to the tests which the Ordnance Committee having the matter in charge may choose to order, and Mr. Whitworth is to place three guns of each calibre at their disposal. Thus far the 12-pounders alone have been experimented upon, but the 70-pounders were on their way to Shoeburyness at last accounts, and will promptly enter the lists. The fact that three thousand rounds are to be fired from each gun; pay from six of the Armstrong's and six of the Whitworth's, and that the effect of each shot is to be carefully noted, indicates sufficiently the exhaustive nature of these tests, and shows plainly that several months must elapse before the Committee will be ready to make a decisive labors. Very properly no official report is to be made of each day's operations; this will be delayed until the witnesses are all examined and the testimony is all in. The daily journals, however, are allowed to pick up such facts as their reporters can gather, and to freely surmise and conjecture as they may deem advisable, without which the Massachusetts Sixth had repaired; the two-decked frey Massachusetts Sixth had repaired; the two-decked frey boat at Havre de Grace was seized and two powerful engines brought down; the difficulties of getting them down to the little dock overcome by an ingenious temporary tressle work which projected into the river; the steamer impressed with wonderful celerity, and with a detail of a regiment and his own "shell backs" at the ropes, hurried over the intervening space to the railroad. As an interlude between these duties, Flusser obtained permission to impress a schooner and cut out a small propeller steamer from from a battery, and with a few shell backs set out for the curious naval expedition of the war, running up an adjacent river, landing and almost alone making a reconnoissance some miles in the interior, obtaining important information, and returning with the vessel cut out and in tow; for the first the chore and captured a light boat which the secessionists had stolen and secreted. These expeditions he several times repeated with like success. The writer has seen him when the bullets whistled thick and sharp about him, as calm and indifferent as if he were at mess; and we can imagine how deliberately he pointed and fired his last shot on the fatal day at Plymouth, and how gravely he died, with the instock of his gun in his hand and his face to the foe.

The most courage of Lieutenant Flusser was equal to his energy and his devotion to duty. Of this the writer (who was then connected with him in duty and messed and lived with him) accompanied him one summer afternoon on a visit to the old cemetery above Annapolis. It was Sunday, and the retired grounds were thronged with ladies of Annapolis, all of whom were among his acquaintance, but none of whom now recognized or saluted him. Merely alluding to the circumstance, with more of satisfaction than regret (for he considered it a tribute to his loyalty), we passed on to the vaults of the Blake family, where Joe Seabrook, a colored servant of the Blakes, with no other protection than its little forts, long disused except in winter war, and utterly ineffective for military purposes, was open to attack by land and water, and the arrival of tugs from Baltimore to cooperate with land forces already organized for its capture was hourly expected, day and night. The Navy, scattered by the administration of Toucey, could afford no protection; the officers of the *Allegany* lying under the guns of McHenry, had resigned in a body, and each hour brought the intelligence of new desertions and disgrace. In this trying moment, when each man had good reason to distrust his neighbor, Captain Blake, the Superintendent, stood firm by the flag, and, aided by such men as Commander C. R. Rodgers, and Lieutenants Upshur, Luce, Fluser, Matthews, Lull, and others, prepared to uphold it to the midst of disloyalty and defection. There were many Southern officers attached to the Naval School some of whom subsequently resigned; but all were faithful until the post was safe—a creditable instance and a rare one! The cadets were thoroughly acquainted with the duties of the service, and were at once placed on a war footing. The few sailors and employés attached to the post were organized, and every practicable preparation made to hold the position in any extremity.

Lieutenant Flusser was a Professor in the Naval School at the time of the outbreak of the war, one of the few of which Theodosic Bland was a member; of high social position and connected with the leading secessionists of the neighborhood by the closest ties, his position was a trying one. To be loyal then was to sever all these ties, and in case of the success of the rebellion, then confidently expected, to abandon all his hopes of advancement in the service of which he was so proud. He did not hesitate for a moment, but threw his whole soul at once into the cause of the Union. He could not even hear to hear the question of secession discussed, but would say coldly to all that the flag was defiled to in his presence, there was a flash in his mild blue eye and a bitter scorn upon his lip which gave assurance how sternly he would battle for its honor. In the anxious moments prior to the arrival of Butler he was the mainspring of defiance. He was, in the most trying position, he performed his duty and more than his duty faithfully and well, and when the old flag appeared in the offing (at first supposed to cover the looked-for attack), he rejoiced deeply and heartily in the rescue from disgrace. "We are prepared to see you," he said to an officer of General Butler's staff; "you have not come a moment too soon."

After General Butler's arrival Flusser was at once selected as Captain of the Post with a place on the staff of the Department. Troops were following rapidly to Annapolis, transports arriving from Fortress Monroe, forced by Washington, the harbor filled with vessels with provisions and supplies for the same destination. Vessels of war were soon arriving and departing, and the Severn was black with the hulls of a fleet of vessels. There was no preparation of any kind for the reception of the troops, and the force was utterly inferior to many small private ones on our Hudson. To reduce this chaos to order, to place these vessels, to load their cargoes and send them off for new ones, was the herculean task to which Flusser devoted his energies again day and night.

Of the many expeditions which he ordered while the Massachusetts Sixth had repaired; the two-decked frey boat at Havre de Grace was seized and two powerful engines brought down; the difficulties of getting them down to the little dock overcome by an ingenious temporary tressle work which projected into the river; the steamer impressed with wonderful celerity, and with a detail of a regiment and his own "shell backs" at the ropes, hurried over the intervening space to the railroad. As an interlude between these duties, Flusser obtained permission to impress a schooner and cut out a small propeller steamer from from a battery, and with a few shell backs set out for the curious naval expedition of the war, running up an adjacent river, landing and almost alone making a reconnoissance some miles in the interior, obtaining important information, and returning with the vessel cut out and in tow; for the first the chore and captured a light boat which the secessionists had stolen and secreted. These expeditions he several times repeated with like success. The writer has seen him when the bullets whistled thick and sharp about him, as calm and indifferent as if he were at mess; and we can imagine how deliberately he pointed and fired his last shot on the fatal day at Plymouth, and how gravely he died, with the instock of his gun in his hand and his face to the foe.

The most courage of Lieutenant Flusser was equal to his energy and his devotion to duty. Of the many expeditions which he ordered while the

One could not but envy the devoted loyalty which that re-

made and in fact his whole life displayed. It "cost him something to be loyal" and he paid the reckoning cheerfully and willingly, in the end with his heart's blood.

When General BUTLER was ordered to Fortress Monroe he did not forget FESSENDEN's merits or his services, but strongly urged upon the Navy Department his fitness for an important command, which he subsequently received. His step was firmly on the ladder, and if he had lived his name would have been more widely known and deeply honored.

The anecdote of his hailing LINCOLN's flagship in the fight in Albemarle Sound, with "Tell the General-in-Chief to get his dispatches out, I am coming aboard," before running her down and sinking her, was characteristic of his coolness and spirit.

There is no here worship in these trifling recollections of FESSENDEN. The writer speaks of him dead as he spoke of him living. He was his ideal of a sailor and of *real* Southern chivalry. He was refined and elegant in person and appearance, of medium height, slight but compact, with an open, frank, sympathetic countenance, a joyous disposition, with a laughing blue eye, and fine golden hair; but nothing as he was in person it was in mind that he was most attractive to those who enjoyed the privilege of his friendship.

T. D. M.

NEW YORK, April 29, 1864.

COMMODORE WILLIAM D. PORTER, U. S. N.

COMMODORE WILLIAM DAVID PORTER died on Sunday morning, May 1st, at St. Luke's Hospital, New York, after a painful and lingering illness of four months' duration. He had a few weeks before been a patient of this noble hospital, where he was treated by the most skilful physicians, but without avail.

Commodore PORTER was a son of the celebrated Commodore DAVID PORTER, of *Essex* fame, and was born in New Orleans at the time his father was in command of that station. He was a brother of Rear-Admiral D. D. PORTER. He was appointed midshipman January 1, 1825, but had served before the mast on the *Brooklyn* two years previous to that date. He served in the *Brandywine* frigate from July 5, 1825, to July 30, 1827, under Commodores MORRIS and PATTERSON. In 1828 he was ordered to the *Guerriere*, but in October his orders were revoked. On the 10th of March, 1830, he was ordered to the *Natchez* as Acting-Master. He was detached April 24, 1831. On the 24th of February, 1834, he was ordered to the *Lexington*, and subsequently transferred to the *Experiment*. He joined the frigate *United States* May 1, 1836, and served in her until March 11, 1838. In December, 1841, he joined the *Mississippi*, and remained in her until March 1, 1842. His next orders were to the Home Squadron, dated May 13, 1842, by which he was ordered to command the steership *Erie*, where he remained until October 15, 1850. He joined the *Water Witch*, as her Commander, August 14, 1851. On the 25th of May, 1859, he was placed in command of the sloop *St. Marys*, and on the 8th of September, 1861, he was ordered to St. Louis, Mo. Here he modeled his famous iron-clad *Essex*, and successfully commanded her until August 12, 1862, when he was detached from her. On the 13th of September, 1855, he was placed on the retired list. On the 6th of January, 1859, he was promoted to Captain, and subsequently resumed the active list as a commander, to date from September 14, 1855. In 1861 he was appointed lighthouse inspector. On the 16th of July, 1862, he was commissioned as a commodore.

His funeral took place in New York on Wednesday afternoon, his remains lying in state at the City Hall, and an escort of marines and military forming part of the procession thither and thence to Greenwood Cemetery. The following gentlemen constituted the pall-bearers:—Rear-Admiral Paulding, Rear-Admiral Breese, Major-General Sandford, Mr. Fitz John Porter, Captain Boggs, U. S. N.; Captain Meade, U. S. N.; Commander H. Erben, U. S N.; Captain Worden, U. S. N.; Colonel Teller, Fourth Military; Colonel Marshall Lefferts, Seventh N. Y. S. N.; Commander Craven, U. S. N.; Retired Captain Schenck, sixty-first regiment; Hon. P. Hamilton, Commander C. Kingsold.

The remains will be taken to Philadelphia for interment.

CAPTURE OF DUPPEL.

DUPPEL, the strongest fortress hitherto held by the Danes, has at last fallen into the hands of the besiegers. At eleven o'clock Sunday night, April 17, the Prussian batteries commenced a heavy cannonade of the redoubts, which lasted without intermission until ten o'clock Monday morning. During this time the preparations for a general assault were made. The left of the Danish position, comprising the redoubts numbered one to seven, commanding the approaches from the Wemingbund and the southwest, was assailed by the Prussians; whilst the Austrian Eleven brigade, advancing from Rakebull, attacked the redoubts numbered eight, nine and ten, which covered the Danish position on the northwest. Under the terrible bombardment which had continued almost without cessation for a period of nearly two months, the redoubts on the left had been reduced almost untenable, and the exhausted garrison was unable to resist the onslaught of the allies, who outnumbered the Danes in the proportion of about four to one. The storming of the left rendered the evacuation of the redoubts on the right a necessity, and the main body of the defenders fell back with great loss. The *tête-de-pont*, exposed to a heavy fire from the Prussian artillery, was heavily held by a detachment of the Danish forces, while the main body of the garrison, now reduced by the assault numbered about 26,000 men, retreated to the island of Alsen, carrying with them one hundred dead and eight hundred wounded. The bridge was destroyed before the entire force had crossed, and about 3,000 Danes were captured on the island. The Danish loss, inclusive of prisoners, is estimated at 4,000 men; that of the allies amounts to about 1,000 killed and wounded.

The fall of that important stronghold coubled the allies to dispatch a considerable portion of their forces northward to assist in the siege of Fredericia. The "maiden of city" is by no means as strong as was the Danish position at Duppel; and being comparatively feebly garrisoned, it probably would not withstand successfully a vigorous siege conducted by so large a force as the allies were able to send against it. The Danes are determined to defend it as obstinately as they defended Düppel; but unless the conference should put an end to the operations of the allies, its fall would only be a question of time.

At last accounts the Danes still held the island of Alsen, and the allies were preparing to attack them in this their last stronghold which they possess in Schleswig. A demand for the evacuation of Sonderburg and the entire island had been refused by the Danes, who were prepared to defend it to the last.

MILITARY AND NAVAL MATTERS IN CONGRESS.

CONGRESS has devoted the principal part of its attention during the past week to the consideration of the Internal Revenue bill and the Conscription bill, the discussion of the question as to the principles upon which the Union shall be reconstructed. The Senate resumed the subject of finance in the early passage through both houses of a bill appropriating twenty-five millions of dollars for the pay of the troops and bounties to volunteers for one hundred days called for by the Governors of the Western States, under the sanction of the President. Objections were made to the bill in the Senate by Senators FESSENDEN, Chairman of Finance and of Military Affairs, but they finally waived their objections and the bill passed, 35 to 5.

The question of the pay of negro troops was opened in the discussion in the House of Representatives on the Senate amendment to the Conscription bill, that all persons of color who have been or may be mustered into the military service of the United States, shall receive the same uniform, clothing, camp equipage, arms, equipages, rations, medical and hospital attendance, pay and emoluments, other than bounty, as other soldiers in the regular or volunteer forces of the United States of like arm of the service, from and after the 1st of January, 1864; and that every person of color so mustered into the military service shall receive the same amount of bounty as the President shall order in the different States or parts of States, not exceeding one hundred dollars.

Any colored person enlisted and mustered into the service as a volunteer, under the call of October 7, 1863, for three hundred thousand men, who was free at time of enlistment enrolled and subject to draft in the State in which he volunteered, shall receive from the United States the same bounty as was paid white soldiers under said call, not exceeding in any case one hundred dollars.

All free persons of color who have been or may be mustered into the military service shall, from the date of their enlistment, receive the same uniform, clothing, arms, equipments, camp equipage, medical and hospital attendance, pay, emoluments and bounty, as others of the regular or volunteer forces of the like arm of service, and all who were inmates in the regular army at the close of the war of three years.

After some debate the amendment was adopted, 81 to 69 Other amendments to the bill were also adopted, including one appropriating forty-five thousand dollars for the purchase of artificial limbs for soldiers and sailors. A bill was also reported from the House Committee on Military Affairs providing that on and after the 1st of May next, the pay of privates in the regular army, including those to sixteen dollars a month, and of non-commissioned officers as follows: Corporals, $18; sergeants, $20; first sergeants, $24; quartermaster sergeants, $26; sergeants, clerks to paymasters, $1,200 per annum, &c. The bill is as follows:

That the Army ration shall consist of three pounds and a half of pork or bacon or three pounds of fresh beef, or one pound and a quarter pounds of salt fish, one pound and a quarter pounds of soft bread or flour, or one pound of hard bread, and to every one hundred rations, fifteen pounds of beans or peas, and ten pounds of potatoes, and to every one hundred rations, ten pounds of rice or hominy, and ten pounds of coffee, and to every one hundred rations, ten pounds of sugar, and to every one hundred rations, four pounds of tallow or candles, and to every one hundred rations, four pounds of soap, and to every one hundred rations, two quarts of vinegar, and to every one hundred rations, one pint of salt, and to every one hundred rations, four ounces of pepper, and to every one hundred rations, thirty pounds of green or dried fruit, and to every one hundred rations, four pounds of molasses, and to every one hundred rations, four pounds of adamantine candles, and to every one hundred rations, four pounds of soft candles, and to every one hundred rations, four pounds of soft candles, and to every one hundred rations, four pounds of soft

CORRESPONDENCE.

WAR PRIVATEER FLORIDA.

To the Editor of the Army and Navy Journal:

SIR:—As fortune appears to be bringing us in the route of the rebel *Florida* at the present time, I had thought it worth while to communicate a few particulars in regard to her movements. She sailed from Madeira upon the 29th of February last, on a very dark night, stating in the papers afterwards that she was going to Cadiz or Lisbon. She had obtained coals, water, and provisions at Funchal, although the Governor at first expressed a determination to order her away without any supplies whatever. The *St. Louis* sailed the morning after the departure of the rebel vessel for Teneriffe, distance about 240 miles, only a day's run for a steamer; but we did not reach the island under six days, as we at first encountered a gale, which was followed by a succession of calms by a gale and calms. So that at last when we were fanned into port by a light breeze from the south-west, we found the *Florida* had sailed only the day previous.

She was ordered out by the Governor-General in twenty-four hours, but means were obtained for her to get to sea. She steamed out towards evening on the 6th, and after standing off some distance, made out a full-rigged ship to the northward, which supposed from course to be of American build, towards which she was headed when night closed in. Her commander stated, when on shore, that he would not attack as except in a calm, and had he sailed a few miles northward of the island, after going out, he would have found me in precisely that situation. The U. S. steamer *Sacramento* sailed from here on the 27th of last month, just one week before the arrival of the *Florida*. The latter met the British steamer *Bermuda* bound to Nassau, although by no he "blockader," saluted by dipping her colors three times, but was, doubtless, rather mortified at not receiving a reply.

The Spanish colors were not hoisted over the fort when the *Florida* entered port, as is the usual custom with friendly or war ships in, and in fact she was not treated in any respect as a vessel of war by the Spanish authorities. The first question that Spanish Governor asked me was in regard to the whereabouts of the *Sacramento*, but regarding which he received no information whatever.

The Captain of the port, Commander SALCEDO, of the Spanish Navy, appears to be very friendly to our cause. He married an American lady, a daughter of Gen. SMITH, of Maine. Hon. JOHN DIAN, Commissioner to Santa Leona, is here at present, awaiting the arrival of the steamer for Pe Cadiz. He has been to the coast of Africa, was seized at first sight, and now intends to travel over the continent of Europe. He mentioned having met your family at Rome, while visiting that city some time since. We have somewhat expected to see the *Kearsarge* come into port, as she sailed from Brest some days ago, according to newspaper accounts. There appears to be no law enforcement among the other privateers, with the exception of the *Alabama*.

OBSERVER.

U. S. SLOOP-OF-WAR ST. LOUIS, OFF SANTA CRUZ, TENERIFFE, March 12, 1864.

THE EXAMINATION OF OFFICERS.

To the Editor of the Army and Navy Journal:

SIR:—In your valuable Journal for April 23d, 1864, is an article, entitled "Important Subjects of Discussion," which contains a resolution and a series of pertinent suggestions. Nothing can be of more importance than the subject of which it treats. It is one that challenges the deep and serious consideration of all professional men, and of all who are interested in their country's weal.

Since the new military establishment has been organized, I have been looking anxiously for some effective steps toward the abolishment of the onerous and terrible evils connected with the system of promotion by seniority in the Volunteer Army, and for the establishment of a new one on principles of justice and merit.

We have, for too many incompetent officers of every grade in the Army, and nothing can be more vitally important to the cause than that we are engaged than the discussion and employment of wise and efficient means to get rid of them, and to appoint brave, meritorious, and efficient men in their places.

It is notorious that any one with political influence can get a commission, of almost any grade, that a Colonel may appoint whomsoever he pleases to command a regiment that altogether too many of our volunteer officers are to get in to be "high privates in the rear-rank." If all our regiments were properly officered, it would add, at least, one-fourth to our efficient field force, give us more victories and fewer defeats, shorten, in a great degree the list of killed and wounded in our battles, and return many brave men to their loving hearts and homes in the North, who under the present system, will find their untimely graves in the "sunny South."

Your correspondent C. S. W. in the article above alluded to says: "Experience has shown that the knowledge and of officer's qualifications attained by an examining board is "almost valueless." That he has "seen a candidate read, and answer every question put to them most glibly and correctly, and yet they were unable to impart their knowledge to others or drill a squad of men in the manual." In the opinion of C. S. W. I most decidedly differ. "Experience "has shown," on the contrary, that a *good* examining board can form a very correct idea of the fitness of an officer command by a rigid examination into his military and general knowledge, by looking his subject in the face, by reading the mind of God upon his countenance, and by investigating into his previous reputation and bearing. This latter can either be ascertained by "correspondence" their personal or by testimonials from them. But the qualifications of an officer cannot be ascertained by the "cross questioning" or testimonials alone. If an officer can impart his knowledge to the board, he can impart it to his soldiers; if he can tell the former how to form "double column," he can properly instruct the latter how to do so. Then can be no radical reform in the Volunteer Army until *all* officers are appointed and promoted upon the recommendation of a good and impartial examining board. A board should be with every corps or army headquarters, and should be under the immediate supervision of the Commanding-General, and no officer should be mustered into the service unless recommended by it.

As an instance of the good results of this system of appointing officers, I point to those regiments of colored troops which have been officered by Major-General CASEY'S Board. Their officers, as a class, are better than those of the most of our Volunteer regiments, and are so classified by some of the Regulars.

In fact, this is the only just and impartial manner of making officers, and its adoption throughout our Army will give new life and vigor to our soldiers, and hasten the day when returned victorious banners, torn and shot, the old flag wave in undisputed dominion from the Lakes to the Gulf.

J. B. Y.

WASHINGTON, April 28, 1864.

THE DISPOSITIONS AT OLUSTEE.

To the Editor of the Army and Navy Journal:

SIR:—Entire justice has not yet been done to either General SEYMOUR or to General GILLMORE or to their behavior at Olustee, Fla. During the last four miles marched before reaching the battle-field, the 7th Connecticut, numbering about 360, under Lieut. COLONEL WARD, with Spencer carbines, led in skirmishing order, occasionally getting a shot at the scattered rebel cavalry. They were immediately followed by Col. BARTON'S mounted force (the 40th Mass. Mounted Infantry, and Maj. SERRANO'S battalion of cavalry) and by Gen. SEYMOUR'S horse battery. A little too far behind (if there was any error at all) came the *other two* regiments of Col. HAWLEY'S brigade (the 7th Connecticut and 8th New Hampshire), leaving the flank abreast, one on each side of the road, with HAMILTON'S battery in the road between. Then BARTON'S brigade and Gen. SEYMOUR with the rear battery.

It is not just to censure the 8th U. S. (colored) no severely as some have done. It was a good regiment, had never been under fire, and had never been sufficiently practised in target firing—many of the men, so far as their officers knew, had never fired a gun. They did not use their weapons to good advantage, but they were not cowardly. You will accept the testimony of that much-respected and gallant officer, Lieut. Col. CHARLES E. HAWKINS, formerly SHERMAN'S battery, who was severely wounded in that fight, and who saw the 8th all about him. Said he to me, "The men did not know how to use their rifles; the "rebels were behind trees shooting the negroes down every "time they showed a head. I was constantly calling out to them, 'I fall sorry for the poor fellows. I did not see one of *their officers* or *ours* who showed cowardice."

I find they have 1,861 men. Having gone over 300 out of about 679 in a very short time, including both the field officers present, Col. FRIETLEY being killed, is evidence that they did not behave badly. The regiment was in a good position—half of them were going back more or less severely wounded.

A rebel officer who accompanied a flag of truce a few days after probably expressed the correct idea, though not very elegantly, when asked what he thought of the negro troops, he replied, "They stood killing d——d well, "but they didn't hurt us much." It was the first time that I ever actually saw negro troops fight, and I was anxious to judge for myself. I now think this: Train them thoroughly in firing at a target until they have confidence in their weapons and in their ability to use them, and then to try their effect on human bodies (this is the natural effect of such training), and I think they will have officers they will fight as well as the average of mankind.

CLAIM AGENCIES.

To the Editor of the Army and Navy Journal:

SIR:—I have noticed several remarks on the subject of "Claim Agencies," and while I agree with you in the main, I think you are mistaken regarding the sufficiency of the compensation allowed by law to persons prosecuting pension claims. In the first place, a mere bookkeeper could not do the work. There are very many nice legal questions to arise in the course of prosecuting a pension claim which it is impossible, or at least improbable, that any one but a lawyer can decide upon. The rules of evidence must be thoroughly understood to enable the claimant to submit to the Department satisfactory proof of the facts necessary to establish his claim. There is probably nothing about which the non-legal mind has such erroneous ideas as about the rules of evidence. Informal affidavits, "statements" and letters, upon which are based thirty without proof, are constantly forwarded to the Pension Office as proof, by these bookkeeper agents, and in consequence have to be returned for the proper proof to be obtained. I would, myself, much rather sue in the Supreme Court on a note and proceed the same to judgment than take up for prosecution any pension claim. I have no doubt that all the paths are better known, and I am probably as familiar with them as any claim agent in the city of Boston.

Take this case. An officer is on trial before a court martial for offences against discipline, and while on trial an additional charge is preferred against him and one of the witnesses, a fight ensues, and the accused is slain. If his mother dependent on him for support entitled to a pension? This is a question as to the construction of the statute, and as difficult as any that ordinarily arises in the practice of the law. Again, who shall be deemed to be "of any wound received or disease contracted in the line of "service of the United States and in the line of his duty," and how shall it be proved? Suppose a soldier in the Army was in the service of the United States and in the line of his duty when he received the wound which caused his death. A protective claim agency informed the mother that under the circumstances she was not entitled to a pension; but I am satisfied from a careful perusal of the decided cases, and from general principles that she is, but five dollars does not seem of sufficient amount to induce me to take up such a difficult case.

Again, as the article in the JOURNAL has set forth, the fee is capable of being made larger by omitting to make the case out correctly. In fact, the temptation to do so thus offers a premium to the agent to delay the cause, which is in itself a sufficient reason for its repeal. Laws of this kind always fail to have the desired effect, and like the laws against usury, rather aggravate the evil they are designed to remedy than otherwise. Claimants are liberally provided for by the Government, and so long as they require the services of attorneys in prosecuting claims there seems to be no good reason why they should be prohibited from employing the best talent at their command.

R.

NEW YORK, April 30, 1864.

CLAIM AGENCIES.

To the Editor of the Army and Navy Journal:

SIR:—My attention was called to a timely and well written editorial in the JOURNAL of April 30, and I move heading. I notice, however, that in the suggestions you make, to obviate a remedy may be provided for the invalid soldiers and the widows who are taxed so enormously by attorneys for prosecuting their claims, you recommend the establishment of claim agencies in all the large cities, which shall be to endowed by charitable contributions, and that the claimants may obtain their Pension, Bounty, and arrears of Pay, without any expense to themselves whatever, and yet at the same time you fail to mention the fact that *such claim agencies as you suggest are in existence in New York and Brooklyn, namely, the Soldiers' War Relief Association*, of which Gen. General WINFIELD SCOTT is President, located at 35 Chambers St., N. Y., and "The War Fund Committee," of which Hon. A. S. T. STEWART is President, located at 16 Court St., Brooklyn. Both these institutions are composed of gentlemen of wealth and philanthropy, who, by their contributions, secure the payment of all soldiers' and sailors' claims upon the Government, without costing the claimant or the Government a single cent. Such difficulties are obtained, additional evidence furnished, and correspondence carried on, at the expense of these benevolent agencies, and so far as these cities are concerned, all soldiers' claims for pay, widows and orphans, need fall into the clutches of the unscrupulous and merciless attorneys.

S.

THE IRON-CLAD TECUMSEH.

To the Editor of the Army and Navy Journal:

SIR:—On the 24th of April, the U. S. iron-clad *Tecumseh* steamed out of New York harbor in tow of the tug *Hyderabad*, and on the 25th of April, arrived at Key West. Fortune or was charming and the sea remarkably smooth: when the vessel began to feel the swell and pitch into it, the water came rushing in the forward ports-ports, as I am very unfortunately nomenclature, and rain were all efforts to prevent or check the inflow. The vessel was then headed for Port Everett returned to the anchorage at Sandy Hook. Of these said hawse pipes, it must be understood, that a more expensive device for letting the chain cable run out of the ship was first been adopted: the worst part of this "water work," that is the useless hole drawn through the side of the ship, had been effectually plugged, and the ship was in a fair way of being ship down the Bay care was taken to secure the chainways against the intrusion of the ocean, by caulking well with cement and oakum, but in the first heavy sea the Tecumseh reminded us of his insinuating ways, and back we had to go to repeat the same way of coming out.

The 26th set in with a S. E. gale, which continued until night, and the next day being foggy, we did not get to sea until evening. On the 28th we again took our departure from Sandy Hook: On getting to sea, it was found that the water still forced in, but not quite in such quantities as before. The wind was fair, and the sea not very heavy and we quite well until 1 A. M., when the tow-line chafed off, but the weather being good, it was resolved to try the Monitor without waiting for another steamer to take her in tow as we could be relied upon in case of emergency, so they steamed on with their own power, the ship now in charge of Fearless hours of hard labor exhibited an average speed of 4½ knots; the *Tecumseh* was doing her best, and this with the sea "at "smooth as a mill pond." But in the hour before dawn the tug was called alongside, the hawser again made fast, and with accelerated speed the vessel reached Hampton Roads at 4 P. M. on the 29th, having steamed from Sandy Hook, "the best (Monitor) passage on record."

As to the sea-going qualities of the vessel, it were impossible to form any opinion from the passage, however, to be very buoyant, and her motion as easy as can be. She steers well for a Monitor, and the arrangements for her anchoring and Mooring genius as can be found anywhere. If the design only aimed at was the building of a raft to carry a revolving turret, this is the best of arrangements, but everything else has been sacrificed to the attainment of this purpose. So much space has been taken up with machinery and boilers that there is not room enough to accommodate more than two-thirds of the crew, but with all her defects, the *Tecumseh* is the most effective vessel of her class, and comparatively speaking, may be considered

The discovery or rendering these vessels "invincible-shields" has done more to extend a war than any one of the most requisite elements of efficiency; it has been forgotten that a sea-going vessel is exposed to other dangers than those of the enemy's fire, and that the enemy's fire is the most formidable enemy a ship has to encounter; a good steering apparatus, easily accessible, has always been considered a most important requisite, but it is only when the safety of the vessel depends on the skill and quickness of the helmsman; more strange than all, it was forgotten, that there are certain rules laid down by which to calculate the exact displacement, or in other words, the draught of a vessel, and that it is only necessary to know the load when the great point of failure in the *Tecumseh*, by whose excessive draught, there is a consequent loss of speed, half-water ply and want of capability to carry her coal and stores.

For fighting a Monitor at sea, it is difficult to find any seaman who believes in it, but so far as our own knowledge extends, we do believe that under the most favorable circumstances of wind and sea, a 15-inch gun may be fired once in a half hour, and then under circumstances of great hazard to the guns' crews.

For harbor service, we are of opinion that the turretted vessels will hereafter take a very important position; an enemy's fleet will venture to enter a harbor which is defended by the [illegible] of light draughts; but to make these

ships really formidable and invincible, they must have a high rate of speed, and be under the entire control of the helm, and in view of these essential qualities, they must get rid of the overhanging stern which is such a dead drag in the water as no engine can overcome, and the effect of its eddying whirlpools are such as no rudder can quickly meet.

It will be understood that we are advocates of iron-clad vessels for coast defence, but we insist upon it, that to these such vessels really valuable, there are certain rules concerning the laws of motion which cannot be departed from; and there are certain other rules, as to the specific gravity of bulkes, which must be under the entire control of the naval architect; if these rules are all set at defiance by one who undertakes to build a ship, it cannot be expected that he will succeed. We maintain, that whatever the principles for the calculations of weight, upon which the hulls of these vessels have been built, they have exhibited an unpardonable degree of ignorance, and should be held strictly accountable by the Navy Department thus imposed upon.

THE TURRET SYSTEM OF IRON-CLADS.

Blackwood's Magazine for March contains one of its periodical articles on iron-clads, entitled, "The Fleet of the Future," which furnishes an illustration of how the ironclad question in England since the combat between the *Monitor* and *Merrimac* has shrunk between the fictions of the power of the gun on one hand and the doubts of nautical men and the promises of the naval architect on the other. Each in its turn has been in the ascendant; and at the time the article referred to was published, the gun was supreme, as the writer declared that all-iron clads, carrying a gun coil-gun had just smashed an exceedingly thick plate—in fact, nearly as thick again as any of their iron-clads can carry—with a charge of ninety pounds of powder. That this writer is laboring under the influence of the effect of this momentary charge of powder is quite clear from the following paragraph:

"If then these monstrous cannon should come into general use, as seems in time highly probable, so far from armor plating giving immunity to ships of war from the shot of their adversaries, it will be the contrary. Weight far more formerly; seeing that on the one hand, the armor will not keep out hardened steel projectiles, while on the other hand by its enormous weight, the vessel is rendered too manageable and buoyant, and its chances of sinking from the effect of any shot increased a hundred fold."

"If monster cannon should come into general use!" Is it possible that this writer, whose pen runs so glibly on the great naval question of the day, can be ignorant of the fact that we have for nearly two years manipulated within our impregnable fortresses, and mounted upon them, the very service charge of which is now sixty pounds of powder, and a solid shot, against iron-clads. We do not propose, Mr. "Fleet of the Future," to tell you of the monstrous cannon we have a service gun—not a solitary experimental one, but a whole park—which can smash in the sides of any of the English iron-clads afloat, and that we have mounted the most *nonsuf* artillery experiments to the end, that we may be able infallibly to sink any that England may hereafter produce.

So much for the monster guns; let us see what this ironclad critic has to say of the monitors—the low carriages, in other words, on which they must be mounted. One of these opponents of the power of the British Navy, the *Warrior*, *Agincourt*, *Lord Clyde*, *Lord Warden*, *Valiant*, *Black Prince*, *et sunt genus*, he says "it is scarcely to be doubted that these ships pass the limit of size of manageable vessels of war. Their enormous length makes them slow in turning, and difficult to steer—qualities for the want of which even great speed will not atone for." And when we consider how much greater is that vessel should be, so as to turn at least as quickly as her adversary, in order to bring the whole effect of her broadside to bear, the necessity for proving her opponent taking up a position for raking her, and for attacking her *screw* and *rudder*, the slowness of manœuvring of these two vessels becomes a *very serious defect*." Italics are mine.)

Imagine for a moment an attack on New York, for example, by such a fleet as that of which we speak, all of which is thus frankly acknowledged, vessels drawing from 26 to 28 feet of water, endeavoring to pass into a harbor, while on the shoals on each side of the channel, monitors, from their light draught out of the reach of danger and at good ranged, would be pouring their shells into the sides of these *fifteen* inch projectiles propelled by at least sixty pounds of powder. These guns do not have to be trained by turning a huge vessel, but by a single man, elevated, and with ease easily and quickly aimed to any point in the horizon by simply revolving the impregnable cylinder in which they are mounted. It is not to be supposed that the writer in the *London Times* spoke of the *Monitor* as a vessel which could not only blockade New York, but could also, by passing up the harbor and lying on the broadside of the city, destroy the other on Hoboken have everything her own way.

A little further on, this writer says in relation to the fifteen inch monitors, unwieldy, vulnerable, and costly engines of war are regarded by the British government as great mistakes. "Those who, like Captain Coles, R.N., the chief constructor of the navy, has publicly declared that three very long vessels are a mistake, we may conclude that the Admiralty do not intend to build any more on that scale." Now, we happen to know that the chief constructor of the British navy is endeavoring to make good his assertion by constructing another broadside ironclad, *Bellerophon* by name, which, on her short two-thirds of the displacement of the *Warrior*, will carry a heavier armament than that vessel, with more impregnable armor and a more formidable battery. This is certainly somewhat paradoxical; but we must still consider Captain Coles as misrepresented. But this writer condemns these vessels of Mr. Reed's, which, he says, "are now being exclusively adopted for the Navy." He considers Mr. Reed's gun paltry, that he can put heavy guns—300-pounders—in broadside in his vessels,—in fact, such guns as the conditions relative as necessary to enable the new craft to contend successfully with any respectable iron-clad, as untenable. On this head we must say that we thoroughly agree with him.

But in justice, it must be said that this writer has the sagacity to perceive that our *Monitor* system is the only one upon which any sound anticipation, as to invulnerability and the ability to use monster guns, can be based. It is quite clear, as he condemns everything else, that his *Broadside* vessels are to be under the entire control of Captain Coles' turret system; this is the kernel of his paper. It is evident, also, that he regards the *turret* or *Monitor system* as the only one which can meet the requirements of the age, from the feeble attempt he makes to prove it an English invention. He says: "Captain Coles' system dates from the plan from wooden published in *Blackwood*, for December, 1860. We will refute this assertion by a brief sketch of Coles' career, from this writer's own account as one either guilty of wilful misrepresentation, or of ignorance unpardonable for a scientific writer in a magazine of the standing of *Blackwood*.

Coles dates his iron-clad career from November 13th, 1855, when he proposed what he termed his own raft, with a gun protected by a *stationary* shield or cupola. Coles further states that, notwithstanding official neglect, he persevered until February, 1859, when he submitted to Admiral Rous. He produced drawings of a "shield fitted with turn-tables." These then are the grounds upon which Captain Coles bases his claim to the Monitor system; and on such frivolous data as this, this writer makes an attempt to establish for him priority of invention for the *Monitor* iron-clads.

Granting that what Coles claims is of some practical value to the navy, (although we think that it is very doubtful to say the least—the letter of Kossuth to the Emperor Napoleon, under date Sept. 26, 1854, enclosing drawings of the first Monitor ever built, with its low snow and sub-der protected, at once destroys his claim to its invention. In vain is the report of Nov. 13, 1855, examined to find any indication of a "turret" or "cupola" or description of a *Monitor*.

In this report the "gun-raft" is specified as follows:—"1st. Light draft of water. 2d. Facility of propulsion. 3d. "Simplicity and rapidity of construction. 4th. Great buoyancy and stability, enabling it to be used on each with "great precision of fire. 5th. Protection to the crew." A drawing of this *raft* can be seen in No. 14 of *Journal of the United States Artillery*. We conceive that to be a specification of an iron-clad vessel, within which is placed the usual naval motive power, and on which is placed an impregnable battery, consisting of "a raft" on which is mounted two monster guns, with a sector of fire equal to the whole horizon? Such a description would most naturally refers to the wood-cuts published in that magazine for Dec. 1860. Let us examine them.

Referring to figure 1 of the above date, there is seen a section and plan view of a vessel, the sides inclining upwards from the water's edge, this inclined part is covered with armor plates. On the deck, which is 10 feet above vertical bulwarks of iron, the sanding of an ordinary iron vessel are carried up from the edge of the deck to the top of the deck, which then the inclined side; in a series of circular holes cut in this deck are inserted an equal number of "cupolas," (the word "turret" was not, perhaps, had not yet been adopted). These "cupolas" are curious structures, composed of a circular frame work of heavy timber, mounted like the deck with armor plates, and pivoted, and a series of rollers under the circumference. Where they protrude above the deck this frame is in the form of a frustum of a cone, and is covered with inevitable 41-inch solid plates. The whole is turned by manual power by means of a crank, the axis of which is a capstan at which below. The internal diameter of this structure at its lower part is about 15 feet, and its height from the floor of the deck is 7 feet. Within this compartment, on a clumsy framework of wood, two breech-loading Armstrong guns are mounted—these guns are fired in service with the obliquities of fire which are given by the "cupolas," practically speaking, such a structure as this is purely imaginary: it is not of the slightest practical value, and could only have been suggested by a person ignorant of the particles of mechanical judgment.

But to do Captain Coles justice, it must be said that he has at last perceived the worthlessness of his plans above described, for the sketches published in *Blackwood* are identical with those which he submitted to convert the *Royal Sovereign*, three-decker, into a "cupola" ship; this is clear from drawings of this vessel, "converted," published in the *Professional Papers of the Corps of Engineers*, August, 1862, and from elaborate engravings, accompanying a lecture on "Iron Ships," by Mr. Coles, delivered by Captain before the Royal United Service Institution on June 29, 1860.

With the small breech-loading Armstrong guns then contained, wood and iron, Mr. Coles proposed, but when the puny effects of the breech-louder against iron plates was proved by experiment, these "cupolas" were abandoned as useless. The Admiralty, as Mr. Coles says on this head, says: "The word 'turret,' made use of in referring to Captain Coles' ships, has been misunderstood, the simple 'shield which were to crown the towers having been abandoned, together with the breech-loading ordnance for their armament, which was found inadmissible, and the muzzle-loading ordnance as can be made for them." In other words, the much talked of "Coles Cupola," together with its inclined sides, were abandoned as chimerical by the Admiralty, and the American *Monitor* turret adopted instead. We compliment the Admiralty on their wisdom.

The gradual conversion of Coles himself from the impracticable ideas he for a long while adhere to so pertinaciously, and at such expense to the country, is certainly amusing, and is another proof of the soundness of our plans. His conversion is not yet quite complete, but if it progresses as rapidly as it has done, we think that, some day, will be. He longs to keep something in remembrance of his wood and iron "shields," so although the American cylindrical turret is adopted in the main, its size is so contracted that it will be impossible to properly manipulate the guns; he still "adheres to the railway turn-table," rollers under the circumference, and elevates the turret up through a hole in the deck. What does the Captain think will become of his turret if the deck is struck, near this opening, with one of our service 430-pounders?

"Captain Coles illustrates his lecture before the Royal United Service Institution on June 29, 1860, with a section of a vessel (like the *Bleebwood*, December, 1860), built with his wooden "cupolas" and inclined sides. He lectures again before the same institution on June 29, 1862, upon the same subject, but this time it is illustrated by elaborate plans of an American turret, mutilated, it is true, on a vessel with wooden sides, probably a steamer of the *Ericsson* or *Swift* class. Comment is unnecessary. We hope, however, that this writer will pursue his investigations, for, if he does, it will not be a matter of surprise if he illustrates his next lecture with drawings of an American Monitor.

According to Captain Coles' own confession, he is evidently wanting in the practical ability necessary to put his crude ideas into form to shape (see discussion of before March 25, 1863); the task of constructing and making his designs is left to the engineers of his country, while he confines himself to writing occasional letters to the London *Times* and delivering lectures. It is plain, however, that many have been willing to believe him to be an "injured inventor;" other nations do not, neither do the intelligent portion of his countrymen. The London *Athenæum* for February 20, 1864, in the first professional magazine in England, in an article on the Monitor, frankly says:—"We will not here enter into a discussion of the merits of Mr. Coles' claim to the invention, or that of Captain Coles as to the originality in this class of vessels" and the writer adds, doubtless, Captain Coles may very possibly deserve some credit for endeavoring to improve on Ericsson, still that the originality of design of the "*Monitor* is due to Ericsson, we think there can be no "doubt whatever."

Scientific men are always ready to place credit where it belongs.

Yet in the face of the evidence above quoted, which must be known to many of our friends as well as to the rest of the professional world, he has the consummate effrontery to stand up in the theatre of the Royal United Service Institution, before a distinguished audience, and call on the "American Monitor as the first copy of my invention."

In conclusion, we would advise "Fleet of the Future" to examine with the events of the past before he attempts to penetrate the future. Investigator.

PETITION FOR AN INCREASE OF COMMANDERS IN THE NAVY.

The following petition has been extensively signed by the Officers in the various Blockading Squadrons:

To the Honorable, the Naval Committee of the Senate:

We, the undersigned, Commanders and Lieutenant-Commanders of the U. S. Navy, beg leave to call the attention of your honorable Committee and, through you that of the Senate, to the fact that there are now twenty years the number of Commanders in the Navy as was thirty-two (32), and that of Captains sixty-five (65). Our vessels then numbering forty-two (42), there often were on the naval list two many for the exigencies of the service, and yet, at a time when the Navy was being enlarged three-fold in men and vessels, the number of subordinate officers, Heads of Commander was reduced to seventy-two (72), and that of Captain to thirty-six (36). The result has been to stop promotion among the Commanders and Lieutenant-Commanders.

While the duties and responsibilities of these grades are considerably increased, they are imposed on officers of inferior rank; i. e. it is required of the Lieutenant-Commander to do the duty formerly performed by the Commander that of Captain. We have Lieutenant-Commanders in some instances commanding frigates, serving as fleet-captains to flag officers, and Lieutenants in the duties of Captains; their labors alone, and not their rank with its emoluments are increased. Of these two, of these grades, was about the same time materially reduced.

We may be pardoned in feeling aggrieved as the case now stands. Our profession earning a flag that these two grades of Captain and Commander may be increased at least to their old figures; which would not increase the aggregate expense of the Navy. Of the Lieutenant-Commanders, now one hundred and forty-four (144), and found by experience, we think, to be entirely too many for the present limit. As it now is, not infrequently, a Lieutenant-Commander of long service commands a frigate, while another Lieutenant-Commander of the same rank and pay, but of short service, is performing the executive duties of a comparatively insignificant vessel. This arises from the want of a sufficient number of Captains and Commanders, to which we have alluded.

The necessity for an increase of these grades is so apparent, that we deem it unnecessary to argument unnecessary to your enlightened Committee; and with the hope that some measures may be adopted for our advancement, we subscribe ourselves

Very respectfully, your obedient servants and petitioners.

The Committee to investigate the Fort Pillow massacre have returned, and report that they have the statements of nearly three hundred witnesses, and yet represented by the newspapers. They took 87 depositions, many of them of persons actually killed in the fight, and of those who escaped after they had surrendered. Men, women, and children, refugees, contrabands, and surrendered troops, were indiscriminately butchered. The Committee will soon make their report, giving a plain statement of facts and the depositions without comment.

Deputy Baron Engelbert Graham has reported to the War Department, that it will require immediately to repair the gun wall at Buffalo, to preserve the wall and adjoining property. Estimated cost, $27,000. The complete will be about the original design, with modification of direction, $27,065.41. He recommends prompt appropriation.

NOTICES TO CORRESPONDENTS.

The Editor of the JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to the columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to correspondents in regard to matters and other questions.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made at the risk of the subscriber by mailing bills, bank notes or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 191 BROADWAY, CORNER OF JOHN STREET.

CITY SUBSCRIBERS who change their residence at this season, are requested to give notice of the fact at our office, No. 39 PARK ROW, in order that the addresses of their paper may be altered accordingly.

THE editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 39 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second door front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, MAY 7, 1864.

CONCENTRATION.

THE elevation of General GRANT to the chief command of the armies of the Union, was properly regarded as the final act of acquiescence by Government in a sound military policy. That policy is known as Concentration—a word which, ever since that event, has come into such incessant use, and has acquired such a depth of meaning, that it will be well to consider with more exactness what it really imports. To some it is still but an *inane nomen*—a catchword, with more mystery than magic in its sound; to others, it carries even a false significance, ill adapted to presage or explain the approaching movements of that General who is regarded as its embodiment or representative.

In brief, then, the term *combination* will be found a more fully descriptive appellation for the policy of the new campaign, than the term concentration. Or, if the latter be chosen, let us see what it implies. Concentration is not limited to the lumping of armies together by mechanical union. The Napoleonic accumulation of crushing weight at a single point, illustrates concentration in the tactics of the battle field. But this is not always the concentration of the strategy of a general campaign. In rapid manœuvring, hostile massing cannot always be seasonably detected. In preparation for campaign, it may be checked by counter-massing. Concentration, then, should express not always the agglomeration of masses, but the *direction of power*, of whatever military character upon a point or series of points: not always uniting men, but combining movements.

Against an entrenched enemy, like that in Virginia, two or even three lines of operations may be as practicable as one. But in adopting them, it becomes necessary to observe, first, that the forces in alliance be conducted simultaneously, or, rather, with mutual reference. If this caution be neglected, the enemy may find opportunity to throw himself against one or another of the allies, upon the temporary check of either, whether the check arise from military or physical causes. He will proceed, if possible, to attack and destroy in detail. In our campaigning, the enemy often has peculiar facilities for such tactics from the possession of interior lines. In the late Red River Expedition, Shreveport was undoubtedly the immediate objective. There were two menacing columns, General BANKS advancing Northwest along the Red River, General STEELE pursuing the military road Southwest through Arkansas. Unfortunately, there was no communication or inter-dependence between the two. The hostile Generals, KIRBY SMITH, PRICE and TAYLOR, moving down against General BANKS, completely repulsed him. His repulse at once rendered the situation of General STEELE precarious.

Two or more lines of operation, also, must converge absolutely to a common point, and be pursued without regard to possible minor demonstrations. The enemy will seek to distract attention. Our own policy is, on the one hand, to continue unperturbed by his feints or even by the trifling injuries he may inflict; on the other, to reject opportunities for extraneous success, or for obtaining plunder, which, after all, is only gathering up what the enemy temptingly leaves to facilitate his flight, by delaying our pursuit.

But these things cared for, the combination of movements of separate armies is true concentration. Our own belief, long since expressed, is, that in Virginia this is the correct plan, and the one which will be adopted in the summer campaign. Such a combination is suggested by the physique of the country. A powerful army on the James forces the enemy to loosen his hold on his entrenchments along the Rapidan. But a strong army facing him at the Rapidan coverts the Washington capital, and quiets the investerate fear of that perilous move—exchanging capitals. Richmond for Washington. This army anticipates disastrous counter-demonstrations, like that skillful one of STONEWALL JACKSON, and stands ready to push forward, the instant the motion of the column on the James gives the cue, to the long-gathering storm of battle bursts, it may "thunder all around the sky." We do not believe that strong triumvirate of Generals —SHERMAN, THOMAS, HOOKER—who rule at Chattanooga, will play the part of simple spectators all through the month of May.

A second suggestion may be made on this topic. Concentration in Tennessee and Virginia demands partial cessation of aggressive operations elsewhere. It does not check all aggression, but only that which is not subsidiary to the great campaign. Aggression for the acquisition of distant territory, or for the possession of some other province of the soil, it does temporarily interrupt. Aggression, whose object is to detain the enemy's troops in a distant quarter, it fully sanctions. Especially is this true with forces engaged to occupy ground which we must not surrender; or with such as could not reinforce the main armies in season for efficiency. Many criticism has condemned operations of this species which were really subsidiary to the grand purpose. They fulfilled the doctrine of concentration, in the sense of combination. With an essentially defensive enemy, who finds facilities for transportation we have not, our best move is to detain his distant troops from making junction with the army he would subjugate, by threatening severe penalties for their withdrawal. On this ground, the Red River Expedition is to some extent defensible. But it is unquestionably liable to direct censure on the other ground. Shreveport, its aim, will be found, in future, a point of much strategic value to the trans-Mississippi region. But any aggressive campaign in the Southwest subjects, at present, to pitying hope, forces against lesser without the consolation of worsting them, and to using strength there which could be better expended elsewhere.

Our general policy, we repeat, save at the main points, and for the subsidiary purpose noted, must be occupation, not conquest. Distant Department commanders, till other word is given, must stand simply at parry and guard. For the present, the Navy should be the great army of occupation. We must hold whatever relatively few troops can hold. We may abandon unimportant interior points, and contract the lines hitherto skirting the banks of unimportant rivers. Where the Navy can guard our conquests, they have a field of valuable service. For such service they are already reinforced with a fleet of six and thirty "double-enders," for river navigation. Gunboats as defenders of occupied points may economize the effective military strength hardly less than the great muster of 100,000 Western militia for frontier defence.

It was in the belief that we did not misinterpret the new policy, that the probability of the evacuation of Pilatka in Florida, and Little Washington in North Carolina were lately suggested, the confirmatory news following close on the issues of the JOURNAL which conveyed our impressions.

THE suggestions of the JOURNAL with regard to Claim Agencies have elicited various replies, two of which we publish elsewhere under their appropriate head. Leaving on the latter points, it may be well to elucidate such as have already excited inquiry, in order that their true bearings may be seen. It is well known that gratuitous Protective Agencies have been established. A few, doubtless, fulfil their mission, and have become an admirable charity. But the need is, in most cases, to extend them, partly reorganize them, and provide for their future support.

First, the agencies should be *systematically* established. There is now very little connection or intercommunication between them. They should have all the consistency, and all the unity, even, that is possible. The similar institutions in different cities should be in correspondence with each other. Perhaps even a general Board of Inspectors or Supervisors could be established, to make certain—as a part of their business—that each Society is profiting by the experience of all the rest. The minor details of office-work, also, should be conducted according to the best model. Finally, the charitable purpose should flow over the ground thoroughly. Granting, even, that these are sufficiently perfect in operation, their number could be increased four-fold before reaching the maximum of good. Again, they must have skillful, intelligent, and enterprising managers, to prosecute claims with the acumen and tenacity of the well-trained lawyer. Private practitioners often manifest not only superior adroitness in procuring patronage, but superior judgment in conducting cases. One of the letters already alluded to, professes to cite such a case. There should also be sympathetic interest in the applicant's cause, and not the pestilence too often found in salaried, mechanical officials. Finally, judicious advertising should make the gratuity known. Many of the numerous claim agents are overrun with work, and able to reject difficult cases. It should seem that, if the other requisites already spoken of are fulfilled, the existence of the charitable societies is not widely known, or else their professions are suspected. Many often, even, in the army, know of no exact locality or particular agency to which their men can be recommended with confidence.

On the other side of the question it should be said, that there are many claim agents of talent, ability, integrity and honor, to whom pensioners could be confidently directed. Most of these can find greater remuneration for their time and skill in other branches of law than in this. What is the remedy? Not, to increase the legal fee, for it is already sufficiently onerous to needy applicants. Nor, on the other hand, should skill and legal ability, paid well in other fees, be wholly expected in this. The remedy is to let the just fee be met by rich, benevolent, and patriotic men. The question, after all, is not so much what is paid, as, who shall pay it.

Especially is there need of such charitable societies when the claim is good, but presenting such peculiar difficulties as not to be undertaken for the ordinary fee. The design of the Department at Washington was to have ordinary forms of application fixed and simple; and to establish such a fee that, though the extra work which undoubtedly occurs in some cases, may demand larger remuneration, it may be compensated by the mechanical simplicity of the work in the majority of cases. But private practitioners will either throw off the more difficult causes, or else require a proportionately burdensome fee.

Professional claim agents have told us they would prefer the establishment of charitable agencies. And on our part it may be said, that should a general organization of them take place, no more fitting persons could superintend and manage affairs than some of the experienced legal gentlemen who have pursued the collection of claims honorably and humanely. Such men would be best able to weed out the disgraceful sharpers who have already imposed upon the needy dependents on Government.

THE Courts of Inquiry into the conduct of Generals NEGLEY and CRITTENDEN, at the battle of Chickamauga, have finished their labors, and the issue is shown in the publication of the proceedings, which completely acquit both these gallant officers of the charges which had been made against them. The Nation has a right to congratulate itself upon the result of such investigations, when it shows that its

servants, to whom have been confided the lives of our soldiers in the field, have not proved recreant to their trust, or incompetent to sustain the responsibilities devolved upon them; and it would seem as though the Government would naturally hasten to publish the verdict of acquittal, in every instance, as soon as it were received. Yet there are officers of high rank against whom the most damaging charges have again and again been made, apparently with official sanction, who have suffered for months from the stigma then cast upon their good names, although it is generally understood that Courts of Inquiry have fully exonerated them, and the Government still withholds the record which would set them right before their countrymen and the world. Such reticence as this is not only unjust to the officers whose reputation may be involved; also exposes the military authorities to the charge of persecution of those who may in some way have incurred their displeasure. We trust that the prompt publication of the findings in the case of Generals NEOLEY and CRITTENDEN makes a change in the pernicious policy which the public began to believe the Government had instituted and deliberately adopted as its rule of conduct.

THE telegrams announce another "race" in Arkansas. General STEELE and General PRICE were the runners, the prize was Camden, and the Union officer won it. If the news be true, General STEELE has been plagiarizing on the strategy of General A. J. SMITH, whose recent "race" with the Confederate leader at Red River is everywhere known. But possibly the ingenious dispatch-writer has used the allegory of the racing match in the Camden case only because he found it so pleasantly received in that of De Russey. Even in the latter, there was not only a race to run, but a sharp battle to fight and a fort to be won. And so there may turn out to be more *race* and less race, in the late occurrence at the capture of Camden. But whether we dignify the Arkansas tactics as racing or manœuvring, there is a goodly savor of successful generalship in them. Let there be no copyright on the plan, and let plagiarizing be free; for there may yet be something similar to practice farther east. For General STEELE, let us hope the next racing-goal will be Shreveport.

Meanwhile, the true lesson to derive is the advantage of securing mobility to troops, and the freedom given by progression in light marching order. When possible, let troops campaign with a minimum of baggage—*impedimenta*—impediments. If a positive proof of the evil effects of impedimenta be given by General STEELE in Arkansas, a negative proof also is not wanting in the disasters on the other side of Shreveport, at Sabine Cross Roads, Louisiana.

THE severity of the sentence of Commodore WILKES will awaken surprise in the Navy, which would be likely on a cursory view of the known evidence to consider a milder punishment sufficient for the offences proves against the accused. But whatever the feeling of those who are not familiar with all the facts of the case, there can be no doubt that Commodore WILKES received his sentence after a full and a careful weighing of the evidence. Since 1818 he has been a member of the service from which now for three years he endures a painful separation, and though he has been far from popular with his fellow officers, he will in his disgrace be probably more leniently regarded by them than by those with whom he has been less intimately associated. It is impossible for us at present to attempt any review of the proceedings of this court-martial. The testimony taken was of a very voluminous character, and has not yet been published.

DESPERATION is an immense element of power for temporary purposes. Nothing calls out the strength of an individual, an army or a nation, like being engaged in a *desperate* contest or cause. In desperate circumstances, men often perform deeds that are almost superhuman. Desperation not only magnifies vastly the ordinary physical strength of the individual, by calling up his reserved and comparatively dormant powers, but it increases also the force and forces of the intellect; and the mental resources displayed by desperate men are often as astounding as the physical. As with the individual so precisely is it with masses of men in this respect. They fling their entire energies into a cause, when nothing but its desperation and desire could call these energies out. In history, the desperate battles of an army have often been its victorious battles.

We frequently hear the desperation of the Rebel cause spoken of as an element of weakness. In a large and far-seeing sense, it doubtless is. But for temporary purposes, there are none of the moral qualities that produce such mighty deeds and vast results as *desperation*.

THE importance which military science has assumed to this country has given a new direction to our prolific inventive genius. Instead of devising new clocks and spinning wheels and agricultural implements, the clever Yankee has turned his attention to the improvement of the instruments of warfare—to guns and projectiles, ships and armor; but though there have been many inventions and many suggestions, very few have yet vindicated their claim to practicability.

The impulse, commencing with the year 1861, appears to have reached its culmination in the following year, 1862, and in the past year to have declined to nearly its condition in the former year, 1861.

The Report of the Commissioner of Patents shews that in 1860 there were filed 139 applications for patents for improvements in cannon, in projectiles, small arms, cartridges, tents, &c.; in 1861, 366 applications; in 1862, 453; in 1863, 322. Under the head of improvements in cannon are embraced various appliances for strengthening the body of the gun, devices and mechanical arrangements for operating gun-carriages and heavy ordnance; some few projects of no very striking novelty for rifling cannon, having reference to either the shape of the grooves or the system of their spiral development; methods of loading ordnance; devices for disabling them in case of emergency by the insertion of expanding and jamming plugs within their bore and breeches; and several contrivances, more or less complex, for rendering artillery many-leaded, by multiple barrels or repeating, by self-feeding magazines, for the purpose of increasing the rapidity of their fire. Plausible as these latter classes of improvements may be, they do not seem yet to have practically sustained the anticipation of their contrivers.

During the four years 119 patents have been granted to inventions of breech-loading cannon; but as the Commissioner justly remarks, the inventors are on the wrong track, and can hope for little encouragement in the way of success.

Of the class of projectiles (for ordnance) a large proportion of the applications has presented modifications of the packing for reducing or preventing windage between the shot and the bore of the gun, and insuring the full effect of the rotating grooves of rifled cannon. Some few modifications of no special promise have been made in what is usually known as the "solid-calibre" shot, or projectile, so jacketed as to fill a larger calibre of gun, and present a diminished diameter or area of resistance in its flight through the air.

During the last four years 244 patents have been granted for improvements in small arms, a class of firearms which has naturally been the subject of the widest investigation and experiment. A large proportion of these patents embrace improvements in breech-loading arrangements. It would seem as if every conceivable form and direction of the closure and inclosure of a disjointed breech had been exhausted.

A large amount of attention has been directed to the subject of cartridges for small arms, embracing a great variety of metallic and other cases, mainly for fixed ammunition, and many devices for priming such cartridges, so as to render them independent of external means of ignition. Many projects have been tried (with varying success) for rendering cartridges water-proof, without impairing their efficiency or sensibility. The applications for patents in this class of improvements have steadily and rapidly increased in number within the last few years, and have probably not yet reached their highest range of competition.

Of all these hundreds of patents scarcely a score can be counted as really available in practical warfare. But the study and experimenting of the active inventors have not been in vain. They are all helping toward the solution of the problem of the best gun, the best projectile and the best cartridge. By far the greater number of these inventors are men who fail, with all their skill and shrewdness, of a full comprehension of the necessities of a weapon of warfare for actual service. And though many of them are loud in their complaints of the old fogyism of the ordnance officers of the Government, it is well that there is a check placed upon the hasty adoption of experimental contrivances.

PROBABLY of all men on this continent, the man who, at this moment, is speculating most intently, profoundly and perseveringly as to the character and plans of Lieutenant-General GRANT's pending operations in Virginia, is General ROBERT E. LEE. He will derive information from his knowledge of the character of General GRANT's mind—from the previous practisings of GRANT in strategy and tactics—from the necessary conditions of military operations in Virginia, dependent upon the topography of the region, the meteorology of the season, the possible lines of advance and MANŒUVRE, &c. He will obtain knowledge from the reports he may be able to get as to the force that GRANT has in hand or in reserve, the character of that force, and the point or points at which it may be concentrating. He will gather flots from the news in Northern journals. He will worm out facts through his system of espionage, which is wide-spread and penetrating. He has, of course, spies at every point and with each column of our Army; his spies, with cocked ears, mess with our officers; they clerk it in the War Department; they obtain confidential interviews with the PRESIDENT; they court rattle-brained women who have access to the secrets of wooden-headed men. We judge that General LEE will find it more difficult to get at General GRANT's plans or secrets than at those of some other men; but still we do not think it unadvisable to say to those who may "think they know some things," and to those whose position gives them access to information of a military nature, that they had better keep quiet their tongues and facts, say, till this time next year, when they can safely retail to the Rebels all that they know now.

THE old-fashioned followers of precedent who have been accustomed to consider the formal acceptance of an officer's resignation by the PRESIDENT, at the vacating of his commission, will find their ideas somewhat rudely disturbed by the manner in which Major-General F. P. BLAIR has been suffered to play at fast and loose with his commission. From the documents presented in the message on the subject, recently transmitted to Congress, it appears that more than three months after the acceptance of his resignation by the PRESIDENT, General BLAIR is permitted to resume the prerogatives of his former rank without the formality by a re-appointment of any kind—simply upon his request that he be allowed to withdraw his resignation. We observe that the matter has awakened comment in Congress, where it is expected that a resolution will be adopted declaratory of the law governing military resignations, and taking the position that a person having tendered a resignation, which has been accepted, is no longer in service. This position would seem to be sufficiently obvious to common sense, but there is an apparent need of a formal decree to this effect.

AMONG the petitions presented to Congress during the past week is one, which we publish elsewhere, from the Commanders and Lieutenant-Commanders of the Navy, who call the attention of the Honorable Senate to the hardship to which, as they shew, they are subjected by the operation of the present law regulating the higher grades of the service. While our Navy has increased three-fold in men and material, the grades of Captain and Commander have been reduced, the former from ninety-seven to seventy-two, and the latter from sixty-five to thirty-six. As a consequence, our active and ambitious Commanders and Lieutenant-Commanders find their prospects of promotion actually decreased at a time when their labors and responsibilities have largely increased. That they have, as a body, served the State good service, the records of the Navy Department will shew, and there would seem to be no good reason for withholding from them their just reward in that prospect of advancement which is the stimulus to honorable ambition. We hope the facts presented in their petition will receive from Congress the attention they merit.

THE corner-stone of the arsenal about to be built at Rock Island, Illinois, was laid on the 21st ult., with simple but interesting ceremonies. The excavation has been made in the solid rock, at great cost.

FOREIGN MILITARY AND NAVAL MATTERS.

The Emperor MAXIMILIAN resigns his command of the Austrian fleet into the hands of the Archduke LEOPOLD.

The iron-plated frigate (*Gloire* class) *La Flandre*, having now been three years on the stocks, is about to take in her engines.

The Italian iron-clad steamer *Regina Maria Pia*, which has been built at La Seyne, has left Toulon for Genoa. On some recent trial trips she obtained a speed of 13 knots.

Vice-Admiral Count Bouet-Willaumez has hoisted his flag on board the *Ville-de-Paris*, as Commander-in-Chief of the French Mediterranean experimental squadron, succeeding the late Admiral Penaud.

An enormous gun, measuring 19 feet in length, 7 feet 4 inches in circumference at the breech, and 2 feet at the muzzle, has just been cast at the government foundry of Ruelle (Charente) for the port of Lorient. Its weight is 14 tons, and the diameter of the bore 10 inches.

The *Rhine Gazette* says that a silver plate, which formed part of the camping service of NAPOLEON I., and which was packed up on the Genappe road on the 18th June, 1815, has been sent to the Prussian Minister of War to be sold for the benefit of the Prussian troops wounded in the late Schleswig. The plate bears the arms of NAPOLEON, and weighs about half-a-pound. This object having a great historical interest, the Minister of War has offered it for sale by tender, the offers to be made in sealed envelopes, sent in before the 30th of April. These will be opened on the 1st of the morning, and the plate adjudged to the highest bidder.

Mr. Sorby, F.R.S., of Sheffield, describes a new process for printing the texture of "blister" steel. He says:—"When iron is converted into steel by cementation, three distinct crystalline compounds are formed, two of which are readily dissolved by diluted nitric acid, whereas one is scarcely at all affected by it. If, therefore, a piece of such steel be ground flat and polished, and then placed in the acid, after a suitable immersion in water, the soluble constituents of original surface and polish, which are not removed in so much dissolved that it stands up in sufficient relief to allow of its being used for surface printing instead of a woodcut, to exhibit the structure of different varieties of steel."

The *Moniteur de l'Armée* states that the Egyptian negro battalion especially organized to serve at Vera Cruz and at the Mexican Chamber in Egypt has perfectly responded to what the Commander-in-chief of the army in Mexico expected from it. These men encountered, according to the same journal, the most severe attacks of the climate, and at present occupy positions in which the health of the French troops would have been seriously affected. The Commander-in-chief of the French army in Mexico, desiring to reward the devotedness of which this battalion gave proof, has by an order dated from the camp, the 1st of March, conferred the Cross of the Legion of Honor on Captain Mohammed Allhas, commanding the battalion provisionally, and military medals in four non-commissioned officers, corporals, or soldiers. These rewards are said to have produced an excellent effect.

The *Gironde*, of Bordeaux, gives some particulars of the Confederate cruiser, the *Georgia*, which looks a most respectable steamer; she mounts only eight guns, and is shortly built for a blockade runner, which could escape her. "Captain Maffit speaks French fluently, and enjoys a high reputation in America. The crew of 150 men are mostly made up of old pirates in their country." This sketch of the officers has about as much sequence as the epitaph of the late Lady Cardigan, "whose virtues and failings were both on freestone announced her as "bland, passionate, and deeply religious." The crew, we are told, is composed of 120 negro, of by no means ferocious appearance. The discipline on board is very severe. Two days since whilst the officers were on shore some inhabitants of Bordeaux having visited the ship, distributed brandy amongst the men, who were thereby worse for it. Captain Maffit, on his return to the ship, put them all in irons, "we do not think," continues the *Gironde*, "that we have any need to divulge the object which is generally assigned to the presence of the *Georgia* in Bordeaux, but her departure will be, perhaps, less tranquil than her arrival, as a Federal vessel is said to be cruising night and day off the mouth of the Garonne."

The *Army and Military Gazette* for 1864 has just been published. The first name inscribed is that of the Emperor NAPOLEON III., as head of the Army; the next two names are those of the Imperial Prince and Prince NAPOLEON. After the names of soldiers comes the military household of his Majesty; then the War Office, which has now been for five years under the direction of Marshal RANDON. The following is the list of officers on active service :—83 generals of division; 159 generals of brigade; 323 colonels; 324 lieutenant-colonels; 1,328 majors; 6,728 captains; 5,147 lieutenants, and 4,755 sous-lieutenants. The active list comprises also 264 functionaries attached to the commissariat; 1,302 surgeons and apothecaries; 1,302 officers of administration, and 40 interpreters. Promotion in the French Army has not been going on at a rate so desirable to young officers. Even service in Mexico and other climates campaigning has not infused much spirit into military advancement. Marshal Forey, however, won his *bâton* by knocking Paulin into submission. There have been 11 promotions to the rank of general of division, and 23 to that of general of brigade; 52 officers have risen to the grade of colonel; 81 to the grade of lieutenant-colonel; 178 to that of major and 728 to that of captain. The forces which France can at present dispose of are thus enumerated:—332 battalions of infantry of the line; 80 battalions of light infantry of Zouaves and tirailleurs; 386 squadrons of cavalry; 226 batteries of artillery; 7 squadrons of artillery train; 13 companies of engineers; 36 staffs of regimental depôts and of companies of workmen; 49 companies of engineers; 2 companies of engineer workmen; 2 companies of pontoniers; 4 companies of builders; 15 sections of military workmen. In this list the army of reserve of course is not included.

The Russian Army.—However strict the discipline, still there is no service where deserts or more honorable rewards are appropriated to military merit. Every officer is considered as belonging to the nobility from the moment he receives his commission. To such as attain the highest grades of the army, the Emperor confers hereditary, and descends to their children. The whole system, by which military rewards and honors are conferred in Russia, is calculated to excite the emulation of all ranks. The Order of St. George is exclusively appropriated, like the Sword of Sweden, for officers who have gained pre-eminent distinction in the field. The Order of Alexander, conferred on the Duke of Wellington, though, to his own immortal honor, he himself refused it (when decreed him by the Russian Senate), saying "that he was incapable of having the required qualifications, and it was an order of which he would not be last to vindicate the dignity," is literally jewels, and the like are frequently presented by the Emperor to his principal generals, in addition to lucrative employments. The Order of St. Vladimir is passed without notice, for a parallel to it can scarce be produced from the heroic days of Greece and Rome. The Emperor Alexander, soon after his accession to the throne, found diamond of the Imperial Crown itself; directing the vacancy, instead of being supplied with another stone, to be filled by a simple plate of gold, inscribed with the name of Kutusoff. There are some curious customs in the Russian army which may be called very unpretending, but yet have something in them which is far from exciting contempt or disgust in those who are unprivileged in their views of human nature. Under it no officer can have the custom for a soldier meeting his officer, however high his rank, to embrace him with the words "Christ is risen."

ARMY AND NAVY PERSONAL.

Brigadier-General Sturgis has assumed command of the cavalry at Memphis, and is actively organizing them.

Brigadier-Generals Ransom and Stone arrived at Memphis last week. General Ransom is rapidly recovering from his wound.

Lieutenants Francis E. Lacy, Thomas Byrne, and James Butler, 3d U. S. Infantry, have been dismissed by order of the President.

Major H. R. Selden, 13th U. S. Infantry, has received leave of absence till further orders to command a regiment of New Mexico volunteers.

Brigadier-General Graham has been appointed Head of the Army Retiring Board, in place of Major-General Meade, who resigned to take charge of the Army of the Potomac.

First Lieutenant H. H. Bronn, of the the 6th New York volunteers, has been detailed for duty to the Provost-Marshal-General's office, War Department.

Colonel S. D. Bell has been relieved of the command of the post of Louisville, Ky. Colonel Gibson, of the Second Ohio heavy artillery, is his successor.

Brigadier-General Prince has gone to Cairo to take command of the forces there and at Paducah and the troops stationed at intermediate points in that portion of Kentucky.

Captain James W. Forsyth, 18th U. S. Infantry, has been appointed Assistant Inspector-General to Cavalry Corps, Army of the Potomac, with rank of Lieutenant-Colonel.

Lieutenant William G. Fitch, of the 2d Regular Infantry, who has been acting Assistant Adjutant-General of the post of New Haven, has been ordered to Wheeling, Va.

Brigadier-General Seymour, who was in command at the time of the late Florida disaster, has arrived in Washington. It is understood that he is to have a command in Virginia.

Brigadier-General J. H. Martindale has been relieved as Military Governor of the District of Washington, D. C., and Colonel N. M. Wiswell of the Veteran Reserve Corps, placed in his place.

Major-General Dana has been ordered on a tour of inspection through the Western States, commencing with Ohio, for the main purpose of hurrying to the front new recruits and furloughed men.

Captain John H. Moore, A. Q. M., has been relieved from duty at Beaufort, S. C., and assigned to the Chief Quartermaster's office, Hilton Head. He is succeeded at Beaufort by Captain Low, A. Q. M.

The President has accepted the following resignations: Brigadier-General John D. Stevenson; Brigadier-General William W. Orme; Colonel E. S. Sibley, Deputy Quartermaster-General; Captain William Craig.

Major-General Schenck, U. S. Volunteers, having reported to Major-General Curtis in accordance with orders from the War Department, has been assigned to duty at Headquarters Department of Kansas.

Major C. S. Charlot, Assistant-Adjutant-General of Volunteers, announced on the staff of Major-General Curtis, commanding Department of Kansas, has been assigned to duty as Assistant-Adjutant-General of the Department.

First Lieutenant R. Lorenzo Ellis, of Norwalk, 17th Connecticut Volunteers, has resigned and been honorably discharged for disability. Captain George W. Curtiss, of New Haven, late of the 5th Conn. Vols., has been appointed a First Lieutenant in the Veteran Reserve Corps, and ordered to Washington. Second Lieutenant Edward Monroe Nichols, 18th Conn. Vols., has resigned and been honorably discharged, to accept a commission of Representative in the Connecticut State Legislature.

It will be recollected that when the *Alabama* captured the *Sonora* off Cape Good Hope, she transferred the plunder to the British ship *Conrad*, which was afterwards captured by the *Vanderbilt*. At the time of the seizure, the mate of the *Sonora* was arbitrarily killed by Captain Dorschheuer, acting-Master's Mate of the *Vanderbilt*. Upon representations of Lord Lyons, Dorschheuer was placed under arrest and tried by a court-martial assembled on board the *Ajax*. The witnesses (part of the crew of the *Sonora*) were brought over from England. After full investigation of the case, the Court has fully acquitted Dorschheuer of all blame in the matter, and he has been restored to his former position.

Colonel Joshua B. Howell, 86th Penn. Volunteers, has been detailed for the command of the District of Hilton Head, Department of the South, by Colonel W. H. Davis, of the 104th P. V. The latter has relinquished command of the District of Hilton Head. Major R. Biddle, 104th P. V., acting-Assistant-Adjutant-General; 1st Lieut. John Lacey, 104th P. V., Acting Aide-de-Camp. Colonel Rodney Dorycc, 6th C. V., has been succeeded in command of the post at Hilton Head by Colonel Henry M. Hoyt, of the 104th P. V., who commands the following to be his staff: 1st Lieut. James C. Stevens, 52d P. V., Post Adjutant; 1st Lieut. Edwin Frets, 104th P. V., Acting Aide-de-Camp.

Brevet-Lieutenant-Colonel Harry Haskell has relinquished command of the District of Florida, Department of the South, and Brigadier-General William Birney has been assigned to it. Lieutenant-Colonel Haskell retains the following staff: 1st Lieut. R. M. Hall, 1st U. S. Artillery, A. Act'g Adj't-General; 1st Lieut. D. V. Purington, 7th U. S. C. T., Aide-de-Camp; 1st Lieut. E. S. Sweetland, U. S. Chief Commissary of Subsistence; 1st Lieut. T. C. Vidal, Signal Corps, U. S. Army; Chief Signal Officer; Surg. S. W. Gross, U. S. V., Medical Director; 1st Lieut. Charles R. Suter, U. S. Engineers, Chief Engineer; 1st Lieut. W. Burns, Jr., 3d U. S. C. T., Chief of Ordnance; 1st Lieut. Col. D. Doubleday, 3d U. S. C. T., Chief of Artillery; Capt. Lewis Ledyard Weld, 7th U. S. C. T., Provost Marshal; 2d Lieut. W. H. Denniss, 3d U. S. C. T., Commissary of Musters; W. H. Dennis, U. S. Coast Survey, attached as Topographical Engineer; Capt. P. F. Young, 107th Ohio V., A. Aide-de-Camp; 1st Lieut. Henry E. Burton, 35th U. S. C. T., Aide-de-Camp.

ARMY CORPS.

We give below a list of Army Corps, with their present commanders:—

1st—Temporarily discontinued.
2d—Major-General D. N. Couch.
3d—Temporarily discontinued.
4th—Major-General Gordon Granger.
5th—Major-General Geo. G. Meade.
6th—Major-General John Sedgwick.
7th—Major-General Frederick Steele.
8th—Major-General Lewis Wallace.
9th—Major-General John G. Parke.
10th—Major-General Q. A. Gillmore.
11th—Consolidated into 20th Army Corps.
12th—Consolidated into 20th Army Corps.
13th—Major-General John A. McClernand.
14th—Major-General John M. Palmer.
15th—Major-General W. T. Sherman.
16th—Major-General C. C. Washburn.
17th—Major-General J. B. McPherson.
18th—Major-General R. F. Ord.
19th—Major-General N. P. Banks. N. B.—Major-General Franklin in temporary command.
20th—Major-General Joseph Hooker.
21st—Consolidated into 4th Army Corps.
22d—Major-General Henry W. Halleck.
23d—Major-General J. M. Schofield.
Cavalry Corps, Army of the Potomac, Major-General P. H. Sheridan.

The following bill has passed both houses of Congress: That no person shall be allowed in the United States shall, in addition to having her name painted on her stern, as now required by law, also have the same conspicuously placed in distinct letters not less than six inches in length, on each outer side of the pilot-house, if there be one, and if there be none, on each side of the wheel-houses, and on the outer side of each wheel-house; and if any such vessel shall be found without having her name placed as herein required, she shall forfeit for each such neglect and forfeiture so to be now provided by law in the case of a vessel of the United States found without having her name and the name of the port to which she belongs painted on her stern, as required by law. Sec. 2. That no master, owner, or agent of any vessel in the United States shall in any way change the name of such vessel, or that of her home port, owners, or contrivance, deceive, or attempt to deceive, the public, or any officer of the United States or of any State or Territory, or of any State, or any corporation or agent thereof, or any person or persons, as to the true name of such vessel, on pain of the forfeiture of the vessel *Provided*, That this act shall not take effect until the expiration of sixty days from and after its passage.

In paragraph 10 of "The March of the Brigade," published in our issue of week before last, occurs an error of punctuation, which affects the sense. The words "and the "other regiments," should be preceded, not followed, by a semicolon. It should read thus:

10. Before the hour fixed for the march the leading regiment will advance to the brigade flag, previously carried to the front; the advance guard and pioneers will take their proper positions in advance of the flag; and the other regiments, the provost guard, train and rear guard will form in their proper positions, ready to take them as soon as the movement of the column shall permit. The march will commence precisely at the time fixed.

ARMY GAZETTE.

THE QUESTION OF MAJ.-GEN. BLAIR'S COMMISSION.—MESSAGE FROM THE PRESIDENT.

To the Honorable House of Representatives:

In compliance with the request contained in your resolution of the 25th ult., a copy of which resolution is herewith entrusted, I have the honor to transmit the following:

EXECUTIVE MANSION, WASHINGTON, Nov. 2, 1863.

HON. MONTGOMERY BLAIR:

MY DEAR SIR:—Some days ago I understood you to say that your brother, General Frank Blair, desires to be guided by my wishes as to whether he will resign his seat in Congress or remain in the field. My wish, then, is compounded of what I believe will be best for the country and for him. I think he can be more in the military connection in my hands, take his seat, go into counsel with our friends, while there, and be back in the field in time for any active campaign. To resigne a House of Representatives, which will really support my Government in all its main issues, to be succeeded by a man who is himself or Speaker, let him serve to that position. If not, let him retain his commission of Major-General, and go back to the army.

You will beat a dangerous schism for him. It will relieve him from a disagreeable position or a misunderstanding, as I think he is to longer serving personally with those opposed to him politically. It will be a misfortune if he shall allow these opponents of slavery and administration to force him out of the military service on account of his loyalty to it. He has abundant talents and services to country and has time without devoting any to temper.

He is rising in military skill and usefulness. His recent appointment to the command of a corps, in place of General Sherman, and General Sherman, proves this. In that line he can serve both the country and himself more profitably than he can by the tenth and in Congress upon the floor.

The foregoing is what I would say if Frank Blair was my brother instead of yours.

(Signed), A. LINCOLN.

HEADQUARTERS MIDDLE DEPARTMENT,
BALTIMORE, Md., April 23, 1863.

HON. E. M. STANTON, Secretary of War:

SIR:—Having been informed that the President my resignation, to take effect on the 4th of December.

I respectfully ask that I may be relieved from my command at an earlier day, say by the 20th instant, or as soon thereafter as some officer can be ordered to relieve me, that I may have time to range the plans or hurry the action of the Department as little as possible. It will be necessary, nevertheless to see to several things that fall within the session of Congress for a necessary journey, and for some professional purposes, which will require the temporary relinquishment of command and occupation. I could also spend two or three days with my family, which I have not seen since last autumn.

I have the honor to be very respectfully, your ob't serv't,

(Signed), ROBERT C. SCHENCK, Major-General.

HEADQUARTERS MIDDLE DEPARTMENT,
EIGHTH ARMY CORPS, BALTIMORE, Nov. 12, 1863.

SIR:—Having been elected by the people of this district a member of the House of Representatives, to which I was elected in October, 1862, and having been informed that it is the wish of the President of the United States Volunteers, to take effect on the 5th day of December next, I have the honor to request that you will be pleased to communicate your official feelings and desires, and duly consult to do so in the hope that I may be enabled to resign my office in time to devote my whole attention to the course of my country as Government, in this time of peculiar trial.

I have the honor to be, respectfully, your obedient servant,

(Signed), ROBERT C. SCHENCK, Major-General.

Endorsed on the foregoing letter:

The resignation of General Schenck is accepted, and he is authorized to turn his command over to Major-General Sigel, or other officer for the time.

(Signed), EDWIN M. STANTON, Secretary of War.

ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, D. C., Nov. 27, 1863.

SIR:—Your resignation has been accepted by the President of the United States, to take effect this day.

I am, Sir, very respectfully, your obedient servant,

(Signed), JAMES A. HARDIE,
Colonel and Assistant-General.

To Major-General F. P. Blair, United States Volunteers.

[COPY OF TELEGRAM.]

EXECUTIVE MANSION, WASHINGTON, D. C., March 16, 1864.

Lieutenant-General Grant having been assigned to the command of a Department, consisting for the present of Illinois, without difficulty or detriment to the service, he is assigned to the command of the corps to be commanded by Major-General Sherman.

(Signed), A. LINCOLN.

[COPY OF TELEGRAM.]

U. S. Military Telegraph, Washington, received 6 P. M., March 16, 1864.

NASHVILLE, TENN., 10 A.M., March 16, 1864.

His Excellency, the President:

General Logan's appointment to the corps referred to in your dispatch I will see General Sherman within a few days, and consult him about the transfer, and answer.

U. S. GRANT, Lieutenant-General.

[CONFIDENTIAL.]

United States Military Telegraph, War Department—Received in cypher 11 P.M., March 17, 1864.

NASHVILLE, TENN., March 17, 1864.

His Excellency A. LINCOLN, President of the United States:

General Sherman is here, and I have had a full talk with him about General Logan to the Seventeenth corps, and the appointment of General J. B. Hair to the Fifteenth corps, and all is satisfactory.

U. S. GRANT, Lieutenant-General.

Copy—received 3:15 A.M., March 18, 1864.

HUNTSVILLE, ALA., March 25, 1864.

His Excellency, A. LINCOLN, President of the United States:

I understand by the papers that it is contemplated to make a change in the Commander of the Army of the Tennessee, and of the corps, so as to transfer me to the Seventeenth corps. I hope this will not be done. I have spent much time and labor to bring the march corps now, of which I have labored to complete the organization this Winter, and succeeded, I believe, in bringing it to a high state of discipline.

JOHN A. LOGAN, Major-General.

[COPY OF TELEGRAM.]

Office U. S. Military Telegraph—War Department—Received at Washington at 9 A.M., March 26, 1864.

CULPEPPER COURT-HOUSE—11:20 P.M.,
March 26, 1864.

Major-General W. T. SHERMAN:

General F. P. Blair will be assigned to the Seventeenth Army corps, and not the Fifteenth. Assign General Joseph Hooker, subject to the approval of the President, to any other corps commanded when you may have, and break up the assembly (?) of one General Officer commanding corps.

U. S. GRANT, Lieutenant-General Commanding.

From a long conference with General Grant, I am satisfied that it is General Grant, according to his command, the following paragraphs, by his command, the following paragraphs are promulgated for the information and government of all concerned:

I. Lieutenant-General U. S. Grant is assigned to the command of the armies of the United States, and will report in person at these headquarters.

II. Major-General James B. McPherson is assigned to the command of the Department of the Tennessee, and will report in person at these headquarters.

III. Major-General William T. Sherman is assigned to the command of the Military Division of the Mississippi, and will report in person at these headquarters.

IV. Major-General Philip H. Sheridan is assigned to the command of the Cavalry of the Army of the Potomac, and will report in person at these headquarters.

V. Major-General George G. Meade will retain the command of the Army of the Potomac, and will report in person at these headquarters.

VI. Major-General John A. McClernand is assigned to the command of the Department of the Northwest, and will report in person at these headquarters.

VII. Major-General Edward O. C. Ord is assigned to the command of the Department of the Ohio, and will report in person at these headquarters.

VIII. Major-General Nathaniel P. Banks is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

IX. Major-General Benjamin F. Butler is assigned to the command of the Department of Virginia and North Carolina, and will report in person at these headquarters.

X. Major-General Franz Sigel is assigned to the command of the Department of West Virginia, and will report in person at these headquarters.

XI. Major-General Quincy A. Gillmore is assigned to the command of the Department of the South, and will report in person at these headquarters.

XII. Major-General Darius N. Couch is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

XIII. Major-General William B. Franklin is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

XIV. Major-General William F. Smith is assigned to the command of the Department of Washington, and will report in person at these headquarters.

XV. Major-General Alfred H. Terry is assigned to the command of the Tenth Army corps, and will report in person at these headquarters.

XVI. Major-General Gordon Granger is assigned to the command of the Fourth Army corps, and will report in person at these headquarters.

XVII. Major-General David Hunter is assigned to the command of the Department of West Virginia, and will report in person at these headquarters.

XVIII. Major-General Henry W. Halleck is assigned to the command of the Department of the Mississippi, and will report in person at these headquarters.

XIX. Major-General John G. Foster is assigned to the command of the Department of the Ohio, and will report in person at these headquarters.

XX. Major-General Joseph Hooker is assigned to the command of the Northern Department, and will report in person at these headquarters.

XXI. Major-General Nathaniel J. Jackson is assigned to the command of the Department of the Pacific, and will report in person at these headquarters.

XXII. Major-General Robert C. Schenck is assigned to the command of the Middle Department, and will report in person at these headquarters.

XXIII. Major-General Lewis Wallace is assigned to the command of the Eighth Army corps, and will report in person at these headquarters.

XXIV. Major-General Edward R. S. Canby is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

XXV. Major-General Robert C. Schenck is assigned to the command of the Department of Washington, and will report in person at these headquarters.

XXVI. Major-General Edward O. C. Ord is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

XXVII. Major-General Nathaniel P. Banks is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

XXVIII. Major-General Benjamin F. Butler is assigned to the command of the Department of Virginia and North Carolina, and will report in person at these headquarters.

XXIX. Major-General Franz Sigel is assigned to the command of the Department of West Virginia, and will report in person at these headquarters.

XXX. Major-General Quincy A. Gillmore is assigned to the command of the Department of the South, and will report in person at these headquarters.

XXXI. Major-General Darius N. Couch is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

XXXII. Major-General William B. Franklin is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

XXXIII. Major-General William F. Smith is assigned to the command of the Department of Washington, and will report in person at these headquarters.

XXXIV. Major-General Alfred H. Terry is assigned to the command of the Tenth Army corps, and will report in person at these headquarters.

XXXV. Major-General Gordon Granger is assigned to the command of the Fourth Army corps, and will report in person at these headquarters.

XXXVI. Major-General David Hunter is assigned to the command of the Department of West Virginia, and will report in person at these headquarters.

XXXVII. Major-General Henry W. Halleck is assigned to the command of the Department of the Mississippi, and will report in person at these headquarters.

XXXVIII. Major-General John G. Foster is assigned to the command of the Department of the Ohio, and will report in person at these headquarters.

XXXIX. Major-General Joseph Hooker is assigned to the command of the Northern Department, and will report in person at these headquarters.

XL. Major-General Nathaniel J. Jackson is assigned to the command of the Department of the Pacific, and will report in person at these headquarters.

XLI. Major-General Robert C. Schenck is assigned to the command of the Middle Department, and will report in person at these headquarters.

XLII. Major-General Lewis Wallace is assigned to the command of the Eighth Army corps, and will report in person at these headquarters.

XLIII. Major-General Edward R. S. Canby is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

XLIV. Major-General Robert C. Schenck is assigned to the command of the Department of Washington, and will report in person at these headquarters.

XLV. Major-General Edward O. C. Ord is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

XLVI. Major-General Nathaniel P. Banks is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

XLVII. Major-General Benjamin F. Butler is assigned to the command of the Department of Virginia and North Carolina, and will report in person at these headquarters.

XLVIII. Major-General Franz Sigel is assigned to the command of the Department of West Virginia, and will report in person at these headquarters.

XLIX. Major-General Quincy A. Gillmore is assigned to the command of the Department of the South, and will report in person at these headquarters.

L. Major-General Darius N. Couch is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

LI. Major-General William B. Franklin is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

LII. Major-General William F. Smith is assigned to the command of the Department of Washington, and will report in person at these headquarters.

LIII. Major-General Alfred H. Terry is assigned to the command of the Tenth Army corps, and will report in person at these headquarters.

LIV. Major-General Gordon Granger is assigned to the command of the Fourth Army corps, and will report in person at these headquarters.

LV. Major-General David Hunter is assigned to the command of the Department of West Virginia, and will report in person at these headquarters.

LVI. Major-General Henry W. Halleck is assigned to the command of the Department of the Mississippi, and will report in person at these headquarters.

LVII. Major-General John G. Foster is assigned to the command of the Department of the Ohio, and will report in person at these headquarters.

LVIII. Major-General Joseph Hooker is assigned to the command of the Northern Department, and will report in person at these headquarters.

LIX. Major-General Nathaniel J. Jackson is assigned to the command of the Department of the Pacific, and will report in person at these headquarters.

LX. Major-General Robert C. Schenck is assigned to the command of the Middle Department, and will report in person at these headquarters.

LXI. Major-General Lewis Wallace is assigned to the command of the Eighth Army corps, and will report in person at these headquarters.

LXII. Major-General Edward R. S. Canby is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

LXIII. Major-General Robert C. Schenck is assigned to the command of the Department of Washington, and will report in person at these headquarters.

LXIV. Major-General Edward O. C. Ord is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

LXV. Major-General Nathaniel P. Banks is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

LXVI. Major-General Benjamin F. Butler is assigned to the command of the Department of Virginia and North Carolina, and will report in person at these headquarters.

LXVII. Major-General Franz Sigel is assigned to the command of the Department of West Virginia, and will report in person at these headquarters.

LXVIII. Major-General Quincy A. Gillmore is assigned to the command of the Department of the South, and will report in person at these headquarters.

LXIX. Major-General Darius N. Couch is assigned to the command of the Department of the Susquehanna, and will report in person at these headquarters.

LXX. Major-General William B. Franklin is assigned to the command of the Department of the Gulf, and will report in person at these headquarters.

NAVY GAZETTE.

THE RED RIVER EXPEDITION.

OFFICIAL REPORT OF REAR-ADMIRAL PORTER.

MISSISSIPPI SQUADRON, FLAG SHIP CHOCTAW,
OFF GRAND ECORE, LA., April 14, 1864.

SIR—I had the honor of reporting to you the movements of the squadron as far as Alexandria, and the intentions of General Banks to move on at once to Shreveport. He deemed the occupation of the city a necessity, as the country around it could be run some miles and made unusual exertions to get them over the falls. The Army started on the morning of the 6th inst., and I proceeded to cover them (if there should be need) on that as they got over the falls; the vessels arrived at Alexandria on the 7th inst., and found good water, the river apparently about to reach its usual stage at this season.

The Cricket, Lexington, Mound City, Chillicothe, Carondelet, Pittsburg, Fourth, Neosho, Osage, Ozark, Conestoga, Fort Hindman, Covington were the vessels sent up, and a fleet of thirty transports followed them.

Admiral Banks was up with the army, and immediately the vessels working hams were described. Lieutenant-Commander Phelps captured one big steamer on the road, and the rest of the fleet destroyed, making 23 guns captured from the enemy since we entered the Red River, and a large amount of cotton. Fort de Russy, Ecore, where I got up here, and were preparing for the march, and at 8 A. M. on the 10th inst. I left Ecore, as I should not risk the vessels and transports in the rear of the army on the 10 of April for Shreveport, with the *Cricket, Fort Hindman, Lexington, Osage, Neosho, Ozark*, with the tugs of getting fast to each of the vessels along when the usual rise came. Twenty transports were sent along filled with army stores, and with a portion of General A. J. Smith's division on board. It was intended that the fleet should reach Shreveport in time for the army, but I was not disappointed in that time.

I found the difficulties of navigation very great, but was reached the point of destination with an hour of the time appointed. The obstacles we were brought to a stop; the enemy had sunk a very large steamer, the *Red Chief*, right across the channel, completely blocking on each bank, and her hull broken in the middle, resting on the bottom. Before I encountered operations, however, a courier came in from General Banks, informing me that affairs had not gone exactly as he could desire, and that he was compelled to fall back on the 10

Acting Assistant Paymaster Daniel Howorth, to special duty at Philadelphia.

Acting First Assistant Engineers Samuel C. Millam and William H. Miley, to the *Ashuelot*.

DETACHED.

Acting Master John Blake, from the *North Carolina*, and ordered to the *New Hampshire*.

Acting Master Nicholas Kirby, of the South Atlantic Blockading Squadron, to the grade of Acting Volunteer Lieutenant.

Acting Master William F. Shankland, to the grade of Acting Volunteer Lieutenant.

VARIOUS NAVAL MATTERS.

Screw steamer *Neptune*, 11, was at Imogen, April 23.

Iron-clad *Saugus*, 2, has left the Philadelphia Navy Yard for the South.

Screw steamer *Iosco*, 10, has been ordered to New London to recruit.

Iron-clad *Wave*, 6, was recently put in commission at New Orleans, and sailed for service.

Screw steamer *Bostuda*, 2, and side-wheel steamer *Cœur de Lion*, 3, and *Ella*, 2, are repairing at the Washington Yard.

Screw steamer *Pocahontas*, 7, touched at Hilton Head April 21, for coal, on her way to the Mississippi Squadron.

The steamer *Harvest Moon* has left the Washington Navy Yard, with Rear-Admiral Dahlgren on board, for Charleston.

The Fourth Auditor's Office distributed $600,106 of prize money and settled 3,299 prize claims during the month of April.

For nothing heard, of which Commodore William Mervine was President, which has been in session for the past two years, has been dissolved by order of the Department.

Iron-clad *Dictator*, 5, is rapidly preparing for her European trip, and is expected to be ready for sea about the middle of June. Iron-clad *Puritan*, 4, will be launched about that time at Greenpoint.

Iron-clad *Roland*, 5, sailed from Hilton Head April 21, for her station on the inside blockade of Charleston. She relieves iron-clad *Sangamon*, 2, for repairs. Iron-clad *Catskill*, 2, is repairing at Station Creek.

The prizes *Alice Vivian* and *James Battle* are now ready for distribution to the officers and crew of the *De Soto*. As an evidence of their value, it is stated that the share of each seaman will be from $700 to $900.

Side-wheel steamer *Agawam*, 10, which sailed from Portland last week Thursday, returned on Friday, having disarmed some of her machinery. It was to be repaired and she would proceed immediately to Norfolk.

Tug repairs to side-wheel steamer *Chenango*, 10, have not yet been begun. Lieutenant-Commander Braine detailed to command. Lieutenant-Commander Fitzbrown is ordered to take command of iron-clad *Passaic*, 4, now lying off Charleston.

The Home Military Commission has agreed to report a bill in favor of relieving Paymaster Brinton from liability for two millions and a half of greenbacks, burnt on the steamer *Ruth*, last summer, on the Rappahannock, which were under his charge when the accident occurred.

The general court-martial, which has been in session for some time at Hampton Roads, has been transferred to New York, where it will, at the Astor House, on May 2, begin its session. Its members are as follows:—Commodore William K. Latimer, President; Commodore Charles Downing; Commodore Thomas Jamau; Captain John S. Chauncey; Commander T. Darrah Shaw; Lieutenant-Commander F. Schenck; Lieutenant Charles Thomas; First Lieutenant John C. Cahill, U. S. Marines, Provost-Marshal; Judge-Advocate Nathaniel Wilson.

A letter from on board the iron-clad *Canonicus*, 2, gives the following account of the recent engaging qualities, as exhibited in her recent voyage from Boston to New York:—"The vessel was under the worst admiralty—making costly zinc knots, and keeping way with the Ocasta, which was towing us on a hawser. At Cape Cod they encountered a heavy easterly swell and considerable of a blow, which was taken in tow. The *Canonicus* had her shell and ammunition on board, and the vessel's bottom was only about two inches above water. Every sea made a complete sweep over her."

On the 15th of April, the Charleston rebels made a bold but unsuccessful attempt to run the blockade of Port Walsh, as her sobriquet off Charleston bar, where she was being blockaded by the iron-clad monitor steamer was precisely like the *Denoid*, that blew up the *Housatonic*, which was lying at anchor on the flagship *Canonicus*. When the machine was discovered by the watch on the flagship, about two hundred yards from the Walsh, approaching continuously and silently. A few musket shots were fired, but no effect was made. A second ball followed, and the entire watch was on the alert, when no answer was returned from the mysterious craft. A third ball was followed by the discharge of musketry from the ship, and the black mass moved straight on towards the frigate. The battle-cry was beaten, and the crew were instantly at their guns, which were cast loose and primed, and the stringer was in readiness to cut away. In another moment the roar of a division of broadside guns was heard, and when the smoke cleared away, no traces of the rebel *David* were to be seen, save a few floating splinters, carefully swept the surface of the sea about the ship and towards the bar.

The Kittery Navy Yard, where a large number of iron-clads are now being built for the Navy Department, is situated on the south of the Piscataqua River, nearly opposite Portsmouth, New Hampshire, and within a short distance of Kittery, Maine. There is a continual ferry between the two places as well as one of the them the Navy Yard is located in. In the Granite State, it is known by the name of the "Portsmouth Navy Yard," while in Maine they call it the "Kittery Navy Yard"—by which name it is generally known. It is recognized in different departments of the Government by both names. The Bureau of Construction and that of Provisions designate it as Portsmouth, while all the other departments speak of it as mention it by the latter name. A force of 1,000 men are employed there. The ships are divided as follows:—Carpenters and laborers, 900; blacksmiths, 100; ship-joiners, 125; sawyers, 50; gun-carriage makers, 30; borers, 30; riggers, 60; painters, 40; machinists, 40; coppersmiths, 30. The Navy Yard proper is in Maine, New Hampshire, and Massachusetts. In the ship-yard, near the bridge connected with the Yard—which is counted one of the best in the country—are the three screw steam frigates, each of 4,000 tons, whose machinery is now being built, and which will be launched during the coming fall.

The vessels now lying unfinished in the Brooklyn Navy Yard since the issuing of the order transferring seamen from the land to the naval service. The following are a few of the more recent departures and arrivals:—The *Richmond*, sailed April 20; the *Brooklyn*, Captain Charles Alden, left on May 2, together with the *Athos*, the same day; the *Tritonia* sailed on the 21 inst; the *Manitou*, Captain Alfred Cotheburn, left on April 26, and the *Sassacus* on the 27th, and are expected to sail shortly. The *Stonedrage* arrived April 21; the *Pensacola*, also the *Mohican*, Captain G. B. Gibson, arrived on the 22d of April; also a large vessel unannounced as yet, and the private *Alabama*; the *Queen* arrived April 27; the U. S. supply steamer *Arctic*, lying at Lansing Commodore Rowan commands the naval station at Key West, on the steamer *Wampanoag*, *Madawaska*, and the great iron-clad *Kalamazoo*, is proceeding favorably. An important change has been announced to take place on board the receiving ship *North Carolina*. Captain Meade, a thorough and gentlemanly officer, who has commanded the vessel so successfully for the past twelve months, has ordered such essential orders to the Government in the perfecting of the discipline of seamen, retired from the command on the 20th ult., and has been appointed in that of the Naval Rendezvous at No. 140 Water street, New York. Captain Thompson, of the Naval Rendezvous, succeeds Captain Meade. Aside from the change in commanders, the *North Carolina* has received within the past week, a reinforcement of about three hundred sailors, transferred from the Army, mostly old hands who have seen much service, and who will undergo a course of drill with the rest of men, and look as if they might have doubled Cape Horn several times during their enlistment. There are now about eighteen hundred men aboard the vessel.

BUSINESS NOTICE.

Morton's Gold Pens are now sold at the same prices as before the commencement of the war; this is entirely owing to the Manufacturer's improvements in machinery, his present large Retail Business and Cash-in-Advance System; for, until he commenced advertising, his business was done on Credit and strictly with the Trade.

The Morton Gold Pens are the only ones sold at old prices, as the makers of all other gold pens charge the Premium on the Gold, Government Tax, &c., but Morton has by no case changed his prices, Wholesale or Retail.

Of the great numbers sent by mail to all parts of the world during the past few years, more than a thousand has failed to reach its destination in safety; showing that the Morton Gold Pen can be obtained by any one, in every part of the world, at the same price, postage only excepted.

Reader, you can have an enduring, always ready and reliable Gold Pen, exactly adapted to your hand and style of writing, which will do your writing without change for from one to ten years at the present almost universal High-Pressure Price of everything, you can have a Morton Gold Pen cheaper, in proportion to the labor employed, than you can obtain any of the other Gold Pens in the World. If you want one, see the "Pen is Mightier than the Sword," in another column.

THE SAME GOLD PENS, IN SILVER EXTENSION CASES, WITH PENCILS.

For $1 50 a No. 1 Pen, 1st quality; or a No. 3 Pen, 2d quality.
For $1 75 a No. 2 Pen, 1st quality; or a No. 3 Pen, 1st quality; or a No. 4 Pen, 2d quality.
For $2 50 a No. 3 Pen, 1st quality; or a No. 4 Pen, 1st quality; or a No. 5 Pen, 2d quality.
For $2 25 a No. 4 Pen, 1st quality; or a No. 5 Pen, 1st quality; or a No. 6 Pen, 2d quality.
For $2 50 a No. 5 Pen, 1st quality; or a No. 6 Pen, 2d quality.
For $3 50 a No. 6 Pen, 1st quality.

GOLD PENS, ALL FIRST QUALITY, IN SILVER-MOUNTED DESK-HOLDERS.

For $2 a No. 1 or 2 Pen; $2 25 a No. 3 Pen; for $2 50 a No. 4 Pen; for $2 75 a No. 5 Pen; and for $3 a No. 6 Pen.

No. 3 Pen.

The Quality may be added to any of the above, as Iridescent Points, carefully selected, and none of this quality sold but with the slightest possible variation in skill and the closest scrutiny can produce.

For $2 50 a Gold Pen and Pencil, in any Pens made by this premises to the year 1860.

The Pencil in the Extension shall equal in respect to Durability, Elasticity and Good Writing Qualities the Gold Pencils usually sold for from $1 50 to $2 elsewhere.

Adapted to the Cheap Gold Pens, he begs leave to say that, previous to operating his New and Patent-Improved Machinery, he could not supply the Well-ing and Durable Pens, for the price, but the Gold Pencils are Extraordinary.

Parties ordering must in all instances specify the "Name" or the "Number" of the Pen they desire to command, and in particular to discribe the kind they prefer as to degree of fine, coarse or stout.

All remittances sent by mail in registered letters will be at my risk; and I will refund twenty cents (change for registering), in addition to the price of each Pen, for every letter containing money not registered. Gold or Silver will be allowed the full amount of the Premium.

TO CLUBS.—A discount of 10 per cent will be allowed on sums of $10, of 15 per cent on $25, and of 20 per cent on $50, if sent to one address at one time.

THE THREE NEW BOOKS on the WAR.

THE WHIP, HOE AND SWORD, by Ripworth.....$1 25
THE COLOR GUARD, by Ripworth.....1 25
CHAPLAIN FULLER, being a Life Sketch of Rev. Arthur B. Fuller.....1 25

These interesting books contain valuable information not obtainable elsewhere. Read them.

They are of particular value to all soldiers, as they are written by men having long experience in the field, and who understand the wants and needs of the soldier.

For sale by all Booksellers, or sent by mail free on receipt of price, by

WALKER, WISE & CO.,
Publishers, Boston.

Now Ready—Price 75 Cents.

PEOPLE'S EDITION OF PARTON'S GENERAL BUTLER IN NEW ORLEANS.

One volume, octavo, paper, price 75 cents.

With the view of meeting the extensive popular demand for this remarkable book, this edition has been prepared. The page and type are similar to those of *Harper's Monthly*, and the less important documents are omitted, and in some instances the extracts given in full are not never so as to interfere with the interest or completeness of the work.

Unquestionably this book stands pre-eminent in interest among all yet occasioned by the war. Its subject and author combine to render it invaluable. Fifteen editions have been called for so far as we have been informed. It is the most extensively commended by the loyal press of the country, and essentially it is a gem for at least of the English press, by whom it is acknowledged to be a complete vindication of General Butler from the malicious charges of which he has been and have brought against him.

It contains an anecdotal sketch of General Butler's brilliant career, from his birth at the bar of Massachusetts; a history of the secession movement; the Secession Convention; correspondence between General Butler and the leading secessionists of New Orleans, in December, 1860, and January, 1861; the General's letter invited to join them; the General's reply; the Governor's proclamation; Massachusetts responds to the call; the Massachusetts 6th marches through Baltimore; the Massachusetts 8th marches with Governor Andrew and Governor Scott; his course at Fortress Monroe; the Big Bethel affair; the General's appointment; his instruction how to take Richmond; the truth about the battle of Great Bethel; the General's appointment to the secret history of the New Orleans Expedition; the organization of the Army of the Gulf; Ship Island; a full account of the capture of New Orleans; the General's entry into the city; the Mayor's letter; the five successive events, with a large number of highly interesting documents, which we cannot receive, before published; the recall of General Butler, and the universal regret at his departure; Proclamations, Orders and opinions upon the great issues before us.

Edition in large octavo, 1,000 pages, paper, price $2 50. People's Edition, 8vo., paper, 75 cents. Sent postage paid on receipt of price by the publishers.

For sale by Mason & Hamlin, Boston, and by all Booksellers. Published by Mason Brothers, No. 1 Mercer street, New York.

PIANO-FORTES,
Warerooms, 652 Broadway, New York.

The superiority of these Instruments is amply guaranteed by the unanimous testimony of the best artists of the day, who claim for them excellence of tone and workmanship hitherto unattained by any other makers. Mr. Goltschelk's constant use of these Pianos, in his extensive concert tours throughout the country, and recorded in establishing the justice of very high claims, entitles them to the highest confidence.

Messrs. C. & Sons have been awarded 50 Premiums from our exhibitions. The great superiority of their manufactures, their ellipse resting upon the best possible qualities of power, brilliancy and purity of tone and elasticity of touch.

COUNTY, PRIZE MONEY, BACK PAY, &c.—Bonuses of all kinds, Back Pay and Bounty promptly collected. Claims against the late Rebellion sent to all parts of the country. Information sought without charge.

ARMY JOURNAL. NAVY

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOL. I.—NO. 38. NEW YORK, SATURDAY, MAY 14, 1864. FIVE DOLLARS PER YEAR. SINGLE COPIES, TEN CENTS.

THE FIELD OF CONTEST IN VIRGINIA.

THE CAMPAIGN IN VIRGINIA.

THE great campaign of the fourth year of the war has at length opened, and already its momentous issues are passing from the region of speculation and prophecy into the domain of history. There had been ominous signs of its approach; but the first fired announcement came from General MEADE's headquarters in an order issued on Tuesday morning, the third day of May. Before its electrifying news reached the North, the Army of the Potomac was already on the march.

On Tuesday, May 3d, the Army broke camp, and with six days' rations in haversack or knapsack, was put in motion in light marching order. In the afternoon, General GREGG marched his cavalry division, with a portion of the canvas pontoon train, towards Ely's Ford, on the Rapidan, and occupied himself till late at night in mending the roads for the travel of infantry. Soon after midnight, he established a crossing at the Ford, Major BRAINARD of the 50th New York Engineers throwing two pontoon bridges to the south bank of the river. About the same time General WILSON, with the third cavalry division, moved on Germanna Ford, about six miles above, and successfully established there another crossing with canvas pontoons. Just before midnight the Second corps, under Major-General HANCOCK, covered by the darkness, began to move out of camp and down the Stevensburgh and Richardsville road to Ely's Ford, which they reached and crossed not long after daybreak. Almost simultaneously the Fifth corps, under Major-General WARREN, executed a similar movement towards Germanna Ford, followed, four hours later, in the same direction, by the Sixth corps, under Major-General SEDGWICK. During the day of Wednesday, and chiefly in the morning, all these corps were safely and handsomely marched across the Rapidan, the Ninth corps, under Major-General BURNSIDE, acting for the time as reserve, being prudently detained at the further side of the stream, until occasion should require its transfer to the enemy's ground. At night-fall the fording was finished for the troops, and only the trains were left to transport.

The Army having crossed without any opposition, now struck out southerly towards the region of Chancellorsville and the Wilderness, the plank road to Fredericksburgh being first carefully patrolled by the cavalry of General GREGG, and the fact ascertained that no enemy in force were lurking in that direction. General WILSON's cavalry swept up the road to PARKER's store, towards Orange Court-House, the supposed base of the enemy. The Second corps camped on the old battle-ground at Chancellorsville, and the other corps were properly disposed. General WARREN, with the Fifth, was at the Old Wilderness Tavern, and General SEDGWICK, with the Sixth, at the Tavern and at Germanna Ford. The latter point formed the headquarters of the Lieutenant-General and of Major-General MEADE, for Wednesday night. The day's movement was creditably and successfully performed. Hardly a shot was fired in crossing, the pickets of the enemy hurrying off, with their great news on our approach. There was a remarkable absence of straggling, and the men moved with spirit. The day was fine and favorable throughout, and the night assisted

our cavalry patrols, scouring the roads for a glimpse at the enemy.

THE FIGHTING OF THURSDAY.

Early on Thursday, then, our forces took up the march, reveille being beat long before daybreak. The order of the day was substantially as follows:—General WARREN, with the Fifth corps, was to proceed from his position on Belmont Farm, near the Wilderness Tavern, along the Orange Court House roads, five miles toward Mine Run to PARKER'S Store, situated about twenty miles from the Court-House. General SEDGWICK, with the Sixth, was to follow him on the plank road. General HANCOCK, with the Second, was to stretch southwesterly away from the Rapidan, from Chancellorsville towards Shady Grove Church, on the Pamunkey road. Finally, General SHERIDAN, who covered our extreme left, beyond General HANCOCK, with his cavalry, was to collect it at Piney Branch Church, to effect a sweeping reconnoissance on our left flank, and to endeavor to find out the enemy's cavalry under STUART, and engage them. This was done, during the day, the cavalry skirmishing resulting on the whole to our advantage.

The object of the movement was evidently to straighten our line in the north westerly direction, carrying HANCOCK out to the left, to connect him with WARREN, and moving SEDGWICK forward. These dispositions, however, were interrupted before full consummation. The Army had proceeded but a short distance before signs were apparent of the approach of the enemy in strong force;—consisting of two corps, EWELL moving along the turnpike from Old Verdersville on Mine Run, and A. P. HILL from New Verdiersville along the Spottsylvania county plank road, over the latter of which, as we have said, General WARREN was advancing. The 5th New York cavalry, skirmishing on the plank road, was quickly driven in with considerable loss. General GRANT continued the march, however, to secure some benefit from the rolling ridges ahead, and then, halting his troops, disposed them with advantage, and awaited the enemy's onset—a few rude and hasty breastworks being thrown up. Our line, according to the order of march already indicated, ran northwest and southeast, with the corps established nearly in order, General HANCOCK had moved out southwesterly, and General SEDGWICK up to the northeast, towards the river, leaving General WARREN still on the plank road, in the region of PARKER'S Store, but not yet arrived at that point. General SEDGWICK, therefore, held the right, General WARREN the centre, and General HANCOCK the left.

The unfavorable nature of the country as a battlefield, was soon perceived. Its surface was covered with dense forests of low pines and dwarf oaks, with here and there an impenetrable undergrowth of hazel. The roads were narrow and easily choked up by troops. There was obviously no opportunity for artillery. A few batteries were interposed here and there in an open space or by a roadside, but the great trains of both armies were silent in the rear, and even the sections planted here and there, were of little use. The battles both of Thursday and Friday were essentially infantry battles.

There were certain ridges in the rolling country, with gullies and ravines, which afforded some opportunity for skill in dispositions, and these were used to advantage. But all manœuvring was rendered difficult by the density of the underbrush. Our line appears to have extended nearly five miles, with the centre a little thrown forward,—its convexity being the result of a battle occurring before we had got into our best position.

About noon, General GRIFFIN (who had reported the enemy in his neighborhood, and as having driven in his advance, consisting of his 10th Massachusetts, with the 83d Pennsylvania, under Colonel HAYES, of the former) was ordered to push his (1st) division of the Fifth corps out to the right and left of the turnpike, to feel the enemy. Accordingly he moved BARTLETT'S 2d brigade to the left of the road, and AYRES' 3d brigade of regulars to the right.—BARNES' 1st brigade (SWEITZER in temporary command) being in reserve. Less than a mile's march, stretching across the turnpike, brought them against a part of EWELL'S force, well posted on a wooded acclivity. A sharp engagement at once ensued for an hour; but the pressure of the enemy in full strength upon our two brigades, and especially upon AYRES' on the left, could not longer be resisted, and our forces fell back, leaving two pieces of artillery, with nearly all the horses killed, in the enemy's hands. WADSWORTH'S 4th division, and ROBINSON'S 2d division, of the Fifth Corps, at once relieved GRIFFIN'S division, after its well-fought battle, and held the enemy in check. After an hour's firing by infantry and artillery, the enemy moved off in force, and our line was re-established. Our loss, principally confined to AYRES' and BARTLETT'S brigades, was in the region of 1,000 men.

It now appeared evident that LEE had made an adroit and fierce attempt to destroy our Army before it arrived in position, either by interposing himself between its right and the Rapidan, or by piercing its right centre. The moment his intent was perceived, however, General MEADE had directed General WARREN to attack briskly, and the result was a repulse of the enemy in that direction, as effectual as that of our own.

The enemy now transferred himself to the left centre, and about 3 o'clock in the afternoon endeavored to press in between WARREN and HANCOCK,—the latter of whom, in obedience to recalling orders, had checked his advance, and was rapidly marching across to close the gap in the line of battle. He arrived in season—but with no time to spare—and found the advance of the enemy already arraying themselves in the interval. GETTY'S division, of the Sixth corps, had been temporarily detached and moved to the left, to the right of the Orange Court-House plank road. The advance, the 1st brigade, of MOTT'S Second division of the Second corps, had barely formed junction with GETTY, when the fight was upon them with great force. The stubborn fighting of these two divisions enabled the remainder of our left to arrive and form—HANCOCK bursting upon the enemy's right with a hot fire of musketry. BIRNEY, BARLOW, and GIBBONS, commanding respectively the Third, First, and Fourth divisions, successively launched their forces in the battle, which was now exceedingly stubborn and bloody. The enemy, massing his troops, poured in a deadly hail of musketry—perhaps unsurpassed for fury in the record of the war. There was little play of artillery,—the almost impenetrable woody growth and underbrush rendering its use hazardous. The enemy's second corps, however, held its ground with unflinching tenacity and for two hours kept almost overpowering numbers at bay. Reinforcements came up, and a part of Generals WADSWORTH'S and ROBINSON'S divisions moved out to turn the flank of HILL'S corps.

It soon became evident, however, that, to relieve the Second corps, there should be an advance along the whole line. It was ordered; and while the darkness of the night was rapidly gathering, SEDGWICK'S corps, which had been engaged during the afternoon since 1½ o'clock, and especially about the time of the attack on the left at 3½ o'clock, pressed upon the enemy and drove them back. They captured a thousand prisoners, also, captured from us during the day. In killed and wounded, their loss was probably equal to ours; and we also took about 300 prisoners.

The results of the day were obviously indecisive. The respective losses were not far from equal. The contending forces lay on their arms on the ground they had fought over. Each had repulsed the advance of his opponent, and only awaited the more desperate conflict of the morrow. In some respects, however, we had gained decided advantages. First, General GRANT had learned the position and strength of LEE'S army—and that of the latter, its greatest value. Second, he had been able to gather his troops well into hand, putting them into a more substantial line than at the opening of the engagement. Finally, there was no longer any doubt as to the policy of calling General BURNSIDE from the further side of the river,—the enemy's force being obviously all in our front. The Ninth corps, under General BURNSIDE, came to the field of battle on Thursday, after a forced march, and was distributed, as occasion required, on the right, right centre, and left centre. But our line remained substantially as during the day, stretching north west and southeast over a line nearly parallel to that from Germanna Ford to Chancellorsville, and with headquarters not much in advance of the Wilderness.

THE FIGHTING OF FRIDAY.

At the very dawn of day, on Friday, the 6th of May, hostilities were warmly resumed. Both armies were evidently bent on attack. General SEDGWICK had been ordered to advance at 5 o'clock in the morning; but fifteen minutes earlier the enemy were upon him in force. General SEYMOUR, with a provisional division on the extreme right, and General WRIGHT'S first division of the Sixth corps, next adjoining, were briskly engaged at once, and General RICKETT soon no less hotly involved. The enemy began to lap flank was repelled, and our line pushed a few hundred yards ahead, without gaining, however, material advantage. At 8 and at 10½ o'clock again the fight was pressed; but the fighting, though furious, was indecisive. At about 8 o'clock, also, the firing extended all along the line, and after a short cessation again broke out at 10½. The enemy began to hurl himself successively on our right and left wings—having perceived our weakness on Thursday—with obvious intent to break through and separate the three corps. A part of BURNSIDE'S Ninth corps, however, had been sent to fill the dangerous gap between the centre and left, and—though this arrangement was not entirely and properly consummated until later in the day, after the experience of several fierce assaults. Earthworks also were thrown up on Friday, as on the preceding day, whenever and wherever practicable, and, as the event proved, with wise precaution against almost the varying fortunes of battle found them of invaluable service.

On the left, our line still stretched across the plank road, as at the close of Thursday's battle, with BARLOW'S division of the Second corps on the extreme left; next, MOTT'S and one brigade of GIBBONS'; next, BIRNEY'S; finally, towards the centre, ROBINSON'S division of the Fifth corps, with HOFMANN'S brigade of the Ninth corps, and CARROLL'S and OWENS' brigades of GIBBONS' division of the Second corps. About 5 o'clock A. M.—the time appointed for SEDGWICK'S advance—HANCOCK moved out his forces, and with great enthusiasm attacked and drove the astonished enemy more than two miles from the Brock road, near the PARKER'S Store. There, reinforced by LONGSTREET, they succeeded in holding their ground,—leaving, however, many prisoners in our hands. A comparative lull ensued after this handsome exploit, when again a severe assault was made on our left, followed up along the line with such fierceness as nearly to break the whole formation. Reinforcements, however, came from BURNSIDE'S corps, and LONGSTREET'S solid infantry masses, pressing our left and centre, were checked, and at last precipitately driven back.

The line swayed forth and back with the shifting fortune of the terrific fight, and the thick and heavy charges were in contention for the centre of the dead and wounded of both armies. Our right and centre gained a little ground, under hot fire, but it was only to meet the enemy's entrenched line, posted on an extended ridge, and approached through a thickly wooded swamp of considerable width, protected by a natural abatis. This position was driven again successfully attempted by our right and centre in the course of the morning. On the left, however, the position at noon was not a little critical. The reinforcements from the Ninth corps were expected to have sufficiently filled up the gap, at daybreak, between WARREN and HANCOCK, but the position was not made entirely strong till later in the day. The enemy, partly withdrawing from the right, for the moment, rushed in farther down the line, as has been said, almost surrounding the Second corps, and rolling far out on its left flank, as well as on the front. Colonel FRANK'S Third brigade of General BARLOW'S First division of the Second corps was borne back by the fierce assault of a greatly superior force, and the whole line once more retired to its entrenched line of logs and abattis, thrown up on Thursday, along the Brock road. Brigadier-General JAMES S. WADSWORTH, commanding the Fourth division of the Fifth corps, was struck in the forehead and instantly killed before noon of Friday.

Another comparative lull occurred at noon, and our forces took the opportunity it afforded to draw up and concentrate their lines, interposing the greater part of BURNSIDE'S Ninth corps between HANCOCK and WARREN. The left also was brought forward

a little from the Brock road, to which it had been driven, towards the centre. Hardly had these fortunate dispositions been made, when again in the middle of the afternoon the enemy, under LONGSTREET and A. P. HILL, fell upon our left and centre with great fury, and again pushed them back. At the junction of the left and centre, the attack was particularly severe, CRAWFORD'S Third Division of the Fifth corps, CRAIG'S Fourth division of the Second corps, and STEDMAN'S division of the Ninth corps suffering its brunt. The latter division, on General HANCOCK'S right, giving way overpowered, the enemy rushed through the gap. General HANCOCK then dispatched Colonel CARROLL'S Third brigade, Second division of the Second corps, to sweep along the whole line until the gap was filled. This manœuvre was most gallantly and successfully executed, the enemy retiring with much loss, and our troops gradually gaining their old alignment.

Resolute and perserving still, the enemy now turned away from the left and centre—towards dark—and again gathered in a final rush against our right, which had stems the opening attacks in the morning and at 10 o'clock, been comparatively at rest. Suddenly and furiously assaulted, our men began to break. General SEYMOUR'S Second brigade, Third division, Sixth corps, already panic stricken, on our extreme right, with most of General SHALER'S brigade, were swept off and in flight, and, captured their own commanders. General SEYMOUR had been conspicuous for gallantly through the day. He had been assigned to this brigade (MILROY'S old troops, new to the Sixth corps) only the night before, and, according to universal testimony, did all that could be done by skill or daring to avert the catastrophe. The whole right wing, and indeed the whole Army, was in imminent peril. General SEDGWICK, however, by infinite exertions and direct personal exposure, rallied and held his troops and saved the Army from the destruction which threatened it. With their success on the right, the enemy sullenly withdrew, darkness already having given over the contest.

The field had been a series of fierce attacks both by us and the enemy, on right, left, and centre, attended in almost every instance with temporary success, but met at last by thorough repulse. The wooded nature of the country, to which reference has already been made, but which can hardly be appreciated by one unfamiliar with the battle-field, was peculiarly favorable to the massing of the enemy's forces in perfect concealment and secrecy. The same difficulties in the ground prevented us from checking their columns with artillery. It must be remembered, also, that their perfect familiarity with the region, its neighborhood being their camping ground for many months, gave the enemy a decided advantage in the manœuvring tactics of the day.

The disaster to the extreme right of the Sixth corps was of a most serious character, and such as has lost more than one battle in history. It is still strange that the enemy did not perceive the havoc they had made. Had they not been exhausted with their unfortunate attacks during the day, or had they known the condition of our right, it must have fared hard with the Army of the Potomac. But so dearly was the advantage gained that their effort to thrust themselves between us and Germanna Ford was left unprosecuted, even when it was nearest being successful. Artillery, however, had been promptly posted to command the column of Rebels, in case it should burst through and over the right flank of our Army. It was not required, the enemy being already repulsed by the strenuous efforts of Generals SEDGWICK and WRIGHT. Our losses in this wing fell little below 6,000, of which 4,000, probably, occurred during the enemy's assault. Our losses in the Second corps ranged in the neighborhood of 3,000. And our total loss in the two days' fighting must be set not far from 15,000 men. Probably these of the enemy were no less severe. In these battles there was an unusual proportion of wounded among the casualties, and this would, at least so Army surgeons used an other side. Amongst our general officers killed in the two battles were Generals HAYES, WADSWORTH and WEBB, and on the Rebel side, Generals JONES, JENKINS and PICKETT, with Generals LONGSTREET, PEGRAM and HUNTER severely wounded. But the lists of casualties are not complete.

It cannot fail to be noticed from the official dispatches on both sides, including those of our Secretary of War and of General LEE, that each army claims to have "repelled the fierce attack of the enemy," rather than to have initiated the attack. Whether a successful repulse, however, seems more creditable than an unsuccessful assault, we will not stop to inquire. At all events, it seems clear that both armies designed attack. On Tuesday our forces undoubtedly moved out to find the enemy, and discovered him intrenching to oppose us. Like manner, it is certain that an attack both on the right and left was ordered for our forces at 5 A. M. on Friday. On the left it was made, but on the right it was anticipated by the enemy, who had the same intent, but had set the time of execution a few minutes earlier than we. The same mutual disposition to attack reappeared on the same line during the day, and with marked emphasis in the afternoon, and at the attack on HANCOCK. It may be added, that this terrific infantry contest of Friday closed on a disputed field, neither army having gained great advantage, and friend and foe lying side by side were a broad stretch of territory in attestation of the equal fortune of the day. General GRANT held substantially the same line as on Thursday evening, but he had strengthened it on the left. During the night, preparations were made to strengthen the right also, and to repair the disaster which the enemy's last charge had wrought on that flank. Except that this night was comparatively quiet, our Army lying silently along their hasty lines of rifle pits, and the Rebels still keeping their more formidable entrenchments on the edge of the woods, while the intervening space, so often fought over, was held by the dead and wounded of both the combatants.

Our cavalry during Thursday and Friday had covered our rear and left, and during the former day WILSON and GREGG held the important point known as TODD'S Tavern, the intersection of the Brock and Catharpin roads. The service thus rendered on the left was particularly important, by preventing flanking demonstrations of the enemy's cavalry. The interrupted dispatches for LEE to STUART will show that such demonstrations on our left by the latter were greatly desired. On the departure of HANCOCK'S corps, however, on Thursday, from TODD'S Tavern, to join the line of battle, our forces were charged, and several hundred of the Eighteenth Pennsylvania cavalry captured.

SATURDAY'S AND SUNDAY'S FIGHTING.

At daybreak on Saturday, our forces opened the conflict again with shot and shell, planted at night to protect our right wing. The latter had been drawn back and strengthened. The commanding called out no reply, and a general advance followed, skirmishers being thrown out. A series of brisk and severe skirmishes ensued, in which we were generally victorious. But it became evident by noon that General LEE was retreating with his main force towards Spottsylvania Court-House, having left behind lines of entrenchments at Mine Run the second defensive line on or near the North Anna. General GRANT promptly began the pursuit. He had already posted his cavalry, to anticipate the movement, near TODD'S Tavern, as we have stated. Some skirmishing occurred during Saturday morning for the possession of the cross roads at that point; and then, at 10 A. M., was a general cavalry battle, with CUSTER'S brigade of TORBETT'S division on the right, GIBBON'S brigade of General GREGG'S division, with MERRITT'S brigade, in the centre, and DAVIS'S on the left. The loss was about 250 on each side, and our forces held their ground.

Meanwhile, our infantry had commenced the pursuit of General LEE, who was retiring in perfect order and turned again and again on Saturday and Sunday, as our forces pressed him, to deliver severe battle. A part of our troops stretched across and occupied Fredericksburgh, the 22d New York cavalry entering that city at 8 o'clock on Saturday morning. A depôt for supplies was established there, and a basis for supplies arranged. HANCOCK'S and BURNSIDE'S corps pressed on, on Saturday night, resuming the chase again at daylight on Sunday morning, and camping at noon twenty miles away southerly from the Old Wilderness battle-field. The Fifth corps, remaining still at the battle ground, marched all Saturday night, through exhausted by the events of the four days and nights preceding, taking the Brock road past TODD'S Tavern, towards Spottsylvania. After leaving the Tavern on Sunday, the 8th of May, BARTLETT'S brigade of GRIFFIN'S division, being in advance as skirmishers, was fired upon by the enemy. Line of battle was at once formed in a triangular clearing near ALSOP'S farm. GRIFFIN'S division held the right and ROBINSON'S the left, supported by MARTIN'S 3d Massachusetts and RITTENHOUSE'S 5th regular battery. General CRAWFORD'S and WADSWORTH'S (now CUTLER'S) divisions came up and the battle was severe. At last the enemy was driven back, but our march was checked for the time. The battle was fought in gallant style by men almost exhausted by marching and fighting. General ROBINSON exhibited great skill and energy through the fight, and was wounded severely in the knee. Three hundred men also were killed and wounded.

Towards evening, General GRANT determined to push the enemy again, and again the Fifth and Sixth corps began a deafening roar of musketry, WRIGHT'S division of SEDGWICK'S corps being in advance. During Sunday, as during Saturday, there was fighting throughout the Army.

MONDAY'S FIGHTING.

On Monday there was comparative quiet in the morning, then cannonading and skirmishing, but no general battle. But we met with a severe calamity in the loss of General SEDGWICK, who was killed by a sharpshooter while superintending the mounting of artillery. On Sunday our line seems to have changed, General WARREN'S Fifth corps holding the centre, General HANCOCK'S Second corps the right, and General WRIGHT'S, lately SEDGWICK'S Sixth corps, the left. Towards dusk on Monday General GRANT ordered another advance on the enemy. Accordingly, the right, with General BURNSIDE'S and GETTY'S divisions in advance, followed by General CARROLL'S brigade, moved out and crossed to the south bank of a branch of the Po River. A severe battle occurred with both infantry and artillery, the enemy and our own troops alternately chargieg. General BURNSIDE on our extreme left pushed out with skirmishing and reconnoissance. During the day we had received and repulsed an attack mainly directed on WILCOX'S division of the Ninth corps. At the close of the night's attack the enemy still held Spottsylvania Court-House, and HANCOCK slowly retired his brave Second corps, after suffering heavy losses, in addition to the terrible slaughter to which his gallantry in the Wilderness battle had subjected it.

TUESDAY'S FIGHTING.

On Tuesday, the incessant storm of battle culminated in the most terrific carnage of the campaign. Our whole line occupied substantially the same position as already described in the operations of Monday,—the line stretching out a length of about six miles on the northerly bank of the Po, and taking the general farm of a crescent, the wings being thrown forward. The dispositions were the new ones of Sunday, the centre consisting of the right wing and the Sixth on the left. The preceding night HANCOCK'S Second corps had succeeded in crossing the Po, and now held a line on the right, nearly parallel to the road from Shady Grove Church to the Court-House. WARREN'S Fifth corps held the centre, being on the east side of the road, and WRIGHT'S Sixth corps held the left, facing towards the Court-House. Further out on the left was BURNSIDE'S Ninth corps. ARNOLD'S, RODGER'S, SLEEPER'S, and other batteries covered our right; MEADE'S, MARTIN'S, and others our left centre. In our front was a dense forest, covering the Army of the woods of the wilderness. The Rebels still held Spottsylvania, and the region north of the Court-House. On the preceding day, his left was understood to rest on Glady Run, sweeping northward, and sheltered by strong work. His right curved in a similar direction, and rested on the Ny River; and his centre, a little thrown forward from the right centre and left centre, was posted on commanding ground.

His position was well supported by breastworks, and along his centre was the forest and underbrush, lining a marsh partially drained by a creek. Early morning the conflict opened by a terrific cannonade of our artillery against the advancing Rebel lines; and for the first time in the campaign, this arm was brought into full and destructive use.

BURNSIDE'S Ninth corps next cautiously skirmished on our extreme left. MOTT'S Fourth division of the Second corps was then transferred to the left, and

the advance continued at this point. Our orders, however, had been to attack the Rebel centre. Accordingly, GIBBON'S Second and BIRNEY'S Third division, of the Second corps, were drawn back from the other side of the Pa. to connect with WARREN. The Second and Fourth division of the Fifth corps commenced the attack on the centre. The rest of the Fifth corps and the two divisions of the Second then advanced and fought with great tenacity several hours, driving the enemy to his rifle-pits, but failing to capture them, GIBBON'S gallant Second division, and especially CARROLL'S brigade, suffered severely in repeated charges. General RICE, of the Second brigade, Fourth division, Fifth corps, was at this time killed. The check of our centre threw the remaining division, BARLOW'S (First) of the Seconde corps on our right in extreme peril, and orders were given to withdraw it to this side the river. The Rebels, however, had already attacked it in great force, and turned it. But its withdrawal was at length effected, and the corps still kept on fighting.

Towards evening, a most energetic, gallant assault was made by the whole line. General UPTON'S First brigade, of WRIGHT'S First division of the Sixth corps, with General DAVIS'S Third brigade of the Third division, moving steadily forward amid a raking and murderous fire, without firing a shot, scaled the enemy's works in gallant style, and captured more than one thousand of the enemy with several guns. But General UPTON, finding himself far in advance of the Army, was compelled to fall back with his prisoners from his daring assault. As always before, night closed on a hard-fought, but indecisive field. Our loss had not been less than ten thousand men. But the Rebels had suffered quite as severely as ourselves.

Wednesday morning was comparatively quiet, though about 10 o'clock the seventh day's fighting began in a series of heavy cannonading of the enemy's position. At eleven o'clock, after skirmishing with varied success, our line was somewhat advanced. At that hour General LEE is reported to have sent in a flag of truce for a cessation of hostilities for forty eight hours, that he might bury his dead. General GRANT replied that he had not time to bury his own dead and would advance immediately, and some parts of our line were therefore pushed forward.

With the great battle of Tuesday substantially closes our record, for the present, of the hard week's fighting of the Army in Virginia. The immense losses of both the enemy and ourselves can hardly be conceived. On neither side has there been much sacrifice of trains, of artillery, or of material. A section of artillery was captured from us on Thursday, but nothing more since. But in gallant soldiers our forces have had a lamentable loss. It is not too much to set the number of our killed, wounded, and missing at this present writing in the neighborhood of 35,000 men, simply adding together the estimates of such battle. In brave and skillful officers, the Army has met irreparable loss. The large percentage of these casualties well attests the courage and spirit with which the soldiers are led into battle. The losses of the enemy are at least equal to our own. It requires very little arithmetic to estimate the length of time during which our Army will be capable of supporting an offensive campaign, without further reinforcements, especially if there be entrenched cities like Petersburg and Richmond to capture. But we know that reinforcements have gone forward, and amongst them artillery trains, designed for future use at the gates of Richmond.

OTHER OPERATIONS.

From the important cooperative movement under Major-General BUTLER, we have reports of gratifying success, his forces having at last accounts planted themselves on the main line of railroad communication with the South, and having the prospect of making good their hold against any force the enemy are at present able to send against them. This result has been accomplished with comparatively trifling loss of life, the rapidity of our movements anticipating the action of the enemy, whose attention was distracted by a feint previously made on the York River. With the purpose of concealing the real direction of the advance, the troops composing the expedition, consisting of the 18th corps, under Major-General W. F. SMITH, and the 10th corps, under Major-General GILLMORE, were embarked on transports at Yorktown and Gloucester Point. Demonstrations of an advance up the York River were made at the same time, a brigade under the command of Colonel S. M. ALFORD, Third New York Volunteers, landing at West Point, constructing wharves, &c. The troops once fairly embarked, the transports set sail on the 6th instant, after dark, steaming down the York River and up the James, preceded by the three army gunboats under command of Brigadier-General GRAHAM; by the double-enders *Eolaus*, *Mackinaw*, and *Cocuta*, four Monitors, the *Tecumseh*, *Canonicus*, *Saugus*, *Onondaga*, and the iron-clad *Atlanta*, and by the smaller gunboats *Commodore Morris*, *Hunchback*, *Commodore Jones*, *Dawn*, *Delaware*, *Putnam*, and *Shoshonee*.

At Wilson's Wharf, on the north side of the James, at a bend of the river, below Charles City Court House, a regiment of General WILD'S negro troops was landed for the purpose of preventing the enemy from any communication; while at Fort Powhatan Landing, a little above, on the south side, two regiments of the same brigade were disembarked with the same object. The fleet then pushed on, discovering off Jones Point the flag-of-truce boat *City of New York*, with the white flag and the stars and stripes flying, with four hundred and fifty Rebel prisoners, which she brought up the day before to exchange. Here General HINKS' division, with some other troops and a battery, was landed, the remainder of the 18th and 10th Army corps effecting a landing at Bermuda Hundred, between five and four miles by water to the north of the Appomattox River. In these operations no opposition was encountered. Meantime the gunboats and Monitors had crossed the bar at HARRISON'S Landing, and were all above City Point. Immediately upon landing the troops marched themselves, the gunboats covering their water flank, and on the 6th reconnoissances were made of the enemy's position. On the 7th five brigades, under command of General HINKS, advanced towards the Petersburg and Richmond Railroad and encountered the enemy, with whom a sharp fight took place, during which we succeeded in cutting the railroad. The railroad bridge crossing one of the tributaries of the Appomattox River, within about seven miles of Petersburg, was set on fire and totally consumed, and the railroad track was torn up and destroyed for some distance to the north of the bridge, and the road rendered useless long enough for our forces to carry out other and more important operations.

Our loss was in the neighborhood of two hundred and fifty killed and wounded. The enemy's killed and wounded were necessarily left on the field, near the railroad, as the enemy, massing themselves, were able to finally drive us away before we could get all the disabled to the rear. Meanwhile, a brigade under General HECKMAN, with BEECHER'S Rhode Island battery, had encountered the enemy the previous day, and retired to prevent bringing on a general engagement, moved out in the direction of the railroad, but was unable to penetrate far.

General KAUTZ, with 3,000 cavalry from Suffolk, on the same day with the movement up the James River, had forced the Blackwater on Thursday last, they went on to Stony Creek, below Petersburgh, cutting in two BEAUREGARD'S forces at that point, a portion, however—that under HILL—reaching Petersburgh in time to contest the progress of our troops. On the same day Colonel WEST, with two regiments of cavalry—the First and Second colored—made a demonstration from Williamsburgh on the Peninsula. They galloped up to the Pamunkey, stopping at the White House, and meeting little opposition except from a few guerrillas, and returned to Williamsburgh the next evening. On Saturday morning, the 9th inst., they went on a second time, travelling over nearly the same ground, and meeting more opposition from bushwackers and detachments of troops. Subsequently these black troopers were embarked on transports and brought to Bermuda Hundred, where they held out other important operations.

On Monday, the 9th, our troops again advanced in force against the Richmond and Petersburgh Railroad with the purpose of more effectually disabling this main line of supply for General LEE. Forming on the battle-field of Saturday our troops moved forward at 4 A. M., General GILLMORE on the right and General BIRNEY on the left. Feeling their way cautiously through the thick woods, they advanced in momentary expectation of a fight. Contrary to expectation, however, their march was unopposed, and at about 8 A. M. the two columns struck the railroad almost simultaneously, General GILLMORE at Walthall, six miles from Petersburgh, and General GILLMORE at Chester, three miles further to the north and thirteen miles from Richmond. After halting until afternoon to destroy the railroad, our forces pressed on after the Rebels, who retired before them to Swift Creek, some five miles west of the railroad. Here they made a stand, the main body across the stream, but one brigade on the hither side sheltered by rifle pits and redoubts. After a short and sharp engagement they were driven from their works by a charge from the brigade of General HECKMAN, skirmishing in their flight all their dend and wounded, and falling back under the protection of an earthwork completely commanding the fords of the creek. At other points of the line a desultory fire of artillery was kept up all the afternoon, and at dark the skirmishers on either side confronted each other from the opposite bank of Swift Creek. The enemy appear to hold a strong position here, from which it will be necessary to dislodge him before an advance can be made on Petersburgh. Though the possession of that place is important to secure our hold upon the railroad, we have a strong position in Kautz's cavalry, and General BIRNEY will be soon by his dispatch published elsewhere, has full confidence that he will be able to maintain his ground.

The success of the naval part of the expedition has not thus far been remarkable. One of the smaller gunboats, the *Commodore Jones*, struck a torpedo, and was destroyed by a torpedo on the 6th instant, and two others, the *Shawsheen*, and the *Brewster*, an army gunboat, by explosion. The destruction of the *Commodore Jones* involved the loss of the paymaster, Mr. E. T. CHAPMAN, killed, and about fifty of the crew killed and wounded. Thus far, nothing has been undertaken by our iron-clads beyond covering the landing of the troops.

In connect with the operations of General GRANT, we have the movement of Generals SIGEL and COUCH, with a force estimated at 20,000 men, up the Shenandoah, for the purpose of guarding against possible movements on the right flank of our main Army, and of undertaking such offensive operations as may be found expedient. From Western Virginia, too, our troops are closing in about the Rebel capital. At some of these detached columns have already reached Lynchburg, and their importance depends entirely upon the successful advance of General GRANT. A failure in the main attack will, of course, render nugatory any success on their part, though in case of the final defeat of General LEE, they would, doubtless, be able to furnish efficient reinforcement to follow up our success. Indeed, it is to be hoped that they may come within supporting distance in season to influence the issue of the present contest with LEE.

As we summed last week, the cannon of the Army of the Potomac was the only answering echo in the artillery of General SHERMAN, who was making the movement on the chief in Virginia by an advance in force against the Rebel positions in Georgia. We have as yet no detailed report of operations in that vicinity, though we have the gratifying but incomplete intelligence assurance that everything at last accounts was going on in a most satisfactory manner. Our advance was in three columns, THOMAS moving against the front of the Rebel position, while SCHOFIELD advanced from Cleveland, thirty miles northeast of Chattanooga. In the meantime, General MCPHERSON, by a rapid circuitous march of forty miles, was to make the movement in chief in Virginia by an advance in force against the Rebel positions in Georgia. We have as yet no detailed report of operations in that vicinity, though we have the gratifying but incomplete intelligence assurance that everything at last accounts was going on in a most satisfactory manner. Our advance was in three columns, THOMAS moving against the front of the Rebel position, while SCHOFIELD advanced from Cleveland, thirty miles northeast of Chattanooga. In the meantime, General MCPHERSON, by a rapid circuitous march of forty miles, was to make the movement in chief upon the Rebel line of communications at Resaca, a station on the Western and Atlantic Railroad, at the crossing of the Oostanaula River, eighty-four miles from Atlanta and fifteen miles south of Dalton. On Saturday, the Rebels were defeated by General MCPHERSON on Rumsel Hill, some ten miles northwest of Dalton, and took up a strong position at Buzzards' Roost, on Mill Creek, five or six miles nearer Dalton. The last report we receive is that "after "three days' heavy skirmishing, in which all the corps "were engaged, we had driven the Rebels back to Rocky "Ridge and Buzzard Roost Mountain, from which we are "fast expelling them."

Our gunboats have made an unsuccessful attempt to destroy the Rebel ram *Albemarle* which appeared in the waters of Albemarle Sound on the 5th, accompanied by her satellite the *Bombshell*. The *Albemarle* is reported at Plymouth. She was attacked by the *Miami*, *Whitehead*, *Cove*, *Commodore Hull*, *Sassacus*, *Wyalusing*, and *Mattabesett*, but succeeded in escaping apparently unhurt, after a three hours' fight. Our gunboats, which were but slightly injured, retook the *Bombshell* with all on board, thirty-four persons. The *Sassacus* ran into the ram at full speed but without inflicting any damage. We lost eight killed, twenty-six wounded, and several badly scalded by steam from the boiler of the *Sassacus* which was struck by a 100-pound Parrott shot.

A cavalry dash was made by the Rebels on Newbern on Sunday, the 1st, but they were driven off by the gunboats *Commodore Barney* and *Louisiana*.

The Rebels are taking advantage of the withdrawal of General BANKS from South Carolina to restore Fort Sumter, at which they are at work as busy as beavers. Fire has been reopened on the fort from Morris Island, and a combined attack by land and sea is rumored.

From Louisiana we have nothing cheerful to report, and we have not space to record full particulars of our disaster. General BANKS was at Alexandria at last accounts with a force sufficiently strong for the defensive, but he does not appear to have been able to render any assistance to our gunboats in the Red River, though positive orders for him to do so are said to have gone from General GRANT. On the 6th inst. three of our transports and the gunboat *Signal* were

destroyed by a Rebel battery, twelve miles below Alexandria. It is little satisfaction to learn that the battery was armed with guns taken from General Banks. The gunboat *Eutaw* has also been destroyed and others have suffered severely, and the *Covington* and *Exchport* blown up to save them from the Rebels. As a necessary consequence of the repulse of General Banks, General Steele has been obliged to fall back to Little Rock. He had a sharp race with Marmaduke for the possession of the city, and lost heavily in stores and ammunition on his retreat, breaking through the lines of Price, who sought to detain him.

THE BATTLE OF THE WILDERNESS.

Two following account of the battles of the 5th, 6th and 7th inst., comes to us from Mr. W. Swinton, who accompanies General Grant in his Virginia campaign :—

Tonn's Tavern, Va., Sunday, May 8, 1864.

The details of the wonderful three days' battle of the Wilderness, which closed last night just as the blood-red sun went down behind the forests of the Rapidan, have given you some idea of the labyrinth of action through which its course ran, and the maze of tactics out of which it was evolved. But the battle of the Wilderness must remain, for the present, undescribed, for the reason that it is really indescribable. I remember a frequent observation of General Grant's, when he used to call it only "hammering on a large scale." Now, if this is true of the kind of ground on which many of our battles have been fought, the analogy holds still more forcibly in the wild, tangled pine woods in whose thickets and along whose margins the sanguinary Indian fight of Thursday, Friday and Saturday raged.

No man can claim that he saw this battle, and although undoubtedly it had a line and formation of its own, it would puzzle even the Commanding General to lay it down on the map. There is something terrible and yet fascinating in the mystery shrouding this strangest of battles ever fought—a battle which no man could see—and whose progress could only be followed by the ear. It is, beyond a doubt, the first time in the history of war, that the human senses have not been a help to the method and fitly pieces of artillery, and yet placed in such circumstances as to make this vast enginery totally useless. Not a score of pieces were called into play in the whole affair, and I may mention it as a fact strikingly illustrative of this battle, that out of the three thousand wounded in the hospitals of Hancock's command alone, not one of the wounds is a *shell* wound. In like manner our cavalry has been totally useless, *as* cavalry. In all their engagements the men have been compelled to dismount and fight on foot, and the horses, except for occasional use in bringing orders, are a burden, not a help. In such circumstances, in the utter impossibility of manœuvring or effecting any grand combination, the difficulty of generalship is enormously increased. It will also be inferred, from the circumstances in which the battle of the Wilderness was fought, that it was quite impossible for it to be decisive in its results. The combat lasted three days, but it might have been prolonged a fortnight longer and still left the issue undecided. Now that it is ended by the withdrawal of the enemy, though we are hardly justified in calling it a *victory* in the positive sense of the word, yet, if it be considered that the enemy was signally foiled in the purpose with which he sought battle in the Wilderness, that he was compelled to fall back, discomfited, and that we are in vigorous pursuit, under circumstances that give us an advantage in position at Richmond, even the most cautious and sceptical will admit the gross and scope of the action to be a most substantial advantage to our arms.

When Grant, on Wednesday night and Thursday morning, threw his army across the Rapidan at Germanna and Ely's Fords, the enemy's position was turned, and the blow of a twelvemonth brought to naught. The chief consideration that prompted the flanking movement on the enemy's right rather than on his left, was, doubtless, that a strategic movement in force on Fredericksburg would uncover for us fuller communications by Aquia Creek or Urbana—an advantage not to be overlooked, and, indeed, indispensable in any protracted march toward Richmond. The disadvantage in that the line of march southward from the points of crossing lead through a region in which no general would seek to fight a battle. I mean, of course, the "Wilderness," a wild tract of barren country, overspread with a thick growth of stunted pine, extending from Chancellorsville up to Mine Run. By directing our march to the right, Lee had it in his power, using the Orange and Chancellorsville turnpike and the Orange and Chancellorsville plank road, to strike us at right angles. The only escape would be to make our passage of the Rapidan a surprise—a conception which was very happily carried out. The march to the rivers was made during the night of Wednesday, Thursday morning found the whole army planted safely on the south side of the Rapidan, and well in hand. So complete indeed seems to have been the surprise, that even after the whole Army had passed the river, our signal officers reported the Rebels still busy on their works on the Rapidan.

But, of course, it was not long before Lee became fully aware of the situation, and he promptly changed front, and pushed out to strike us by the two roads already named, which, as you will observe, run from west to east, and strike the road on which we must advance (the Germanna and Chancellorsville plank road), precisely at right angles. This was a masterly movement, for it obliged Grant to halt, form line of battle, and dispose his force in such a way as to cover the fords, by which all our supplies were to be had, and which it was absolutely necessary to keep open in order to preserve our line of communication.

This, then, was how it came, strategically, that we were compelled to fight the battle of the Wilderness—an encounter which I am sure both General Grant and General Meade would gladly have avoided, had it been possible to do so. This much credit at least is due to General Lee, whose manœuvre was one of great boldness and rapidity. Whether General Lee intended merely to delay our advance and gain time for the new combinations necessitated by our successful crossing of the Rapidan, or whether he chose this line as one on which to try the gage of a decisive battle, in the hope of defeating us in the same way as he did in the same region (Chancellorsville) at the same period of last year, I am not sure. I look for the solution of determining, although the desperate vigor of the three days' attack would give strong color to the probability of the latter design. And it must be confessed his advantages were great. He crowded us into a restricted triangle, densely wooded, and which he knew perfectly, and he struck us with the whole of our vast trains yet to be brought over the river. On the other hand, the enemy knew the country; with fifty thousand men he could here do as much as we with a hundred thousand, and he had the strong line of Mine Run, six miles in front, to fall back upon in case of repulse. When I say that after three days' fight, in which he with desperate fury threw himself repeatedly against every point of our line—right, left and centre—in the hope of breaking through and rolling us up, he has been compelled to retire discomfited, the sum and substance of the story is told.

Thursday morning found Warren's corps (the Fifth) at Old Wilderness tavern, on the Germanna and Chancellorsville plank road, five miles south of the ford, and Sedgwick's on his rear, on the road leading from the bridge down to the river. Hancock's corps, on the same day, crossed the river at Ely's Ford, five or six miles further down the river, under orders to move to Shady Grove Church. Burnside's corps was to remain behind for twenty-four hours at Culpeper and then follow the main column. The manœuvre of the enemy compelled General Meade to form line of battle north and south, and this was done about a mile west of Germanna plank road and parallel to it, Sedgwick's corps forming the right and resting on the triumpike of the enemy Ford, and Warren's the left. Finding the enemy was determined to make a stand here, the order to Hancock to move to Shady Grove Church was countermanded, and he was directed to diverge by what is called the Brock road, swing round, come up and form the left of the line.

The disposition of our line will have shown that there must be for a considerable time a great interval between our centre (Warren) and our left (Hancock)—an interval which could only be filled by Hancock swinging round and connecting with Warren. The triumph of the enemy would be to interpose the resting possession of the plank road, and planting himself between the two halves of the Army. In this he was completely foiled, for Warren and Sedgwick held the front firmly until Hancock in the afternoon had completed his flank movement without serious loss, especially on the part of Warren, two of whose divisions, namely, those of Wadsworth and Griffin, lost each a third of its numbers.

From Chancellorsville, where Hancock had hirouacked on Thursday night, he advanced to the intersection of Brock road and the Orange and Chancellorsville plank road, where he found Getty's division of the Sixth corps. Forming line of battle he attacked at 4 o'clock, and fought very severely until 8, engaging Hill's corps. The enemy held a position behind the improvised breastworks and was already in line of battle, while Hancock had great difficulty in getting in, as he was marching by the flank to mass, but he steadily held his position at the cross-roads, from which all the efforts of the enemy failed to drive him.

The operations of Thursday were so far successful that they defeated the purpose of the enemy to advance up the Orange road and penetrate between Hancock and Warren. It was, however, only by the utmost skill and vigor that this was effected, for had the Rebels been able to penetrate a mile further they would have achieved their end.

Unwilling to remain on the defensive, General Grant, on Thursday night, ordered a general attack along the whole line for 5 o'clock the next morning. Burnside, who had been hitherto in reserve was ordered in, and Hancock, who, as was realized, had a severe part to perform, was strengthened by four divisions taken from the Fifth and Sixth corps, so that we commanded nearly one-half the Army.

Promptly at the hour the flame of battle burst forth all along the line, which, from Sedgwick's right to Hancock's left, had an extent of about seven miles.

On the right Sedgwick attacked, engaging Ewell, who, however, showed a strong front. The two divisions Warren has left, namely, those of Griffin and Crawford, badly handled yesterday, content themselves with repulsing the Rebel attack. Wadsworth, connecting with Hancock's right, puts forth a desperate valor, leads in person several charges at the head of his division, has two horses shot under him, and is himself shot in the head and left in the hands of the enemy, but whether dead or alive is not yet known. Baldy Smith, somewhat tardy, is only diminishing as yet, and has had no serious business. Hancock, on the left, attacked promptly at 5 o'clock and gallantly drove the enemy about a mile and a half, taking the Rebel line of rifle-pits and five colors. In their turn the Rebels attacked Hancock, and the ammunition of Hancock's men being exhausted, they are forced back to their original line at 11 o'clock. The enemy even turns the extreme left, formed by Frank's brigade of Barlow's division, which broke in considerable confusion down the road. This, however, was promptly repaired, and the enemy prevented from following up his advantage. After this all remained quiet with Hancock until 4 o'clock in the afternoon.

Hitherto Hancock had met only the corps of Hill, but at 4 in the afternoon, Longstreet's corps, which had marched all night, arrived and went into the fight, came on, and Lee prepared to hurl the main weight of his force with a view of doubling up our left flank, and rolling us back on the enemy. The Rebel attack was made at precisely 4½, and was made in four lines, the last on the plank road. It was marked by the greatest vigor, and succeeded in breaking our lines. Part of our breastworks got afire, and a portion of the Third and Fourth divisions broke. Gregg's division was, however, promptly formed in rear of the break. The brigade of Carroll (Gen. Gordon) himself was his distinguished gallantry, and though shot through the arm, would not leave the field), forming by the left; the brigade of Brooke by the right. This was effectual in checking the Rebel advance, and after forty-five minutes of most desperate fighting the crisis had passed. To the coolness and skill of Hancock, and the valor of his command had saved our Army. Failing on the left, the Rebels repeated their usual tactics by a night assault on our right, and they succeeded in rolling up the brigade of General Truman Seymour, who was hurled back on Getty's division, which moved to the other portions of the line, and though some confusion was inseparable from a night assault, the Rebels had gained nothing after all.

The Rebels expended their utmost strength in the battle of Friday, but failed to accomplish any decisive results. It was obvious that they were in very great strength, for they showed a full line along our whole front, extending beyond our right and overlapping our left.

It was, therefore, difficult on Friday night to say whether the enemy would renew the attack or retire. In case of the former alternative, a new and stronger line, considerably contracted, was selected on Friday morning. The attack, however, was not resumed in the morning, and reconnoissances and skirmishes made during the day along the whole line, though developing on the part of the enemy a strong skirmish line, left little doubt that the main portion of his army was retiring.

In this state of facts, Lieutenant-General Grant formed the determination of throwing forward the Army by a night march toward Spottsylvania. Accordingly, a march of 15 miles was made during the night, and this morning finds the whole Army massed at Todd's Tavern. We shall doubtless, to-day, feel forward toward Spottsylvania Court House, where we shall probably find the enemy in position.

Although no reliable returns of our losses in the three days' fight, it is probable they will reach 15,000. The loss of the enemy cannot vary much from the figure, and we have taken 3,000 prisoners.

NEAR SPOTTSYLVANIA COURT-HOUSE, Va., } Monday, May 9—2 P. M. }

I have this morning returned from our advanced line of battle, which lies within two and a half miles of Spottsylvania Court-House, the enemy confronting us in force. Our Army reached this position yesterday morning, Warren's corps having the advance, and heavy fighting took place during the day. It was hoped that we could have reached Spottsylvania before the enemy would be able to make that point; but in the foot-race which the two armies ran on Saturday night from the battle-ground of the Wilderness, Longstreet, it appears, started at 11 P. M. of Saturday; our advance left at 10 P. M. The two columns marched by parallel roads, but Longstreet's

corps had time to arrive and form line of battle, and when our force was thrown out to feel the enemy this morning, he was found in position. Our first attack was made by BARTLETT'S brigade of GRIFFIN'S division, on the right of the road, with ROBINSON'S division on his left. BARTLETT had been ordered by General WARREN to attack in column, under the belief that only Rebel cavalry would be found. Instead of this, however, he ran on the whole of LONGSTREET'S corps, and his brigade, already reduced by the fearful losses of the three days' battles of the Wilderness, was frightfully cut up. One of his regiments, the First Michigan, went in a hundred strong and came out with but twenty-five, having lost three-fourths of its number in fifteen minutes. ROBINSON'S division, which held the left, was also roughly handled, and broke in disorder. Seeing this, General WARREN seized the division flag and rallied the men in person. Fresh troops were thrown in, and after fighting from 8 A. M. till 12 M., our troops had gained the object sought—an open space up to the woods in which the Rebel line was formed. In this engagement General ROBINSON was severely wounded in the leg, and will have to lose his limb.

At 6 P. M., two fresh divisions, namely, those of CRAWFORD (Fifth corps), and GETTY (Sixth corps), were thrown in, and after a severe engagement, lasting for an hour and a half, CRAWFORD carried the Rebel position, but the other line of breastworks and outposts on the hundred princes. This ended the action of yesterday. For the numbers engaged, our losses were extremely severe, and will count up to 1,500.

This morning found our line established two and a half miles the side of Spottsylvania Court-House, and securely entrenched. LONGSTREET has also been strengthened by the arrival of EWELL'S corps. The Rebel line lies on a ridge a mile in front of the Court-House, and it will be a position somewhat difficult to carry, should it be decided to make a direct attack.

It will be observed on the map that our present position carries us many miles south and in the rear of Fredericksburgh, whose famous fortified heights are in our possession, without the need of firing a shot. It will be used as a depôt and for sick, and several thousand wounded men who were yesterday sent there. A small army of 2,500 greybacks have also just been marched by headquarters *en route* to the same point. They are generally hearty-looking fellows, and rather better clad and shod than I have before seen them.

The Army of the Potomac is in superb condition and spirits—in fact, was never before in any such condition. We are going on to Richmond, depend upon it; at least, come more formidable obstacle than has yet appeared will have to present itself to the Army of the Potomac, as the Rebel papers of yesterday, is between Petersburgh and Richmond; SHELL and AVERILL are in the right place, and you will presently hear from the cavalry corps of this army, under the bold and energetic leadership of SHERIDAN, in a way that will prove serious enough to the enemy.

The headquarters of the Lieutenant-General and General MEADE, are always established near each other, and in action the two Generals and their staffs are always together. General MEADE retains the immediate command of this Army, while General GRANT exercises a general supervision upon the movements over the whole field. In regard to the operations of this Army, the two Generals are in constant consultation, and it would, I think, be hard to say how much GRANT'S own practical share in the actual command is. Perhaps I shall be able to say more hereafter of the strategic moves and combinations, while General MEADE takes charge of their tactical execution.

THE VIRGINIA CAMPAIGN.

OFFICIAL DISPATCHES.

SECRETARY STANTON TO MAJOR-GENERAL DIX.

WASHINGTON, May 8—9 A. M.

To General JOHN A. DIX, NEW YORK:—

We have good news from the front; but the Medical Director has notified the Surgeon-General that our wounded were being sent to Washington and will arrive from six to eight thousand.

The Chief Quartermaster of the Army of the Potomac has made requisition for seven days' grain, and for railroad construction trains, as a token that the struggle is regarded as serious. The following General Grant's universal, and adopts an inference of material success on our part:

The enemy's strength has always been most felt in his first blows, and he attacks furiously, and our forces are not only having sustained their ground, but preparing to advance, lead to the hope of full and complete success. For when either army fails in the first campaign by struggling and desertion continues, and the enemy's loss in killed and wounded must be small in proportion to the number engaged. Marching under fire on last night's despatch has been received from General Grant, dated

HEADQUARTERS, MAY 8—10 P. M.

yesterday, states that General Thomas had occupied Tunnel Hill, thrown the enemy back, and that he was in front of Dalton, posted at Rutzard Roost Pass, North of Dalton. Skirmishing had taken place, but no report.

Nothing later from General Banks.

You may give such publicity to the information transmitted to you as you deem proper.

It is designed to give accurate official statements of what is known to the Department in the great crisis, and to withhold nothing from the public.

EDWIN M. STANTON, Secretary of War.

SECRETARY STANTON'S SECOND DISPATCH.

WASHINGTON, May 8—5 P. M.

Major-General JOHN A. DIX, NEW YORK:—

We are yet without any official dispatches from the Army of the Potomac, except those referred to this morning from the Medical Director and Chief Quartermaster, and nothing additional has been received by the Department from any other source. It is believed that no fighting took place yesterday.

A part of the wounded arrived in Washington this morning at Baltimore Station, and are on the way in by railroad. The Department will probably receive dispatches by that train, which will arrive to-night.

A dispatch from General Butler, just received, and which left his yesterday, states that a demonstration had been made by his forces on the railroad between Petersburgh and Richmond, which was repulsed in destroying a portion of it so as to break the connection; that there had been some skirmishing, but that all had succeeded. He heard from a rebel deserter that Hunter was Cangereously wounded, Fetchin, and Johnson are killed.

Nothing further has been heard from General Sherman.

EDWIN M. STANTON, Secretary of War.

THIRD DISPATCH.

WASHINGTON, May 9—10.45 A. M.

Major-General DIX:—

We have intelligence this morning by means direct from the Army as late as Saturday evening, but no official reports. The general result is the same as heretofore given. The fighting on Friday was the most desperate known in modern times. I despy regret to say that Major-General JAMES S. WADSWORTH was killed. This accomplished soldier, Brigadier General Wadsworth, who was struck in the forehead by a ball, fell into the hands of the enemy, while leading them against one of the enemy's strongest positions. His remains are in our hands. Brigadier-General Edward Harland, Webb was wounded. General Jones of the Rebel army was killed. The conflicts on Friday were unusually severe. In most admirable. Their cool, deconsidered courage for every instance proved too much for the desperate efforts of the enemy. We have been always at all points. There has been no struggling. As the latest accounts thereof was yesterday morning commencing to move to Spottsylvania Court-House, and yesterday heavy cannonading was heard at Alpin Creek from that direction [probably Shaler. We have not heard from Sheridan. One regiment, the 5th Pennsylvania Reserves, charged through an abatis of trees, and the rebels unable to get back, and most of them were captured. We have also taken a large number of prisoners, supposed to be about 4,000.

The wounded had not yet arrived at the point where the telegraph was communicated. Medical Director reports that a large proportion were slightly wounded. Artillery was not used on either side the first two days.

I am happy to say that I am relieved from the duties of duty last dispatch. General Sherman was heard from last night. He had been all day reconnoitering the enemy's position, and would attack to-day.

EDWIN M. STANTON.

FOURTH DISPATCH.

WASHINGTON, Monday, May 9—11.30 A. M.

To Major-General DIX:—

This Department has just received from General Butler the official report of General Kautz's cavalry expedition of Friday. He says their loss is killed is not large, but they have many wounded. He grieves to announce that Colonel LOUDON LADDLEY, of Kentucky, General Jenkins killed, and General Pegram badly wounded on Friday. Colonel Ladley was a gallant officer, beloved by his men. He thinks a merciful God that every advance on their General

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give an early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to matters of fact.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States Funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in correspondence addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 102 BROADWAY, CORNER OF JOHN STREET.

OUT SUBSCRIBERS who change their residences at this season, are requested to give notice of the fact at our office, No. 39 PARK ROW, in order that the addresses of their paper may be altered accordingly.

The editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 39 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, MAY 14, 1864.

THE GRAND CAMPAIGN.

SEVEN days' terrific fighting is the record of the Army of the Potomac for the first week of the summer campaign against Richmond. Seven days unparalleled in the history of the war, and which find but a partial field for comparison even in the memorable seven days' struggle along the Peninsula. There has been little attempt to vie victories by strategy, and the contested ground itself has set narrow limits even to tactical manœuvres. The aim of the Lieutenant-General has been to bring the enemy to bay on a fair field, and to pit Northern against Southern soldiers on equal terms. The result has been a series of determined and bloody encounters, such as even the Potomac Army has not hitherto experienced. We hasten to bear our tribute to their admirable valor and gallantry. They found no protection of artillery, and little of cavalry. There was not often the shock of serried lines, but the stern meeting of man and man in the dense jungles of that wild Virginia region so emphatically called The Wilderness. The long lists of mortality are the simple but irresistible attestation of the fury of their onset and the tenacity of their defence. A narrow strip of ground, fought over many times by the swaying lines, shows the valor of the combatants. Officers and men have fallen side by side on the bloody fields. For with the Nation be unmindful of their heroic memories.

Reviewing the field as it lies, we find that the enemy has been pressed slowly, but surely, back from his Rapidan entrenchments to his line of defence along the North Anna. So far there has been achieved substantial success. Again, the enemy has been foiled in his hope of crushing our forces at the outset. The great battle of the Wilderness was no essential part of General GRANT's plan. He did not avoid, but he did not seek it. His plan was to flank the enemy, with or without the battle. To such a statement confirmation is added by the speech of the PRESIDENT, who announced that General GRANT had not been jostled from his original design. The advance was substantially analogous to that of General HOOKER. The battle-ground was the same. The tactics of the enemy the same. But the results were diverse. And on familiar ground, while our Army had yet failed to get into thorough manœuvring position, the enemy fought three days, and then hastily withdrew. Here then also is success.

But the campaign is still undecided. The battle is not yet done. The enemy is still strong, brave, and unyielding. Bitter and bloody work must go on yet; and in the presence of such events, it would be idle to prognosticate the hour or the day of final triumph. Taking courage from the heroism of the troops and the cool determination of their commander, let us also be prepared for momentary reverses.

Our chief ground of faith in the campaign is the conviction that the Rebel army cannot long endure the shocks to which it has been subjected. Obstinate as appears its present front, any day, any hour, may bring news of its sudden break and retreat. When once the conviction of disaster steals into its ranks, and the *morale* of the Rebel army is gone, its disintegration will be as astonishing as its present coherence. Its power of resisting concussion has already been put to the severest test, and that simple, yet admirable policy of pressing its retreating legions with rapid, incessant and merciless shocks, can hardly fail to weaken it beyond endurance. When the crash does come, be it a day, or a month hence, the effect will be astounding.

If other reason be needed for our hope, it may be found in the gradual converging of new forces against the doomed Capital. Reinforcement we need. But reinforcements have already gone forward. And above all, the column of STOEL is an army of reinforcement, and cannot long fail to press down upon the beleaguered enemy.

We desire to tone pardonable exultation down to the more fitting pitch of determination, and in triumph or reverse to be prepared for either. We are aware of the thousand contingencies which may arrest victory away in the moment of fruition. We are mindful also of the sad experience of the Army of the Potomac in former days. But we cannot conceal our belief that brighter auspices surround the gallant Army, than those of its Peninsular history; and that it is destined to speedy triumph, we cannot entertain a doubt. Let no labor be relaxed till the campaign be brought to happy consummation. So far, all is well.

THE PLAN OF THE ADVANCE.

LIEUTENANT-GENERAL GRANT's plan for his advance into Virginia, appears to have been to follow a line of operations nearly corresponding to the direct route from Fredericksburgh to Richmond, making his base at Aquia Creek, instead of upon the railroad from Alexandria to Culpepper. To place the Army upon this route he passed around the right of the Rebel position, and was prepared either to accept battle from LEE near the Rapidan, or pursuing his march to occupy Spottsylvania Court-House and the adjacent country. The latter, if accomplished, would have secured for our forces great advantages, the country being much more favorable for operations than that in the vicinity of the Rapidan, which is thickly wooded; and we should also have been near the Rebel line of railroad communication, with the chance of interrupting it. General LEE, however, would not thus permit himself to be outflanked, and having great advantages in his knowledge of the country, was able to move so as to present his full front instead of his flank to us. In doing this he was compelled to fall back and assume a new position.

This statement will explain the complicated struggles of last week, which, although apparently resulting in the main advantageously to our forces, were so long indecisive. The Army started on Wednesday from its position near Culpepper, and according to the left, crossed at the lower Fords of the Rapidan. On Thursday the cavalry and advance came into collision with the enemy, who had moved from their position to meet us. On Friday the two armies met in full force amidst the dense forests of the Wilderness, and a bloody struggle occurred. LEE failed to check our advance, and therefore retired to Spottsylvania Court-House, in order to assume a new and advantageous position. On Saturday, Sunday and Monday, various engagements occurred, but the time was principally occupied by our Army in ascertaining the position of the enemy, and in making arrangements to drive him from it. It was also necessary to employ this interval in disposing of the wounded and procuring supplies. The great encounter took place on Tuesday, and from the reports we receive at the time of writing, there is reason to judge from them that we obtained decided successes, and forced the Rebels to retire still further towards Richmond. Should this prove to be the case, the Rebel government must soon decide upon the alternative of making a desperate and decisive struggle in front of their capital, or of abandoning it for the purpose of concentrating their armies at a point further in the interior of the Confederacy. It is altogether probable that they will adopt the first, for they must feel assured that if Richmond is lost, the Rebellion is virtually ended.

The operations of General BUTLER assume great importance in this connection. If he is able to interrupt permanently the direct communication between Richmond and the South, it will cause much distress in the capital, but will not be decisive, as there are available indirect communications by way of Lynchburgh. General BUTLER does not appear to have been able to penetrate to Petersburgh, which is the key to an attack upon Richmond from the South. Should he, however, succeed to the capital, directly pursued by GRANT, we shall acquire advantages with every mile of progress, for the short railroad communication by way of Aquia Creek and Fredericksburgh will be left in our complete control, the Peninsula route will be opened and communication will be established with General BUTLER.

With the imperfect details in our possession it is impossible to speculate upon future movements with any considerable degree of reliability; but it seems to be quite certain that General GRANT will occupy the Fredericksburgh line, getting up his supplies as rapidly as possible, and constantly pushing LEE to prevent the latter from sending off a large detachment to attack General BUTLER. Unless, therefore, the stubborn determination of the Rebels should give way before the severe punishment they are receiving, we must anticipate a continuance of bloody conflicts, in which our sacrifices will be immense, although no immediate adequate results be accomplished. For the whole experience of the war has shown that to meet either of the two armies is hardly possible. In a country like Virginia even a defeated army can retain its organization and continue fighting. It may be that the final result will be determined simply by the comparative ability of the combatants for prolonged endurance. We trust, therefore, that complete arrangements have been made for constantly supplying our Army with reinforcements of men and material.

MAJOR-GENERAL JOHN SEDGWICK.

THE Army of the Potomac has lost one of its best soldiers in the death of Major-General JOHN SEDGWICK, killed by the bullet of a sharpshooter on Monday, near Spottsylvania Court-House. While standing with two members of his staff in some entrenchments, directing the placing of some pieces of artillery, he was struck by a bullet in the head—a ball evidently near the left eye, which must have cut near the right ear, killing him, of course, instantly. We fear that the life of this noble commander has been sacrificed, like that of too many others occupying high positions, through an excess of courage; for the mode of his death would seem to indicate that he was on the advanced line of his troops, and, judging from his previous conduct in this respect, we infer that this was the case.

General SEDGWICK was one of the oldest soldiers in the Army; and long experience in warfare—on the plains, in Mexico, and during the many battles of the Army of the Potomac—had rendered him perfectly indifferent to danger. He always accompanied his advanced troops into a battle, scrutinising himself the movements of the enemy. Officers associated with him relate many curious anecdotes of his apparent partiality for establishing his headquarters in the most exposed situations. His conduct in this respect was probably prompted, not only by long familiarity with danger, but also by the high instincts of a noble and conscientious nature, leading him to share all the dangers of his troops, and to encourage them by his example. For this, every soldier in his command loved him, and all were ready to follow "Uncle "JOHN" in any enterprise, no matter what the perils to be encountered.

In personal character General SEDGWICK was plain, honest, genial, affectionate, and thoroughly reliable. He had no ostentation, no vanity, and was quiet and unpretending in demeanor. In private intercourse all esteemed and loved him as a friend. His nature was as simple and as ingenuous as that of a child. But as a commander he was strict in enforcing military duties, understood perfectly well all the minutiæ of his profession, and without making any appeals to his men, created enthusiasm in them by the influence of his character. As a consequence, his command was always in the most perfect condition. The Sixth Army Corps which he has commanded for over a year, had a prominent reputation for its completeness in all details of effectiveness. Under his leadership it has

performed services which entitle it to the highest honor. At the time of the disastrous battle of Chancellorsville, under General HOOKER, one year ago, General SEDGWICK was left with his corps at Fredericksburgh, and, receiving orders from General HOOKER to join him by piercing the enemy's rear, General SEDGWICK captured the famous heights in the rear of Fredericksburgh by a succession of brilliant charges; continuing his march he met a force of at least double his numbers, and held his ground against them for an entire day. The result of the action at Chancellorsville made these efforts unavailing, and General SEDGWICK brought his corps safely across the Rappahannock, though its capture was imminent.

When the Army was marching to meet the Rebels in Pennsylvania last June, General SEDGWICK was on the extreme right of the line, and held a place thirty miles distant from Gettysburgh, when he received the order to march thither. He made a forced march by night, and arrived at Gettysburgh in time to retrieve the disasters of the second day's fight. The march was one of the most rapid in the history of the war, and one of the most important in its results. Another brilliant achievement was effected during the movement across the Rappahannock last fall, when General SEDGWICK stormed and carried an entrenched position on the bank of that river, capturing about fifteen hundred prisoners. In addition to these individual achievements, General SEDGWICK and his corps have participated in all the operations of the Army of the Potomac during the last year.

General SEDGWICK was about fifty years of age, was born in Connecticut, and was graduated at West Point in 1833. On the 1st of July, 1837, he was breveted second lieutenant of the Second artillery, and received his full commission on the same day. On the 19th of April, 1839, he was promoted to a first lieutenancy. He served in Mexico, and was breveted captain for gallant and meritorious conduct in the battles of Contreras and Cherubusco, with rank from August 20, 1847. He received another brevet, major, for gallant and meritorious conduct in the battle of Chapultepec, dating from September 13, 1847. He commanded his company and became distinguished in the attack upon San Cosmo gate, Mexico City. On the 25th of August, 1853, he was made a full captain of artillery. On the 8th of March, 1855, he was appointed major of the First United States cavalry (a newly-organized regiment), and served in Kansas, commanding at Fort Riley during 1858 and 1859, and at Fort Wise in 1860. He held this position at the breaking out of the present Rebellion. On the 16th of March, 1861, he was commissioned as lieutenant-colonel of the Second United States cavalry, and on the 25th of April, 1861, was promoted to the colonelcy of the Fourth United States cavalry. He was commissioned a brigadier-general of volunteers on August 31, 1861, and was placed in charge of a brigade of the Army of the Potomac. He was afterwards assigned to the command of the Third division of the Second Army corps, then under the late General SUMNER, and with that command moved upon Manassas. Under that commander he participated in the siege of Yorktown and in the pursuit of the Rebels up the Peninsula of Virginia. At the battle of Fair Oaks, on the 1st of June, 1862, he particularly distinguished himself, and was nominated for and obtained the brevet of a Brigadier-General of the United States Army from May 31, 1862. He participated in the seven days' contest, and was particularly noted at the battles of Savage Station and Glendale. He also took part in the contest before Washington under General POPE. At the battle of Antietam he commanded a division in SUMNER's wing of MCCLELLAN'S Army, and was wounded twice during the engagement. On this occasion he remained two hours on the field after he was wounded, and had then to be carried away. On the 23d of December, 1862, he was nominated by the PRESIDENT a major-general of volunteers, with a rank dating from July 4, 1862, and was subsequently renominated and confirmed in March, 1863, his rank to date from May 31, 1862. In January, 1863, he was placed in command of the Ninth Army corps, and on the 5th of February, 1863, was transferred to the command of the Sixth Army corps.

Being the senior officer of the Army of the Potomac, he has usually commanded a wing during all operations, and in General MEADE'S absence commanded the entire Army. It has been frequently stated that very important military positions had been offered to him, and that they had been refused. This is probably true, as his high abilities were universally appreciated, and his freedom from ambition would lead him to avoid all peculiar prominence. During the present war his corps has lost no officer whose death created a greater vacancy—none who will be more regretted as a man and as a commander, than JOHN SEDGWICK.

APPARENTLY the contest now raging with such extraordinary violence in the East and the West, is to be determined by the numerical superiority of one side or the other. Between the two parties engaged in this war, the strength of the battalions will exercise an influence greater than between any other combatants in the world, for otherwise they have so many points of resemblance and equality—both being such courageous and tenacious fighters, and both commanded with such skill, that decided success can scarcely result from any very great superiority in strategy, or fighting abilities. Have we reserve armies ready formed to reinforce the shattered columns now fighting the greatest battles of history? This is the momentous question of the times. There should be now at least 100,000 men organized at different accessible points, who can be thrown with rapidity upon any part of the vast field where they are required. We trust that thousands of soldiers hitherto scattered through the country, have by the new policy of concentration been called in and made available for active service. Besides these, every possible effort should be made now to enlist men, and to *keep* our forces constantly up to their complement. The time may come when 10,000 fresh men reaching Grant before Richmond, will decide the fate of the Rebellion. The campaign so auspiciously begun should not fail through the want of a few brigades.

THERE are very many of the mental and military characteristics of Lieut.-General GRANT to be discovered in his reports of his actions, and especially in the report of his last battle at Chattanooga. It appears, among other things, that he would not be inclined to give up a field or a purpose on small provocation, but would be apt to contest it with the enemy till it was either decidedly won or decidedly lost. The significance of such sentences as these is apparent.

He sent an order from Chattanooga to General BURNSIDE at KNOXVILLE, saying:

"Should Longstreet move his whole force across the Little Tennessee, an effort should be made to cut his pontoons so that *steam can if overplied half the cavalry of the Ohio army.*"

Further on he addressed the same officer:

"I can hardly conceive the necessity of retreating from East Tennessee. If I did at all, *it would be after losing most of the army.*"

On the 19th of October last, after assuming command of the Military Division of the Mississippi, he telegraphed from Louisville to Major-General THOMAS whose army was in great straits at Chattanooga:

"Hold Chattanooga *at all hazards.*"

THE following dispatches have been addressed by the Secretary of War to Mrs. General GRANT, who is now in New York:

WASHINGTON, 2d P. M., May 9, 1864.

To Mrs. Lieutenant-General GRANT:

I rejoice to inform you that the latest advices from the front lead to the belief that General GRANT has achieved a complete victory. It is premature to announce a decided result, but our hopes are confident. The General was well when an officer just in left the Headquarters on Saturday evening, which is our latest.

EDWIN M. STANTON,
Secretary of War.

WASHINGTON, May 9th, 1864.

To Mrs. Lieutenant-General GRANT:

Since my last telegram to you this Department have received dispatches direct from General GRANT, dated yesterday, at 11 A. M. He was quite well. He says the result of three days' fight at Old Wilderness was decidedly in our favor; he is now pursuing the Rebels to Richmond. I congratulate you upon his great achievement.

EDWIN M. STANTON,
Secretary of War.

THE following officers have been mustered out of service: Colonel and Brevet Brigadier-General E. D. Keyes, U.S.A., mustered out as Major-General of volunteers. Major Wm. H. French, U. S. Artillery, mustered out as Major-General of volunteers; Brigadier-General W. A. Gorman, U. S. Vols.; Lieutenant-Colonel Augustus Schriver, Additional Aide-de-Camp.

THE LATEST AND THE BEST.

We stop our press to insert the following important despatch:

WASHINGTON, May 13—5:20, A. M.

Major-General Dix:

Official dispatches are just received by this department, dated yesterday, 8 A. M., at the battle-field near Spottsylvania Court House. They state that during the night General Hancock marched from his previous position on our right, and occupied the ground between Generals Wright and Burnside, at daylight he attacked with his accustomed impetuosity, forcing the first and then the second line of the enemy's works, capturing the whole of Edward Johnson's division, and part of Early's, together with Major-General Johnson, General Stewart, and from thirty to forty cannon.

The number of prisoners is not given, but are to be counted by thousands.

General Burnside, on the extreme left, opened at the same time with General Hancock, and advanced with comparatively little opposition. His right has formed a junction with General Hancock, and his left is not actively engaged

General Wright's troops attacked at 7½ o'clock, and are now at work.

General Warren is demonstrating to hold the enemy in front of his lines.

The rebel works at that point are exceedingly strong.

A dispatch has been received from General Butler, dated "In the field, near Chester station, Virginia, May 12—3:30 P. M."

It states that he is now pressing the enemy near Fort Darling, and has before him all the troops from North and South Carolina that have got up.

Beauregard's courier was captured this morning, going to General Hope in command of Drury's Bluff; he had dispatches stating that Beauregard would join them as soon as the troops came up.

General Gillmore holds the intrenchments, while Smith demonstrates upon Drury and the enemy's lines.

General Butler is well in the cavalry, has sent to cut the Danville Railroad, near Appomattox Station, and can, perhaps, advance on the James river.

We have had no telegraphic communication with General Sherman since Wednesday.

EDWARD M. STANTON,
Secretary of War.

We have sad confirmatory news of the loss of Brigadier Generals STEVENSON and HAZE, officers whose admirable gallantry and skill demand for us in a future number more than this passing notice.

MAJOR-General Butler writes to Major-General Peck that "Your (Peck's) being relieved from Newbern by me in no manner implies any censure upon your action, or disapproval of your administration, and was determined upon many days before the order was actually sent, and before it was known or believed that there would be any demonstration upon your command by the enemy. That order was delayed by the necessities of the service in other movements of the department which are solely subjects of explanation."

BRIGADIER-General Stannard has been relieved from his command in New York and has gone to Fortress Monroe under orders from the War Department. Brigadier-General De Trobriand is assigned in General Stannard's place over the troops in New York city and harbor.

BRIGADIER-General Kilpatrick is assigned to the command of the cavalry of the Army of the Cumberland. Brigadier-General SHERIDAN commands the cavalry corps which has been recruiting in Kentucky, and is now on the move.

BRIGADIER-General DEVENS, who has concluded a tour of military inspection of the defences of New England, has received orders to report at Fortress Monroe for duty under Major-General Smith.

A DISPATCH dated on the third says: As far as known, the enemy are making no movements in this direction. Everything is perfectly quiet inside our lines, and the weather is clear and pleasant. Kilpatrick left a note at Tunnel Hill yesterday for General Wheeler, saying:—

I came out to meet you on Friday with five hundred men, while you outlaid; to-day I come with one thousand; next time I will come with my whole command and annihilate you and your minions. Your classmate,

J. H. KILPATRICK, Brigadier-General, U. S. A.

REBEL REPORTS AND COMMENTS.

THE BATTLE OF THE WILDERNESS.

ORANGE COURT HOUSE, May 2, 1864.

Scouts report that the enemy have struck their tents in Culpepper, and that the Yankee army is moving. There are no demonstrations as yet on our front. It is reported that the enemy is moving by both flanks.

A heavy wind storm passed over this place this evening, upsetting a train of cars in its course, and wounding the mail agent.

FREDERICKSBURG, May 3, 1864.

BURNSIDE'S whole corps, excepting the negro brigade, has passed to the front, crossing the river at Rappahannock Station yesterday. The negro brigade of his command has been placed on guard over the Orange & Alexandria Railroad from Manassas Junction to Alexandria, relieving the two regiments who have heretofore performed that duty. These white troops will now be sent to the front. The Yankees are swiftly perfecting the preliminaries of battle, and the struggle cannot be deferred many days.

Their cavalry made reconnoissances to Falmouth last night and the night preceding, and their videttes on the Stafford hills were distant spectators of the tournament which came off here on yesterday.

A review of Major-General FITZ LEE's division of cavalry is announced to take place at Mansfield to-morrow.

[From the Richmond Whig, May 4.]

THE War Department was in receipt of no information from the Rapidan last night beyond that contained in the Associated Press telegram in the telegraphic column.

The only additional news from the Peninsula is that the number of the enemy landed at West Point up to yesterday was four thousand. They were landing on both sides of the river and had thrown out pickets as far down the road as Gloucester Point. Several vessels came up to West Point Monday night.

It was rumored last night that a skirmish had occurred at James City; but the report needs confirmation.

A Yankee scouting party, about twenty in number, appeared near Falmouth on Monday.

[From the Richmond Examiner, May 4.]

A dispatch from Orange Court House reports GRANT's army to have set forth and to have commenced moving. The special dispatch of our associated press announces conclusively that the authorities at Washington have been pushing Grant to move by the middle of this week, and this whole movement is probably made more in obedience to orders from headquarters than in any hope he may have of the capture of Richmond.

The War Department was last night without any intelligence from our army; yet private advices, from trustworthy sources, say that our men were in the best spirits and condition, or better prepared for the struggle. Hickes and his regiment, the gallant remnant of to-day's sun—we may hear that the great battle has begun; and when we recollect that it is LEE's army of veterans—men who have been tried on a dozen fields—we can have no doubts of the result.

There was no news last night, either from North Carolina or the West.

HEADQUARTERS ARMY NORTHERN VIRGINIA, May 6, 1864.

Hon. Secretary of War:

The enemy crossed the Rapidan at Ely's and Germanna Fords. Two corps of this army moved to oppose him—EWELL's by the old turnpike, and HILL's by the plank-road. They arrived this morning in close proximity to the enemy's line of march. A strong attack was made upon EWELL, who repulsed it, capturing many prisoners and four pieces of artillery.

The enemy subsequently concentrated upon General HILL, who, with his own and EWELL's divisions, successfully resisted the repeated and desperate assaults. A large force of cavalry and artillery on our right were driven back by ROSSER's brigade. At nightfall the enemy had assumed a position against every effort until night, when the combat closed. We have to mourn the loss of many brave officers and men.

Gallant Brigadier-General J. M. JONES was killed, and General STARKE severely wounded, mortally wounded, while his command with conspicuous valor.

R. E. LEE.

ORANGE COURT HOUSE, Friday, May 6.

The enemy renewed the attack this morning with great violence, advancing in four main lines and yet heavier on and Richmond. Every attack of the enemy was repulsed. We have driven him some distance on the left, but he is very stubborn on the right. He is now moving on.

Lieutenant-General LONGSTREET had turned the enemy's left, and was driving him back, when he was severely wounded. He was shot by MAHONE'S *brigade through mistake*. General LONGSTREET is doing well. He and his command are safe. Major-General WADSWORTH, of the Yankee army, was killed. The battle was fought in the Wilderness, and will probably be designated as " the battle of the Wilderness." Brigadier-General SEYMOUR was also severely wounded.

ORANGE COURT-HOUSE, Friday, May 6.

A considerable engagement occurred yesterday about twenty miles below here, near PARKER's store, in Spottsylvania County, on the plank road, between part of EWELL's corps and the fifth corps of the Yankees, including SYKES' Regulars. The engagement lasted from twelve o'clock until night. Our troops repulsed the enemy most handsomely, capturing nine hundred and eighty-one privates and forty-one commissioned officers, who have arrived here.

General J. M. JONES and Colonel WARREN, of the Tenth Virginia, were killed, General STARFORD was mortally wounded.

Second Dispatch.

The following additional particulars of the fight yesterday, have reached this place:

Generals HEATH and WILCOX were in the fight yesterday; they attacked and drove them three corps and two divisions of the enemy. LEE's North Carolina brigade last night were engaged and captured three pieces.

General PEGRAM was painfully wounded in the knee.

From 3 o'clock until night there was very heavy musketry fighting, with but little artillery engaged. COOKE's brigade fought well and lost heavily. THOMAS' and MCGOWAN's brigades also suffered considerably. ROSSER fought WILSON's and GREGG's Yankee cavalry with a single brigade, driving them back at all points.

Third Dispatch.

The attack by the enemy, this morning, was very violent They were repulsed in every instance. A strong effort was made to turn our right. We drove them on our left, but they were stubborn on our right, until LONGSTREET finally forced them back.

General LONGSTREET received a severe wound in the shoulder. General PAUL JENNINGS was mortally wounded. The fighting was predominantly with musketry, mostly with musketry. It is believed that we are driving them. General RENNING was slightly wounded in the arm. Three hundred more prisoners have been taken, and more are on the way. The Richmond Ambulance Committee arrived here this morning.

ON THE SOUTH SIDE OF RICHMOND.

[From the Richmond Dispatch, May 7.]

The movements of the enemy on the South side, under General BUTLER, are pretty well known to the public by this time, with the exception of a general intention to flank Drewry's Bluff. A gentleman who left City Point Thursday night about 12 o'clock reports that the steamer, about 4 o'clock, the enemy landed a force of some 2,000 at City Point, capturing our picket guard of thirty men, under command of Lieutenant DAGGS. Our picket force was also captured, but the men made their escape. The main bulk of the enemy's force passed up the Appomattox River, about three miles higher up James River, in Chesterfield county, where they landed a force variously estimated at from ten to fifteen thousand men. The force at Bermuda Hundred and others could be seen in the distance, coming up James River. This large flotilla was convoyed by three iron-clads (Monitors) and four wooden gunboats.

Bermuda Hundred is near the mouth of the Appomattox River, on the north bank, and but ten miles from Drewry's Bluff. It is also within five or six miles march of the Richmond and Petersburgh Railroad.

The preparations to receive and honor for the expedition have been very extensive. Three hospital steamships—the *State of Maine, Connecticut,* and *New World*—all accompany it, and all the hospitals of City Point have been cleared out to receive the wounded.

So the chief of the iron-clads which accompany the transports to the James, an entirely new vessel, just finished in New York, which arrived at Fortress Monroe last week. It is supposed that the Government has her all the defects of the Ericsson Monitors are avoided, her being built on a heavier and stronger plan, her ventilation better, and her deck but fifteen inches above the water. Her guns throw fifteen-inch shot and rifled shell.

It was rumored on the streets yesterday that the Yankees had taken the Richmond and Petersburgh Railroad at Port Walthall Junction; but this report is not confirmed, and last night our troops were still in possession of the post.

The following dispatch was received here last night:

PETERSBURGH, May 6, 1864.

Our forces were skirmishing with the enemy's forces near Port Walthall Junction at 9 o'clock this evening.

GEORGE E. PICKETT,
Major-General Commanding.

We learn, in addition to this, that later intelligence announces that the enemy had been driven back.

Last night information was received here that thirty-five of the enemy's gunboats and transports had passed Harrison's Landing, and seventy were in sight, making one hundred and five in all.

Six of the squadron came up, and one of them, the leading one, was fired into by our batteries. The other five then landed their troops at Curtis's Neck.

At last accounts there were several gunboats in sight off Grigsby's Farm, two and a half miles from Chaffin's Bluff.

From a dispatch received at the Navy Department from Lieutenant HUNTER DAVIDSON, in charge of submarine defences, we learn that a Yankee gunboat ran foul of one of the torpedo stockades in the James River yesterday morning and was blown to atoms. It was probably a picket boat "left as big as a row-boat."

The explosion occurred at Deep Bottom, near Aiken's Landing, about twelve miles below the city, and not a soul on board escaped the disaster.

MOVEMENTS OF THE ENEMY IN THE PENINSULA.

The Yankee force which has been at West Point for a week broke up their camp on Thursday, and when last heard from were marching in the direction of Old Church, in Hanover county. They number about 20,000 thousand. It is said that General BUTLER is with this force, though from other sources we hear that he is with BALDY SMITH on the other side of the river.

They have advanced up to the bridge which crosses the Chickahominy River.

OPERATIONS IN NORTHERN GEORGIA.

DALTON, May 5, 1864.

Contrary to all expectations, the enemy have advanced but little to-day. The division of HOOKER's corps is at Lee & Gordon's Mills. PALMER's corps and one division are in front of Tunnel Hill, occupying our old picket station.

HOWARD's corps and two divisions of THOMAS' army's Station and Red Clay, are all busily engaged cutting roads, causeways, and building bridges. Their advance will be necessarily very slow. Numerous deserters have come into our lines to-day and given themselves up, saying that time expires from the 5th to the 12th, and none of them will fight for the approaching engagements.

DALTON, May 6, 1864.

The enemy have been at a standstill to-day. They are repairing both railroads as they advance, and have a train of pickets which renders it impossible to learn what is going on inside. The enemy's advance guard were driven from Tunnel Hill at 2 o'clock. General JOHNSTON has issued an order granting pardon to all persons under arrest, except those accused of plundering and pillaging.

[From the Richmond Whig, April 30.]

THE DUTY OF THE PEOPLE AT RICHMOND.

That a great struggle is about to take place for the possession of Richmond is conceded on all hands. The enemy is marshalling his columns on the Rappahannock and the Peninsula, and that a last desperate effort will be made to overrun Virginia and occupy her ancient capital in shall not be the enemy himself. What, then, becomes the duty of the people of Richmond in view of the mighty conflict at hand? It is exactly the same as that of the commander of a man-of-war who sails out of port to engage the foes of his flag in mortal combat. The decks are cleared for action, non-combatants are sent to the rear or ashore, the supply of ammunition and food is looked to, and a short prayer uttered that Heaven will favor the right and protect the land of the free and brave for whom the battle is waged.

Such is now the duty of the people of Richmond. Every preparation should be made for the struggle that is coming, and every obstacle removed which can hinder or embarrass the movements of our troops. If there is a man, or woman, or child, in the city who cannot aid in the combat here, and who can find temporary refuge elsewhere, they should immediately depart, so as to relieve the decks and diminish the consumption of food. The trains employed in bringing supplies for their subsistence might then be used in transporting troops; and every man or combatant thus withdrawn a soldier might be substituted and supported. The food now consumed by persons who are not fighting or assisting those who are, and transported railways, would be available for armed men able and ready to defend the city against the assaults of the invader. Armies, like men, are confused and embarrassed by spectators; women and children crying to them for assistance and running to their relief.

We sincerely hope and pray that the red waves of battle may not, as in 1862, roll and break and hiss against the streets of Richmond; but if they do, our citizens who are little people may never again be saluted by the reports of Yankee guns. But our hopes may be disappointed; the enemy may come again, as he has come before, and for aught we know, the battle may be fought on these hills and in these streets. It is in view to this possible contingency that we would urge upon our people to make all needful preparation for whatever fate betides them, and so conduct as to avoid all unnecessary and unreasonable alarm. Be clear cool and an open field. And, above all, let the living oracles of our holy religion, and pious men and women of every denomination, be appealed to for counsel, for victory, and that his ear is ever open to the prayers of the righteous.

THE ADVANCE AGAINST RICHMOND.

[Richmond correspondence of the Mobile Register.]

An the impression prevails in town that the women and, children are to be sent out of the county. In another form, the rumor is, that General BRAGG has said that in case LEE's army has to fall back he will displace the city of its surplus population, and prepare for a siege in very unnecessary thing for General BRAGG to say; since it follows as a matter of course that a siege would, of itself, drive away all who were not obliged to remain. I hope that we believe General BRAGG made any such remark. A meet ing of the citizens of Charlottesville will be abandoned if LEE is compelled to retire.

Active operations on the line of the Rapidan well hardly begin before the middle or even the last of next month; for GRANT will not be able, with all his energy and diligence, to get his whole number and well in hand before that time. Lee is quietly watching him in the Wilderness, while he will be disclosed the moment BURNSIDE's Annapolis expedition reaches the rear of the Confederate army. Many *Examiner* thinks BURNSIDE will disembark at Urbana, near the mouth of the Rappahannock river, and march thence upon Richmond, while GRANT moves in front. BUTLER's Bermuda army, with a force coming up from Williamsburgh and Fortress Monroe. But Urbana would be an ill-chosen point; for he would have two rivers to cross before he comes within striking distance of Richmond. Port Royal, twenty miles below Fredericksburgh, would serve his purpose much better for there he would be immediately on the line to flank and rear, and force him either to retire from the strongly fortified line of the Rapidan or to divide his army.

* * *

Instead of dividing, LEE will concentrate. He will not even spare PICKETT and CUSHMAN to attend BURNSIDE, advancing up the Peninsula. The fortifications around Richmond being completed and connected by telegraph, he will entrust the defence of the capital to General BRAGG, at the head of the local forces and reserves, while PICKETT and others confront BURNSIDE at Port Royal or elsewhere. LONGSTREET and EWELL will form the centre column crossing Port Royal, BURNSIDE may move up the north bank of the Rappahannock as far as Fredericksburgh; if so, he will extended towards Stafford Court House. Reinforced by BURNSIDE and all the troops which can possibly be spared from the

defences at Washington, will GRANT, failing in his effort to manœuvre LEE out of Virginia, and even out of Orange county, essay to carry by storm the fortified line of the Rapidan, as he did the much stronger positions of Lookout Mountain and Missionary Ridge—will he, think you, attempt this bold task while LONGSTREET hangs on his right flank and rear? He may, for his luck has given him confidence, and time presses. Some "big thing" must be done before the 7th of June, the time fixed for the meeting of the Republican Convention at Chicago. Moreover, GRANT knows that when all the troops under the immediate authority of LEE's army with the purely defensive attitude which it has assumed as an entire army, on but two occasions—at Fredericksburg and at Mine Run—left the second battle of Manassas. At Sharpsburgh it was not an entire army, but a remnant of less than forty thousand, were and wasted with fatigue and hunger.

Unless LONGSTREET should take position so near to LEE as to be able to "support" him on the right, GRANT is confined or protended to offer battle—in which event he would be in danger of being turned upon by GRANT and whipped before LEE could get to LONGSTREET's aid—by less than three hundred pieces of cannon, well supported by infantry GRANT could not get to you. Nor could any damage he might do after LEE was defeated. It would be easy to escape of LONGSTREET after that. But suppose LEE is not defeated, and GRANT, after sustaining the repulse of bloody assaults, are compelled to retrace the Rapidan and make their way as best they can to the entrenchments at Alrington, while LEE troops should follow, harassing, pressing the bloodhounds on their rear; and LONGSTREET falls like a thunderbolt on their flank. Suppose that! Ah! it makes the heart sink with hope. We have not dared to—and so bitterly disappointed in just such hopes. And yet the time ought to come—and probably will come—when success shall be required by one truly grand and decisive victory. Why should not that victory come this year? When shall it come more propitiously?

THE YANKEES ADVANCING.

[From the Richmond Whig of 7th.]

Up to a late hour last night there had been no fighting whatever on the Peninsula, but it was said there were a number of transports on their way up the James River, below City Point. The information was brought to the latter point, conveyed by Yankee gunboats, was according the James River, and was at a short distance below City Point. It was received in Petersburgh on Thursday afternoon, about 12 M. General PICKETT immediately directed Colonel ARCHER, commanding the Petersburgh post, to come out to me, and this was the signal for considerable excitement which instantly ensued. This excitement was greatly enhanced by the ringing of the alarm bells, which in turn was soon followed by the ringing of all other bells in the city, which startled the quiet citizens from their repose from its centre to its remotest limits. The militia quickly responded to the summons, and in the course of three or four hours more than one thousand were in the place of rendezvous, armed and equipped as the law directs. All the veterans around Petersburgh, including infantry, artillery and cavalry, put themselves in motion for the scene of action with all due celebration. The enemy came up the James River at 4 P. M., landing a force of two thousand at City Point, capturing our picket guard and the Signal Station on General Dodge's. The signal station was captured, but the men escaped. The bulk of the men, about fifteen hundred, landed a little higher up, and landed ten to fifteen thousand men. Our informant counted forty-one transports, and others coming, three armed boats. The Yankees had all his prospective motions. Bermuda Hundred is ten miles from Drewry's Bluff, and two or three hours' march from the Richmond and Petersburgh Railroad to Richmond.

AN ATTEMPT AGAINST ATLANTA.

[From the Richmond Whig.]

The Dalton correspondent of the Atlanta *Register* avers that the programme of the Abolition Government for the pending spring campaign is, that while GRANT is busily executing to all indications, will open with a grand demonstration in an attempt against Atlanta. The movement of troops on the part of the enemy, as far as we can ascertain, point plainly in that direction. It is known that the concentration of the enemy's forces in the direction of Chattanooga is proceeding with great rapidity, and that there is more activity there than at the latter point.

The foregoing is exactly in accordance with our views, expressed in this paper a week ago. Whatever appearance of attack upon LEE, or on North Carolina, the enemy may bring up, our great effort will be against General Johnston's "On to Atlanta" is now his watchword. We know that our opinion in such matters is worth but little, but we would say what it is, our opinion is worth any man's; but still our opinion is that while the "On to Richmond" is but a feint, the "On to Atlanta" is real.

THE CAPITAL THREATENED.

[From the Richmond Whig, 7th.]

In some respects the siege is more prolonged than when MCCLELLAN, at the head of one hundred thousand men, was encamped within five miles of the corporation limits. The rumors are well nigh as numerous as the days of the siege. They know the city is in peril, and they have refence promptly to the field. The quiet determination of the citizens is worthy of the best days of old grandeur. Knowing that the hour of suffering trial had come, they armed themselves and went calmly forth to defend their wives and children and fireside. Every one felt that the occupation of the city, even for a single hour, involved consequences most terrible, apart from the destruction of property. Numberless calamities to the pure and unprotected, who would be crouching in garrets and cellars, were to be dreaded. To avert these calamities, fathers and brothers and sons were willing to lay down their lives. The union was holy; how could they be otherwise than confident with regard to the issue of the day? Besides, the many state on good authority that its weakness is less than the more numerous of our invaders, and their superior number makes it stronger. Some apprehension is felt in regard to the number of troops in and around the city. On that point it would be obviously improper to state particulars. We may be very sure, however, that heavy reinforcements are at hand. They may act arrive in time to prevent the enemy from achieving a temporary success, such as the burning of a bridge and the capture of an outpost, but they can come soon enough to punish the enemy for his temerity. We expect for several days to witness an unwonted degree of excitement and of thrilling and alarming rumors. The enemy will bring us not a little, and the busy-bodies will do their share in augmenting the sum of what is inevitable in time of peril, and can be counteracted only by anticipating them, and presenting a firm mind in spite, not only of rumors, but of appearances. Let us possess our souls in patience, no matter what happens. Panics are unjustifiable here, worse, and the best way to meet a danger is to face it. In a word, the defences of the city must and will be cultivated, for the air will be thick with ugly and evil reports. Let us say, plainly, that we hold the city to the last gasp, as well from the lawless within as from the invaders without; and next to encourage and sustain our defenders. The sacred duty should be sent here must not be left to the hospital attendants alone.

It may be and we trust it is the last time Richmond will be exposed to the horrors of a siege. Those which she is to distinguished throughout the Confederacy. Let this during refuge all previous ones. There will be trouble about food, especially for the troops near the city. The commissariat should not be left wholly to the authorities, who will be busy with the transportation of troops. The local troops had but one day's rations in their haversacks, and that will be exhausted before requisitions are furnished.

ARE WE PREPARED?

[From the Richmond Whig, 6th.]

Suppose the enemy gain such advantage as to compel LEE to fall back toward Richmond, are we at all prepared for such a contingency? Have we made the slightest effort—for we have been so elated by success after success, that we have not permitted ourselves to contemplate the probability of anything but victory. We have not. The fact remains from the elated condition in which we have been for months past, may cause us to do other extreme, and at a time when the highest qualities of nerve will be needed to repair a temporary reverse, we will be found in a state of supine despondency. We should be ready to meet the other side of the picture, and accustom ourselves to the idea of temporary miscarriage of our arms, and to the requirements of such an event. Should LEE be compelled to recover more favorable for LEE, the chances of battle are so various and so much beyond human control, that it is impossible to foretell with certainty the issue of a general engagement.

We all know this; yet no one has asked the question, and when we do ask it, LEE suffers a reverse, and is forced to fall back upon this city! Still less have we permitted ourselves to consider the consequences of a deplorable accident which may befall us.

A year ago "Stonewall" JACKSON fell not far from the spot on which LEE and GRANT are about to join battle. We think it fair to say that the former was more to this calamity; for the people of the Confederacy are by no means prepared for it. They have made up their minds, apparently, that LEE is invincible, and that no other fate awaits him, forgetting quite, that there can be but one way. If LEE should fall, there is no one to command with the contemplation of that other way. Let it be dismissed at once and forever. Suppose LEE falls, we have BEAUREGARD. Suppose his arm can no longer wield the sword, we have retirees, we have reinforcements and many excellent lines of defence. Whatever befalls us, death is very clear: our independence must be won. Short of that we will not submit. There is no middle ground, as Mr. LEACH lucidus, between independence and subjugation.

How often have we proclaimed that the fall of Richmond, and of all our cities, would not and should not end the war. Do we still stand fast to that proclamation, or are we, indeed, ready to see the war end this year, one way or the other? Perhaps at this moment the great contest on the Rapidan is at its height. Perhaps the issue of this day's gun the wires may bring us sad tidings. Should it so chance, we must and will fight more desperately more to the breach, remembering that the cause for which "Stonewall" JACKSON died may suffer a thousand reverses, but can never fail. The enemy may be able to repulse LEE to-morrow; and in the end we will, for we must, triumph gloriously.

MR. JEFFERSON DAVIS'S MESSAGE.

TO THE SENATE AND HOUSE OF REPRESENTATIVES OF THE CONFEDERATE STATES OF AMERICA:

You are assembled under circumstances of deep interest to your country; and it is fortunate that, coming as you do, newly elected by the people, and clothed with the condition of the various localities, you will be the better able to devise measures for the safety of the country and for the service without imposing unnecessary burdens on the citizen. The brief period which has elapsed since the last adjournment of Congress has been sufficient opportunity to test the efficacy of the most important laws then enacted, nor have the events occurring in the interval been such as materially to change the condition of affairs.

The unjust war commenced against us, in violation of the rights of the States, and of powers not delegated to the Government of the United States, is still characterized by the barbarism with which it has heretofore been conducted by the enemy. Aged men, helpless women and children appeal in vain to the humanity which should be inspired by their condition, for immunity from arrest, incarceration or banishment from their homes. Plunder and devastation of the property of non-combatants, destruction of private dwellings and churches devoted to the worship of God, expeditions organized for the sole purpose of sacking cities, consigning them to the flames, killing the unarmed inhabitants, burning the helpless women and children, are some of the constantly recurring atrocities of the invader. It cannot reasonably be pretended that such acts conduce to any end which their authors dare avow before the civilized world, and sooner or later Christendom must mete out to them the condemnation which such brutality decrees. The sufferings thus ruthlessly inflicted upon the people of the invaded districts has served but to illustrate their patriotism. Entire unanimity and zeal for their country's cause have been prominently conspicuous among those sacrifices which have been greatest. So the army which has borne the trials and dangers of the war; which has been subjected to privations and disappointments which the fortune of many battles more than the brief fatigues and perils of actual combat), has been the centre of cheering and hope. From the camp comes the voice of the soldier-patriot invoking each man to go home, in the whom he best may fill, to devote his whole energies to the support of the cause, in the service of which their confidence has never faltered. They, the veterans of many a hard-fought field, tender to their country, without limit of time, the service which involves value to us—one which posterity will hold in grateful remembrance.

In considering the state of the country, the reflection is naturally suggested that this is the Third Congress of the Confederate States of America. The provisional government was formed by the representatives of four sessions, lived its appointed term and passed away. The permanent government was then organized, its different departments established, a Congress elected, which also held four sessions, served its full constitutional term and expired. You, the representatives under the permanent government, now now assembled at the time and place appointed by the law commencing your session. All these events have passed into history, and the present is the time for our people, undisguised, made three years ago, by a people that presume to assert a title to govern States whose separate and independent sovereignty was recognized by treaty with France and Great Britain in the last century, and remained unquestioned for nearly three generations. Yet these very governments, in contempt of all duty and treaty obligation, which bind them to recognise as independent Virginia and other Confederate States, have, with unceasing energy, for several years, acted in aiding by unfair and partial action, the claim set up by the Executive of a foreign government to exercise despotic power over the United States of America, and treat the invasion of them by their former limited and special agent as though it were the attempt of a sovereign to suppress a rebellion by a lawful authority. The temporary advantage has been taken of our present condition, and our rights have been sold for the vassals of a war obtained in ports to which they had been invited by proclamations of neutrality, and in one instance our flag also insulted where it was shield. Such a course was supposed to be owing, while one of these governments has contented itself with simply deprecating by deferential representations the continuance of a course of conduct inconsistent with prudence of his contemptuous disregard of neutral rights and flagrant violation of his own law. It may be that foreign governments, like our enemies, have mistaken our desire for peace, unreservedly, expressed, for evidence of exhaustion, and have been encouraged by the delusion to hope for an ultimate subjugate or exterminate the millions of human beings who, in these States, prefer any fate to submission to their savage conquerors.

Idee no prospect of an early change in the course here before pursued by these governments; but when this delusion shall have been dispelled, and when the independence, by the valor and fortitude of our people, shall have been won, and the United States inflicted on combatant against us, and can no longer be ignored by open foes or professed neutrals, this war will have left, with its proud memories, a record of which our children will it may not unbecomes us to forgive—some for which we may not properly forbear from demanding redress. In the meantime, it is enough for us to know that the purpose of our enemies is closed against us; that our enemy is making renewed and strenuous efforts to our destruction, and that we must increase for us, as a people secure in the justice of our cause and holding our liberties to be more precious than all other earthly possessions, to contribute and apply every available element of power for their defence and preservation.

On the subject of the exchange of prisoners I greatly regret to be unable to give you satisfactory information. The Government of the United States, while persisting in failure to execute the cartel, which we concluded, delivers of prisoners, and then suspend action without apparent cause. I confess my inability to comprehend their policy or purpose. Our soldiers held by us in spite of human care, are perishing from the inevitable effects of imprisonment and the home sickness produced by the hopelessness of release by exchange. The repetition of the most startling augments our longing desire to relieve from similar trials our brave men, who have spent so many weary months in a hostile land, suffering imprisonment, enthrall with heroic constancy. The delivery, after a suspension of some weeks, has just been completed, and I regret to say that we are not assurance of intent to carry out the cartel, an interruption of the exchange may recur at any moment.

The report of the Secretary of the Treasury, herewith submitted, will afford you information in relation to the matters appertaining to each. There are two of them on which I deem it necessary to offer a few remark.

The report of the Secretary of the Treasury states facts justifying the conclusion that the large amount of bank notes, for the purpose of withdrawing from circulation the large excess of Treasury notes heretofore issued, has had the effect to which it was directed. The last of this description of circulation will have been reduced to a sum not exceeding $230,000,000. It is believed that the foreign importations which have been another issue of notes should take place, and that the use of the credit of the Government should be restricted to the two other modes provided by Congress, viz.: the sale of bonds and the issue of certificates bearing interest, for the price of supplies purchased within our limits. The law, as it now stands, authorizes the issue by the Treasury of new notes to the extent of two-thirds of the amount received under the provisions of the act of February 17, 1864. Funded under this law is shown to be $300,000,000, and if two-thirds of this sum be retained, we shall have an addition of $200,000,000 to our circulation. This will be largely ample for the business of the country. The addition of

this large sum to the volume of the currency would be attended by disastrous effects, and would produce the speedy recurrence of the evils from which the funding law has rescued the country. If our arms are crowned with the success which we have so much reason to hope, we may well expect that this war cannot be prolonged beyond the current year, and nothing would so much retard the beneficent influences of peace on all the interests of our country as the existence of a great amount of currency not redeemable in coin. With our vast resources, we are confident, if restricted to its present volume, would be easily manageable, and by means of subscription or otherwise the coin would give place to the precious metals, the only basis of a currency adapted to commerce with foreign countries. In our present circumstances, I know of no mode of providing for the public wants which would entail sacrifices so great as a fresh issue of Treasury notes, and I trust that you will concur in the propriety of absolutely forbidding an increase of those now in circulation.

Officers have been appointed and dispatched to the trans-Mississippi States, and the necessary measures taken for the execution of the laws, enacted to obviate delays in administering the Treasury and other Departments established in those States; but sufficient time has not elapsed to ascertain the result.

In relation to the most important of all subjects at the present time—the efficiency of our armies in the field—it is gratifying to assure you that the military force and organization of the troops have kept place with the improvement in material and equipment. We have reason to congratulate ourselves on the results of the labors of the past year, and on the increased administrative energy in the different bureaus of the War Department, and in the navy, notably in the reduction of expenditure and the success in the ensuing campaign.

The organization of reserves is in progress, and it is hoped they will be valuable in affording local protection without requiring details and detachments from active forces.

Other important considerations will be found in the report of the Secretary of War, your attention is especially invited to those in which legislation is suggested as the following subjects, viz:—

The tenure of office of the general officers in the provisional corps, and a proper discrimination in the compensation of the different grades.

The provision required in aid of invalid officers who have resigned in consequence of wounds or sickness contracted while in the service.

The amendment of the law which deprives officers in the field of the privilege of purchasing subsistence for family, to their embarrassment, instead of conferring the benefit intended.

The organization of the general staff of the army, in relation to which a special message will shortly be addressed to you, embracing the measures which appear to be withheld my approval of a bill passed by your predecessors at too late a period of the session to allow time for returning it for their consideration.

The necessity for an increase in the allowance now made for the transportation of officers travelling under orders.

The mode of providing officers for the retention of the conscript laws.

The means of securing greater dispatch and more regular administration of justice in examining and disposing of the records of cases received from the courts-martial and military courts in the army.

The recent events of the war are highly creditable to our troops, exhibiting energy and valor equal to any in the habitual gallantry which they have taught us to expect on all occasions. We have been cheered by important and valuable successes in Florida, Southern Mississippi, Western Tennessee and Kentucky, Western Louisiana and Eastern North Carolina, reflecting the highest honor on the skill and conduct of our commanders, and on the honorable soldiers whom it is their privilege to lead. A naval attack on Charleston was successfully repulsed at the outer works that the attempt was abandoned, and the nine months' siege of Charleston has been practically suspended, leaving that noble city and its fortress, comparatively undamaged to the skill and fortitude of its defenders. The armies in Northern Georgia and in Northern Virginia still oppose, with unbaken front, a formidable barrier to the progress of the invader; and our generals, armies and people are animated by cheerful confidence.

Let us, then, while resolute in devoting all our energies to securing the restitution of the bright auspices which encourage us, not fail to offer up to God our most grateful thanks are due to Him, without whose guidance and protecting care all human efforts are of no avail, and to whose interposition are due the manifold successes with which we have been cheered.

JEFFERSON DAVIS.

RICHMOND, May 2, 1864.

ARMY GAZETTE.

SENTENCE OF ROBERT TAYLOR.

General Court-Martial Orders, No. 39.
WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, May 5, 1864.

I. Before a Military Commission, consisting of
Captain C. Thompson, 15th Michigan Volunteers,
Captain Owen Griffith, 22d Wisconsin Volunteers,
Captain James Curtis, 1st Indiana Cavalry,
Captain D. B. Mesy, 22d Wisconsin Volunteers,
Captain Daniel Bassett, 15th Michigan Volunteers,
and which convened at Murfreesboro', Tennessee, September 16, 1863, pursuant to Special Orders No. 258, from Post Headquarters, Murfreesboro', September 6, 1863, was arraigned and tried—

Robert Taylor,

Private, Company A, 8th Ohio Cavalry.

Specification 1: In this: that he, the said *Robert Taylor*, a citizen of Coffee county, in the State of Tennessee, did feed a negro woman named Hetter in such manner that she died from the effects of the blows and bruises inflicted. This at or about the 31st day of August, 1863, at or near the residence of said Robert Taylor, about nine miles from the town of Hillsboro', in Coffee county, Tennessee.

To which charge and specification the accused, Robert Taylor, a citizen, pleaded—

NOT GUILTY.

FINDING.

The Commission having maturely considered the evidence adduced finds the accused Robert Taylor, a citizen, as follows:—

Of the specification—GUILTY.

Of the charge—NOT GUILTY,as charged, but guilty of manslaughter.

SENTENCE.

And the Commission does, therefore, sentence him, Robert Taylor, a citizen, "*to be confined in the State Penitentiary for the period of five years.*"

II. The proceedings, findings, and sentence in the foregoing case having been approved by the major-general commanding the department, and laid before the President of the United States, the following are his orders:—

The sentence in the case, as found in the record, is brief and free from all discrepancy or contradiction. The prisoner is seems abject of this an amount of money paid to him by the murdered woman, as will be not stated—but there was no proof of any such theft, still less any thing to be entered upon the record to the murdered woman, as will be conclusive of. Probably, however, from apprehension of punishment for the crime, or from some other cause, the prisoner, after the crime was known, was pursued by the prisoner and his neighbors, captured, and brought back.

Before the arrival of the party with the prisoner, himself in the bystanders, asked if there was any one present who could tell what had become of the money which the woman had received for the sale of her property. Whereupon the prisoner, who had been sitting by the fire, quietly drew from his pocket a roll of bills, and, counting them, handed them to the bystanders, who, on counting them, found that they amounted to the sum of $1,000. The prisoner, on being asked how he came by that brief sum, replied that he had stripped the person of the woman with whom he had been living, and who had been murdered by him, of the money in question. On the further examination of this man, "some neighbors persons said they thought the woman had more money than that, and that if the prisoner had killed her for money he must have more than that, and that he should be hanged." The prisoner then untied, and satisfied by one of the neighbors that he had not concealed any money, sewed in his linen from one of the bosoms on the way. She succeeded, however, in reaching the prisoner's wife, and a few minutes thereafter expired. The absence of any evidence of theft removes from the case all element of the crime. It is manifest in the evidence that the woman's death was produced by cruel and severe, if wilful, beating with a stick by the prisoner, who had drunk; and in attempting publication of the prisoner's numerous brutalities to the woman, one of the neighbors that he bore a good moral character, and clothed and fed his slaves well; and he stated that he should not have interfered in the case of a charge, given the woman even a worse whipping than that of which she died.

That a body of officers, holding commissions in the Army of the United States, should have sat in judgment on, and on oath, should deal this lightly with so shocking a sacrifice of human life, cannot but excite surprise and the severest animadversion. Every circumstance surrounding the crime aggravates its enormity, among which is the helpless condition of the victim, and the long-continued brutalities to which the unfortunate sufferer was subjected, thus affording ample time for all reflection, and for the exercise of the most tender feelings, before the accomplishment of the bestial and unrestraining victim.

The President directs that the sentence be approved, and—shall except as to the place of confinement, be carried into execution, and Albany, New York, the penitentiary designated by which he shall be confined; but while doing so, he feels it incumbent upon him to call the attention of the Army, and especially those charged with the administration of military justice, to the insensibility displayed by this commission to the enormity of the offence which it was its duty to be regarded. The murderer of the commission, in thus lightly dealing with one of the most revolting murders on record, have no honor to themselves, and affording an example which it is hoped will never again be witnessed in the United States.

The prisoner will be sent under proper guard to Albany, New York, and delivered to the warden of the penitentiary of that place for confinement for the period of five years, in accordance with the sentence.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant-General.

THE FIRING OF WASHINGTON, N. C.

HEADQUARTERS DISTRICT OF NORTH CAROLINA,
NEWBERN, N. C., May 3, 1864.

General Orders No. 8

While the troops of this command may exult and take just pride in their many victories over the enemy, yet a portion of them have been guilty of conduct which the commanding General considers to belong the brush or shame to the check of every true man and soldier.

It is well known that, during the late evacuation of Washington, the troops, under the command of Brigadier-General Palmer, committed wanton, needless depredations and heinous hundreds of poor citizens, driven from their homes by the ravages of war, and, in the town of Washington, destroying the best portion of the once happy homes of the people, and leaving them to starve in the midst of plenty in the heart of peace.

And this was done by men in the military service of the United States!

It is also well known that the Army Vandals did not even respect the charitable institutions of the country, but the doors of the Masonic and Odd-Fellows' Lodges, plunged them both, and have left them the charred ruins of what they were.

And this, too, by United States troops.

It is well known that the public and private stores were entered and plundered, and that devastation and destruction ruled the hour.

The commanding General had until this time believed it impossible that troops of the United States could be guilty of conduct so disgraceful an act as this which now blushes the fair fame of the Army of North Carolina, but the evidence is too clear to be disputed, and that the ranks are disgraced by men who are not soldiers, but thieves and robbers, and that the name of a great and honored host for whom no punishment can be too severe.

The commanding General will not attempt to describe the scenes in the town of Washington when the flames first appeared. He knows what troops had set fire to the town. The whole of the 3d and 4th Brigades of the 1st Division of the 18th Corps, and the 1st Brigade of the 2d Division of the 18th Corps, every day for ten consecutive days, or until the guilty parties were found out.

By command of Brigadier-General I. N. PALMER.

J. A. JUDSON, A. A. G.

FAREWELL ORDER OF MAJOR-GENERAL HULBURT.

HEADQUARTERS, SIXTEENTH ARMY CORPS,
MEMPHIS, April 30, 1864.

General Orders No. 43.

The time having arrived commanding the Armies of the United States has this day relieved me from the command of the Sixteenth Army Corps. In separating from a body of officers and men whom I have so long commanded, it would be improper and inconsistent with my feelings if I did not give some testimonial of the services rendered and the duties performed by this corps.

Now a year and a half has passed away since upon Re rule 19,000 men from this ample force heavy details were sent to Vicksburg, and to Arkansas Post, Yazoo Pass Division, subsequently to other expeditions, have become historic.

With the exception of the battles of Shiloh and Charleston Hall, Pulaski to Eastport, the Army of the Tennessee, Ohio and Mississippi Rivers, from the Tennessee to Chattanooga, and Knoxville.

The left wing of this corps, under command of Brigadier-General Dodge, co-operated with Major-General Sherman in his successful October to relieve Chattanooga and Knoxville, and now holds the line of the Memphis and Charleston Railroad.

Two divisions of the corps participated in the march to Meridian, and under the able direction of Brigadier-General A. J. Smith moved back the tide of disastrous battle on Red River.

It is with proper pride that I claim Smith and Mower, and their commands, as parts of this corps; nor do I forget to give credit to the detachment from the Seventeenth Army corps, which marched and fought as brothers in arms with them.

The troops of this command, since the Sixteenth Army corps, that it furnished to Major-General W. T. Sherman, then commanding the Military Division of the Mississippi, have marched with him, beaten, and seven thousand new muskets; for without that increase of numbers, the losses in battle, by disease, casualties of service, would have been such that there could not have been made in the time necessary the campaign of Atlanta.

Of the Sixteenth Army corps, as originally composed of the Sixteenth Army corps was, notwithstanding, expected to cover the line of the Mississippi River from Memphis to the mouth of the river and to hold the immense depots and hospitals of Memphis.

The command has been constant and severe, and I cannot doubt they their record shows constant and flashing worth; by the fruitful exhibition of courage and endurance, and by the fact that, as compared to deficiency—the infantry not more than sufficient for service, and including cavalry, artillery and infantry, it is not overstated.

They have lost no honor by not performing impossibilities.

Officers and men of the Sixteenth Army corps, I bid you an affectionate farewell.

S. A. HULBURT,
Major-General United States Volunteers.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

TO BE BRIGADIER-GENERAL IN THE VOLUNTEER SERVICE.

Brigadier-General Robert B. Mitchell, U. S. Army, of the United States Volunteers:

TO BE BRIGADIER-GENERALS IN THE VOLUNTEER SERVICE.

Colonel Daniel H. Rucker.
Colonel Josiah Gorgas.
Lieutenant-Colonel Henry Ingalls.
Colonel John C. Ramsey.
Colonel Augustus V. Kautz, 2d Ohio Cavalry.
Colonel Thomas Kilby Smith, 55th Ohio Volunteers, August 19, 1863.

TO BE HOSPITAL CHAPLAIN.

William G. Leonard, of Massachusetts.

TO BE ASSISTANT QUARTERMASTER.

First Lieutenant John S. Campbell, of the Kentucky Cavalry, to be assistant quartermaster, with the rank of captain.

Lieutenant Robert Wooster, 1st Vermont Cavalry.
C. F. Loveless, of Iowa.

NOTICE TO DELINQUENTS.

The following officers having been reported at the headquarters of the Army for the offences hereinafter specified, are hereby notified that charges have been preferred against them, and that unless they appear within fifteen (15) days from May 9, 1864, they appear before the Military Commission in session at Washington, D. C., of which Brevet Brigadier-General John G. Caldwell, United States Volunteers, is President, and make answer to the charges preferred against them:

For giving duplicate discharges to enlisted men, in violation of paragraph 915, *Revised Army Regulations:*

Captain M. F. McDonald, 12th Pennsylvania cavalry.

For enlisting a man physically disqualified for duty.

Major St. Clair Mulholland, 116th Pennsylvania Volunteers.

For accepting a man physically disqualified for duty.

Assistant Surgeon J. K. Mason, U.S.A.

Drunkenness and duties without leave.

Second Lieutenant Benjamin Wheelock, 16th New York artillery
Captain Oliver S. Johnson, 16th New York artillery.

Absence without leave.

Lieutenant-Colonel Charles D. Savage, 12th New Hampshire Volunteers.

Lieutenant Ernest Ratzmann, 45th Regiment New York Volunteers.

First Lieutenant Samuel Hewitt, 72d New York Volunteers.

First Lieutenant Charles Frederick Wolf, 9th New York.

First Lieutenant Charles J. Ball, 11th United States infantry, having been appointed on the Staff of the Army of the James, without authority since January 31, 1864, by which he is detained from his proper station with his company, and failed to report to Military Commission in session at Washington, D. C., which Brigadier-General John G. Caldwell, United States Volunteers, is President, satisfactory defence to the charges against him, he will be recommended for dismissal from the service of the United States.

DISMISSALS

For the week ending May 7, 1864.

Colonel G. H. Moore, 20th Michigan Volunteers, on account of that regiment and a portion of the 24th Michigan being ordered, to date 10 January 31, 1864, for conduct unbecoming an officer and gentleman, to date January 31, 1864.

Colonel Orrin D. Hapgood, 1st Arkansas cavalry, to date May 5, 1864, for absence without leave.

Captain A. Judd, 9th Regiment Minnesota Volunteers, to date May 5, 1864, for having received a leave of absence, on a report that his wife was dangerously ill, and for remaining absent after the point of death," which statement was entirely false, and for failing to return immediately to his command after the deception had been discovered.

First Lieutenant George W. Jewett, 3d Indiana Volunteers, to date May 3, 1864, for conduct unbecoming an officer and gentleman, and conduct prejudicial to good order and military discipline.

First Lieutenant George B. Cross, 6th Illinois cavalry, to date May 4, 1864, for absence without leave, and conduct to the prejudice prejudicial to good order and military discipline.

First Lieutenant James W. Hall, 16th New York cavalry, to date May 4, 1864, with loss of all pay and allowances, for absence without leave.

First Lieutenant William J. Mount, 11th New Jersey Volunteers,

to date May 6, 1864, he having tendered his resignation on himself, to take effect on the 6th inst.

Second Lieutenant Thomas Lonergan, 19th United States Infantry, to date January 4, 1864, for disobedience of orders and absence without proper authority.

Second Lieutenant A. T. Wells, 16th New York Volunteers, to date May 6, 1864, he having tendered his resignation on insufficient cause as the eve of an active campaign.

First Lieutenant Joseph Bell, 4th April 4, 1864, for absence without leave, having been published officially and failed to appear before the Commissioners.

First Lieutenant Jesse J. Bowers, 12th Pennsylvania cavalry; First Lieutenant Edward Hall, 4th April 4, 1864, for absence without leave; and Second Lieutenant W. B. Maddicbrook, 4th New York Volunteers. The following officers, having been published officially, and failed to appear before the Commissioners.

*In wing disrespectful and profane language in making an official report, etc., etc., etc.,

The prominent features of the Metropolitan Fair, recently held in New York, were to be perpetuated in a series of fifty-four photographic views prepared by Messrs. J. Gurney & Son of this city. These views include the Art Gallery, Department of Arms and Trophies, Curiosity Shop, New Jersey Department, Indian Department, Cattle Show, and Interior View of the Main Building. The Executive Committee have also been put on record by the same firm in a photographic group, which is to be on exhibition for a few days at their gallery, 707 Broadway. Messrs. Gurney were themselves prominent contributors to the Fair, presenting in addition to a life-size portrait of Hon. Horace Gunther, of New York, valued at $575, twenty Imperial photographs of the most prominent generals of the Army and navy of the Union, valued at $360, and views of the different departments of the Fair, valued at about $100. This, with the proceeds of the Photograph Studio, fitted up in the 14th street building by the Metropolitan, the receipts of which ($456) were given to the Fair, made an entire contribution of over $1,600.

BUSINESS NOTICE.

MORTON'S GOLD TIPS are now sold at the same price as before the commencement of the war; this is entirely owing to the great improvements we have made in machinery, his present large Retail Business and Double-Action System; for, until he commenced advertising, his business was done on a small scale strictly with the Trade.

The Morton Gold Pens are the only ones sold at 50 cents, as the makers of all other gold pens charge the Premium on the Gold, Government Tax, &c., but Morton has at no cost changed his prices, Wholesale or Retail.

Of the great numbers sent by mail to all parts of the world during the last two years, not one in a thousand has failed to reach its destination in safety; showing that the Morton Gold Pen can be obtained by any one, by sending a dollar bill, at the lowest price, postage only excepted.

Besides, you can have an enduring, always ready, and reliable Gold Pen, exactly adapted to your hand and style of writing, which will do your writing vastly cheaper than Steel Pens, and in the present almost universal High-Pressure Time of everything, you can have a Morton Gold Pen cheaper, in proportion to the labor spared by its use, than any other Pen, Steel or other Gold Pen in the World. If you want one, see the "Pen is Mightier than the Sword," in another column.

CHICKERING & SONS,
MANUFACTURERS
GRAND, SQUARE, AND UPRIGHT
PIANO-FORTES,
Warerooms, 652 Broadway, New York.

The superiority of these Instruments is amply demonstrated by the voluntary testimony of the first artists of the day, and by the universal favor they have received. Their great power, brilliancy and purity of tone and workmanship hitherto unexhibited by any other makers, undoubtedly constant use of the Chickering Patent has severely tested their musical qualities, and their adaptation to every climate of the very flattering estimation in which they are held.

Hence, C. & S. sons have been awarded 20 Prizes Medals, over all competitors, for the superiority of their manufacture, that they confer upon the instruments qualities of great power, brilliancy and purity of tone, and elasticity of touch. 311

BOUNTY, PRIZE MONEY, BACK PAY, &c.—Soldiers or sailors entitled to Back Pay or Prize Money promptly collected and settled. Blanks and full instructions sent free to any address on receipt of stamp. Attorneys made upon officers' pay rolls.

THE CAMPAIGN IN VIRGINIA.

THE first week's campaign of the Army south of the Rappahannock closed substantially with the great battle of Tuesday, May 10th. That battle, like all its predecessors, was in its immediate results, indecisive: though not so, indeed, in the plan of the campaign—a campaign of heavy, incessant blows, dealt with final intent to send the enemy reeling back to his Richmond defences. Let us denominate the work of the week, and indeed all the work thus far, cheering as it has been, not so much victory, as the *preliminary* of hoped-for victory.

Our record of the first week, pausing also with Tuesday's contest, left the Army hotly investing the Rebel position at Spottsylvania, and the enemy as hotly defending it. Spotsylvania Court-House is an insignificant village, on the northern bank of the Po River, a branch of the Mattaponi, about 15 miles from Fredericksburgh, and nearly the same from the old battle-field of the Wilderness. A part of its importance arises from the junction near by of several cross roads—the Bowling Green, Fredericksburgh, Piney Branch Church and Brock roads, all running to the places thus indicated, and the Catharpen road across Catharpen River towards Orange Court-House. The region is a rolling one, partly cleared, with here and there fields long since turned for the summer agriculture, but principally clothed with forest and underbrush, pines, dwarf oaks, hazels, and alders, with thorny and dense bushes between.

WEDNESDAY, MAY 11TH.

On Wednesday morning our position, like that of the enemy, was nearly as at the close of Tuesday's battle. The Rebels still held and covered the town with a crescent line, maintained—as nearly as those fortunate enough to be on its exterior could judge,—by the following disposition of corps:—A. P. HILL's corps on their right, HOKE in the centre, LONGSTREET on the left. Their centre was very strong, and posted securely, with rifle pits in front, and the strip of forest covering it well guarded with lines of skirmishers. On right, left and centre, also, a blackened muzzle peeping out here and there showed that artillery was protecting wherever it could be used. Opposed to them, our line, convexing to the enemy, ran thus from right to left:—HANCOCK, WARREN, WRIGHT, BURNSIDE.

The morning opened with brisk skirmishing, our artillery covering the reconnoitering movements. Continual watchfulness was exercised over the enemy's manœuvres. His efforts were mainly directed to strengthening his position, taking advantage of the lull of battle to erect in the woods new earthworks and plant new abatcis, in support of the defensive dispositions long ago made in anticipation of this emergency. To prevent the accomplishment of this purpose, our batteries played into the woods at intervals through the day. Early in the day, the skirmishing was sharp, especially upon the centre and right, and at the latter point a reconnoissance was made to investigate the condition of the enemy's left. Assaulting columns of the Sixth and Second were ready, but at length a delay in the enterprise was ordered. It turned out subsequently that this preparation, whether designed as a feint or not, deceived the enemy with regard to the real attack made at the other extremity of their line the following day. The enemy in the interim had shifted artillery from the right to left, towards the point threatened on Wednesday.

About noon the stir of the skirmishing died away. The contrast between this comparative quiescence and the roar of Tuesday, gave currency to a groundless rumor that General LEE had asked, under a flag of truce, a cessation of hostilities to bury his dead. Another rumor asserted that LONGSTREET had been wounded severely in the right breast and died on the way to Richmond. The real fact appears in LEE's dispatch from the Wilderness battle, where LONGSTREET was wounded, not mortally, but so as to be *hors du combat* for the rest of the campaign. Occasional firing both of artillery and infantry made up the day's record, and at nightfall it ceased.

The first rain of the campaign fell during the afternoon, in a grateful thunder storm, purifying the heated air, and laying the dust. Soon, lines of bivouac fires streamed up in the camps, rations were brought out, and while the bands played patriotic airs, resounding cheerily among the forest trees, there was for the first time a pause in heavy march and fierce battle. At this time came news of SHERIDAN's brilliant raid, received with loud cheers of enthusiasm.

It having been determined to assault on Thursday morning, the Second corps was selected to make the attempt on the left, where the enemy's batteries, posted strongly, had been able through the day to annoy our lines. Favored by the storm and darkness, not long after midnight HANCOCK shifted the position of his Second corps from the extreme right to the left, to the ground between Generals WRIGHT and BURNSIDE —filling up the space there vacant, and making our line now run thus, from right to left:—WARREN's Fifth corps, WRIGHT's Sixth, HANCOCK's Second, BURNSIDE's Ninth. The change of position was accomplished by marching in those hours which would have been prized for rest by the tired corps. At its close, the position of the Second was somewhat precarious, being near ground well commanded by the enemy and requiring speedy advance in the morning.

THURSDAY, MAY 12TH.

Accordingly, at dawn of day, sheltered by the dusk and by a thick mist or fog, the Second corps quietly and cautiously moved up from its position to the enemy's lines. BARLOW's first division and BIRNEY's Third divison formed the first line, and GIBBON's Second division and MOTT's Fourth the second line. BARLOW's advance marched in column of battalions doubled on the centre. As the corps surmounted gradually the rugged and woody space which intervened, the excitement increased, till it broke out in a splendid rush at the Rebel entrenchments, which the gallant corps leaped with loud cheers, dashing into the astonished enemy and compelling their surrender in mass. It was a gallant charge with the bayonet, hardly a gun being fired. It was a clear surprise, and might have been more fruitful but for the cheering of some of our men, who could suppress their enthusiasm no longer. As it was, an entire division was surrounded and captured, officers and men,—3000 prisoners and two Generals, Major-General EDWARD JOHNSON, commanding the division, and Brigadier-General G. H. STEWART. From the position of the lines, the attack penetrated EWELL's (Stonewall JACKSON's) corps. Their position was strong and one most important to hold, the Second corps being now a wedge between the enemy's centre and right, and helping to press apart that dangerous structure of works wherein the enemy lay ensconced. So complete was the surprise that the hostile officers were started from breakfast by the rude intrusion of their unwelcome guests, who *sans ceremonie* came to share their meal like the Commendatore at the table of DON GIOVANNI. So rapid was the conquest, that in an hour after the start, the successful leader was able to send the following dispatch to headquarters:—"I have captured from thirty to forty guns. I have finished up JOHNSON and am now going into EARLY. W. J. HANCOCK."

No sooner was the first line of rifle pits carried, than the second was stormed with great impetuosity, and, after a stout resistance, wrested from the enemy.

The charge of the Second corps was followed by a heavy cannonade all along the line, to which the enemy, now thoroughly awakened and exasperated, replied to his fullest capacity. In the commingled roar, our whole line quickly moved up to support the Second corps. BURNSIDE's Ninth corps pressed in on the extreme left, converging towards the penetrated space, and speedily joined its right to HANCOCK's left division, closed the gap, and mingled the flash of its musketry with the line of the Second corps. The Sixth corps also threw itself against EWELL's left, and on the extreme right WARREN's corps became hotly engaged, and an incessant rattle and roar of battle arose along the entire line. The rain-storm of the preceding day began again with greater violence, but did not cool the ardor of the combatants.

The enemy were quickly roused to the importance of the position they had lost, and, about 9 o'clock, began to charge again and again with desperate fury upon the Second and Ninth corps, in attempts to repossess their works. Very bloody fighting occurred without intermission for three hours. The Rebel columns dashed with unflinching determination against our lines, retiring each time with their huge columns winrowed by cross and enfilading fires of artillery and musketry, now steadily brought to bear upon them. The artillery on neither side had been hitherto brought into thoroughly effective play; but Thursday's battle, though by no means an artillery duel, reminded its participants more nearly than the preceding of Gettysburgh and Malvern Hill. At length, towards noon, the enemy, surfeited with slaughter, abandoned for a time the attempt to retake the prize which our men had won so fairly and held so tenaciously. But they had successfully disputed our further advance, and of the captured cannon, the greater part lay covered by the guns of sharpshooters, neither party being able to carry them off.

Meanwhile, further to the right, our right and centre had charged the enemy's works with great gallantry, emulating and equalling the desperate rushes of the Rebel columns. But in front, as has already been said, the enemy's position was impregnable; every avenue of approach being swept by the withering fire of artillery, and their force strong enough to hold the position against twice the attacking numbers. After heroic attempts, the design was abandoned.

Finding that success lay most clearly in turning the enemy's right, General MEADE, after a temporary lull, began the early afternoon by crowding his troops down towards the left, shortening and massing his line, and again pouring infantry and artillery fire into the enemy, and pressing hard upon the enemy's right

and right centre. All through the afternoon and till nightfall the carnage went on with varying success along the line, the resistance of the Rebels being stubborn, and the whole field, from headquarters to the extreme front, being at times swept by their fire. The enemy finding that our right had been merely holding him in front from reinforcing his right, and that we had now abandoned his front, also concentrated his troops on the important point on our left. Every inch of muddy and gory soil was fought over with desperation, and yielded only when impossible to hold it. Neither the rain nor the wretched mire of the roads delayed the rapidity or intensity of the fight. The rival bayonets often interlocked, and a bloody grapple over the entrenchments lasted for hours, the Rebel battle flags now surging up side by side with our own, and anon, torn and riddled, disappearing in the weeds. The dead and wounded lay thickly strewn above the ground, and fairly heaped up where the fight was deadliest.

On our extreme left, BURNSIDE'S Ninth corps had moved up, at daylight, into the fight, very soon after the Second became engaged. The corps had been posted across the Fredericksburgh turnpike, in the dense thickets. It was the intent, if possible, to enclose and turn the enemy's right flank, held by the corps of A. P. HILL. During the morning the fighting was severe; the enemy being strongly protected by rifle-pits and the dense timber. But the corps pushed on, driving the enemy gradually into their stronger fortifications. Here for a time there was a check to our advance. During the afternoon, when the Sixth and Fifth corps had moved down from the right, and massed near HANCOCK'S stronghold, again the Ninth corps assayed the enemy's flank, POTTER'S division being well up towards HANCOCK'S corps on the right, with CRITTENDEN in the centre and WILCOX on the left. A fierce contest ensued. The enemy anticipating the attempt to flank him, had prepared a strong counter movement on his extreme right, and in spite of desperate fighting, bore back our left; HARTRANT'S brigade, of WILCOX'S division, carried off three hundred prisoners, and stretching as large a number dead and wounded on the ground. The enemy quickly rushed on in pursuit, but were checked and driven back with great loss by a sweeping artillery fire from batteries brought up and posted since the advance of the morning. The other two divisions stood firm, GRIFFIN'S brigade in POTTER'S division on the right of the corps being credited with the repulse of the enemy's entrenchments. Hard fighting continued, but it was soon obvious that no more ground could be gained on the extreme left, and, holding what had been traversed, the fight there closed. The corps behaved gallantly and suffered severely, the chief burden falling on WILCOX'S division on the left.

After SEDGWICK'S fighting, night fell on a battle unsurpassed in severity in the history of the war. For the first time in the campaign a decided success was achieved. WARREN and WRIGHT, who moved two hours after HANCOCK, had not advanced on the enemy's front; but this was not expected, as his position could not there be carried. On the extreme (swelling our preceding captures to 7,500 men), and also two general officers, and eighteen pieces of artillery actually brought into our lines. Between forty and fifty pieces had been at one time captured, but the remainder rested on debatable ground, and were subsequently withdrawn by the enemy. We had suffered fearful loss—perhaps 10,000 in killed and wounded—but the enemy's was not less. Above all, the brilliant dash of the morning secured a strong grasp on the enemy's left centre, and the advance of a mile in our line in that direction. Five determined assaults were made during the day to expel our troops, but all were fruitless. No more gallant, desperate, or long continued fighting, on either side, for the possession of entrenchments, had occurred during the war; while the severity of the wounds gave proof of something more than musketry fighting.

Unmolested, save by the long continued struggle, here and there during the night, in the region of the coveted works which the Second corps had gloriously won and gloriously held, detachments of troops again fell on each other. The prize was the possession of the cannon, still covered by hostile rifles, and the disputed chain of rifle-pits. The enemy also chose to demonstrate in order to cover their contemplated change of position, and the erection of new defences.

FRIDAY, MAY 13TH.

Friday morning at early dawn our skirmishers pushed out ready for fresh attack. It was soon obvious, however, that the enemy had prudently withdrawn his main force on our *left*, leaving only a line of skirmishers there, and had fallen back to a new defensive position, a little retired from the one to which our victorious troops carried the day before. The intervening woody ground was at once possessed by our troops, and heaps of dead were the ghastly monuments of the field, now indisputably ours. But the rain, which had not checked the fury of battle, began to offer obstacles to rapid advance in force. The roads were inundated—artillery, impracticable for artillery and wagons. There was nothing left but to occupy the day in feeling the new location of the enemy, in skirmishing with his rear, and in preparing for future onsets. Our movements for these purposes were prompt and decisive, and ascertained that the enemy, having withdrawn but a slight distance, was busy at work fortifying. While the achievement of HANCOCK forced this retrogression, it was also necessitated by the decimation in battle of the enemy's troops, now no longer able to hold so extended a line of defence as before. Retreating in good order, he soon halted and compacted his troops on a narrower line.

Friday, in the main, however, was a day of quiet. Slight skirmishing occurred, as we have said, but longneeded rest came to a great part of the Army. The latter portion of the day was rainy, and the storm increased at its close. The troops not engaged in reconnoitering, however, found enough to do in the mud office of burying the dead and relieving the wounded. At noon, a congratulatory order was issued from General MEADE'S headquarters, praising the heroism of the troops, asking equal valor for the future, and stating the achievements of the campaign as follows:—

For eight days and nights, almost without intermission, in rain and sunshine, you have been gallantly fighting a desperate foe, in positions naturally strong, and rendered doubly so by extensive defences.

You have compelled him to abandon his fortifications on the Rapidan, to retire and attempt to stop your onward march to Richmond. You have forced him from entrenched position so tenaciously held, suffering, in all, a loss of eighteen guns, twenty-two colors, and 8,000 prisoners, including two general officers.

Neither the skirmishing nor artillery firing of the day inflicted important loss on either side, and but few brigades were at any one time engaged. The troops continued awaiting orders to move, since, though thoroughly exhausted by incessant exertions, they had learned to expect new labors each day; and through all the hard experience their spirits were steadfast and cheery. In spite of mud and rain, it was determined to try another movement like the bold and successful manœuvre of HANCOCK. The tactics of Tuesday rendered manifest the fact that the Rebel front was impregnable, and their right our practicable point of attack. Accordingly, our lines were to be once more shifted down to the left, in the endeavor to flank. The Fifth and Sixth corps were selected this time, for an attempt resembling that of the Second and Ninth. The position of Thursday, as already indicated, was thus, from right to left:—WARREN, WRIGHT, HANCOCK, BURNSIDE.

About 9 o'clock on Friday night the two right corps were put in motion, and marched all night to their new position. The difficulties of the march through the ankle-deep and knee-deep mud, and amid the furious storm, made the movement slow and arduous, and only endurable by contrast with the severer experience of constant battle.

SATURDAY, MAY 14TH.

The next morning found the Army confronting the enemy still further on the east. He was found also to have fallen back a little, and to have turned his lines so as to face rather more to the east, still tenaciously holding the Court-House and the forked roads. Our Army was mainly enclosed between the Po and Ny Rivers, of which the former is the chief affluent and true headwaters of the Mattaponi. The line, when finally established, stretched nearly at right angles across the Fredericksburgh and Spottsylvania road, compact and free from any great gap, and with the corps posted as follows:—HANCOCK'S Second corps on the right, BURNSIDE'S Ninth, on the right centre, WRIGHT'S Sixth on the left centre, WARREN'S Fifth on the left. On Saturday, WRIGHT had not been able to get immediately into position, and was further to the left and a little thrown back, as if in reserve. The position was a good one, on the crests of rolling ridges, and running nearly northwest and southeast, and covering the woody banks of the Ny River. There was also space for the sweep of artillery. Unfortunately, the almost indescribably bad condition of the roads had prevented the successful completion of the movement in season to authorize an attack. There was no hope of surprise, and before our artillery trains and ammunition were in position, the enemy was alert and hostile. About 5 o'clock Generals GRANT and MEADE removed headquarters to GAIL'S house, on the Fredericksburgh and Spottsylvania road, about eight miles from Fredericksburgh and two miles from the Court-House. The extremities of the two wings are about equi-distant from the house, and the skirmishing line a mile in front. This description is thus particularized, because the new disposition of forces and lines continued for several days, and till rain and mud raised their seige, and permitted a free road forward. But the obvious intent of late being to mass the line on the left, a part of the Second corps was on Sunday withdrawn from the right and moved towards the other flank; but returned immediately.

It soon became evident that, if our position was strong, the enemy's was no less so. A part of the town and of the enemy's camp and works came in sight, through the more open country, especially when viewed from the Second corps on the right. A slight cavalry skirmish arose as our advance pressed forward, and some howitzers were turned upon us. But the enemy were soon silenced, his few companies of cavalry driven in, and the ridge they occupied possessed by our forces. The Rebel position seemed to be a semi-circular line of earthworks, with rifle-pits here and there, well established on commanding heights, and the whole flanked right and left by dense woods. Artillery was already in position, and new entrenchments building. A part of the works appeared to be sodded, showing an old construction, and the utmost activity was manifest in strengthening the position. Our own lines were soon busy with rifle-pits and works, and the great armies so lately contending with bayonet and bullet, were now quietly and sedulously emulating each other with the spade.

On the extreme left, however, there was considerable fighting. The enemy, at about 8 o'clock in the morning, held a house across the Ny River, deemed easily contiguous to our lines. Some time past, a part of the first division of WRIGHT'S Sixth corps was ordered to take it. This they accomplished, charging up the hill, and driving out the enemy after a sharp skirmish. About the middle of the afternoon the enemy made a sudden and unlooked for charge on the position, in order to retake it. General MEADE, who was in the house at the time, narrowly escaped capture or injury, several bullets penetrating the frame. The onset was so fierce as to force our men back with considerable loss, and from the advantageous position thus gained the enemy threatened our left with artillery. The Sixth corps was soon thrown forward to retake the position. But being in the rear and in reserve, it could not be got up till dark. Two batteries, however, were immediately turned on the house, and these raked it with an incessant fire. At dark, AYRES' Third brigade of GRIFFIN'S First division, Fifth corps, charged up the declivity and swept the enemy off the hill, retaking the commanding position. There was commanding still later, and a part of the Second corps was reported to have driven the enemy back with loss.

SINCE SUNDAY.

Sunday, the twelfth day from breaking camp at Culpepper, was the first real day of rest to the Army of the Potomac. Its constant and severe marches by night, and its fighting by day, had disposed it for a period of refreshment. During the first three days of the week, few manœuvres of importance took place. The enemy was constantly watched, reconnoissances made, and any hostile disposition checked by instant preparation to meet him. A slight skirmish occa-

casually occurred, and the marching of corps to change position was not wholly over. A little picket firing, with shelling of the woods, however, is the most that is to be recorded. The enemy remained quiet, employing his time in strengthening his already strong position. On Sunday afternoon, BIRNEY's division of the Second corps fell back from its position on the right of the line towards the left and centre; but as the enemy's rush to occupy the deserted space, the division returned and reoccupied it, after a sharp engagement with the enemy, during which our batteries on the right opened on him. With some loss, the enemy was repulsed.

On Monday, General GRANT sent word to Washington that offensive operations had been necessarily suspended until the roads become passable; that the Army is in the best of spirits, and feels the fullest confidence in success.

The weather of Monday and Tuesday was extremely favorable to drying the roads, and on the latter day the enemy's position was carefully examined. He was found apparently strongly posted. On Wednesday morning firing commenced early, and brisk skirmishing occurred on the right, and finally settled into a heavy engagement, lasting through the forenoon and culminating in another brilliant charge on our right by HANCOCK. He drove the enemy a short distance and carried the first line of entrenchments. Up to our last advices he had steadily defeated all attempts to expel him from this position. Aside from this success the results of the engagement are understood to have been favorable, though in no sense decisive. The Rebels maintain their position with great tenacity, and officers from headquarters describe their fortifications as formidable.

SHERIDAN'S CAVALRY.

The operations of General SHERIDAN have been more complete and effectual than is usual with such expeditions. Cavalry raids are apt to be attended with more *éclat* than any others, and to accomplish less. They have usually been independent expeditions, bent on plunder, and undertaken without proper and timely concert with the general campaign. To be effectual, they should be cooperative, and bear a proper relation to the movements of infantry. Otherwise its plunder they take is comparatively trifling, the bridges they burn are rebuilt, and the railroads severed are relayed. These operations should be timed for the critical moment, preventing reinforcements, delaying retreat, or facilitating pursuit for the main army, as the case may be. For such reasons we have not been greatly jubilant over many expeditions which have exhibited commendable dash and daring, without substantial fruits.

In the campaign in Virginia, General SHERIDAN's first service was to establish during the night of May 4, crossings at Germanna and Ely's Fords for the rest of the army, which he accomplished with General WILSON's Third division at the former point, and General GREGG's Second division at the latter, General TORBERT's First division being for a time in the rear. Crossing on Wednesday, the 4th, the usual work of reconnoissance was carefully performed, GREGG's division taking the road through the centre of Ely's and westerly towards Fredericksburgh, and WILSON's division doing the same service southerly and westerly around Germanna. On Thursday, the 5th, the Army advanced, as already described in our last review of the campaign. It will be remembered that our right flank and the enemy's left rested on the Rapidan, or as nearly on the river as to be well supported there, and easily protected by artillery. It remained to cover our left, as for the enemy to cover his left, with cavalry. The point of meeting was in the vicinity of TODD's Tavern, the location of which has already been described. The chief interest of the place was the fact of the crossing of the Brock and Pamunkey roads at that point; and insignificant in other respects, it now became an important point to hold, either in view of advance or retreat, like the position at Quatre Bras, and Sombreffe.

On Thursday, the 5th, there was severe skirmishing in this region between the Third division and FITZ LEE's cavalry, and our party were rapidly and continuously driven back. CHAPMAN's brigade was chiefly engaged. The Second division coming up in support, the enemy were in turn forced to retire, and a part of the lost ground recovered. Our loss was set at about forty killed and wounded, and as many prisoners. On Thursday also, Colonel MCKENZIE's brigade of the Third division became engaged in the direction of PARKER's Store, suffering a loss of about seventy men.

On Friday, the 6th, while the great battle was going on, on the right, STUART moved down and attacked our cavalry. General TORBERT's First division,—now under command of General DAVIES, General TORBETT being ill,—held the right, and General GREGG's Second division the left. Colonel CUSTER's First brigade, First division, and Colonel GREGG's brigade of the Second division, received the chief attack, and the enemy was at last repulsed, after a long and varying fight. In the afternoon our cavalry fell back towards ALDRICH's Tavern. Near this point, on Saturday, another severe fight occurred with STUART, who seemed determined to get in our rear and at our supply trains, parked at Chancellorsville, or at all events, to clear the roads for the withdrawal of LEE's army to Spottsylvania. The fight was severe and long continued, and fought, like the preceding and other cavalry skirmishes during the week, in dense woods, the men being dismounted, and engaging with carbines. They were supported also by horse batteries. We seem to have gained no advantage, and to have gradually removed our position from the region of TODD's Tavern and the road between that point and PARKER's Store, back to ALDRICH's, about four miles distant. ALDRICH's is directly on the road between Fredericksburgh and Chancellorsville, and at the point where the Pamunkey road debouches into the other. It was especially essential for the cavalry to cover Chancellorsville and Fredericksburgh and the road between them, as well as to protect our trains and ambulance at both points.

The sudden departure of LEE, however, to his defences on the Po, relieved our cavalry of most of their duty in guarding the rear. On Sunday the Third and First divisions, following up the retreat of LEE, in advance of our infantry, came upon the enemy's rear-guard on the Brock road, and had a brisk skirmish with him, which, however, was ultimately taken off their hands by the Fifth Army corps, as already related in our description of the opening of the campaign. The remainder of Sunday was spent in preparing for the events of the morrow.

THE RAID.

It having been determined to make a raid in the enemy's rear, forage, rations, and ammunition were all prepared by Sunday night. At daylight on Monday, the 9th, the Second division, GREGG's First division in advance, WILSON's Third in the centre, and GREGG's Second in the rear. The march was first towards Fredericksburgh, but when about three or four miles from the town, the column turned to the right on to the Fredericksburgh and Childsburgh road, and, travelling southerly on this road, passed round the enemy's flank, down to the south of Spottsylvania Court-House towards Childsburgh, at which latter point the advance halted. Starting thence on the same road, which then bears southerly and westerly, they reached and forded the North Anna River at Anderson's bridge, about dusk, two miles below Hanover Dam Station. GREGG's brigade of the First division at once occupied the station, and there were fortunate enough to overhaul a train of 378 of our wounded and prisoners, including two colonels and many other officers captured in the late operations, and moving "onward to Richmond." The small guard scattered, and a very pleasant and joyful reason ensued. Half an hour more would have hurried them by railroad towards Libby prison.

The command now quickly fired the trains of cars, with the depôt of supplies, destroying two locomotives, three long and heavy trains, with a large quantity of bacon, besides meal, flour and other supplies for LEE's army. Eight miles of the Virginia Central Railroad, connecting Richmond with Gordonsville, was then destroyed. The ties and bridges were burned and the rails twisted, so as to make the work effectual. While this was going on in advance, the Rebels had got scent of the movement, and harassed our flank and rear in strong force. The Sixth Ohio, in the extreme rear, was roughly handled, and many of them wounded and taken prisoners by a vigorous charge straight through their columns. The First New Jersey supported them, and at last the Rebels were driven off. The column bivouacked on the North Anna, occupying both sides, the enemy skirmishing a little through the night.

On Tuesday morning, May 10th, the Rebels began to shell the camp, and there being no reason for remaining, our forces moved directly south, but found the enemy in front annoying our advance. The advance was continued, however, across Little River, with a short halt at Negrofoot. The South Anna was crossed at Ground Squirrel Bridge, which lies due south of Beaver Dam, and the bridge destroyed. The column camped near GOODALL's, the Rebels molesting it, as before, during the night, by sharpshooters.

At 3 o'clock on Wednesday morning, May 11th, General DAVIES' First brigade of GREGG's Second division, was dispatched to Ashland Station, seven miles to the east, on the Richmond, Fredericksburgh and Potomac Railroad. The First Massachusetts, reaching the train at daylight, charged through it, driving the Rebel cavalry before them. They then fired the depôt, and destroyed stores in considerable quantity, six miles of railroad, three culverts, two trestle bridges, several Government buildings, a locomotive and three trains of cars. On the return, the regiment was assailed by a severe fire from houses in the town, and left about thirty men in the hands of the enemy.

The advance, meanwhile, had pushed on, and destroyed track still further along, on the same road, at Glen Allen Station. As it approached Richmond, the column found its march disputed more and more stubbornly. At length, the Rebel cavalry, concentrated under General J. E. B. STUART at Yellow Tavern, attacked in force General DEVENS' brigade of MERRITT's First division, our advance. A brisk and severe contest ensued, CUSTER's and GILL's brigades coming up in support. WILSON's division soon arrived and formed on the left of MERRITT, and the enemy was driven towards Ashland.

A force, meanwhile, moving down the Brock road, entered the outermost picket defences of Richmond. This Rebel line was taken by a gallant charge of General CUSTER, who rode at the head of his brigade. Here about a hundred prisoners were captured with a section of artillery complete. General J. E. B. STUART and Lieutenant-Colonel PATE were mortally wounded, and have since died. The former is an irreparable loss to the enemy.

During the night of the 11th, the Third division made some reconnoissances around the second line of the enemy's works, but no further advance was attempted in that direction, and our force turned next morning southward, striking the Chickahominy. It had been destroyed, but was rebuilt under galling fire, and crossed by the First division, DEVENS's brigade in advance. A brisk fight ensued, the Rebels attacking both in front and rear. Generals GREGG and WILSON, however, succeeded in repulsing them in the rear, and the bridge being rebuilt, our force succeeded. Mechanicsville and Coal Harbor were next reached, and the column encamped towards evening at Gaines' Mills. The march of May 13th took the force to Bottom's Bridge, and thence the column proceeded to Turkey Bend, and obtained supplies from General BUTLER, four miles distant, across the river, at Harrel Landing. At last accounts the cavalry still remained in this region.

It will be seen that considerable damage was done to the bridges and railroads. Our loss was not large, being probably less than 500, while the enemy must have suffered as severely. Thus end the achievements of the cavalry for the present.

GENERAL BUTLER'S OPERATIONS.

FROM the James River we learn that having abandoned his apparent intention to advance on Petersburgh, General BUTLER has undertaken the siege of Drury's Darling, the preliminary operations of which were progressing with gratifying success at the date of our latest advices. Our account last week closed with the engagement of the 9th inst., at the close of which day the Rebels had been driven across Swift Creek, and our forces occupied the north bank of that stream, some three miles above Petersburgh. The main portion of our Army remained in this position skirmishing with the enemy during Monday, the 9th, while a force under General TERRY was sent toward Richmond advancing up the railroad to a short distance beyond Chester Junction, meeting with but

little opposition. Meanwhile, under cover of this advance, the railroad was destroyed for a distance of eight or ten miles, including a portion of the branch road from Chester Junction. Dispatches being received from the War Department, announcing that Lee was in full retreat for Richmond, pursued by General Grant, General Butler, consulting prudence, drew in his forces under cover of his entrenchments, fearing an attack from such portions of Lee's army as might arrive in Richmond. As our forces were preparing to retire, a Rebel flag of truce appeared, representing Bushrod Johnson, and asking a truce —1st, to bury their dead; 2d, to exchange the wounded prisoners; 3d, to parole all officers and men captured. General Turner was not to be taken by this dodge, and detained the flag of truce, referring the matter to General Butler, and sending another flag with his division. General Butler promptly replied to the requests of Bushrod Johnson: 1st, we have buried your dead; 2d, I accept your proposition; 3d, no exchanges or paroles can be given, until the Confederate States recognize colored soldiers.

Until Friday, the 13th, no further movements were undertaken—a portion of our force being employed in strengthening the fortifications. On Thursday, the 12th, a heavy force from both corps was sent out, under Generals Gillmore and Smith, to cover the movement of a cavalry expedition sent out under General Kautz, for the purpose of severing railroad communication between Richmond and Petersburg. Leaving a sufficient force under General Ames to watch the enemy at Petersburgh, General Gillmore advanced with his corps on our left, up the railroad toward Chester and Richmond. General Smith, with the 18th and a division of the Tenth corps, advancing in the same direction on the right, up the Richmond and Petersburgh turnpike, between the railroad and the James River. A little above Werbottom church —a place whose ordinary importance has not been sufficient to secure for it a location on any map—the Third New York, Colonel Alford's brigade, Turner's division, Tenth Army corps, who were deployed as skirmishers by General Smith, came the enemy, and drove them at a brisk pace for a mile or more. Coming to bay at last in a stronger position, the Rebels made a determined stand, and a sharp engagement ensued, the enemy being finally driven back. Thus skirmishing until dark, the troops under General Smith advanced that night as far as a swift little stream, called Proctor's Run, some three miles from Fort Darling, and within sight of that fortification.

Meanwhile, General Gillmore had taken advantage of the occupation of the enemy's attention by General Smith to press forward on the left to the neighborhood of the Half-way-house, where we halted for the night.

On Friday morning the Rebels were found to have disappeared from our immediate front, and an advance was ordered all along the line to uncover their position, which was concealed by the woods and thick undergrowth. They were soon discovered in strong force under the protection of their fortifications, subsequently found to consist of a line of earthworks stretching for a distance of several miles from a point a quarter of a mile beyond the railroad nearly to the bank of the James. These were the outer line of defence about Fort Darling, and behind these inner line works the enemy retired after some sharp skirmishing. It was determined to dislodge them from this position by turning the works on the left. Briskly engaging the enemy in heavy skirmishing along the whole line, our left, under General Gillmore, was ordered to swing gradually around upon its centre and right, while the 3d New Hampshire, 10th New York, and 24th Massachusetts Vols., were sent to turn the right flank of the Rebel works. Unobserved by the enemy, whose attention was occupied by the demonstration in front, the flanking column wound through the woods, guided by a negro along a bridle path which led a little to the left of the outer edge of the fortifications. Here, forming in line of battle, under cover of the woods, they charged up a steep hillside and across an open space some twenty or thirty rods in width in the face of a heavy volley of musketry. Before they had opportunity for another volley the Rebels were driven from their position, which was occupied by our troops who took thirty prisoners. Our loss in this affair is placed at 130. Major Randleyt, of the Third New Hampshire, and the Adjutant of the regiment, were slightly wounded. Captain Ely was killed. Lieutenant Cloudy, of the Twenty-fourth Massachusetts, was also killed. Finding their position turned by this movement, the next morning (Saturday, the 14th) the enemy, under the cover of a vigorous demonstration, abandoned the whole line of fortification and withdrew to a second and stronger line of works some three quarters of a mile beyond. The works from which we have driven them are described as very strong, the parapet being not less than ten feet thick, with innumerable traverses, and bold artillery, and broken by bastions flanking one another.

In the brief dispatch announcing the carrying of the enemy's first line, General Butler reports that the Rebels had retired into three square redoubts, upon which he was bringing his artillery to bear with effect. As these works command the entire line of defences, their possession is necessary to enable him to secure his present position. Our batteries, aided by sharpshooters, are reported to have silenced the enemy's guns on Saturday, and nothing but sharpshooting was heard from them during the day. At 4 P. M. a shot from one of our guns exploded a magazine in the outer works of Fort Darling, causing a great cheering along our lines. About 9 o'clock in the evening the Rebels attempted to advance on our lines near the Petersburgh Turnpike, but after a short and spirited engagement they were driven within their works. About noon on Sunday, the 15th, the Rebels came out of their fortifications and attacked Hinkman's brigade. The fight was altogether with musketry, and lasted till 4 o'clock. The enemy were driven back to their works. Sharpshooting was continued along the lines, and the Rebels' artillery was kept silenced. At daylight on the 16th—which is our latest report—the sortie was repeated, our right wing being attacked with fury *en masse*, which opens fire upon our fleet but is speedily driven off. The cavalry force of General Kautz returned to City Point on the 12th inst., with 140 prisoners. They report having destroyed several miles of the Danville Railroad, burned a railroad bridge over the Appomattox, destroyed the canal, and the embarkments of the Lynchburgh and Richmond Canal.

General Heckman is reported captured by the Rebels.

GENERAL SHERMAN'S OPERATIONS.

Our reports from the Army of General Sherman continue to be confined to the usually brief telegraphic dispatches, which furnish us with but few of the details of his movements. As we stated last week, the advance of our Army was in three columns, General Thomas moving against the front of the Rebel position from Ringgold while General Schofield, with the left wing of the Army, consisting of the Twenty-third and Fourth Army corps, advanced from Cleveland, Tenn., via Red Clay, on the Georgia line, to unite with Thomas near Tunnel Hill, Ga.; McPherson meanwhile executing a brilliant flanking movement on Resaca. Little resistance to our advance was made at Tunnel Hill, the only purpose of the Rebels being, apparently, to hold our forces in check until they could make good their retreat to the stronger position of Buzzard's Roost. With the loss of but four or five wounded and none killed, the Fourteenth corps, under General Palmer, after a brief skirmish, took possession of the hill through which the Georgia railroad passes by a tunnel eighteen hundred feet in length. Directly opposite Tunnel Hill is "Rocky Faced Ridge," a rugged, stony hill, rising precipitously to a height of some five hundred feet. Between Tunnel Hill and Rocky Faced Ridge lies a narrow level valley, less than a mile wide and some three miles in length, running north and south. The outlet to this valley, toward Dalton, is through a deep, narrow, mountain defile or pass, known as Buzzard's Roost; a position easily defended, with steep, rugged sides along which artillery can be planted in such positions as to sweep all approaches and sacrifice any assailing force. The approach to this pass across the valley was defended by a line of rifle-pits and earth-works. Marching down into the valley from Tunnel Hill, the forces under General Sherman early on Sunday morning, May 8th, advanced against the Rebel position in the opposite side of the valley at Rocky Faced Ridge and Buzzard's Roost Pass. After severe skirmishing for several days it became fully apparent that Dalton was almost, if not altogether, impregnable to a front attack. Our loss in this skirmishing was about 800 killed, wounded and missing, the greater number being slightly wounded. The chief sufferers were Geary's division of Hooker's corps (Twentieth) and the Fourteenth corps, Palmer's corps (Fourteenth). While General Sherman engaged the attention of the Rebels here, General McPherson, executed a successful flanking movement to Snake Gap, which opens upon Resaca, fifteen miles south of Dalton. As soon as he had made good his position there, he was joined by Sherman, with the main body of his army. Finding their position at Buzzard's Roost thus rendered untenable, the Rebels, under General Joe Johnston, retreated on Resaca, which they appear to have reached in season to oppose the advance of General Sherman, who had the longer line of march. On Sunday, the 15th, the two main armies again came in collision, our troops pressing forward on the left and storming two of the earthworks, behind which the Rebels opposed our advance upon Resaca. On Monday, the 16th, an advance was made by General Sherman all along the line, and after a sharp fight, the Rebels were driven from their fortified position with heavy loss. It is reported at eight guns and 1,000 prisoners. We have a less authentic report of the capture of nine Rebel trains going South with supplies. No estimate is made of the Rebel killed and wounded. Ours is stated by General Sherman at 3,000 killed, wounded, and missing, most of the wounds being slight ones. General Kilpatrick, Mawson and Wilder are reported among the slightly wounded. At last accounts the Rebels were in rapid retreat from Resaca southward, and our forces in vigorous pursuit, General Sherman having crossed the Oostanaula on Monday, the 17th, *en route* for Kingston, which is sixty-two miles northwest of Atlanta, at the junction of the branch railroad from Rome. Previous to their retreat the Rebels burned the railroad bridge crossing the Oostanaula at Resaca, but the railroad and telegraph to that place were reported to be in working order.

Still later official accounts announce the arrival of Sherman at Kingston on the 18th, his advance on the enemy on the 19th, and their retreat. Davis' dirt, shoes and hats.

OTHER OPERATIONS.

The popular interest in the Southwest, lately so acute, has now very much subsided, so much more important are the campaigns in other quarters. But the appointment of Major-General Canby to the command of the trans-Mississippi Department has been received with a general feeling of relief. How soon he can organize his command it seems hard to determine. General Banks at last account still held Alexandria. It would be hard to be driven out of that position, after so many Union obsequies, speeches, and elections. We think it can be held, although it is a long span to New Orleans, and the victorious Rebels are molesting us on the river and endeavoring to blockade it between these points. Late advices say that General A. J. Smith will be compelled to march overland to the Mississippi, fighting his way out. This is not official.

The army of General Steele, having returned to Little Rock, seems fully capable of holding that city. Meanwhile, the enemy is endeavoring to effect a blockade of the Red, Arkansas and White Rivers, though as yet he has not partially succeeded.

The particulars of the unfortunate check received by General Steele's expedition will be found in the dispatch from Secretary Stanton published elsewhere. The results of this expedition thus far are certainly such as to disappoint the calculations which were based upon it, and it may as well be counted out as the consideration of future movements. General Averell has been doing some effective work with his cavalry on the Lynchburgh and East Tennessee Railroad, in Southwestern Virginia, and General Crook's column, descending from the mountains to the northward, has tapped the same road at Newberry, Va., and near the same locality as reported by Averell's column, and in three fights won a decided victory over the combined forces of John Morgan, Sam. Jones, and Jenkins. The enemy lost six hundred

killed and wounded, and three hundred prisoners. General A. G. JENKINS fell into our hands, mortally wounded. Our loss was four hundred killed and wounded. A railroad bridge over New River at Newbern, with several miles of track, was completely destroyed. We have reports also of guerrilla movements and outrages on the borderland.

REMINISCENCES OF GENERAL SEDGWICK.

We last week paid some slight tribute to the character and services of that noble soldier, JOHN SEDGWICK. We will now offer a few personal reminiscences concerning his life and habits, which may serve to explain in part the veneration in which he was held by all who were permitted to come within the circle of his influence.

General SEDGWICK was a bachelor, and probably on account of the absolute necessity of domestic and married life and of paternity, he attached himself the more strongly to those with whom he was connected in the intimate relations of the camp. He lived among his staff like a father among children—encouraged their friendly associations, and was apparently never more happy than when he collected them into his tent to join in an elegant little supper. The attachment of the members of his staff, and others who were brought into close connections with him, was very ardent; while having an affection for him as a man, the influence of his character, and of his acquirements, and capacity caused them to entertain the most respectful regard.

He was exceedingly quiet and amiable in his department, exhibiting very little consciousness of self. Not indulging in much conversation, he would occasionally make a remark, which by its humor would excite general laughter, or by its keenness and pertinency dispose at once of any subject which might be under discussion. A person seeing him in mixed company, retiring and silent, might in ignorance of his capabilities, have overlooked him entirely. But any one who considered him at all deficient would soon be convinced by a little observation of him in conversation or action, that his mind was of the most vigorous, penetrating and profound kind. Only long acquaintance, however, would elicit the knowledge of the extent of his attainments and the correctness of his conclusions on affairs which require profound thought. In matters pertaining to his profession he was fully posted; he thoroughly understood all the duties of a soldier, and could handle his corps with a promptness and precision which would excite any one's wonder. Without officiously interfering with his staff-officers in the conduct of their business, he kept himself constantly informed of all the details of their arrangements, and incited them to constant vigilance. All the Departments of the command were, therefore, in excellent condition.

He was plain and sometimes negligent in dress. When first assigned to the Sixth corps, the troops were, of course, desirous of becoming acquainted with their new commander. The first march under him was across the Rappahannock in May, 1863, when he commanded the left wing under General HOOKER. It was amusing to hear the remarks of the men upon him as he rode along without any pretension or ostentation. Subsequently, when under the direction of the height of St. John's river with the assault, and when at Salem Church he was with the front lines of the troops under the hottest fire of the Rebels, their estimation of him rose to enthusiasm. In the forced marches made by the corps during the Gettysburg campaign, the men of the Sixth corps, who had christened "SEDGWICK'S cavalry," and would tramp along over their twenty-five or thirty miles a day with the greatest good humor, bantering among themselves upon their ability to march any necessary distance further, when they saw the well-known staff with their commander, would cheer.

His negligence of dress sometimes produced amusing scenes. Once, while General SEDGWICK was sitting in front of his tent, with his beard showing the want of a razor for several days, his coat off and sleeves rolled up, enjoying the cool air of the evening, after a fatiguing day, a newspaper correspondent rode up, and, with a patronizing air, exclaimed—"My man, can you tell me the road to the Station?" The general with the greatest *bonhomie* immediately gave him the information desired, and pointed out to him his road. Another instance of the following:—A woman came into the headquarters from the country with a fine turkey, and going to General SEDGWICK, who was sitting *en deshabille* on the steps of a house, inquired for the general, saying she had brought him a turkey, because he had sent a guard to her house to protect her property. "Won't you sell me the turkey?" said the general: "I will pay you well for it." "No," replies the woman, "I have brought it to the general, and no one else can have it." The discussion was kept up for some time, until finally the general called to an officer in full uniform, saying, "there, go give it to him." She immediately went and delivered the turkey to the officer, who took it in amazement, while she gave utterance to some voluble thanks. Some of the bystanders, who had heard the whole matter, subsequently informed the woman's conceptions, and she came up to the general blushing and giggling, apologizing and expressing her regrets that she had given the turkey to the wrong person. The matter was rectified very much to her satisfaction. It must not be inferred, however, that the general was slovenly. On the contrary, on all proper occasions he conformed rigidly to the requirements of costume, and expected it in his officers. His negligence was only the absence of any desire to make a parade of his rank when not necessary. In a permanent camp his person, and his tent, were always as clean as those of the headquarters were kept in the best condition as to order and cleanliness.

The same absence of any desire for parade, or to make his rank an apology for superior comforts, induced him always to avoid, whenever he had the choice of quarters, but to have them pitched in the fields or woods. In fact, when exigencies required him to establish them near buildings, he would sleep in his tent through preference. On active campaigns he would even refuse to allow tents to be pitched —sleeping himself and expecting his officers to do so—either on the ground without covering, or under a simple fly (the extra canvas roof of a wall tent). This was the case at Gettysburgh, where he remained on the front of a hill exposed to the fire of the Rebel cannon, declining to go behind the crest.

It is no unusual thing in the present condition of warfare and the extent of artillery range for officers of all grades to be exposed to fire. The gallantry of American commanders induces them to put themselves at the head of their troops when important results are to be achieved. But none, certainly, have ever been more frequently in situations of danger than General SEDGWICK. He was never far in the rear of his troops. At Antietam he was wounded by a bullet; during the terrible fighting of his corps on the Rappahannock in May, 1863, he was in the thick of the battle; at Gettysburgh he was, as we have said, in front; and now he has fallen while personally superintending some details in the advanced line of his command. His fate is similar to that of the gallant RAYMOND, killed at Gettysburgh. He, too, risked his life in every battle, under the influence of the desire to supervise personally the arrangements of his troops.

Like all old officers, General SEDGWICK was fond of a fine horse. Last summer the officers of the division which he formerly commanded joined in a purse to present him with a sword and equipments. The presentation was fully reported at the time, and caused great gratification to the general. The horse was rather too restive for him to ride in comfort, but although he never mounted him, he regarded him with great pride, both for his own sake and the manner in which he was acquired.

General SEDGWICK had arrived at that age when physical ease and comfort are highly appreciated, and none enjoyed them more than he when their enjoyment was consistent with duty. But no one was more in the arrangements for a conflict he was indefatigable. His health was usually vigorous, his physical frame stout, and his constitution enduring. He would undoubtedly, in the common course of nature, have had a hale and hearty age. He never spared himself in the discharge of duties of action, nor assumed the privileges to which his rank entitled him. None of the younger men could say that their activity was not wearied when General SEDGWICK sought repose.

Finally, he was most conscientious in the performance of his duties. He did not consider himself in the service of the existing administration, but so far as his duty as a soldier was concerned, he never expressed opposition. That he was destitute of any ambition for renown or position is certain, for opportunities for both have been offered him. His faithful discharge of duty was actuated by a true love for his profession, and an honorable desire to acquit himself of all his obligations. We know of no example in the Army which for soldierly excellence is more deserving of imitation than that of SEDGWICK. May we always have such commanders.

BRIGADIER-GENERAL STEVENSON.

Brigadier-General THOMAS G. STEVENSON was the son of Hon. J. THOMAS STEVENSON, a distinguished citizen of Boston. In the New England Guards, a militia company, he rapidly rose from the ranks through non-commissioned and commissioned grades, till the opening of the war found him Major of the Fourth Battalion of Massachusetts Infantry. At the Governor's call, he took his command to Fort Independence, and performed a month's garrison duty there. Returning, he recruited the 24th infantry regiment, in the fall of 1861, personally drilling it with great care and skill. The regiment joined FOSTER'S (1st) brigade in General BURNSIDE'S expedition, sailing from Annapolis January 6th, 1862, taking some part in the reduction of Roanoke Island on February 8th, and a full share in the capture of Newbern on March 14th. Washington, N. C., being taken a week later, the 24th occupied and garrisoned it, successfully repelling the enemy's attack on it, later in the year. Colonel STEVENSON conducted several expeditions into the Rebel lines, and had charge of a brigade in the reconnoissance to Tarboro', and in the movement on Goldsboro' in December. He took part in the spirited battles at Kinston and Whitehall. He was appointed a brigadier-general, under date of December 18th, 1862. General STEVENSON being organized a land force for operations against Charleston or Wilmington, assigned General STEVENSON to command a brigade in General NAGLEE'S division. Some difficulty arose soon after between General HUNTER and STEVENSON, from the latter's disbelief at that time in the policy of arming slaves; but it was speedily and honorably removed. His appointment as Brigadier-General was confirmed, dating March 14, 1863.

General STEVENSON was stationed in the reduction of Morris Island, and, at the assault on Fort Wagner, in July, 1863, commanded the reserves. In the fall of 1863, he returned North to recruit his health. Recently, he was assigned to the charge of the first division of the Ninth Corps, under his old commander, General BURNSIDE, with whom his service has made him a favorite subordinate. He fell on Tuesday morning, May 10th, at 8½ A. M., in the severe battle at Spottsylvania, a rifle ball piercing his head, while he was surrounded by his staff, cheerful and confident up to the moment he fell.

The death of General STEVENSON is a calamity to the Ninth Corps and to the Army, as well as to the great corps and army of his personal friends. As a youth and a leader in athletic sports, he had attracted to himself very many of the best spirits in the Boston city, of whom he was the admired centre. His manly and straightforward conduct insured respect, and his sympathetic friendship inspired affection. He possessed to a remarkable degree that happy union of dignity and *bonhomie*, which made his bearing easy and unaffected, and won the love of any man he met. He entered the militia with characteristic energy, and quickly showed his superiority. He became unsurpassed as a drill-master and disciplinarian. Perhaps he was unequalled, even, in these respects, by any man of his years in the State. Officers and men of his command have enjoyed his command, found unvarying testimony to his skill and popularity. The men in the ranks were moved to great respect for him. His brother officers and subalterns cherished mingled feelings of affection and esteem. His superiors had thorough confidence in General STEVENSON. Brave and prudent, both hearing witness to the military turn of his character and to the maturity of his judgment. Struck down at the age of 28, his career was full of promise. A wide circle of admirers will deplore his fate, as they were always proud to speak his praise.

Devoid of boasting, truthful, honorable, independent, kind to his men, generous and faithful in friendship, brave and cool in battle, careful, skillful and trustworthy in military dispositions and in obedience to orders, General STEVENSON has passed away to the swelling lists of the historic heroes of the war.

BRIGADIER-GENERAL JAMES C. RICE.

BRIGADIER-GENERAL JAMES C. RICE, killed in the battle at Spottsylvania, was a native of Worthington, Mass., and was graduated at Yale College. Thence he went west to Natchez, Mississippi, where he remained some years, teaching school, being also engaged as literary editor of a newspaper. Returning to New York he entered upon the practice of law. At the breaking out of the war General RICE joined the Garibaldi Guard, a regiment raised by Colonel D'UTASSY, as a private. Subsequently, and in view of his soldierly qualities, young RICE was promoted to the lieutenant-colonelcy of the Forty-fourth New York State Volunteers, or in which he was better known at the time of their organization, the Ellsworth Avengers. With this regiment he served with distinction through the Peninsula and subsequent Maryland campaigns, was promoted to a colonelcy, and at Fredericksburg he bravely and distinguished services was made the rank of brigadier-general.

General RICE was a man of strong religious and patriotic convictions, and his rapid and remarkable elevation from the ranks to an exalted field position was earned by merit, not in any way bought by outside influence.

The funeral services over his remains were held last Sunday at the Madison Avenue Presbyterian church, New York, of which church he was an active member. The Rev. WILLIAM ADAMS, D. D., delivered a funeral discourse, in which he glanced at the history of the heroic and noble soldier "who gave his sword to his country and his pen to the "service of the Saviour." The coffin was wrapped in the American flag, and on the lid were wreaths and crosses of jasmines, and the sword worn by the father of the deceased in the war of 1812. Amongst the pall bearers were Major-General DIX, and Brigadier-Generals HAYS and ANDERSON. The remains, accompanying the mourning relatives, left Hudson River Railway depôt, and taken to Worthington, Mass., for burial.

REBEL ACCOUNTS.

OFFICIAL DISPATCHES FROM LEE'S ARMY.

NEAR SPOTTSYLVANIA COURT-HOUSE, VA., May 8.

To the Hon. J. A. SEDDON:—

After a sharp encounter with the Fifth army corps, we were attacked by WARREN'S and TORBETT'S divisions of cavalry. General R. H. ANDERSON, with the advance of our cavalry, repulsed the enemy with heavy slaughter, and took possession of the Court-House. I am the more grateful to the Giver of all victories that our loss is small.

SPOTTSYLVANIA COURT-HOUSE, } VIA GUINEY'S, May 11, 1864. }

The HONORABLE SECRETARY OF WAR:

General GRANT's army is entrenched near this place, on both sides of the Brock road. Frequent skirmishing occurred yesterday and to-day, without developing or discover the position of the other. To-day the enemy shelled our lines and made several assaults with infantry against different points, particularly on the front of General R. H. ANDERSON. The last, which occurred after sunset, was the most obstinate; some of the enemy leaping over the breastworks. They were easily repulsed, except in front of General DORN' brigade, where they drove our men from their position, and from a battery recently captured. The men were soon rallied, and by dark our line was re-established and the battery recovered.

A large body of the enemy were also routed our left on the evening of the 9th, and took possession of the road about midway between Shady Grove Church and the Old Furnace. GENERAL FAMILY, with a part of HILL'S corps, drove them back this evening, taking one gun and a few prisoners.

Thanks to a merciful Providence, our casualties have been small.

Among the wounded are Brigadier-Generals HAYES and H. H. WALKER.

FREE REPORTS.

[From the Charleston Mercury, May 16.]

The Yankee forces at Culpepper Court-House moved by the old plank road and crossed the Rapidan at Germanna ford. They left Culpepper Court-House on the Orange and Alexandria Railroad, moved by the old turnpike and crossed the Rappahannock at Rly's ford, four miles below the junction of the Rapidan and river and eight miles in an air line from Germanna ford. The conflict opened at noon Thursday, May 5, and was a considerable engagement between EWELL's corps and the Fifth corps of Yankee infantry. The collision took place near Parker's Store, where the plank road debouches into the old turnpike. This point is in Spottsylvania county, about eight miles above Chancellorsville and twenty-four miles below Orange Court-House. The night of the 5th ended our day with the complete repulse of the enemy on all sides and the capture of one thousand seven hundred Yankee prisoners and four pieces of artillery. Fighting was renewed on the next morning (Friday), the 6th inst. The battle field was about five miles lower down the road, where the old General LEE states in his dispatch to the War Department, near Wilderness Tavern. The enemy were soon driven back on Chancellorsville, so that the previous day's work had been taken place at or near the old Chancellorsville battle ground. The attack of the enemy was desperate and violent, but was defended in every point by the Southern. Saturday the battle was renewed; and while the enemy's whole line was steadily held in check, General JOHNSON's brigade, by a brilliant charge, turned his right, cutting him off from Germanna ford, and necessitating a hasty withdrawal of his force to-ward Rly's. Our accounts of the subsequent operations are scanty, but a severe cavalry engagement had occurred on Sunday, in which the enemy was "repulsed with great slaughter." GRANT, at last accounts, had abandoned the position to which he had been driven, and in which his right rested on Rly's ford, and was marching off down the river in the direction of Fredericksburg. Among the killed and losses reported on General JENKINS, killed, and Lieutenant-Colonel HUNTER, and Captain MCCORKLE, severely wounded. On the Yankee side, General WADSWORTH was killed in the first day's battle, and Generals T. SEYMOUR and SHALER captured, with seventeen hundred men. The rebel loss on the 6th instant was reported at five thousand men killed and wounded. Colonels NANCE, MILLER, BOOKLER, and LAIDLAW were killed. The rebels fought desperately, and the fighting entirely with musketry. It is reported that General STUART was severely wounded. General PRICE, and his unconditional surrender demanded. Results not known. General BEAUREGARD reports the sinking of a Yankee gunboat, and the disabling of two monitors by the ram *Albemarle*, in the waters of North Carolina.

[From the Richmond Dispatch, May 12.]

The following private dispatch, from Major STAUNTON, of Fredericksburg, was received yesterday. It refers to the repulse mentioned in General LEE's telegram:—

GUINEY'S, May 11, 1864.

I came here to obtain information of the battle-field. I hear nothing but the statement that citizens have been arrested as hostages for prisoners we captured there on Sunday.

There was severe fighting yesterday near Spottsylvania Court-House. The Yankees, drunk with liquor, attacked our entire entrenchments and were repulsed with terrible slaughter.

Monterey Gap was heard to-day in the same direction. The news is generally favorable. M. STAUNTON.

Some anxiety was felt in the public mind as to the supplies for General LEE's army, when it was announced as the fact that all the railroad damage done by the raiders has been repaired, and General LEE's line of communication is intact.

[From the Richmond Enquirer, May 14.]

BATTLE-FIELD NEAR SPOTTSYLVANIA COURT-HOUSE, } VIA LOUISA COURT-HOUSE, May 11, 1864. }

There was heavy cannonading all day yesterday. About 8 o'clock, last night, the enemy having got possession of the road leading to the main road to Louisa Court-House with a large force, HUNT's division was sent to drive them off, which was accomplished with but slight loss to us. Our troops drove the enemy back some three or four miles, and out of their lines of breastworks, capturing seven pieces of artillery, one caisson, and some one hundred and fifty prisoners.

Among the wounded on our side was Brithsdier-General H. H. WALKER, of Virginia, whose foot has been amputated.

Between ten o'clock and nightfall the enemy made repeated assaults upon FIELDS' division, but were handsomely repulsed in every instance by our line of skirmishers, FIELDS' line of battle never firing it necessary to engage them. FIELDS' loss was very trifling.

Very near dark the enemy made a vigorous and determined assault on Brigadier-General BATTLE, driving DANIEL'S and DOLES's lines of battle from their breastworks, and capturing six pieces of our artillery.

JOHNSON'S North Carolina, WALKER'S Stonewall, Va., and GORDON'S Georgia brigades, however, quickly came to their assistance, driving the enemy back and recapturing our lost guns.

The enemy's loss is said to be very heavy, especially in FIELDS' and DOLES' front. The enemy are certainly fighting with great nerve and desperation.

The Yankee Major-General Sedgwick is certainly killed, and it is reported that Generals WRIGHT and NEW are killed.

On other parts of the line yesterday there was nothing but heavy skirmishing.

HAYES, of Louisiana, was wounded in the leg yesterday, but not dangerously.

Fredericksburgh was occupied by the enemy Sunday night.

The enemy have three pontoon bridges over the Rappahannock.

The town is said to be filled with Yankee wounded, the numbers being estimated as high as fifteen thousand.

The enemy's force is said to be about sixty thousand,—some have it forty thousand.

STUART's cavalry are also unceasingly fighting and pursuing the enemy, and have done excellent services. Our position is very strong.

GRANT has issued orders congratulating his troops on their success—telling them that Petersburgh was in the hands of the Yankees, begging them to fight hard.

Our troops, generally, are in fine spirits, in a hopeful, and confident of final success.

The enemy, in a raid around our lines, captured a few of EWELL's ordnance wagons, and re-captured some of their prisoners on their way to the railroad. Up to noon to-day there had been no engagement, except the usual skirmishing and occasional discharges of artillery on our right.

Everything is progressing well, and the army is in no danger of suffering. [Signed] R. E. LEE.

REPORTED BATTLE THURSDAY.

Various rumors were afloat yesterday evening concerning a battle reported to have been fought on Thursday, between General LEE and the Yankee forces, under GRANT, at Fredericksburgh, in which the enemy were represented to have been very determined in their efforts, advancing six times to the assault, and as many times being repulsed, the slaughter of Yankees, according to report, being unprecedented. A dispatch is stated to have been received by the PRESIDENT last night announcing the fact, but the contents did not transpire.

[From the Lynchburgh Republican, May 8.]

The gallant Lieutenant-General LONGSTREET was expected to arrive in this city on Sunday evening. We are rejoiced to learn that he will not only arrive on that day, but that in a few days he will again be in the field. We can but illy afford to lose the services of so skillful and gallant an officer as General LONGSTREET in this period of our fate.

[From the Richmond Examiner, May 12th.]

The enemy have concentrated in Virginia. If beaten here he is beaten everywhere. *If he wins here he wins everything.* The war might continue, the Confederacy, might possibly survive—*but if Virginia is lost, the present Confederate organization will have probably ceased to exist.* And now all on the government to bring up the troops at its command.

FROM THE SOUTH SIDE OF RICHMOND.

THE ENEMY FALLEN BACK TO BERMUDA HUNDRED.

[From the Richmond Dispatch, May 12.]

It would seem that the enemy have changed their plan of operations since the battle of the 6th. The following dispatch from General RANSON was the first intimation of the change:—

DERWYN'S BLUFF, May 11, 1864.

The enemy fell back last night from their position yesterday towards James river, and are now encamped on the Bermuda Hundred opposed in large numbers on James river, in the vicinity of Howlett's and Trent's, and in force on the road to Petersburgh.

Shortly after the reception of this intelligence it was rumored that the enemy were crossing to this side of the river, but no movement of the kind has occurred since. Up to yesterday afternoon, when this dispatch was received by General BEAUREGARD—

CHAFFIN'S FARM, May 11, 1864.

The enemy's pickets do not extend to this side of DERWENT'S house. They are not opposite COX's wharf, as reported this morning, and there are no signs of crossing to this side.

Yesterday evening there was no Yankees at Port Walthall, nor along the line of the railroad or turnpike from Petersburgh to this city.

Last night our official dispatch from the commanding officer at Petersburgh announced the fact that the enemy had fallen back to the river (Bermuda Hundred) and were entrenching.

Intelligence through our signal corps states that the enemy were cutting down trees and attempting to block up the river with them, upon the apprehension, probably, that the iron-clads which they say are at Richmond would go down the river.

The movement on the south side, as at first projected, is thus abandoned. The enemy have fairly retreated, whether with the purpose of reinforcing or not is not known. If the Confederate government really had any iron-clads at Richmond now they would be useful.

THE FIGHT AT CHESTER.

CHESTER, VA., May 10.—The Yankees have been repulsed from this point with the loss of one thousand killed and wounded. All the Yankee prisoners taken, one thousand in number, were sent to Danville on Saturday. Before leaving they became very refractory. The enemy in Chesterfield county have withdrawn from the railroad to their entrenchments. General BEALE is here now and Gen. GILMORE are commanding the expedition, with their headquarters at City Point. The Yankee force here is entrenched. Beast BUTLER had a narrow escape from five of our pickets at City Point on Friday evening.

REPORTED HASTY RETREAT OF THE UNION FORCES.

[From the Petersburgh Express, May 12.]

About half-past eleven o'clock on Friday night the citizens of Petersburgh were startled by several heavy discharges of musketry in Chesterfield county, the sound proceeding from the direction of the Jefferson Davis factory. Anxiety was on the tip-toe to ascertain the cause, but it was not certained until nearly four o'clock, just before the dawn of day. At that hour it became known that a Yankee who had come into our lines, and gave the particulars. On the enemy's entrenched line, which had been pushed around on Monday afternoon to Brander's bridge, he placed a heavy picket guard, consisting of a New Hampshire regiment, numbering eight hundred men, which regiment, it seems, were somewhat isolated from the main body of the Yankee forces—a fact which our generals were not slow to perceive. Two companies of the 7th 43rd North Carolina regiment, General CLINGMAN's brigade, were selected to make a night assault upon these sons of New Hampshire, and see if they could not be induced to "change their base." The assault was sharp, sudden and decisive. With a rush the brave Confederates were within double-quick time on, and pounced into a deadly volley. Before he could retreat or form, his surprise another galling fire greeted him, and yet another a moment after, which proved too much for warm-hearted New Hampshire, and the blue coats started off in wild confusion, shaping their course towards Bermuda Hundred. It was a beautiful moonlight night, and the dark mass of many men could be distinctly seen, so the Carolinians had but to aim in the mass and they were bound to hit. Every volley from our men was followed by cheers from the enemy on the wood, and thus the race progressed until we had driven the New Hampshire Yankees to the very banks of the turnpike and across the railroad, a distance of some two miles or more. By this time the whole Yankee camp was frightened out of its wits, and the entire force was under the impression that Forrest was in their rear, and that the whole Confederate army was coming on. Their retreat was hasty, and in many instances in two directions, and it is fondly and confidently hoped that we shall succeed in bagging many of these would be conquerors. We are told that among the Yankees, the force is called conquerors for all our trials and troubles, but there is no hope of capturing that body, bloated, Massachusetts Yankee. We think it a pity that the morning's dawn broke before the gunboats since he heard the firing of the first Confederate gun in Virginia.

The enemy left many valuable articles on the ground abandoned yesterday, such as Belgium rifles, canteens, haversacks, knapsacks, blankets, boots, &c. There was every evidence of a hasty retreat. The retreat was as sudden as precipitate, for they had thrown up breastworks on Monday, and were getting comfortable for a regular siege. The invaders have saved themselves a terrible drubbing. Had they remained to-day, or to-morrow at farthest, would have been the most severely handled since the first blow which would have consigned every man of them to a grave of Virginia soil or a berth in a Confederate prison.

THE FIGHT AT FORT CLIFTON—GUNBOAT DISABLED.

[From the Richmond Dispatch, May 14th.]

A fight occurred at Fort Clifton on Monday last—a point a few miles above City Point, on the Appomattox river. The following letter from the officer in command gives the particulars of the affair:

FORT CLIFTON, May 9, 1864.

I cannot refrain from writing you a line at once to tell you how God has blest us this day. My heart is gushing in gratitude for his kindness and protection, and the slightest thing I can do is to pour out my soul.

I was attacked this morning on the left by a battery of six rifled guns. Finding that my pieces on this side could not reach them, I left my men under cover, and they soon got tired of shelling us. After things had quieted down I had just got to my left, three quarters of a mile off, when a fleet of gunboats hove in sight. I engaged them for five or six hours, crippling one, which got away, and disabling the one to the extent which I suppose. I started with twenty men to board her, when she took fire from one of my shells, was abandoned by the enemy, and blew up. I suppose by this time the river here is now quite clear, but I am hard at work, &c.

AVERILL'S MOVEMENTS.

[From the Richmond Dispatch, May 12.]

AVERILL appears as not in command of the forces which attacked Lynchburgh on the 8th instant. He has gone with another portion of his command to Saltville, where it is reported, he was defeated.

The force which made the attack on General JENKINS was under the command of General ROCK, and was composed of twelve regiments of infantry, two of cavalry, and fifteen pieces of artillery.

Our force, now under the command of Colonel MCCAUSLAND, has fallen back to Christiansburgh, in Montgomery county, eighty miles west of Lynchburgh.

GENERAL SHERIDAN'S EXPEDITION.

[From the Richmond Inquirer, May 13, 13, and 14.]

From the most reliable sources there could force could easily be

ner down at between 15,000 and 20,000, and thirty-five pieces of artillery. Some of these, from one position, may be drawn off took them four and a half hours, marching by fours, at a sweeping rate to pass a given point.

Where Beaver Dam stood, nothing remained but charred and burning ruins of buildings and two trains of cars, with their contents, that were not consumed, scattered profusely over the ground. The farmers' fencing far and wide lighted up the midday sky with a lurid glare.

This unfortunately is the fate of one of the most thoroughly equipped and most powerfully supplied of Yankee commands that ever left the North. I said that Richmond was the object was the capture and sack of Richmond, yet what has it accomplished? So far as we see, the Yankees have only destroyed property, thereby making themselves and children to suffer along their track, which seems to be the aims of Yankee chivalry. And to whom Richmond owes its security from the most powerful combination we leave the country to judge.

Persons who have been able to come in the path of the Yankees say that they are most admirably equipped. The force consists almost entirely of mounted infantry. While they were fighting and tying Kautz in the woods on yesterday their horses were grazing in the rich meadows of the Chickahominy. They took possession of all the corn upon the farms occupied by them, had committees of their own, and impressed those of the farmers, shelled as much as they wanted, and carried off to work on the railroads as many as they had brought with them, and ground out abundant rations for their men. In this way they were enabled to refresh themselves and their horses, and, protected as they were, principally by woods and temporary fortifications, they could afford, superior in force as they proved to be, to withstand our assaults, and were desperate enough to resort to any expedient to get away.

A prisoner brought in last night, whose account is in accordance with that given by others, was a sergeant in GRANT'S army thirty thousand cavalry; that fifteen thousand attended STUART'S funeral; that Richmond papers of the date fifteen thousand came down the telegraph road from Fredericksburgh, their object being to tap all the railroads around Richmond. Another was a lieutenant in the Second Rifles in Chesterfield, having no idea of, making an attack upon Richmond. They would have made no demonstration on Richmond at all, but for the fact that PEMBERTON was in the column was commanded by General SHERIDAN, with Brigadier-General Gregg, Colonel Gregg, acting brigadier, and Brigadier-General Custer commanding division. Eight and eighteen pieces of artillery, and were completely equipped, being provided with pontoons for the purpose of travelling. Including grist mills and corn shellers, alluded to above. The prisoner says the column had not lost over two hundred men since the commencement of the raid. He also states that the other fifteen thousand would come to the relief of his command.

The Yankees were intended in completing their retrograde movement over the Chickahominy during Thursday night and a few hours of yesterday morning. Our forces proved entirely adequate to the task of keeping them in their our entire force at the time being not more than one-third the force of the enemy, and with the disadvantage, also, of being easily flanked if pressed too hard. The Yankees did press it repeatedly and suffered dearly for it before they could arrange matters to their satisfaction. They lost a great number of their broken down horses, and, under cover of darkness, finished their retreat over the Chickahominy between nine and ten o'clock yesterday morning they pressed Gaines' farm and Cold Harbor, destroying considerable private property, and ... doing whatever general damage they thought would contribute to the glory of their raid. It was thought that they would pass on down through New Kent and go by the way of Williamsburg to Fort Monroe, on the Charles City shore; but information was received last night that they had crossed the Chickahominy at Bottom's Bridge, with the intention of joining BUTLER by way of the White Oaks swamp road. They were travelling very slowly, and were apparently in no trim for fighting. Our cavalry, being unbroken and in good trim, could not pursue to any purpose. Thus ends the raid on the Chickahominy. The damage may be estimated in a few words. The interest loss will attach which our gallant men sustained; but this was to some degree repaid in kind. A few days' rations of meat were destroyed, and a number of bridges on the railroads which may be repaired in two or three days.

MISCELLANEOUS DESPATCHES.

ARRIVAL OF PRISONERS AT LYNCHBURGH.

[From the Richmond Dispatch, May 12.]

Forty-four officers and eight hundred and ninety-one privates, captured by General Lee at Parker's Store on Thursday last, arrived in Lynchburgh Saturday afternoon. Among the officers are Brigadier-General Seymour, fourteen captains and twenty-seven lieutenants, representing twenty regiments, from Maine, Wisconsin, Pennsylvania, New York, Michigan and Indiana. Two or three of them belong to the regular Army. Many of these officers were captured in the fights around Richmond in 1862, and were recognized by Lieutenant SHIRK, Assistant Provost-Marshal in that city, who once had charge of them on Belle Isle. The officers and privates all fraternize with each other, as commanded by HANCOCK. They are described as a decidedly genteel set of Yankees, and conducted themselves while being marched through the streets in an orderly manner.

FUNERAL OF MAJOR-GENERAL J. E. B. STUART.

[From the Richmond Enquirer, May 14.]

The funeral of this much lamented and brave General took place yesterday afternoon at five o'clock, from St. James church.

At the appointed hour the hearse appeared in front of the church, and the remains of the noble soldier were placed in the hearse. The noble steed whose now silent voice had so often startled the enemy with his stirring battle cry, was carried down the centre aisle and placed before the altar. Wreaths and a cross of evergreen, interwoven with delicate lilies of the valley, burnet and other flowers of purest white, decked the coffin.

The pall bearers were General BRAGG, Major-General MCCOWN, General CHILTON, Brigadier-General LAWTON, Commodore FORREST, Capt. LEE, of the navy, and General GEORGE W. RANDOLPH, formerly Secretary of War.

The scene was sad and impressive. President DAVIS sat near the front with a look of grief upon his care-worn face; his Cabinet officers were grouped around, while on either side were the Senators and Representatives of the Confederate Congress. Scattered through the church were a number of Federal officers, captured in battle—among them the former General RANSOM, commanding the Department of Richmond. Hundreds of sad faces witnessed the scene; but the Rev. Dr. PETTIGREW and other ministers had a warworn mien, whom the dead STUART has so often led where he led the living to victory, and who have given their lives for his, were away in the fight, doubtless striking with a double courage as they thought of their fallen General.

The short service was read by Rev. Dr. PETERKIN, a funeral anthem sung, and the remains were carried out and placed in the hearse, which was followed by the sorrowful Cortege, followed by a long train of carriages.

The military escort accompanied the procession, but the hero was laid in his last resting place on the hill side, while the earth trembled with the roar of artillery and the shouts of the victorious host. Thus was the dust upon descending and devastating his native land, and the other, proudly and defiantly standing in the path and invoking the foe to come on. Peace to the dead, but all is in better cheer for the memory of such as Stonewall JACKSON and J. E. B. STUART.

GENERAL PEMBERTON A VOLUNTEER LIEUTENANT-COLONEL.

[From the Richmond Inquirer, May 14.]

On Thursday General PEMBERTON resigned his commission as Lieutenant-General P. A. C. S., and sought active service as a Lieutenant-Colonel of artillery. General PEMBERTON was assigned to the command of the artillery defending the approaches to Richmond on the north. This position has been much coveted for the unfortunate result of the siege of Vicksburgh, where he was commander-in-chief. Many persons have censured him as freely for these who spoke in utter ignorance of the fact as by those who should have been conversant with them. Without detailing the many difficulties which beset the matter since riots, it is sufficient to know that PEMBERTON and his army resisted with heroic determination for many days after the possession of the city by the enemy, and upon one of the largest armies and fleets ever gathered on this continent for the reduction of a single city. The losses inflicted upon the besiegers no one will question. The *Whig*, in speaking of General PEMBERTON'S resignation, says:

"This action on the part of General PEMBERTON exhibits a highly laudable spirit, and goes far towards sustaining all that has been said in regard to him as a man of patriotism and honor. It is no time now to criticise the military conduct of unsuccessful generals, who, under the circumstances, may have committed errors. But as in the case of General PEMBERTON, so much unselfishness at this critical period of the struggle for liberty, will not be unappreciated people of the Confederacy will remember, to his credit, his present conduct; and those who have felt bitterly towards him will be strongly tempted to recall their censure. We have no doubt that General PEMBERTON will render valuable and efficient service to the cause in the present emergency."

THE ATTACK ON THE RAM ALBEMARLE.

From a correspondent who writes from "*Seymour Butcher's Bay, N. C.*," we receive the following interesting particulars of the recent fight between our gunboats and the Rebel iron-clad *Albemarle*:

In the afternoon of the 5th of May, the *Miami* and *Whitehead*, who were up here on picket saw the ram *Albemarle*, the *Cotton Plant*, and the *Bombshell* coming down the river. The *Albemarle* fired a number of shots, none of which hit either. The *Bombshell* was, as you may remember, captured from us when Plymouth was taken.) Of course our two gunboats turned and coaxed them all down towards Bluff Point, where the fleet lay—the plan being to "pound her to pieces" with heavy shot. Well, they got her down to Bluff Point, and there they, when the fleet, having gotten under weigh, and formed in line of battle, the *Cotton Plant* thought discretion the better part of valor, and abandoned all her might. The plan of battle was in two lines, abreast of each other; the right line composed of the three large iron-clads—double-enders; the left by the smaller fry. As each vessel got abreast of the ram, she was to give it her broadside, put her helm hard a port, and haul off to make room for the next. Each vessel was protected from a raking fire by the one immediately astern of her. Thus, each delivered a broadside, returned to her station, and in a short time about up until her turn came again, and so on *ad libitum*. This programme was broken to upon, however, by Lieutenant-Commander ROE, the Senior.

When the *Mattabesett* got under weigh, he followed in her place, only pausing on his way to capture the *Bombshell*. After delivering his first fire into the ram, and seeing that he might as well have thrown dried peas at her, he turned and made directly for the ram. The others, he having completely ground, the ram then lying broadside to him, and about six hundred yards distant, he opened fire. Now, the *Mattabesett* is exactly of the ram aforesaid, rang four bells and went into her at the rate of eleven or twelve knots. Over went Mr. Ram on one side, with his bottom elevated in the air, his decks covered with water, and the *Sassacus* pounding at him with all her battery. Thus she held him for ten minutes. She received no assistance, and I verily believe the brave old *Sassacus* would have finally deliberately sunk the ram herself alone, but for an unfortunate accident. The old craft had not been able to get steam to operate ports, for these two minutes. Only one shot had been fired at the *Sassacus* during the engagement by her whole crew, and that a continuous fire of rifles was, however, kept up on the *Sassacus*, but so greatly were the rebels scared that their aim was bad. At last, as they attempted to get a port open, and instantly fired a rifled shot (100 pounder Brooke), which passed into the berth-deck, through an empty coal-bunker, through one of the boilers, and through the ward-room, where it finally spent itself. But the gangways and main deck were instantly one cloud of scalding steam. Thirteen men were scalded and one killed by the steam. Of the wounded about four or five will die. Notwithstanding all this they kept at the work—hauling the muzzles off two of his guns, plumping a couple of shots into his ports, and finally, when unable to hold him any longer, they hauled off and made for our wives. As soon as the ram got clear of the *Sassacus*, he did not stop any longer, but left for the upper part of the sound, where the fleet lay. He passed up through Croatan down to Bluff Point, and anchored. The ram fought the rest of the fleet until dark, then turned down the *Sassacus* and fired at her. Her loss is four killed and from twenty-five to thirty wounded.

The ram used two 100-lb. Brooke's rifles. It is supposed to have two others, but did not get out the *Sassacus*. It is very heavily plated, and its sides have such a slope that a shot takes no hold on them. Even when alongside, the *Sassacus* could not penetrate her guns sufficiently with her armor at right angles. Her solid 100-lb. Parrot shot broke into pieces on the sides of the ram, although fired with the muzzle of the gun almost touching it. Lieutenant-Commander ROE says he considers it far more formidable than the *Atlanta*.

GENERAL MCCLELLAN AND THE ARMY.

In the Hon. HENRY J. RAYMOND'S new volume, "A History of the War; or, Lincoln's Administration," we find the following hitherto unpublished letter of Mr. LINCOLN to General MCCLELLAN:

WASHINGTON, MONDAY MORNING, May 9, 1862.

MY DEAR SIR:—I have just returned from the Secretary of War is forming the part of a dispatch to you, relating to army corps, which dispatch, of course, will show my entire concurrence in what this will. I wish to say a few words to you privately on this subject. I ordered the army corps organization not only on the unanimous opinion of your Generals of division, but also on the unanimous opinion of every military man I could get an opinion from, and every modern military book I could see accepted. Of course, I did not on my own judgment pretend to understand the subject. I now think it indispensable for you to know how your struggle against it is daily postponing and hindering our military discard. It is looked upon as merely an effort to pamper one or two favorites. The commanders and brigadier proved rivals. I have had no word from SUMNER, HEINTZELMAN, or KEYES. The commanders of these corps are, of course, the three highest officers with you. You can constantly told that you have no consultative or communication with them; that you consult and communicate with General HALLECK and me privately. General HALLECK is with you. I do not believe these complaints are true or just; but at all events it is proper you should know of their existence. I think you have three army corps disobey your orders in anything?

Now, when you relieved General HAMILTON of his command the other day, you thereby lost the confidence of at least one of your best friends in the Senate. And here let me say, not as applicable to you personally, that Senators and Representatives speak of me in their places as they please without question; and that officers of the Army must cease addressing insulting letters to them for taking a course they disapprove of. But to return, are you strong enough, even with my help, to set your face upon the men you dislike, HEINTZELMAN and KEYES, all at once? This is a practical and very serious question for you.

A. LINCOLN.

The following letters from General MCCLELLAN and General MACEY are also given:

WASHINGTON, August 20, 1861.

SIR:—I have just received the enclosed letter. In cypher. Colonel MACEY knows what he says, and is of the coolest judgment. I recommend that the Secretary of War transfer at once the regiments now under enrollment in New York and elsewhere, and that if it is not proceeding with great rapidity drafts to be made at once. We must have men without delay.

Respectfully, your obedient servant,

GEORGE B. MCCLELLAN,

Major-General U. S. A.

DISPATCH FROM COLONEL R. B. MACEY TO GENERAL MCCLELLAN.

NEW YORK, August 20, 1861.

I urge upon you to make a peremptory and unconditional demand for an immediate draft of the additional troops you require. Men will not volunteer now, and drafting is the only resource left. Time is precious, and no effort should be spared.

Respectfully, your obedient servant,

R. B. MACEY.

COLORED TROOPS.

IN a letter to Major-General HANCOCK on the pay and rate of colored troops, and the organization of their families, Major-General GILLMORE makes the following points:

First. The general organization in this department are formed from the States of South Carolina, Georgia, and Florida, and in forming them the organization of the regiments will follow the States colored regiments, with the appropriate numbers. The would manifestly cause their separation and increase their efficiency.

Second. A Board for the examination of candidates for commissions in colored regiments should be appointed in each department.

Third. The pay of the white soldier and of the colored soldier should be the same. The latter can calculate with the same certainty upon the pay of the colored man a suspicion that he is legally entitled to it. Besides, it is not for the interest of the service to allow any policy suggests the course, even if the law did not require it.

Experience of doubtful results, which it is not.

Fourth. The families of colored soldiers should be provided for by allowing them to locate upon and cultivate land in advance of the regular survey and sale thereof. This is important as a military measure, by making the soldier contented with his lot, in securing to him a home for his family during the war, and for himself when the war is over.

MAJOR-GENERAL JEWIN MCDOWELL goes to California to take command of the department of the Pacific. He will be welcomed by all who know his fine military bearing and his thorough culture as a gentleman.

NOTICE TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character related to the service. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notice of the promotions, casualties of general interest; of the movements of vessels, of commissions issuing officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to technical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made by Post Office Money Orders, or Quartermasters', Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers will fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to this JOURNAL.

The postage on THE JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 79 PARK ROW, TIMES BUILDING.

CITY SUBSCRIBERS who change their residences at this season, are requested to give notice of the fact at our office, No. 79 PARK ROW, in order that the addresses of their paper may be altered accordingly.

The editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 79 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

ANSWERS TO CORRESPONDENTS.

CLINTON.—Of the present Corps commanders, HOWARD and WADSWORTH are natives of Maine, the latter being appointed, however, from Wisconsin; BUTLER was born in New Hampshire, and appointed from Massachusetts; BANKS, HEINTZELMAN, and SYKES (of the cavalry corps), are natives of Massachusetts, General HOOKER being appointed from California, and General SHERIDAN from Ohio; MEADE is a native of Connecticut, as was his predecessor General SEDGWICK; AUGUR, STEELE, BURNSIDE, and WARREN, are natives of New York, General AUGUR was appointed from Michigan, and General BURNSIDE from Illinois; STEINWEHR, SLOCUM, and HOWE from Ohio; LOGAN from Illinois; HUMPHREYS and WARREN are natives of Indiana, the former being appointed, however, from Rhode Island; PALMER, BLAIR, and MCCLERNAND are natives of Kentucky; General PALMER and MCCLERNAND were appointed from Illinois, and General BLAIR from Missouri; TERRY is a native of Virginia; General GRANT was born in Ohio, and appointed from Illinois. Thus it would appear that of the above Generals two were born in and appointed from Maine, one born in New Hampshire, two born in and appointed from Connecticut, three born in and two appointed from Massachusetts, four born in and two appointed from New York, one appointed from Rhode Island, four born in and two appointed from Ohio, one each appointed from Wisconsin, California, Michigan and Missouri, one born in and four appointed from Illinois, two born in and one appointed from Indiana, three born in Kentucky, one born in and one appointed from Virginia.

DELETA.—The promotion either of an officer or enlisted man does not affect his duties or carry him to or set aside his station or command. He is entitled to discharge at the end of that time. An officer remaining in service, without promotion, beyond the original term of three years, will re-enlist.

ADJUTANT.—Regimental staff officers should wear the uniform of the arm of service to which their regiment belongs.

GUN LOCK, YORK.—Whatever supplies you receive must be accounted for to the department from which it is received.

VOLUNTEER.—There has been neither an order or act of Congress discharging regular soldiers who have been on detached service for two years or more.

DELTA.—The *General Staff* comprises the Adjutant and Inspector-General's Departments and Aides-de-Camp, who are ex-officio assistant-adjutant-generals.

The *Staff Corps* are the Engineer, Ordnance and Signal corps, and the Quartermasters, Subsistence, Medical and Pay Departments.

An enlisted man on entering an officer's tent or quarters should, if without arms, take off his cap; if under arms, he should salute as a sergeant; if with side-arms, he should touch his cap.

THE Sergeant-Major in passing in review should salute the reviewing officer.

THE following officers, who left the field without sufficient cause, were sent to the Old Capital Prison in Washington, to be returned to the front under guard:—Lieutenant J. A. Ashley, 109th New York; Lieutenant E. S. Griffin, 145th Pennsylvania; Lieutenant Edward W. Barnes, Co. I, 125th N. Y.; Lieutenant A. H. Mentzer, 145th Pennsylvania; Lieutenant Thomas G. Palmer, 1st Michigan; Lieutenant William Moore, 62d New York.

THE Secretary of War directs that officers now in the city of Washington so slightly wounded as not to need treatment in hospital, and who have received passes to remain in the city, and all such cases that may hereafter arrive from the front, shall be sent to Annapolis to report to the Medical Director there for treatment. As soon as fit for service each officer will be so reported to the Adjutant-General by the Medical Director, who will also give the officer an order to join his regiment.

A GENERAL order was issued on the 18th, placing Major-General Wright in command of the 6th army corps.

BRIGADIER-General Ullmann commands the troops stationed in the district of Port Hudson, La.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, MAY 21, 1864.

THE SUMMER CAMPAIGN.

WHOEVER finds himself doubting the possibility of National success in Virginia needs only to look away from the dubious or calamitous issue of this or that day's battle, and to fix his mind simply on the work to be done, and the means wherewith to do it. It is not wise to underrate one's enemy. But putting the extremest estimate on the enemy's strength as he lies in Virginia and Georgia, we to-day are stronger —enough stronger to conquer. That is the best General for us who can best put our superiority to effective use. On the other hand, the work is, in brief, the expulsion of the enemy from stronghold to stronghold, from one line of defence to another, down into the "last ditch," if indeed he is so resolved to terminate the contest. There is nothing here impossible to accomplish. Be he never so skilfully entrenched, the enemy's position can be ultimately carried. Our people thought it sufficient excuse for the first repulse at Bull Run that the enemy used "masked batteries." They declared those wooded cross-roads at Manassas another Sebastopol, and that one need not hope to contend with masked batteries. Chattanooga and its environs, a stronghold in truth, were pronounced the Gibraltar of America; but they found a ROSECRANS and a GRANT to storm them. Experience in war incidence one to think there are no Gibraltars: no fortresses so impregnable they may not be entered, no positions so finely entrenched they may not be turned and carried.

The present leader of the American Armies seems sternly urgent to try the virtue of fighting, and to trust to weight of metal and of numbers. Such a disposition will commend itself to all those who have never stomached the silly and insolent affectation of underrating the capability of Northern soldiers. If, indeed, we must double our numbers to get an equivalent in prowess for the enemy, then the General's mathematics are fatally wrong: but he is not of that mind.

Our primary aim should not seem to be the capture of Richmond. Certainly we should not hope to capture it, without first, after such enormous exertion, dealing at length the *coup de grace* to the army of General LEE. There need be no flattering hope to cozen the Rebels out of their capital by some blindless game of strategy, such as might be devised in a library-chair, with maps and pins for soil and men. The true plan combines such work as he dreams of who sleeps in bivouac.

The disposition of the enemy was not long since as aggressive as war own. He chafed at being on the defensive, regarding the new Union leader as only another candidate for repulse and discomfiture. It was once all McDOWELL. It was McCLELLAN, it was POPE, it was BURNSIDE, it was HOOKER, it was GRANT. It *was* GRANT, indeed—a strong man. LEE's intent to attack did not disconcert an opponent disposed for an extreme trial of arms. General GRANT did not hunt long for his objective. He found it the day after crossing the Rapidan. It was a movable one; and, whether it go to Richmond or Southwestern Virginia, it will find the Union leader on its trail.

Remembering, therefore, the thoroughness proposed in this latest and most comprehensive campaign against the Rebellion, let us not exhibit undue impatience at its commencement. General GRANT has sufficiently established his military character for rapidity of execution. It was already established indeed at Chickamauga. But General GRANT strikes not only at Richmond, but at the Rebellion. His momentous game this military chess champion plays by exchanging men for men, confident that with the surplus of pawns and pieces, he may clear pawns for pawn, piece for piece, till the adverse player is reduced to sinking weakness. Then, indeed, we may look for loss to fall all on the weaker side; but not till then. Is there any doubt which of the two armies will find its resources soonest drained?

It will be well, therefore, to dispose ourselves to a longer and a harder campaign this summer than the popular desire would wish. The farther we advance into Virginia, the more difficult will operations become, and the longer our line of communications, provided the enemy falls back in full strength. Some annoying reverses must be contemplated,—some weak link in the chain, like STONE'S,—some temporary severing of communications,—some doubtful days of battle, like those in the Wilderness.

If, also, the suspicion should steal over the enemy, that fierce attack weakens him in disastrous proportion to the injury he inflicts on us, his aim will be to protract our conquest, though he may of necessity, He will seek to gain time, hoping that some new shift in the wheel of fortune may be more favorable. He will at least exchange Richmond, if it must be yielded up, for the delay of a long and hard summer's campaign. While, therefore, the enemy may at any time be made suddenly down from apparent vigor to exhaustion, the true temper for the North is to act as if there were many days and weeks of labor yet before us. Our confidence does not rest on the issue of any brilliant day, but on that of many days conjoined.

AMERICAN AND EUROPEAN FIGHTING.

THE enduring courage and the tenacity exhibited in all the great battles of this war by both armies, are equal to any exhibitions of the same qualities recorded in history—in some respects are superior. Scarcely any conflict has been decided by a single trial. At Corinth, at Murfreesboro', at Chattanooga, at Vicksburgh, at Gettysburgh, at the invincible wrestle has generally enabled the beaten combatant to retire with some order, and has given to so many battles only partial results. The superior perseverance and energy of the Northern armies are now beginning to tell; but in those of the South there is doubtless much of the unyielding quality yet remaining, which will vigorously contest with us the soil over which we are gradually marching.

Many of the peculiarities of American warfare—particularly the often indecisive character of battles, and the impossibility of following up successes—are of course attributable to the nature of the country, to the vastness of the theatre for the defence, and the vast extent of rear which is at the command of both parties in this war. In Europe a single battle often decides the fate of an empire, by deciding that of its capital or of some prominent strategic point. But on the vast arena where American armies operate single days of battles must occur in order to determine the destiny even of a single State, as in Tennessee, or of a single great line of communication, as of the Mississippi River.

A third prominent cause for the difference between American and European warfare, is the difference in the constitution of the armies. When a European standing army is defeated in every quarter, and was obliged to contend with insurrections in La Vendee and in the south; yet with powerful energy it recruited its armies, until the course of events was changed and it became everywhere victorious.

It is a great mistake, however, to assert, as is so frequently done in the general newspapers, that European history does not present instances of continuous fighting, and of battles continuing for several days. Without referring to siege operations, many cases can be mentioned of campaigns including numerous conflicts, and of great battles that were decided only after several days of fighting. Indeed it has rarely happened that any great battle has been fought without various preliminary affairs; though as these are not specified in history, and attention is permanently given to the chief and decisive engagement, we fall into the conclusion that only this occurred. We doubt, however, if, in the whole history of warfare since fire arms came into general use, any parallel can be furnished to the seven days' fighting on the Peninsula, and the recent engagements in Virginia. Such battles in Europe would have involved the destruction of

ose or the other army, with all its *materiél*. In this country, however, from its physical peculiarities above alluded to, the losses are proportionally small, and the results somewhat indecisive.

We naturally seek for comparisons to our own battles in those of the Crimean and the Italian wars. But the former was mostly comprised in the siege operations, and in the latter, the French were so immeasurably superior to the Austrians that the drama closed with the two great acts of Magenta and Solferino, without much by-play, or accessory incidents. It is to the wars following the French Revolution therefore, that we must turn for parallel incidents. It will be interesting to recall them, in the first place, as matters of history, and in the second place, to show how much similarity there is—notwithstanding the changes in tactics and weapons—in the methods by which great bodies armies come into encounter. For it is well known that the principles on which battles are fought do not vary—although there are innumerable combinations of details. Strategy is the same now as in the early ages of history. The differences in arms make differences in the modes of arraying troops and fighting, but such movements as, for instance, as flank attacks and attempts to break a line in its centre have always been among the grand manœuvres of commanders.

In 1793 the Austrians under the Archduke CHARLES attacked the French on the 1st of March, and the battle was continued for two days, the French being defeated, the Austrians fought them again on the 9th, and again defeated them. A few days afterwards the Austrians captured the city of Tongres. DUMOURIER now took the command of the French, and in a few days attacked and beat a portion of the Austrians, and on the 18th, a general engagement occurred, in which the French were finally defeated.

In 1794 the French on the 10th of May, crossed the river Sambre and attacked the Austrians, but were repulsed; on the 20th, 26th, and 29th, they tried it again with the same result; on the 3d of June, they fought and were repulsed; on the 4th, the French renewed their attempts and kept them up for several days, but were again driven back. On the 18th, they crossed again and held their position till the 26th, when the Austrians attacked them, but received a severe defeat. Thus in something over a month there were eight battles, besides a number of smaller actions.

The extraordinary energy displayed by NAPOLEON in his Italian campaign is well known. The fighting in some portions of it was almost as continuous as the operations in Virginia. Thus on July 29th (1796), the Austrians attacked the French and were successful. NAPOLEON then concentrated his force against the reserve on the hill, ending with the defeat it; on the 3d of August he broke the Austrian centre at Lonato; he then marched to the help of AUGEREAU and defeated the Austrians, who were attacking that General; the final battle took place August 5th, and ended in the defeat of the Austrians—the campaign occupying eight days. A similar series of conflicts occurred in the fall, ending with the battle of Arcola, which was fought through two days without a result; on the third day afterward it was resumed, and the French were successful.

Battles of several days duration were not uncommon during the wars of NAPOLEON. His great victory at Ulm, in which he captured the entire Austrian army under MACK, was a series of fights, commencing about the 1st of October, and continuing to the 16th. Simultaneously MASSENA was having a three days conflict with the Austrian army in Italy.

The movements at Jena commenced on the 9th of October (1806), and skirmishes of an advanced partie continued for three days; on the 14th, the French won their principal victory; on the 16th and 17th, they obtained other successes; they pursued and encountered the Prussians at various times, until on the 24th, they captured the remnant of the army.

The great battle Leipsic, where NAPOLEON's career as a conqueror terminated, occupied four days—commencing the 16th of October (1813), and raging till night; the next day there was a suspension of general conflict, which was renewed on the 18th; the French retreated on the 18th, and were pursued and routed with terrible slaughter.

Perhaps the European campaign which, more than any other in history, resembles in activity and the number of engagements those we are accustomed to see in our war, is that in France just previous to the successful entry of the Allies into Paris—a campaign more remarkable in some respects than all others of NAPOLEON—one, in which with but a comparatively small number of men he made efforts almost superhuman against the overwhelming forces of his opponents.

The French army numbered 70,000 men; that of the Allies under SCHWARTZENBURG and BLUCHER 400,000; while these entering the country from other points amounted to 500,000 more. NAPOLEON attacked 54,000 Prussians at Brienne with one-third that number and defeated them; the next day the Allies returned with 150,000 and attacked NAPOLEON, who had only 40,000. He held his ground till night, and retired. A few days after he fell on the flank of a Russian column of 120,000, and broke it up. The day afterwards with 25,000 he defeated 60,000 under YORK and SAKEN. The third day after he was attacked by BLUCHER, who had 100,000, but defeated him. Making a forced march across the country, a few days afterwards, he defeated the Austrians, under BIANCHI. Returning to Troyes he was attacked by BLUCHER with 60,000 at Mery-sur-aube, but defeated him. After various conflicts he was finally overwhelmed, and the Allies compelled Paris to capitulate.

Waterloo is generally instanced as a battle of a single day. But previous to the great battle occurred the affair with the Prussians at Ligny, and that of NEY with the English at Quatre Bras.

A GENERAL European war, springing from the Polish question, was threatened all last year, but it was finally averted by the firmness of the Czar and his success in suppressing the Polish insurrection. Another war, springing from the Danish question, and involving all the great powers, was threatened at the opening of this year; but the success of the Austro-Prussian arms in Denmark, and the agreement of the parties interested to try and settle their difficulties by a Conference, seem for the time being to have averted this peril. At present, the aspect of Europe is profoundly calm, though there are many slumbering elements of disturbance.

A correspondent, writes from Paris that at the close of April, all thoughts of an anticipated general war had evaporated. He adds: "The French Emperor "would not be at any time averse to a war, if he "could see his way clearly to rapid success. But he "is not lucky to fight a losing game. He is not so "young as he once was, and has a taste for a quiet "life. The Italian war, while it enabled him to say "that he is a real soldier, tried his nerves and sickened him of personal command. At present I do not "think he will undertake any European war unless "England joins him, and of that there is small chance. "The prevalent feeling of France is in favor of peace "at almost any price. The EMPEROR, knowing that "the country would desert him if he were to plunge "into a war which should turn out to be long and disastrous, has the strongest motives for keeping the "peace. His paramount object is to die quietly in "the Tuileries and leave his throne to his son. As I "heard a deputy observe: The EMPEROR looks upon "the whole world as so much manure for his dynasty."

If his Majesty's ambition is to lead a life of perfect repose in the future, and to die quietly in the Tuileries, and to leave his throne to his son, he could perhaps subserve these purposes were he to withdraw from Mexico the forty thousand troops who now stand on the soil of the country with their bayonets at its throat.

We judge that the Danish war is practically over, even though, pending the issue of the Conference, Denmark has refused to accept the proposal of the German Powers for an armistice. All the successes have been on the side of the allied armies, who invaded the kingdom with a force nearly twice the effective strength of the army of Denmark. At least twenty-two thousand Danish troops, or one-half their actual force, were engaged in the defence of Düppel; and when that position fell—preceded, as it had been, by the evacuation of the Dannewerke, and succeeded, as it was, by the evacuation of Fredericia—the Danes or the Duchies did not take refuge in the islands, and give up all hope of holding Schleswig or Holstein, or any part of the peninsula. The island of Alsen, to which the bulk of the Düppel garrison effected its retreat, and upon which it has latterly been planted, is at the mercy of the allies, as they can land upon it under cover of their artillery; but the allies have no desire to annihilate the army and kingdom of Denmark, and are evidently desirous of calling truce until the Conference is heard from. From the accounts, the casualties, and the results of the fighting in the two considerable actions of this Danish war, it is quite evident that the work was not very hot or desperate, —very different work from that between the two great armies on this continent.

THE Army will be gratified to learn that the extraordinary procedure in the case of General BLAIR, whereby a general officer was enabled to resign his commission, and after the lapse of a few months resume his rank without any reappointment, was not only not concurred in by Mr. STANTON, but that he absolutely declined to take any part in the business. The order appointing General BLAIR to the command of a corps was issued in direct contravention of his expressed convictions.

THE position of Chief-Engineer of the Army, left vacant by the death of Major-General TOTTEN, was offered a short time since to Brigadier-General J. G. BARNARD, whose eminent fitness for the place is universally acknowledged in the Army; but this officer declined to accept it on the ground that he believed Colonel DUANE, between whom and himself by the choice, to have the first claim upon the office of Chief-Engineer. Here is an example of fine soldierly conduct which ought to be cherished in the Army, whose *esprit de corps* will not suffer by the emulation of it.

As a complement to our own advices from the field of battle and our own review, we last week reprinted from the New York *Times* Mr. WILLIAM SWINTON's graphic account of the Battle of the Wilderness. If our space permitted, we should reprint other of Mr. SWINTON's letters, which deserve publication in some more permanent form than in the columns of a daily newspaper. They are written by a gentleman whose opportunities for observation are no less peculiar than his intellectual fitness for the comprehension and discussion of military operations.

THE PRESIDENT has accepted the resignations of the following officers:—Colonel and brevet Brigadier-General E. D. KEYS, Eleventh U. S. Infantry; Colonel ANDREW PORTER, Sixteenth U. S. Infantry; Captain RICHARD L. OGDEN, A. Q. M. U. S. Army; Captain WILLIAM H. TYLER, C. S. U. S. Volunteers; Captain JOHN T. PRICE, Fifth U. S. Infantry; Assistant Surgeon ROBERTS BARTHOLOW, U. S. Army; Second Lieutenant H. F. RICE, Seventeenth U. S. Infantry; Second Lieutenant JAMES W. PASCHAL, Thirteenth U. S. Infantry; Second Lieutenant C. L. SMITH, Ninth U. S. Infantry.

ONLY those who have undergone the arduous labor of a campaign can appreciate how terrible has been the strain upon the energies of our Potomac Army since that May morning when first it crossed the Rapidan. Though it has advanced but a few miles into the enemy's country, it has marched, in the execution of the tactical manœuvres of the various battles and reconnoissances, hundreds of miles. In the case of some corps it is estimated as high as three hundred miles. This in addition to the exhausting work of one of the hottest engagements on record. Three years ago such labor would have been impossible to the Potomac Army. But new days are veterans in war, and are equal to the severest exertion which a general need ask of soldiers. It is well that they have been heavily reinforced, and it is easy to understand why a rest from fierce battle was necessary.

THE fact that our composing room chances to be in the same building in which the *World* office is situated, has been the cause of serious inconvenience to us this week. The publication by that paper of the malicious forged proclamation of the PRESIDENT has led to the military occupation of the building, and compelled the editors, compositors and "copy" boys of the JOURNAL to run the gauntlet of a vigilant guard, to whose literal obedience of all the regulations for outpost duty we would here bear witness.

CORRESPONDENCE.

A NEW SYSTEM OF ORDNANCE.

To the Editor of the Army and Navy Journal:

SIR,—Some experiments in artillery firing have recently been made near New York, which were intended to prove that the destructive power of gunpowder is far from being fully utilized by any of the systems of ordnance now in use; in fact, that a new system altogether is required to allow it to do its utmost work.

The gun used was a 12-pounder smooth-bore, carrying a *shell* projectile weighing about sixteen pounds, fired with a charge of about two pounds of powder. The matter of communicating the force of the explosive of gunpowder to the shot from the gun, as it is claimed to be simple and efficient.

The breech of the gun is bored through for the tail of the projectile to protrude to the rear; this guides the tail when at rest. The length of the charge is equal to a disk of orbital occupying the bore of the gun, through the centre of which the tail passes freely in loading, as it does through the cartridge. The disk constitutes the bottom of the cartridge, and the shell rests near the fore end, or mouth, of the gun. The disk carries the shot out of the gun, when the heavy excess of atmospheric resistance on the disk causes it to strip off the tail, and the *naked shell* pursues its flight in a tangent to the trajectory, as do other projectiles not disk.

By a proper device in the breech of the gun, the projectile (which was fifty-two inches long, and one inch and five-eighths in diameter at the head) can be rotated during its discharge; but the true direction of its flight does not depend upon rotation. The principle of its projection is the same as that of the *arrow*. The length of guide entirely prevents any tendency to tumbling.

The theorem, Equiun B. C. Barres, one of the inventors, is, that penetration and range require that a projectile of *maximum* penetrative power should be formed with a *minimum* of transverse section. Hence, the shell should not the sphere, cone, nor cylinder, should be adopted for purposes of penetration, while the latter may answer best for the wished combination.

The force of a projectile, or its impact, may be expressed by multiplying its weight by the square of its velocity. The projectiles of equal weight and velocity, but of unequal resistant areas, will differ in penetrative powers, as the square root of the ratio of resistant areas, the less of the two the least area. Hence the importance of a high degree of velocity, and the great advantage of reducing the section of penetration.

The power of a shell depends upon the extent of its bursting charge; but a large bursting charge usually, however, involved a large diameter, thereby preventing a high and well-sustained velocity, and a sufficient degree of *penetration* for missile purposes, piercing armor, and passing between the sides of ships and blowing up river and harbor obstructions. The *shell-shot* would have superior adaptation for all the purposes of an exploding missile.

It is also argued that there is a loss of initial force in small-bored guns, where the use of a sufficient quantity of powder necessary causes the charge to occupy a considerable length; that the effects of explosion upon the durability of the piece is in the gender of the square of the cartridge should have more diameter than length, and the gun should have a larger bore than usual, though not necessarily more than a greater area of metal.

The gun is, therefore, a muzzle-loading smooth-bore piece of larger calibre than usual in proportion to weight. The diameter of the shot or shell is about one-fourth of the least upon the diameter of the bore of the gun, but it is a *shell* as long as the gun, and of such thickness that it may be desired, with a section area of head from an eighth to a fifth of the area of the bore. The same piece will fire round shot and shell, and the shaft shot and shell, with rifle, or direct motion.

One of the principal features of this system is the use and certainty of the course of the shell when passing in the water. It will not *ricochet* or glance like a round ball or the shell, but pursue the original direction as in the air. This fact induces the author to believe that it will be enforced to secure the bodies, engines, screws, and magazines of ships below water, from the effects of shot and shell, properly formed. The shaft projectile will reach a ship's hull below water with the same certainty as above, and with only slightly diminished weight and velocity. The ship which could successfully resist a blow from a 600-pound shaft-gun would not float with her armor. Such a projectile would contain 25 to 30-pound rifle balls acting simultaneously on the same surface.

B.

ADMIRAL GOLDSBOUGH'S REPORT ON IRON-CLADS.

To the Editor of the Army and Navy Journal:

SIR,—Admiral Goldsborough's Report on iron-clads is the most recent and ridiculous of the ill-timed communications which have been written on the subject since the opening of the question. Over five columns of fine print are occupied with arguments to prove that iron-clads hull and building are grave mistakes, and next with arguments in favor of two theories of his own, viz: concerning the effect produced on an iron-clad when struck by shot, by what he terms "vibration," and, second, concerning iron-clad *suspended with guns*, which he says are "detrimental to unity of purpose."

His "vibratory" theory is, that when the armor of an iron-clad—and he says that thick armor—is struck by a shot, vibration of sufficient extent to produce cracks large enough to ultimately sink the vessel and also to destroy the rivets, &c., in the *bottom* of the iron hull, ensues.

Without speaking at length on this head, it is sufficient to state, that "vibration" in the sense in which he employs the term, cannot be transmitted through an elastic medium like wood; or, even if there was no wood at all behind the iron, the effect of the blow would extend but a short distance from the place struck; this has been abundantly proved both by experiment and practice. Again, our ironclads have been hundreds of times when approaching the effect he states—his application of his theory to the sinking of the *Weehawken* to the contrary notwithstanding. That vessel has been struck many times and in other vessels built from the same plans which were at anchor near her during the storm in which she foundered, and which vessels were not injured. The same vessels have since this disaster been struck many more times by shot and have passed through equally as severe storms without injury. His "vibration" theory would therefore seem untenable.

The bold manner in which he advocates the construction of ships without sails, the practically ignoring the power of our heavy ordnance, and the remarkable calculations he advances to sustain this radical theory, make it plain that while in the profession he is considered by all as a genius that it was written to sustain this favorite idea alone. In short, he urges the Government to construct iron-clad ram without guns, and to rely upon the ram alone to carry out "purpose." This is a startling position to be officially taken by a General officer of the Navy; it is the first one, we have accurately wasted millions of money and committed almost irreparable blunders. Let us then examine his calculations and see if they are worthy of attention.

The Admiral says that a ram of ten millions and eighty thousand pounds weight, moving at a velocity of fifteen knots per hour, striking a vessel at rest normally, strikes a blow equal in power to that of *a cannon ball ten feet two and three-fourth inches in diameter, weighing one and fifty-three thousand pounds, moving at the velocity of one thousand feet per second.* Verily a small comet. The contemplation of the force of such a mass of projectile would make the oldest artillerist: it would crush to atoms, pulverize, absolutely grind to powder any structure made by human hands. And stop a little, let us see if the ram is the ram as to be endowed with such fabulous power as this; it is true we never doubted, but that under certain conditions, the ironclad ram could accomplish much, and be very powerful, but then we never dreamt that it could have the power of a *solid globe of iron ten feet in diameter*, moving at the velocity—the Admiral is particular in the dimensions—moving at the enormous velocity of *one thousand feet per second, or nearly six hundred miles per hour!* Let us look carefully over his calculations and see if he is not in error; if there is no error, incredible as it is, we must believe his statement. On doing so we find that the Admiral has simply exaggerated the power of his imaginary ram *forty fold*. His error was in not allowing for the great resistance which a body offers to be put in motion in a proportion to the *square* of the velocity of that motion, and has made his calculation as though the resistance of the water increased as the velocity speeds was in direct proportion to those speeds. This is plainly exemplified in the case of falling bodies; the power inherent in a mass of matter in weight or the *vis viva* is in proportion to the *square* of the velocity.

But it is idle to pursue this elementary quest; it is known to every practical man that the error has been pointed out by the Admiral himself, and his resistance which a body offers to be put in motion is in proportion to the *square* of the velocity of that motion, and has made his calculation as though the resistance of the water increased as the velocity speeds was in direct proportion to those speeds. This is plainly exemplified in the case of falling bodies; the power inherent in a mass of matter in weight or the *vis viva* is in proportion to the *square* of the velocity.

But it is idle to pursue this elementary quest; it is known to every practical man that the error has been pointed out by the Admiral himself, and his examination. However, if any one doubts the accuracy of our calculations, let him consult any work that has passed over them for himself. Indeed, now that the error is pointed out, it must be clear to the Admiral himself, that he has made a calculation which is simply negative the gifts of his elaborate Report. Is it not then evident that he is in conscience bound to retract his official statement as to the power of his ram, and address to the Secretary under whose administration our powerful fleet of iron-clads have been built, that proof positive has effected to repel the invader, and that their use is not "detrimental to unity of purpose," which purpose must be to destroy the enemy?

V.—INC.

GENERAL COURTS-MARTIAL—THEIR ABUSES.

To the Editor of the Army and Navy Journal:

SIR.—In the ARMY AND NAVY JOURNAL of the 19th March a summary of proceedings of a General Court-Martial is recommended as coming to you by "official sanction," which makes its publication, accordingly, of great importance.

This summary is generally calculated to improve the very high opinion which the Judge Advocate Tribunal, which has hitherto pervaded our new volunteer army, although there are a few directions therein contained which appear not only unjust, but in actual conflict with the best authorities on military law.

For instance, under "Proceedings and Record," the summary says, "Charges read to prisoner in open court, and he is *arraigned*. Charges can be altered and amended, but no additional charges can be preferred. Now, I would respectfully ask, at what time should the charges be "altered or amended," and whether in the presence of the prisoner, and by whom, the prosecutor, the Judge Advocate, or his counsel, or not? Should the charges be so altered or amended before the evidence has closed, or during the trial by evidence, or not? This point is of vital importance, and it is hoped that it will be answered by those who give this summary for the "official sanction."

But both Benet and Dr. Hough (see pages 91 and 102 respectively) say that a court-martial cannot alter or amend the original charges, or substitute others, *after the close of judgment*, and the highest authority (the War Department) have decided they are right in so saying. If the new doctrine can be established, I do not know any one it would be possible that the accused should know positively the charge which he is called upon to answer and to defend himself against. If a court-martial is allowed to retire, but one charge for another in this way, great and cruel injustice may be done. The accused may have rested his defence in the consciousness that he has disproved the charges against him, and afterwards discover that the charges, being altered or amended, the original charges have either so "altered or amended" them as to find him guilty, when he has no longer an opportunity to offer rebutting testimony.

This is dangerous ground, and may ruin the reputation of gallant and worthy men, if it is to be incorporated into our military code. To try a soldier for one offence and to punish him for another, would be simply absurd, were it not also the height of injustice and cruelty, and thereby injurious to the service. What should we say of a jury which should bring in a sum guilty of arson who had been indicted for murder?

I contend that the principle of law and even the instincts of natural reason are contrary to such an enunciation of the powers of a court-martial as are to be laid down by "official sanction," and that such action as it sanctions, if it is violative of the authorities (see BENET, p. 120, and following) and of the General Orders of the War Department, from G. O. No. 7, June 18th, 1856, to G. O. Army of the Potomac, 1862, in the latter of which the same principle is asserted, and its violation by several courts-martial denounced, and their proceedings reversed in consequence, then "expediency" will not sanction such a contempt for natural rights.

In a case of this kind, as far back as 1849, an officer was court-martialed for disobedience of orders, for acting against him, but not guilty of the charge, and not guilty of the second charge and its specification, and the court proceeded to sentence upon their verdict, when the General officer, who instantly disapproved the proceedings as irregular, for finding any part of the facts alleged against him, after having acquitted him of both charges. The principles of justice are the same now as in 1849, although it is very apparent that many new lights have arisen since that time.

The administration of military justice in our armies at present is of the most vital importance to humanity, and a doctrine like the one created or here go to the service as under "official sanction" might mislead many an active officer, and result in a miscarriage of justice unnecessarily, and prevent the cause of justice, susceptible as is the author, to "alter or amend," the charges in the absence of power, if he leave, therefore, to renew the request that an adequate explanation of this paragraph may be given, or that it be "altered or amended," for the sake of the service at large.

In consequence of the incompetency of many of the members in our courts-martial, the improper appearance of those composing the courts-martial, their jealousies, rivalries, and also the desire of some to vindicate the laws and justice, great injustice has been done, and will be done and the leading principles of military law and common justice violated, which can only be carefully and carefully decided in perpetuate. What a mockery of justice it is to read, in your columns, for instance, as we constantly do, that such a one has had a court-martial appointed to try him, granted a tedious waiting, and he is reinstated—"provided the Governor of his State has not filled the vacancy;" or, that he is reinstated "if he can get a leave of absence."

What a comment on the revising power and its use of the high prerogative of administering public justice with which it is entrusted! What a comment on the indifference from such action on the part of the authority which stands to the front in the defence of the rights of the people! Indifference, which is pleaded in such cases—never can justify the violation of the great leading principles of all law and common justice; and when the rights of the people and the soldier is to risk their lives in fighting its battles, it is at least extremely unreasonable to ask them also to risk the loss of that which is to them more valuable.

It is well for the soldier to see to it that no such abuse of power by courts-martial is distinctly authorized by "official sanction," which is calculated to undermine and oppression without an effort to be heard. As your journal seems to be the vehicle for the publication of this question, I have no doubt you will also accept the position of a *quasi* judge advocate of a court-martial and give a hearing to the same in a similar form. I have no doubt that in the place of a accused person, insuring fair play to both sides, for the concession that a court-martial may "alter or amend" charges before arraignment is one that they will not be disposed to admit.

LEX.

MAJOR HENRY L. ABBOTT,

20TH MASSACHUSETTS.

In the depths of that dense Virginia jungle, the Wilderness, where so many brave young soldiers of the Republic have tasted death, and where so many gallant officers have received orders, rose, at the age of 22. He was graduated honorably from Harvard College in 1859. At the fall of Sumter, he enlisted as gunner for the defence of Boston Harbor, and was appointed Sergt. in Battery Harbor. He next received a commission as Second Lieutenant in the 20th Massachusetts infantry, a regiment whose discipline and efficiency soon became the theme of universal praise in the Second corps, where during is common. In the 20th, his Captain and Four Lieutenants were killed or wounded in action, and the other regiments—COLONEL BARTLETT, of the 49th Massachusetts, and COLONEL MACY, of the 35th, both also wounded in the battle of the Wilderness—commanded Brigade. Major Abbott was distinguished for the severe fortunes of his regiment—the Peninsular campaign, POPE'S disasters, ANTIETAM, the two assaults of Fredericksburg and the terrible losing one at the Chancellorsville. He was twice wounded, selected as a storming party, Gettysburgh, Mine Run, and now the Wilderness. On the Peninsula, he was severely wounded, he received a ball through the left lung, and was left among the dead.

Of late, Major ABBOTT had abundant opportunity to command his regiment, in the absence of his superior officers, and exhibited noticeable skill and ability as a leader and disciplinarian. Of his fearlessness in battle, it is enough to say that his regiment was proud of it.

As we pen this, news comes of the death of Adjutant HENRY W. HOOD, of the same regiment, also wounded in the Wilderness and attacked and finally wounded by guerrillas while being carried to Washington. Adjutant HOOD was a young man whose devotion to patriotism was pure and unbestained, life, after a calm career of the east, being freely given up on the altar of the country.

TO THE PUBLIC.

DEPARTMENT OF STATE,
WASHINGTON, WEDNESDAY, May 18, 1864.

A paper purporting to be a proclamation of the President, countersigned by the Secretary of State, and bearing date of the 15th of May, is reported to this Department as having appeared in the N. Y. *World* of this date. *This paper is an absolute forgery.* No proclamation of this kind or any other has been issued or authorized to be made by the President, or issued, or proposed to be issued by the State Department or any other Department of this Government.

WILLIAM H. SEWARD, Secretary of State.

The following is the forgery, as it appeared in The World:

EXECUTIVE MANSION,
May 17, 1864.

Fellow Citizens of the United States:

In all seasons of exigency, it becomes a nation carefully to scru-

ance the line of conduct, humbly to approach the Throne of Grace, and meekly to implore forgiveness, wisdom, and guidance.

For reasons best known to Himself, it has pleased Him that this calamity should be the means of unparalleled outrage, and this nation the unprovoked sufferer of the Nineteenth Century. With a heavy heart, but an unhesitating confidence in our cause, I approach the performance of a duty devolved upon me by the solemn oath I made before Almighty God, and now registered in Heaven.

With entire confidence I tell you that the first Virginia campaign under Lieut.-General Grant, in whom I have every confidence, will cause courage and fidelity the people do well to honor, to return to them. Sherman's campaign will be equally successful and more striking. He has crippled their strength and defeated their best army.

Now, however, of the situation in Virginia, the disaster at Red River, the glorious victory in Arkansas, and the state of the country. I, Abraham Lincoln, do hereby recommend that Thursday, the 30th day of May, A. D. 1861, be observed by the people throughout the United States as a day of fasting, humiliation and prayer.

Burning hatred to slavery, combined with conditions of public affairs presents an extraordinary occasion, and in view of the pending exercises of the day, I have hereby fixed on the following order of exercises. Prayer, by Lieut.-General Grant, President of the United States, by order of the army and navy of the United States, and by the people, have thought fit to call forth, and hereby do call forth the citizens of the United States, between the ages of eighteen and forty-five years, to the aggregate number of (400,000,) four hundred thousand, in order to relieve the pressing necessities of the public service, and to assume the due execution of the laws.

And, furthermore, to such persons, or number of States, shall fail to furnish by the fifteenth day of January next, their respective quotas, a draft sufficient to fill the same to be ordered in accordance with the laws of the United States.

The blanks for the object will be communicated to the State authorities through the War Department.

I appeal to all loyal citizens to favor, facilitate and aid this effort to maintain the honor, the integrity and the existence of the National Union, and the perpetuity of popular government.

In witness thereof, I have hereunto set my hand, and caused the seal of the United States to be affixed. Done at the City of Washington this 18th day of May, in the year of our Lord one thousand eight hundred and sixty-four, and of the independence of the United States the eighty-eighth.

By the President,

ABRAHAM LINCOLN.

WM. H. SEWARD, Secretary of State.

OFFICIAL DISPATCHES.

TWELFTH DISPATCH.

WASHINGTON, May 12—8:25 P. M.

To Major-General Dix:

No dispatches from the Army of the Potomac have been received since 11:30 this morning. Heavy firing was heard from that front, rising probably to the damage to the line south of Nashville by the 28th inst.

A dispatch from General Sheridan, dated "Headquarters of the cavalry corps, May 11, 1864," says that he has just returned with his command into their rear, but destroyed eight to ten miles of railroad, two locomotives and cars, and large quantities of commissary stores, and that since he had got into the rear there was great excitement among the inhabitants of Richmond. That on the morning he started to convey his rear and flanks and had made one day's march, Stuart's cavalry division was in his front, moving toward Columbia. No dispatches have been received from General Butler.

Dispatches received from General Steele report his command as having arrived at Camden, Ark., on the 30th ult., without serious loss on the enemy, commanded by Kirby Smith in person, at Bahne River, well defended.

A skirmish from Red River, arrived to-day at Cairo, reports reconnoissance going out from Fort Randall, and that a portion of the second Cairo en bay was to Red River.

EDWIN M. STANTON, Secretary of War.

THIRTEENTH DISPATCH.

WASHINGTON, Friday, May 13—8:30 A. M.

Major-General Dix:

Official dispatches just received by this Department dated yesterday, 8 A. M., at the battle-field near Spottsylvania Court House, say that the day previous (Thursday) General Hancock made a most previous position on our right and occupied the ground between Generals Wright and Burnside. Early this morning he assaulted with unwonted impetuosity, turning the fort and then the second line of the enemy's works, finding them empty. Gens. Wright's and Burnside's division and part of Early's, together with Major-General Crawford's, Gouverneur K. Warren's late thirty-first corps, are in pursuit.

The number of prisoners is not yet given, but it is to be counted by thousands.

General Burnside on the extreme left opened at the same time with General Hancock, and advanced with co-operatively little opposition. His division is in pursuit. The enemy's retreating force on his left is now actively engaged.

Several Virginia papers obtained at seven fifteen o'clock, and are now at work.

Major-General Warren is disseminated to hold the enemy in front of his line. The number of prisoners is not yet reported.

A dispatch has been received from General Sutton, dated "In the field, Spottsylvania Court House, May 12, 1864."

It states that he is now pressing the enemy near Fort Darling, and has before him all the troops from Richmond, Petersburg and South Carolina that have got up.

Beauregard's counter was captured this morning going to General Hoke, in command of Bragg's Brigade. He had a dispatch stating that Beauregard would join him with 25,000 men to-day.

General Gillmore holds the entrenchments, while smith demonstrates within sixty miles of Richmond.

General Keith, with the cavalry, has been sent to cut the Danville Railroad, and Major-General Gillmore has been ordered to advance on James River.

We have had no telegraphic communication with General Sherman since Wednesday.

EDWIN M. STANTON Secretary of War.

FOURTEENTH DISPATCH.

WASHINGTON, May 13—12 o'clock, Midnight.

Major-General Dix:

A dispatch from the Commissary of Prisoners at Belle Plain, announces the arrival there of over 7,000 prisoners, including 400 officers, with Major-General Burnside's command.

EDWIN M. STANTON, Secretary of War.

FIFTEENTH DISPATCH.

WASHINGTON, May 13, 1864—2:30 P. M.

To Major-General Dix:

A dispatch from Lieutenant-General Grant has just been received, dated near Spottsylvania Court House, May 13, 6:30 P. M. It is as follows:

The eighth day of battle opens, leaving between three and four thousand prisoners in our hands for the last seven days, including two General officers, and over thirty pieces of artillery. The enemy are fortifying and are in front of Hancock, Wright and Burnside. Each army commander and even a company, whilst we have destroyed and injured and disabled a large portion of the enemy's force, and our opponents entire of the enemy.

E. M. STANTON, Secretary of War.

SIXTEENTH DISPATCH.

WASHINGTON, Friday, May 13—6½ P. M.

Major-General Dix:

The following dispatch from Mr. Dana has just reached this department:

"SPOTTSYLVANIA COURT-HOUSE, Va., }
May 12—8 A. M. }

"HON. E. M. STANTON, Secretary of War:

"Are shadowing his position during the night, whether to occupy a new position in the vicinity or to make a thorough retreat, is not known. General Grant, however, is not the man to abandon what he engaged in settling this question, and at 9 A. M. had come up on his line of battle. Hancock, Burnside and Wright were in front the same dogged efforts of yesterday, the news of Lee's departure inspires the best with fresh courage. The wounded are to be sent to the rear, while the heavy rains of the last thirty-six hours render the roads very difficult for wagons and artillery. The proportion of severely wounded is greater than on either of the previous days' fighting. This was owing to the great close quarters.

(Signed,) "CHARLES A. DANA, Secretary of War.

SEVENTEENTH DISPATCH.

WASHINGTON, D. C., Friday, May 13—6:35 P. M.

Major-General Dix, New York:

The Acting Surgeon-in-Chief reports that of five hundred patients from the recent battle-field admitted into the Harewood Hospital, only two have died since their reception, and that, in his opinion two-thirds of the whole number will be fit for duty in thirty days. Reinforcements are going forward from all parts of the Potomac.

EDWIN M. STANTON, Secretary of War.

EIGHTEENTH DISPATCH.

WASHINGTON, Saturday, May 14.

Major-General Dix:

Despatches from General Grant, dated yesterday, evening at six o'clock, have reached the Department.

They announce that Hancock, Wright and Burnside were still in front of the enemy's works. The enemy, however, developed fact that the enemy had fallen back four miles. There was no engagement yesterday. We have no account of any movement of the enemy's left since the battle of the preceding day. Colonel Carroll was severely wounded.

A dispatch has just been received from General Sherman, dated near Resaca, May 13, at 10 P. M., announcing the occupation of that place. Johnston had been forced to evacuate Dalton, and our forces were in the rear of the latter with the view of compelling him to fine order. All working well, and as fast as possible.

No intelligence has been received from Sigel or Butler.

Guerrillas have broken the telegraph lines between Williamsburg and Gold Summerville. They have fled, and the lines will open as reports have been received from him.

Despatches from Grant compel him to be at Woodstock. The rumor that he had broken the railroad between Lynchburg and Charlottesville is not credited.

Our wounded are coming in from Belle Plain as fast as the transports can bring them.

Grant's army is well supplied.

EDWIN M. STANTON, Secretary of War.

NINETEENTH DISPATCH.

WASHINGTON, May 14, 1864—9:30 P. M.

Major-General Dix:

The following telegrams have just reached this Department from General Sherman:

No other reports have been received since my dispatch of this afternoon:

EDWIN M. STANTON, Secretary of War.

HEADQUARTERS, }
HEAD QUARTERS, HALF WAY HOUSE, }
Saturday, May 14—10 A. M. }

HON. EDWIN M. STANTON, Secretary of War:

General Schofield's corps crossed the Oostanaula on the right this morning, at 8 A. M. Lost small.

The enemy's force crossed into three square redoubts, upon which we are now bringing our artillery to bear with effect.

WM. T. SHERMAN, Commanding.

TWENTIETH DISPATCH.

WASHINGTON, May 14—11:40 P. M.

Major-General Dix:

An official despatch from General Sheridan, dated at Bolton's Bridge, via Fortress Monroe, May 13, 10 A. M. on the 9th instant he marched around the enemy's right flank, and on the evening of the day reached the North Anna, after considerable fighting.

During that night he destroyed the enemy's depot at Beaver Dam, three large trains of cars, and the track for miles. Also two locomotives, two hundred thousand pounds of bacon and other stores, amounting in all to millions of dollars in value. Destroyed the telegraph and railroad track for about ten miles, extracting several miles of the latter and burning the ties and bridges of the road.

Including two colonels, one major and several other officers.

On the morning of the 10th, he moved his command crossing the South Anna at Grand Squirrel Bridge, and went into camp about daylight.

On the 11th he captured Ashland Station, destroyed here one locomotive and ten cars of the enemy, and burned the large and permanent buildings containing a large amount of stores; also destroyed the railroad track for miles, including the bridge, two trestle bridges, and the telegraph wire.

About seven P. M. on the 11th he resumed the march on Richmond. He found the rebel General Stuart with his cavalry concentrated at Yellow Tavern, about eleven miles from Richmond, on the obstinate contest gained possession of the Brooksdown pike, capturing two pieces of artillery and driving the enemy in confusion and disorder across the North fork of the Chickahominy. At the same time a strong column attacked the enemy's rear and drove him from all his positions on the line of the Chickahominy.

During the night he marched the whole of his command between the rebel and fortifications of Richmond, and on the forty-seven

ARMY AND NAVY IN CONGRESS.

The pressure of exciting military news was so great upon the last issue of the JOURNAL as to crowd out our customary *résumé* of the labors of Congress. That the record may be continuous, we incorporate the last fortnight's work in the following report:

SENATE.

On Wednesday, May 4th, Mr. HALE, of New Hampshire, reported a bill providing for a Board to examine the claims of contractors for side-wheel gunboats, known as "double enders." A similar bill, a joint resolution providing relief in the case was adopted.

The House Bill establishing a Bureau of Military Justice coming up, Mr. WILSON said it did an act of justice to one of the most deserving officers of the Government, Judge-Advocate Holt, who for three years had done the work. He considered that the position of the Judge-Advocate General was purely a civil office and should not be adorned with a chaplain. On motion of Mr. WILSON, the bill was laid on the table.

On Friday, May 6th, Mr. DOOLITTLE, of Wisconsin, called up the bill to return the Navajo Indians to their reservations in New Mexico, and appropriating $100,660 for that purpose. It was opposed by Messrs. CONNESS and HOWARD; but finally passed, yeas 28, nays 14. Mr. HOWARD, of Michigan, reported a long substitute for the Pacific Railroad Bill.

On Monday and Tuesday following, there was little done in either House. In the Senate the Bill to provide pensions for veteran volunteer engineers of the Army of the Cumberland was passed. A bill amendatory of the act regulating the grade of acting officers was introduced and referred.

On Wednesday, May 11th, Mr. LANE, of Kansas, introduced a resolution inquiring into the wretched military management of the Red River campaign. A spirited discussion arose, making it apparent that the entire administration, civil as well as military, of General BANKS, needed immediate investigation. The subject therefore was referred to the Committee on the Conduct of the War.

A resolution appropriating $50,000 for the Commander (the late Commodore WILLIAM D. PORTER) and the officers and crew of the Mississippi gunboat *Essex*, which destroyed the rebel ram *Arkansas*, was adopted after a debate of a second reading. The bill to equalize the grades of naval line officers was also passed.

On motion of Mr. SUMNER, the bill allowing Surgeon SOLOMON C. SHARP, U. S. A., to receive a service of plate from the British Government as a testimonial, was passed.

The bill for the organization of the Quartermaster's department was taken up, and Mr. GRIMES's amendment, providing that the proposed organization shall not exist unless than one year after the rebellion, was adopted, and the bill passed. It goes to the House. A synopsis has heretofore been published.

A preamble and resolution condemning the President's action in the case of Alexander Hall, and censuring, was introduced by Mr. DAVIS, of Kentucky, but were not disposed of. A joint resolution providing relief for the machinery contractors of the side-wheel gunboats was passed. The Conference Committee's report in reference to volunteer naval officers requiring their confirmation by the Senate was agreed to.

On Thursday, May 12th, a resolution calling on the Navy Department for information in reference to the erection of a naval depot at Albany, Maine, was adopted, as also a resolution calling on the Secretary of War for a list of all the general officers of the Army in continuous service, the commencement of the present war and those since commissioned; the States in which they were born and from which they were appointed, with a statement of confirmations, resignations, dismissals, deaths in the service, &c. After holding an executive session the Senate adjourned till Monday.

On Monday, May 16th, the conferring of commissions on Generals IRWIN and BURNSIDE was again discussed, and generally disapproved. The NAVY Appropriation Bill was passed, the Conference Committee's report being adopted. Bills were passed for relief of the widows of Generals EDWARD D. BAKER, E. P. WHIPPLE and HIRAM G. BERRY. The House bill granting promotions to confirmed Rebel lands was referred. The bill to equalize the pay of officers was taken up, and some amendments to it were adopted.

On Tuesday the subject of soldiers' pay was again discussed and passed, and went to the House. On Wednesday, the House Bill defining the pay of the staff of the Lieutenant-General was passed. Bills were introduced and a resolution to encourage and promote enlistments in the Army, which was referred.

HOUSE.

On Wednesday, May 4th, the Fortification Appropriation Bill was reported and passed with amendments for repairs in Boston Harbor. In the evening session, the bill extending to soldiers and sailors, without regard to color, the benefits of the Homestead law on Rebel confiscated lands, was taken up and debated, the discussion, as usual, going into politics and parties.

Thursday was taken up almost entirely with discussing the bill to authorize the State of Missouri to raise troops incurred in calling out the militia during the Rebel invasion of 1863. Mr. COX, of Ohio, offered an amendment to appropriate fifteen millions to pay the expenses of all the States that had called out troops to repel raids of the enemy; after great discussion it was adopted, and the bill passed, 71 to 65.

On Friday, May 6th, a resolution was adopted instructing the Committee on Naval Affairs to examine into the expediency of locating the proposed navy-yard on the west side of the Hudson River, nearly opposite Yonkers. But we are informed the Committee are disposed to look favorably on Lodore as the proper site. The claims of League Island are also urged strongly.

Mr. RICE, of Massachusetts, introduced a bill to regulate prize proceedings and distribution of prize money.

Mr. GOOCH, of Massachusetts, from the Committee on the Conduct of the War, made a report of the ill-treatment of prisoners in Rebel hands. Forty thousand copies were ordered to be printed, together with an equal number of the Fort Pillow massacre report.

In the House Military Committee the proposed military railroad in East Tennessee was approved, and its construction recommended to Congress.

On Wednesday, May 11th, a debate took place on the bill to give the soldiers and sailors of the present war homesteads on the confiscated lands of rebels, after the expiration of the morning hour it was laid aside, and the joint resolution to drop from the army rolls all unemployed generals, except those on the retired list, all surgeons, and all the offering and rejection of a few amendments, was adopted, 72 to 55.

Next day, Thursday, the House passed the military homestead bill, after a long debate, by 75 to 64.

On Friday, May 13th, the Rebel victories prevented legislation, and amidst great cheering dispatches from the Army were read.

On Monday, the 16th, the proceedings in the trial of Commodore WILKES and ROBERT TAYLOR were called for by resolution, and also a resolution on General HUREMAN'S order concerning cotton lands in Natchez.

On Tuesday, the 17th, the House acted on the disagreeing amendments to the Army Appropriation Bill. Among those agreed to are $75,000 for the hospital at Mare Island; $15,000 for a cemetery for the Navy and Marine corps near Philadelphia; providing that the appropriation of $760,000 for a floating dry-dock and navy-yard, may construct two dry-docks at New York and Philadelphia—$360,000 for each—and the balance for a floating Sectional Dry-dock.

On Wednesday, the 18th, a resolution was adopted inquiring into the expediency of providing for the promotion of non-commissioned officers and privates distinguished for good conduct and bravery in the field, as officers of the line.

ARMY GAZETTE.

MAJOR-GENERAL MEADE TO HIS ARMY.

HEADQUARTERS ARMY OF THE POTOMAC, May 15, 1864.

SOLDIERS:—The moment has arrived when your Commanding General feels authorized to express to you his appreciation of your services.

For eight days and nights, almost without intermission, in rain and sunshine, you have been gallantly fighting a desperate foe, in position naturally strong, and intrenched at every available point.

You have compelled him to abandon his fortifications on the Rapidan, and to assume new and stronger ones, and now he has abandoned the last entrenched position he successfully occupied, and is in full retreat, twenty-two miles south, with eight thousand prisoners including two general officers.

Your brave deeds, and heroic endurance, your pride and privation, will ever be memorable. Let us return thanks to God for the mercy he has shown us, and ask earnestly for its continuance.

Soldiers! Your work is not yet over. The enemy must be pursued, until possible, overtaken. The courage and fortitude you have displayed renders your Commanding General confident that your future efforts will be crowned with success.

While we mourn the loss of many gallant comrades, let us resolve that their memory shall be honored by paying, if our grateful losses.

We shall soon receive reinforcements which he cannot expect. Let us determine then, to continue vigorously the work so well begun, and by the blessing of Almighty God the object of our labors will be accomplished.

(Signed) GEORGE G. MEADE,
Major-General Commanding.

(Official,)
S. WILLIAMS, A. A. G.

GENERAL SHERIDAN'S DISPATCH.

HEADQUARTERS CAVALRY CORPS, May 13, 1864.
Major-General MEADE, Commanding Army of Potomac:

GENERAL—I started the enemy's right and got into their rear. Did not meet sufficient force to detain me. Destroyed the railroad for miles at Orange Railroad, two locomotives, three trains and a very large depot of supplies. Struck the Virginia Central at Beaver Dam depot of supplies at Hanover Dam. Since I got into their rear there has been a continuous storm of rain. The country is so flooded that I have ordered my command to the James. The enemy has attempted to get around me, but I have successfully thrown off. I expect to rejoin their cavalry south of the South Anna River. Have re-captured five hundred of our men and released them.

Very respectfully, your obedient servant,
P. H. SHERIDAN, Major-General Commanding.

DECLARATION OF EXCHANGE.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, May 17, 1864.

GENERAL ORDER No. 193.

1. The following officially reported from the Rebel Commissioner of Exchange, has declared, without consulting with the authorities of the United States, that the following articles delivered at City Point up to the 27th of April were exchanged, *i.* *e.*

Colored, Total all Rebel prisoners of war, all artillans on parole prior to May 7, 1864, be declared exchanged, and they are hereby declared exchanged accordingly.

2. It is further announced, that after deducting the number of Federal officers and men embraced in the above exchange, the rebels will remain indebted to the Federal Government, according to tables carefully prepared by the Commissary General of Prisoners, from official data, 13,596, for which no equivalents have been received by the Federal Government.

3. All paroled officers and enlisted men herein declared exchanged, who are in this camp, will be immediately forwarded by the commandants of camps to their regiments and commands, and will report by letter to the Commissary General of Prisoners, Washington. Those who are absent on leave, will, on expiration of their leave, report to the Chief Mustering Officer of Rendezvous, Maryland, or Columbus.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant-General.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

TO BE MAJOR-GENERALS IN THE VOLUNTEER FORCE.

REMOVE FROM DISMISSAL.

The following-named officers, charged with offences, and heretofore published, are exempt from being dismissed the services of the United States, by direction of the President instituted by Paragraph No. 83, series of 1863, from this office, having reported that satisfactory explanations have been made in their respective cases, viz.:

Second Lieutenant A. B. Twining, 1st Connecticut artillery.
Captain James A. Mitchell, 16th Maryland infantry.

NOTICE TO DELINQUENTS.

The following officers, having been reported at the headquarters of the Army for the Department in which they are stationed, are hereby notified that they will stand dismissed from the service of the United States, unless, within sixty days from the date of this order, they appear before the Military Commission, in session in Washington, D. C., of which Brigadier-General Thomas M. Vincent, Assistant Adjutant-General, is President, and make satisfactory defence to the charges against them:

Absent without leave on officer and a gentleman.

Captain Alexander Hall, Fifth Michigan Volunteers.

For being in the city of Washington without proper authority, and failing to report under arrest at headquarters Military District of Washington, as ordered.

First Lieutenant Jacob Hamilton, Company F, 9th regiment Veteran Reserve corps.

First Lieutenant Robert A. Ogden, 1st Ohio light artillery.

For being in the city of Washington, D. C., without proper authority.

First Lieutenant J. J. Bragdon, 2d New Jersey battery.
Captain R. R. Hall, 2d New York cavalry.

Absence without leave.

First Lieutenant Bernard Sherry, 69th Pennsylvania Volunteers.
First Lieutenant Joseph Bretzinger, 69th Pennsylvania Volunteers.
First Lieutenant Lyman S. Linson, 9th regiment Corps d'Afrique.

NAVY GAZETTE.

Owing to objection on the part of the Navy Department, our usual quota of Navy Gazette is crowded out this week, and this week is again vacant. It will, however be resumed in the next issue, when the back orders will be published in full.

THE RED RIVER EXPEDITION.

OFFICIAL REPORT OF REAR-ADMIRAL PORTER.

MISSISSIPPI SQUADRON, FLAGSHIP CRESCENT,
MOUTH OF RED RIVER, LOUISIANA, April 28, 1864.

SIR:—I had the honor to inform you, in my communication No. 10, of the raising of the Red river sufficiently to enable Major-General Banks, assisted by the explosion of a torpedo under her bottom, to get the *Eastport* over the rapids. The same night I proceeded at once to the vessel, and found her sunk to the gun-deck, the water over it on one side.

I saw that no time was to be lost, and went to Alexandria, in hopes of finding the pumps of the *Champion* No. 3. Lieutenant-Commander Phelps had already sent a tug down for the same purpose, and at 4 o'clock that night the pumps had been brought and proceeded on up. An hour after the officer sent came up, and I sent her up with directions to continue till the vessel was relieved.

I had ordered all her guns taken out and all her ammunition transferred to other vessels, which was done by the time I reached the vessel. The pumps were at work, and the water was lowering.

I was detained a day in Alexandria, making a different disposition of the vessels under my command, in consequence of the capture of Fort Hudson by the rebels. I sent some of the heavy iron-clads to Fort Hudson to protect the transports, and ordered the lighter vessels to the mouth of Red river.

When I returned to the vessel, I found her in a fair way of being relieved. The pumps had commenced to lower her deal of more than eighty diameter the water. The leak had to be stopped before the vessel could be raised. The leak was at the bow, and by very vigorously to endeavor to save his vessel, and he was rewarded by the success of his efforts. The vessel was relieved of water to that was performed by the officers and crew of the *Eastport*, and it was owing to the prompt action of all on board that the vessel did not fall into the hands of the enemy, if it could be helped.

The *Champion* No. 3 remained with us for a short time permitted, but I had a faint idea that our Army was about to fall back on Alexandria, and sent her down to Simmesport by during the *Eastport*, or perhaps lose some other vessels.

On the morning of the 26th I found that preparations were making to move the Army in the direction of Alexandria, and I received from Major-General Banks a request that I would have to proceed slowly to Alexandria, keeping with me the lighter draft vessels to cover the rear of the Army in case of attack by the enemy.

The day after my return to Grand Ecore orders were given for the Army to move in the direction of Alexandria. I have not since, and I thought my chance of saving her very small, even if we met with success in having our transports with the Army left. On the 26th of April I went down to the *Eastport* again, and found that the army her commander had written should be destroyed. It was necessary to use some trials if we were to save the vessel. She was then lying listing on the bottom on one side, and steam had been raised on her.

On the 21st she started in tow of the pump-boat *Champion* No. 3, and with the pump of *Champion* No. 3 transferred to the *Eastport*, and connected with her bailers. This arrangement, with the addition of one of the *Champion*'s pumps, soon had water on the fire-room and confined it to the bow.

We passed Alexandria about 3 o'clock before Grand Ecore, and sent up a gunboat to convey down all the transports that were left up there. The vessel keeping up the race, towing a-fast on which was all the *Eastport*'s guns.

On the first day the *Eastport* sank twenty miles down the river, and at o'clock in the evening she grounded from not being in the channel, and there she still remains, the channel being narrow, and over the bar and other obstructions which abound in this river.

It would be impossible to give an adequate idea of the difficulties of the navigation from the 31st of April up to the 26th, the time when it was no longer considered possible to get the *Eastport* over the sand bars and logs, now increasing, unless time was allowed to get extra steam, and the officers were kept from scraping as while we were at work.

The Lieutenant-Commander commanding the *Eastport*, S. L. Phelps, had done all that man could do to save his vessel, and felt it was a matter of duty to stay by her as long as possible.

She grounded eight times badly, and each time under circumstances where to work the engines would only have sunk her. The commander's conscience never deserted him, and I could not help admire his firmness in refusing to allow steam to be used at times when I knew there were pieces to pass below with much less water than was needed.

I determined not to leave the vessel, and sent word to her size to that the commander felt a hope of getting her down.

I worked with him constantly, and we had the same object in view, sleeping apparently neither night nor day—anybody could, and was allowed to sleep when he could not help it.

Gradually, I never went through so much anxiety in my life. On the 4th day of the month I got the *Eastport* between the bars, and after congratulating ourselves that we had passed every impediment, except one, which I knew I could get through the mud, we started down stream with the expectation of making at our first night's anchorage. We had, however, only passed twenty-two miles on her way, and sixty more would bring her within our reach.

The Army though were sixty miles ahead of us, and the report we had to be taken from the mouth of the river to the Mississippi was in mud, and we might naturally expect when the Army arrived safely in Alexandria that we had made part of the same journey. We decided to cutting off my small force of three light draifts and the *Eastport* without any other assistance, and to proceed down together, each one their intentions.

On April 26 I passed the last open stream, and had scarcely passed before the *Eastport* was hard aground, and this time to a position where even I, who had confidence in her getting off, thought the difficulty here was a word of water, and the bed of the river was of such a character that I felt sure she would not be able to get her keel sufficiently low to float her.

We tried to lighten her by removing her iron plating, but this we found to be labor thrown away, and that the vessel would have to be moved in a short time, and that plan was abandoned at once.

I had determined to get her off, and I knew that there was no help either our fleet, or blown up, to prevent her falling into the hands of the enemy.

On two occasions I had given the commander preparatory instructions relative to her destruction, and I knew that he would do it in all impartial and generous, he stuck to the work, and deserved to meet with success.

Every effort was made to get the *Eastport* off from what proved to be her final resting place.

The quadroon *Fort Hindman*, whose commander has worked to assist the *Eastport* with a will, and who has performed the duty of our steam captain in moving her here, but only enough to get us in a worse position, and the *Fort Hindman* herself, I had to leave to her, and from this place it seemed that no human power could save her. The water was falling rapidly, and the channel was in such a state of filling her off unless we had time and our rear protected, I gave an order to destroy her.

Ten tons of powder was placed in her in various positions, she was filled with such combustibles as could be procured, and on the 27th April the *Eastport* was blown up, Lieutenant-Commander Phelps applying the match, and I am sorry to say, never gave the crew the opportunity time to reach the boat when the *Eastport* blew up, covering the air with fragments of iron, and the concussion was tremendous, and on the famous bends form in every direction.

Let me not be misunderstood, I would not protect a wreck as ever was made by powder. She remains a troublesome obstruction to block up a channel for years to come, but I do not think that the machinery and such parts of the machinery as could be made available by our fleet will be lost.

Every one working in the vessel left her in time to get on board the tugs the hull. Some fell overboard, as the fire burnt away the wood to which they were lashed, and were picked up immediately by the tugs.

I would have brought away every piece of iron, had I not been assured that I had overstayed my time.

Charge of guerrillas had been on the left bank of the river, and no precaution to blowing up the *Eastport* we were attacked by a heavy force on the right bank.

The vessel was lying tied to the bank, and I was looking out from the *Eastport* in the *Fort Hindman* when the enemy opened fire with out inquiry to any one. The rebels selected the moment to make their attack, and, opening fire with artillery, they were met by a fire from sixteen with 1,200 muskets, and then made a rush to board the vessel.

The enemy, however, were properly met and repulsed, and the attack, dropping out the road, and the *Fort Hindman* was under her own master, and, with a heavy cross fire from the two other vessels, the rebels were speedily driven back with loss, and the *Fort Hindman* at once proceeded down the river.

We were not satisfied until we had gone about twenty miles, at a rate above Gene River. When running the point, the vessels in close line and nearly the entire force were on deck, I was standing on the glacis, on the right bank, and we immediately opened fire with our rear guns. The vessels were under way at the time, and I was on the glacis, when all, every one of which struck this vessel.

The Indian Chief, the *Fort Hindman* and *Osage* came to stop the engines, for the purpose of fighting the battery and covering the boats astern. I ordered them to proceed, and when the vessels had passed, the sun soon enough to avoid the pitting shower of shot and shell that the enemy poured on us, we then proceeded down the river, firing and clearing all on deck in a few moments.

Nothing else passed worthy of notice. I stopped on the gun-deck to see this was the matter. As I stepped down, the after-gun was struck by a shell and disabled, and a number of men at the gun were killed.

As the same moment the crew from the forward gun were scared by a shell exploding among them, and I found that I was the only one left to rally one man to fire.

I succeeded in getting the contrabands, who fought them to the last, and as a gun was fired, I ordered the men to return to their guns—men and found the chief-engineer killed, whose place was soon occupied by an assistant engineer, and the vessel was under way. Action had been through it and wounded one of the pilots. I took the wheel myself, and, with the assistance of the engineer, I succeeded in clearing all on deck in a few moments.

Finding the pilot was wounded, I stopped on the gun-deck to see this was the matter. As I stepped down, the after-gun was struck by a shell and disabled, and a number of men at the gun were killed.

At

BUSINESS NOTICE.

MORTON'S GOLD PENS are now sold at the same price as before the commencement of the war; this is entirely owing to the Manufacturer's improvements in machinery, his present Rapid Method of Solid-to-Advance System; for, until he commenced advertising, his business was done on Credit and strictly with the Trade.

The Morton Gold Pens are the only ones sold on said prices, as the makers of all other gold pens charge the Premium on Gold, Government Stamp and tax. Morton has in no case changed his prices, Wholesale or Retail.

Of the great numbers sent by mail to all parts of the world during the past few years, not one is on a thousand but would have been returned to the owner, showing that the Morton Gold Pen can be obtained by any one, in every part of the world, at the same price, postage and tax excepted.

Reader, you can have no enduring, always ready, and reliable Gold Pen, exactly adapted to your hand and style of writing, which will be your constant friend by cheaper than Steel Pens; and at the present season replenish Ships Stores! Free of exchange, you can have a Morton Gold Pen cheaper, in proportion to the labor spent upon it and material used, than any other Gold Pen in the World. If you want one, send the "Pen is Mightier than the Sword," in another column.

MARRIED.

(Announcements of marriages should be paid for at the rate of fifty cents each.)

BRADEE–STEWART.—In South Boston, May 18th, by Rev. E. A. Starling, Lieutenant Harry S. Bradee, of the 20th Massachusetts Volunteers, to Miss Mary E. Stewart, daughter of Lieutenant-Colonel J. Stewart.

MERRIAM–SNOW.—In Chelsea, Mass., May 14th, by Rev. O. H. Leonard, Jacob W. Merriam, Acting Captain U. S. N., to Miss Mary Jane Snow. Also on the 15th, Eugene R. Fuessle, Esq., of Boston, to Miss Ella J. Snow, sisters of Boston.

CORNELL–FATTERSON.—In Brooklyn, N. Y., on May 19th, 1864, by Rev. Dr. Littlejohn, Director of Holy Trinity, Dr. Wm. Cornell, U. S. A., to Miss Mary, daughter of General Alex. Patterson, of Key West, Florida. No cards.

DIED.

PURSER.—In Washington, D. C., on Saturday, May 14th, in the residence of her grandfather, Colonel William Maynadier, U. S. A., Lucy Purser, infant daughter of Lieutenant-Colonel Samuel S. Purser, U. S. N.

SMITH.—At the Girard House, Philadelphia, on the 16th inst., Washington Smith, Surgeon U. S. N.

HARDY.—At Fort Wadsworth, S. I., on Thursday, May 19th, Jesse Hardy, Consort Commodore Hardy, aged 76 years.

ARNOT.—Died, at the Soldiers' Home in Wilkesbarre, May 9th Major Henry L. Arnot, of the 50th Regiment Mass. Vols., aged 32 years.

BROWN.—In Brooklyn, N. Y., on Saturday, May 14th, Anna Brown, wife of Lieutenant Thomas S. Brown, U. S. N., and youngest daughter of the late Samuel Kissam.

ADVERTISEMENTS.

Advertisements of a character suitable to the columns of the JOURNAL will be received at the following rates: 15 cents a line for each insertion. Advertisers are requested to make their favors as short as possible.

SPORTSMEN, TOURISTS, AND OTHERS.

POWERFUL AND BRILLIANT DOUBLE GLASSES.

Portability combined with great power in Field Marine, Theatre, opera and general out-door day and night double perspective glasses, will show distinctly a person at a distance of 2 to 6 miles. Specimens of the greatest transparent power to strengthen and improve the sight, without the slightest strain or fatigue. Catalogues sent by enclosing a stamp.

TO PURCHASERS OF RIFLES.

In consequence of the numerous applications which I have had for my improved rifle sights of the "Hiatt to Reference," I am induced to offer my services to the public as an Agent for the purchase of Rifles of every description. Having no personal interest in any particular rifle, I can make such arrangements with the principal manufacturers and dealers that I can supply purchasers with arms of any pattern that is in the market. I will select for any one who leaves the choice to me, or will procure a gun of any specified pattern and prove its capacity by such charges and balls as may be used in actual service.

It is proper to state that the unprecedented demand for rifles renders it impossible to procure them promptly by those of the best models; but my arrangements will enable me to do as fast as the condition of the trade and contractors will be served in the order of their applications. Address H. W. S. CLEVELAND, Detroit, Mich.

"THE PEN IS MIGHTIER THAN THE SWORD."

THE GOLD PEN—THE BEST OF ALL PENS.

MORTON'S GOLD PENS,

No. 25 Maiden Lane, New York.

Are now kept in Stock and Manufactured as heretofore, and are sold at the same prices as before the commencement of the war; this is entirely owing to the Manufacturer's improvements in machinery, his present Rapid Business and Cash-in-Advance System; for, until he commenced advertising, his business was done on Credit and strictly with the Trade.

The Morton Gold Pens are the only ones sold on said prices, as the makers of all other gold pens charge the Premium on Gold, Government Stamp and tax. Morton has in no case changed his prices, Wholesale or Retail.

Of the great numbers sent by mail to all parts of the world during the past few years, not one is on a thousand but would have been returned to the owner, showing that the Morton Gold Pen can be obtained by any one, in every part of the world, at the same price, postage and tax excepted.

Reader, you can have no enduring, always ready, and reliable Gold Pen, exactly adapted to your hand and style of writing, which will be your constant friend by cheaper than Steel Pens; and at the present season replenish Ships Stores! Free of exchange, you can have a Morton Gold Pen cheaper, in proportion to the labor spent upon it and material used, than any other Gold Pen in the World. If you want one, send the "Pen is Mightier than the Sword," in another column.

THE FOLLOWING ARE THE PRICES:

No. 1 Gold Pens without cases.

For 25 cents, the Magic Pen; for 38 cents, the Lady's Pen; for 50 cents, the Gentleman's Pen; for 75 cents, the Excelsior Pen; and for $1, the Excelsior Pen. These Pens are not numbered, but correspond in size to Nos. 2, 3, 4 and 5 respectively.

THE SAME PENS IN SILVER-PLATED EXTENSION HOLDERS, WITH PENCILS.

For 50 cents, the Magic Pen; for 75 cents, the Lady's Pen; for $1, the Gentleman's Pen; for $1 50, the Elegant Pen; and for $1 50, the Excelsior Pen. These holders are Numbers 0, 1 and 2, and, like Pens, with Indiscants Points, the average wear of every one of which will maintain a writing for a year. These Pens; although they are unwarranted, and, therefore, not exchangeable.

MORTON'S WARRANTED PE

The name "A. Morton," "Number," and "Quality," are stamped on the following Pens, and these points are warranted for six months, except against wear.

The Numbers indicate size only: No. 1 being the smallest, No. 6 the largest, adapted for all writing. No. 4 the smallest, and No. 10 the largest Mammoth Gold Pen, for the desk.

Long and Medium Nibs of all sizes and qualities. Nos. 4 to 8 Numbers 2 to 6, fine; 3 to 7, medium; 4 to 8, of first quality.

Fine and Broad and Short Nibs are also pointed; the Medium Nibs are Broad, Coarse, Business points. This range of pens are sometimes of the size and style.

GOLD PENS, WITHOUT CASES.

For 25 cts No. 1 Pen, 1st quality; or a No. 2 Pen, 2d quality.

For 38 cts No. 2 Pen, 1st quality; or a No. 3 Pen, 2d quality; or a No. 4 Pen, 3d quality.

For 50 cts No. 3 Pen, 1st quality; or a No. 4 Pen, 2d quality; or a No. 5 Pen, 3d quality.

For 75 cts No. 4 Pen, 1st quality; or a No. 5 Pen, 2d quality; or a No. 6 Pen, 3d quality.

For $1 No. 5 Pen, 1st quality; or a No. 6 Pen, 2d quality; or a No. 7 Pen, 3d quality.

For $2 No. 6 Pen; $2 75 a No. 7 Pen; $3 25 a No. 8 Pen; $4 a No. 9 Pen; $6 a No. 10 Pen—all 1st quality.

THE SAME GOLD PENS, IN SILVER EXTENSION CASES, WITH PENCILS.

For $1 50 a No. 1 Pen, 1st quality; or a No 2 Pen, 2d quality.

For $1 75 a No. 2 Pen, 1st quality; or a No 3 Pen, 2d quality; or a No 4 Pen, 3d quality.

For $2 a No. 3 Pen, 1st quality; or a No 4 Pen, 2d quality; or a No 5 Pen, 3d quality.

For $2 50 a No. 4 Pen, 1st quality; or a No 5 Pen, 2d quality; or a No 6 Pen, 3d quality.

For $3 a No. 5 Pen, 1st quality; or a No 6 Pen, 2d quality; or a No 7 Pen, 3d quality.

GOLD PENS, ALL FIRST QUALITY, IN SILVER EXTENSION CASES, WITH PENCILS.

For $2 a No. 4 Pen; for $2 25 a No. 5 Pen; for $2 75 a No. 6 Pen; for $3 50 a No. 7 Pen;

For $4 a No. 8 Pen; for $5 a No. 9 Pen; and for $6 a No. 10 Pen.

The "best quality" are pointed with the very best Iridium Points, carefully selected, and although this quality are sold with the slightest imperfection which does not impair their usefulness.

The "2d quality" are superior to any Pens made by the principal trade in this city.

The "3d quality" to intende shall equal in respect and Durability, any Gold Pens made by whatever the only true consideration any Gold Pens made or offered.

In regard to the Cheap Gold Pens, he begs leave to state that they are manufactured by new and Improved Machines, he could not have made up Good Willing Pens, and that in 1864, up to date, no Gold Pens have been furnished gratuitously.

Purchasers ordering pens in all instances specify the "Name" or the "Number" and "Quality" of the Pens desired, stating the particular point, if any, required, whether stiff or limber, coarse or fine.

All remittances should be in registered letters or at my risk; and to all who send twenty cents additional for postage, in addition to the price of goods ordered, I will guaranty their safe delivery.

Parties will please address all letters to the exact address as below.

TO CLUBS.—A discount of 16 per cent. will be allowed on Nos. 1 to 6 Pens, and of 16 per cent. and 25 per cent. on $6, if sent to one address at one time.

Address A. MORTON,
No. 25 Maiden Lane, New York.

FIRST NATIONAL BANK OF GETTYSBURG,

DESIGNATED DEPOSITORY AND FISCAL AGENT OF THE UNITED STATES.

10-40 Loan.

This Bank is prepared to receive subscriptions to the

NEW GOVERNMENT LOAN,

issued under authority of an Act of Congress, approved March 3, 1864.

The Bonds are redeemable after ten years, at the option of the Government, and is payable in forty years in coin, and are exempt from all taxes but Income.

5 PER CENT. PER ANNUM.

REGISTERED BONDS issued in the amount of the following denominations—$50, $100, $500, $1,000, $5,000 and $10,000.

COUPON BONDS will be issued—$50, $100, $500 and $1,000.

INTEREST IN COIN

will commence from date of subscription, or the accrued interest from the 1st of March, can be paid in currency. Subscriptions to U. S. notes or notes of National Banks, adding (60) fifty per cent. to the amount subscribed.

Coupon Bonds ready for delivery.

JACOB SCHICK, Cashier, President.

PROPOSALS FOR ANCHORS AND KEDGES.

NAVY DEPARTMENT,
BUREAU OF STEAM ENGINEERING,
Washington City, May 14, 1864.

The Bureau of Equipment and Recruiting will receive, until 12 o'clock, noon, on the 1st day of June, proposals for the manufacture and delivery at the Navy Yards as may be designated, the following iron stretock anchors and kedges:

4 of	2,000 pounds.
63 of	1,800 pounds.
4 of	1,600 pounds.
39 of	1,500 pounds.
4 of	1,400 pounds.
69 of	1,200 pounds.
4 of	1,000 pounds.
70 of	800 pounds.
4 of	700 pounds.
68 of	600 pounds.
4 of	500 pounds.
60 of	350 pounds.
4 of	300 pounds.
60 of	250 pounds.

The above weight is exclusive of the stock, which will be to the approved pattern, and that to be made of the best scrap iron, of the form, dimensions, and weight as will be made for the navy yards, and be subject to such inspection as the Bureau may direct.

One-half of these anchors, each of the size from 1,800 to 250 pounds inclusive, must be delivered in one month from the date of the notification of the award of the contract, and the remainder in one hundred days from the same date.

Each bidder for this contract will be similar to those used in the Navy.

Bids will be received separately by the pennes as required by law, that, if awarded, the contract will be complete.

The proposals must be endorsed, "Proposals for Anchors." That they may be delivered to those other business letters, and be addressed to the Chief of the Bureau of Equipments and Recruiting, Washington, D. C.

NEW SONG BOOKS.

OSSIAN'S HARP. A collection of Comic and Sentimental Songs, compiled by Carlos F. Dodge. "Words and Music, 25 cts. SHILLING SONG BOOK. Words and Music, 25 cts. These books contain those songs that have appeared since the publication of Near 1 and 2 Shilling Song Books, to be found in no other collection, 12 cts.

Published by OLIVER DITSON & CO., Philadelphia, 277 Washington street, Boston.

U. S. 10-40 BONDS.

These Bonds are issued under the Act of Congress of March 3th, 1864, which provides that said Bonds issued under this Act SHALL BE REDEEMED IN COIN, at the pleasure of the Government, at any period not less than ten nor more than forty years from their date, and until their redemption FIVE PER CENT. INTEREST WILL BE PAID IN COIN, on Bonds of not over one hundred dollars annually, and on all other Bonds semi-annually. The interest is payable on the first days of March and September in each year.

Subscribers will receive either Registered or Coupon Bonds, as they may prefer. Registered Bonds are recorded on the books of the U. S. Treasurer, and can be transferred only on the owner's order. Coupon Bonds are payable to bearer, and are more convenient for commercial uses.

Subscribers to the loan will have the option of having their Bonds dated from April or March 1st, by paying the accrued interest in coin, (or in United States notes, or the notes of National Banks, adding fifty per cent. for premium,) or receive them drawing interest from the date of subscription and deposit. As these Bonds, by Act of Congress, are

EXEMPT FROM MUNICIPAL OR STATE TAXATION,

they will be found the most desirable security for investment in currency, and are of equal convenience as a permanent or temporary investment.

It is believed that no securities offer so great inducements to lenders as the various descriptions of U. S. Bonds. In all other forms of indebtedness, the faith or ability of individuals or stock companies or separate communities only is pledged for payment, while for the debts of the United States the whole property of the country is holden to secure the payment of both principal and interest in coin.

These Bonds may be subscribed for at par from $50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will lose the benefit of the interest.

The Funded Debt of the United States on which interest is payable in gold, on the 3d day of March, 1864, was $707,905,000. The interest on the debt for the coming fiscal year will be $35,875,250, while the customs revenue in gold for the current fiscal year, ending June 30th, 1864, has been so far at the rate of over $100,000,000 per annum.

It will be seen that even the present gold revenue from customs would more than pay the interest on the debt, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of importations, to $140,000,000 per annum.

Interest on Registered Bonds selling on less terms were not issued until March 26, but the amount of Bonds reported sold at the United States Treasury up to May 7th was

$44,606,100.

Subscriptions will be received by the Treasurer of the United States at Washington, and the Assistant Treasurers at New York, Boston and Philadelphia, and by the

First National Bank of New York, No. 4 Wall-st.
Second National Bank of New York, 2d-st. and Broadway.
Fourth National Bank of New York, Pine street.

CHICKERING & SONS,

MANUFACTORERS
GRAND, SQUARE, AND UPRIGHT
PIANO-FORTES,
Warerooms, 652 Broadway, New York.

The superiority of these Instruments is amply guaranteed by the universal testimony of the best musical artists of the day, who claim for them excellence of tone and mechanical structure unsurpassed by any other makers. Mr. Gottschalk's constant use of Chickering Pianos has served to attract their notice as soldiers, and resulted in establishing the pioneer house in every Southern city on which they are sold.

Messrs. C. & SONS have been awarded 59 First Premiums, over all competitors, for the superiority of its manufactures, their patent improvements, and the unity of great power, brilliancy and purity of tone and elasticity of touch.

DOUNTY, PRIZE MONEY, BACK PAY, &c.—Soldiers of all kinds Back Pay and Bounty promptly collected. Officers and Soldiers of all insurrections sent to us parts of the country, can promptly secure same by calling on or addressing

THE CAMPAIGN IN VIRGINIA.

OUR detailed account of last week's operations closed with the story of Tuesday. There had been a pause in the heavy fighting. The wretched condition of the roads had for several days delayed advance. Baggage wagons and caissons sank axle-deep in mud, and neither much profanity nor strong leverage could avail to pry them out, except after great lapse of time. Rapid transfer and massing of infantry was hardly less difficult, and repeated attempts, of which the chief was on the preceding Saturday at daybreak, proved that concerted movements for attack must be for a time relinquished. There was, also, universal bodily exhaustion among the troops, in spite of their admirable temper. It obviously remained, therefore, to employ a few days in rest, refreshment, and preparation. The first necessity was promptly and steadily to clear the camp of wounded; and long trains of ambulances passed day and night over the rough and painful Fredericksburg road. Multitudes of crippled soldiers, also, dragged themselves slowly in the same direction, running the gauntlet of MOSEBY's guerrillas, who, still scouring the ground, here and there, on both sides the Rapidan, occasionally pounce upon stragglers or squads of wounded. On Monday, a division of HANCOCK's Second corps moved off to the position on the right, which had been abandoned by us on Saturday—so hastily abandoned that not only a considerable quantity of small arms and limbers, but even a hospital full of wounded, had been left behind. They easily recovered all the wounded, numbering about a thousand, and brought them off. A commissary train had previously been sent to the same point with five days' rations, and were prepared to find the enemy in possession of the hospital, and a flag of truce necessary. But the enemy had also left the ground. Meanwhile, army wagons kept constant communication with the rear, bringing up commissary stores and ammunition, of which at least a full supply was received. Very large reinforcements also came in. The Secretary of War has announced that "more than 25,000 veteran troops" are already there, and we must add other thousands to express the actual force which has been dispatched to the front, up to the present time. There was much to do in reorganizing and disposing these new troops to the best advantage, filling up the depleonble gaps of ten days' service. Finally, there was many work in entrenching, wherever entrenchments could be useful; and the troops often labored, in some parts of the line, all night. Reconnoissances were continually and carefully made, and each movement of the enemy noted.

The troops, meanwhile, were improving in health and spirits. Supplies were kept constant and rations full. Bands played in the evening, and the men cheered by congratulatory orders, as well as by camp rumors, of the successes in Virginia and Georgia. Instances of valor also were rehearsed in the camps, and the feeling aroused that opportunity would rapidly follow merit. The story of these quieter days now recorded, does only shows the great use, as well as necessity, of the pause in battle, but will also furnish a record for similar days yet to come. The condition of the roads and fields, now so greatly improved, may be again reduced to impracticability. The march of reinforcements will be hindered, subsistence and ammunition trains retarded, and manœuvring for a time difficult or impossible.

On the enemy's part, also, there was much to be gained by a respite in action. He had proportionately as many wounded to care for, and as imminent need of attending to his commissary department, SHERIDAN's raid causing him temporary annoyance. He also kept a careful watch on his active foe. He continued to entrench himself busily, still holding Spottsylvania, encircling it with a network of defences, and adding new rifle-pits and abattis to his old and strong fortifications, already bristling with artillery. He showed a bold front, and displayed his strength so ostentatiously as to give rise to an occasional rumor that he would not stand to fight his decisive battles on this ground. He paid little attention to the shells which were now and then sent on errands of inquiry to various parts of his line.

WEDNESDAY'S BATTLE.

On Tuesday, the 17th, the Army had become refreshed, strengthened, and fully supplied, and the miry roads improved by the clear and fine weather. It was accordingly determined to again attack the enemy, and strong reconnoissances were made. Our constant effort had been at Spottsylvania, as in the Wilderness, either to turn the enemy's right, or else, by threatening it dangerously, to force him back against Richmond. To effect this manœuvre, our Army had frequently gained ground to the left. But so palpable had the endeavor become, that it was thought expedient to assail this time the enemy's left flank, partly trusting that he had been induced to reinforce his right in neglect of his left, and partly with a view of subsequent operations again in the old direction. The ground also was unfavorable as yet for another attempt with our left. Tuesday night, therefore, there was moving of troops and of batteries towards the right; but hardly a shell or a rifle-shot disturbed the unwonted peacefulness of the camps. When the new line was formed next morning, it ran as follows, from right to left:—WRIGHT's Sixth corps, HANCOCK's Second, BURNSIDE's Ninth, WARREN's Fifth. It was the right and centre that were to attack.

At daybreak, cannonading broke out on our right, gradually increasing in severity, and quickly responded to by the enemy. Between 4½ and 5 o'clock a general assault was made by the three right corps. The position in front of the Second corps was a part of that which they had so bravely wrested from the enemy on the preceding Thursday, and in the first line of rifle-pits to be taken were those which had been abandoned by us on Friday. BARLOW's First division, and GIBBON's Second, of HANCOCK's corps, with the CORCORAN Legion, the latter being a part of the Washington reinforcements for the corps, eagerly cleared the open space in front, dashed on the enemy's skirmish line, and drove it back. On their right, but little later, the Second and Third divisions of the Sixth corps no less vigorously moved up. The second line of rifle-pits was carried as briskly as the first, in the midst of a sharp and deadly fire, GIBBON's Second division, Second corps, rivalling in gallantry the memorable example of BARLOW's First division on Thursday. Here a formidable barrier interposed. In front, stretched a broad, dense, and almost absolutely impenetrable abattis, behind which riflemen lay, too secure to be dislodged, and in the rear, a heavy force of artillery. It was almost an ambuscade, and so perfect was the defence as to suggest the thought that the skirmish lines in front had been intentionally surrendered, so as to draw our men further in. The impossibility of penetrating further without great slaughter, was at once apparent to the division commanders. The impossibility of standing longer under the murderous sweep of artillery was equally obvious. The troops were withdrawn in good order under a destructive fire, and the assault ceased.

The Ninth corps, meanwhile, had vigorously attacked farther down the line, with POTTER's division on the right, CRITTENDEN in the centre, and WILCOX on the left. Our whole line was so massed that the corps closely joined each other. The several divisions of the Ninth moved forward across the open so as to form three attacking columns, and at the same time a hot artillery fire broke out, to which the Rebels responded with ardor. General BURNSIDE had fixed his own position so far to the front that several spherical case-shot reached his headquarters, wounding members of his staff. By good fortune the General escaped uninjured, and the headquarters were retired. As on the right, so here, our troops gallantly dashed up to the abattis in spite of every obstacle; but there recoiled, the temporary struggle to surmount it being hopeless. WARREN's corps, on the left, did not take active part in the engagement, but suffered the loss of a few men by the enemy's shells. At daylight the batteries at this extremity of the line opened briskly on the enemy, and elicited a prompt response. Our strong entrenchments, however, prevented the enemy's fire from being effectual. After an hour the artillery fire here slackened. At ten o'clock it again broke out in great severity, but no advance of infantry was made at either line, except the employment of a regiment of sharpshooters to operate against the enemy's gunners, and to counteract the designs of the enemy, who was picking off our own cannoneers.

By eleven o'clock, the assault was abandoned, and all the troops recalled to their original position. It had promised no little success. For several days our main forces had been withdrawn from fronting the point attacked, only a strong skirmish line being left. The shifting of corps had been executed briskly, and the attack gallantly conducted under a galling fire. CONCORAN's Irish legion, though untried, like their comrades in the Second corps behaved handsomely, suffering great loss. GIBBON's veteran Second division, of course, carried their colors rapidly to the front in gallant style, and on the left, the three divisions of BURNSIDE's corps (POTTER'S division of colored troops being in reserve), performed their part of the labor. But it was found that the enemy were perfectly prepared for our reception, and held a strong chain of earthworks, fringed with almost impenetrable abatis. To pierce it would be a hazardous, and probably a desperate task, involving a slaughter of troops beyond comparison with the value of the position. Our loss in the engagement amounted to about 1,200, and the exposure to artillery fire heightened the proportion of dangerous wounds.

The afternoon and evening of Wednesday were quiet, and our line lay as before, our right a little in the rear of the battle-field of the morning, and our left stretching up the declivity on ANDERSON's farm. During this day, as in the two preceding, the enemy refrained from offensive operations, but held his ground tenaciously.

General GRANT having assured himself by Wednes-

day neon of the enemy's strength at Spottsylvania, immediately put other measures in train than those of attack to accomplish his purpose. On Wednesday night a cavalry force under General TORBERT entered Guinea's Station, a point on the Richmond, Fredericksburgh and Potomac Railroads, about ten miles in a direct line southeasterly from Spottsylvania, across the Po, and consequently on the right and rear of the enemy's position. The cavalry destroyed the buildings and supplies, the telegraph apparatus, &c. This was only the precursor of a general movement in that direction.

EWELL'S ATTACK ON THURSDAY.

Accordingly, on Thursday, a portion of our right was quietly moved from its position, and began to march across to the left. Meanwhile, the rest of the camp was unusually quiet through the day, supply trains busily flying back and forth from Belle Plain; tardy reinforcements pressing up in force, with the other details of peaceful labor already described. There was little cannonading or musketry, and even the opposing skirmish lines ceased to pick each other off, and here and there indulged rather in friendly exchange of jests and badinage, or of tobacco and coffee. Both camps were in range of the silent batteries, but within our own lines, at least, was quiet confidence, with some of the ordinary scenes of bivouac. It should seem, however, that marching was already the word of the day, and that the stretch along the enemy's right—which subsequently took place—would soon be initiated. But the enemy interposed his presence in a way to delay for a brief period the execution of the flanking movement, if indeed it was assigned for so early a date as Thursday night.

A little after noon of Thursday, EWELL marched a part of his corps, with RHODES' division in the advance, over the Ny River, proceeded completely across our right, accomplishing his purpose in more easily form the withdrawal of our troops already alluded to, and about 5 o'clock struck out of the woods to the Fredericksburgh wagon road in the rear of our right flank. His advance brigade roused the camp by its firing, desultory and scattering at first, and such as might have come from the guerrillas continually infesting that neighborhood, but gradually swelling to greater volume, as his troops arrived and got their artillery in support. Fortunately, the main point of exit was just then less thinly studded with teams than usual, heavier trains of ammunition and commissary stores being between that and the front, and others further towards Belle Plain. There was an instant stampede of teamsters and ambulance drivers both to front and rear, as the Rebel column swept across the road. Our small force of cavalry was compelled to retire, but dismounted to fight, and to cover the rapid race for camp. The enemy at once took possession of the ambulances and a portion of a train of subsistence within their reach, and showered bullets on the retreating part. Several horses were killed, and the teams stopped, the drivers hastening to escape on foot. Our main force was far in the front. But, fortunately, General TYLER's division of heavy artillery, which had been sent down from the Washington defences but a few days previous, armed as infantry, was close at hand. After some delay General TYLER got his troops into line (Colonel TANNARY's Second brigade of the First Massachusetts and First Maine regiments, being already fighting in advance), and desperately resisted the enemy's progress. Although these troops were mostly unused to fire, and least of all to the unprecedented fury of the present mode of fighting in Virginia, they fell upon the enemy with the utmost bravery, displaying gallantry equal to that of veterans. The first cones of the Rebels was overpowering, but soon KITCHING's brigade moved up in support of TANNARY's, and when the whole of TYLER's division had arrived, they drove the enemy from the road into and through the woods in admirable style. Although ignorant of field service, they had been thoroughly drilled as infantry, and were now so armed. They proved, in fact, quite as available in this surprise, as the older troops, who would undoubtedly have been sent in, had the attack been anticipated.

As soon as possible, BIRNEY's Third division of the Second corps, CRAWFORD'S Third division of the Fifth, and RUSSELL's Third division of the Sixth were hurried up in support; but the thorough repulse and discomfiture of the enemy had already been effected by TYLER's division. On the latter their success has had an excellent influence. The enemy got few, if any, wagons away, and destroyed nothing of importance, though some horses were shot. The engagement was very rapid, and of short duration; but such were the ardor and dash of our men that they sustained during its continuance a less of about twelve hundred men. The loss of the First Massachusetts heavy artillery (formerly the Fourteenth infantry) was particularly severe. The enemy's loss was perhaps equal to our own, in killed and wounded, though probably not greater.

To cover their movement on our baggage train, the enemy about 5 o'clock opened a very heavy cannonading against our left, still held by WARREN's Fifth corps. They also advanced as if to test the possession of that extremity of our line after a short fight were driven back, and the cannonading ceased.

The attack of EWELL may have arisen from the enemy's surmise of our disposition to flank him once more on his right, being simply an effort to detain us on our old ground. Or, it may have been, as we think it was, principally a cover to aid General LEE in secretly withdrawing from his own position. It is commonly thought, however, that LEE had not fathomed the intention of General GRANT; and if this view be correct, EWELL's immediate attack was also his ultimate object, namely, to get in our rear, cut, permanently or temporarily, communication with Belle Plain, appropriate supplies to himself, and so inconveniencing our own as to cause further delay in active movements. The removal of our right, already alluded to, from across the Fredericksburgh road, afforded additional temptation to his project. And he could not have been unmindful that a large part of our cavalry force of late in the neighborhood of Haxall's, remote from the scene. How near his movement came to successful issue we have already indicated. It certainly seems that we have good fortune, as well as successful generalship, under the suspicious conduct of the new commander. The incautious rattling of the enemy's skirmish line first gave us indication of his movement. His advance were obviously stimulated more by excitement and the prospect of success than anything else, and their vivacity sounded the alarm before a sufficiently strong force could be brought up to make good the surprise. The noise of the musketry specially aroused our men, and its proximity to our own headquarters gave instant insight to General GRANT of what was occurring. The fresh troops do not appear to have been placed in the fortunate position they occupied, with reference to this sudden détour of the enemy, but were temporarily located there for future assignment, and one old regiment engaged was actually *en route* from Fredericksburgh, at the line of supply from Belle Plain stopped, there was no longer anything to fear from an attack on the right flank.

About three o'clock on Friday morning the divisions of the Second, Fifth and Sixth corps, which have already been described as relieving TYLER's division, having held the front of battle, were quietly withdrawn, entered the woods, and, sweeping through them, attacked the rear of the enemy's column, and cut off about four hundred prisoners, straggling in the woods. The enemy recrossed the Ny and retreated to his camp, and our forces gathered up a large number of dead and wounded. The space of two miles which we had traversed. The good conduct of the troops and their decided success produced a congratulatory order from General MEADE, dated Friday, May 20th, 8 A. M., by which time the results were known. The remainder of Friday was quiet.

THE MOVEMENT SOUTHWARD.

On Friday night commenced the grand movement, which has just put a new face on the campaign in Virginia. About midnight General TORBERT's division of cavalry left Massaponex Church and advanced to Guinea's Station, whose position has already been described, thence to Guinea's bridge, where the Ny runs into the Po, about a mile southwest of the station. At Downer's bridge, near by, Rebel cavalry were found, threatening the column. A sharp charge of the Fifth New York cavalry drove them back, and our forces, pushing the enemy from the road, pressed on southerly to Bowling Green, a village fifteen miles southeast of Spottsylvania, and six miles from Guinea's. A little further south, the cavalry still continuing their course, pushing the enemy before them, struck upon Milford Station, and drove out the Rebels, a party of PICKETT's division of EWELL's corps, supported by a battery, capturing 70 men. Here the forces lately deposited here by LEE had been removed.

At midnight of Friday, also, the Second corps, which had been moved to the left of our line, as already stated, followed the road of the cavalry, striking Massaponax Church about four o'clock, Guinea's Station on Saturday morning, and finally Bowling Green—reaching the latter point, after a march of about twenty miles, by nightfall of Saturday. The country, when once the column emerged from the dense woods of Spottsylvania, was found to be open, and bore marks of cultivation. The weather was fine but warm, the roads good, and the Army in gay spirits.

Proceeding from Bowling Green, the Second Corps next struck the Mattapony at Milford's bridge, five miles south of the former place, crossed the river, and formed line in a commanding position about a mile from the bridge. Here, a few hundred Rebel cavalry were found against the column's division which fled, but discovering in season they were about to capture a Tartar, wheeled and escaped with safety. The enemy's infantry was in strong force in front. During the day of Sunday, the 22d, the corps marched forward and held the ground for a mile or two from the Mattapony. Milford Station is about forty miles from Richmond.

Meanwhile, at ten o'clock on Saturday morning, WARREN's Fifth corps broke camp and followed the Second, encountering cavalry, like its predecessor, near Guinea's, and, like them, driving the enemy back with ease. The Sixth and Ninth followed the Fifth, bringing up the rear, and, on Saturday, the whole Army had left Spottsylvania. Our advance was so rapid that the movement had been anticipated; stores had been removed, and LEE's main army taken from our path. All the corps had more or less skirmishing—that in the rear being at one time quite lively, but no damage or delay was caused. The advance was conducted in a bold and confident style, the corps striking out, with occasionally, long gaps intervening, and the whole position in some quarters, lest a part of our force should be cut off by an attack of the enemy, while it marched by the flank.

By Sunday, the rapid and at first apparently confused movement had gained palpable consistency, and a sort of line was formed, facing westerly, the Second corps holding the left at Milford Station, and the Fifth the right at Guinea's, with the centre in the direction of Bowling Green. It was already clear to General GRANT that the enemy had entirely abandoned Spottsylvania, and was preceding him in the direction of Hanover Court-House. There was no longer need to hold the ground in our rear, and the whole Army on Monday pushed forward at a rapid rate, and reached the Pamunkey river in the neighborhood of Jericho Mills. The Second and Fifth corps were in the advance, the latter at the right of the Second. HANCOCK rushed at the enemy's strong position, after briefly reconnoitering its strength, his troops gallantly charging the enemy, while our batteries played into their ranks. The battle was very severe; but, with a loss of about three hundred men, HANCOCK succeeded in forcing the position. Meanwhile, WARREN's Fifth corps had already crossed higher up, without much difficulty, but were soon attacked with fury and vehemence. Secretary STANTON's dispatch from General GRANT says that WARREN "was attacked with great vehemence. I have never heard more rapid or " massive firing, either of artillery or musketry. The " attack resulted in a destructive repulse of the enemy. At the position attacked by HANCOCK the " Rebels were entrenched, and in considerable force " between the creek he had crossed and the river, and " made a pertinacious resistance to his onset; but be" fore dark he had forced them from their works and " driven them across the stream."

By night, the Second and Fifth corps were both across the river, and the Ninth and Sixth held the hither side. On Tuesday, the whole Army was across,

briefly pursuing the Rebels, and, at our last dispatches, was approaching the South Anna.

GENERAL BUTLER'S OPERATIONS.

OUR account last week of General BUTLER, included some mention of the enemy's attack on Monday, the 16th. The consequences of that attack proved more serious and destructive than either general telegrams or private advices had led us to suppose. Not only was HECKMAN'S gallant brigade, which was unsupported in General BUTLER'S Army, severely cut up, but our right flank seems to have been so nearly turned as to necessitate a withdrawal from our advanced position, back to Bermuda Hundred. It has been suggested by writers from the scene of conflict, that BEAUREGARD may have been reinforced by Lee during Sunday and Monday, 15th and 16th, and this theory might derive support from the fact that few active operations went on at Spottsylvania during those days or the days preceding and following. But there is no evidence of such an occurrence, and prisoners, at least, would have substantiated it, if it had existed. Nor is it at all necessary to resort to this supposition to account for our repulse.

Our line was formed with W. F. SMITH'S Eighteenth corps on the right, and GILLMORE'S Tenth corps on the left. Early Monday morning, concealed by a very dense fog, the enemy massed his troops against our right wing, which, at that time, was particularly vulnerable. He burst upon HECKMAN'S brigade, of WEITZEL'S division, SMITH'S corps, and, in the blinding fog and darkness, a terrific conflict ensued. Borne down at last by numbers, the gallant brigade fell to the rear. Here COL. DRAKE'S brigade, WEITZEL'S division, consisting of the 8th Maine and 112th New York, came to the rescue, and by hard fighting for a time stayed the tide of the enemy. Farther to the left, WISTAR'S and BURNHAM'S brigades of WEITZEL'S division were also set upon with fury. But, in their front, General SMITH had caused a telegraph wire to be intertwisted with the heavy undergrowth, and the enemy stumbling through it, were repulsed with considerable slaughter. It is stated that the danger from this point was not exceeded to the right, but the order failed of being transmitted in season. On our left there was a simultaneous attack, HAWLEY'S and BARTON'S brigades of TERRY'S division, Tenth corps, suffering severely. But the fighting was chiefly on the right. Towards eight o'clock, about the time when the attack on our left and attempt was made to shorten our line and reform it by moving up the left to the assistance of the centre—troops from the latter having been dispatched to the right. General GILLMORE retired from his favorable position on the left, though not until the order to do so had been repeated. The turnpike having been seized by the enemy in our rear, another road had to be cut, to effect the withdrawal. Meanwhile, the flanking advantage of the enemy was so decided that the line was temporarily retired and reformed about a mile in the rear, General GILLMORE holding the enemy in check, and advancing up towards the old line, the enemy falling back. A retreat was quickly ordered, and our forces retired without confusion, and without molestation, the Eighteenth corps in advance and the Tenth protecting the rear. While the firing was going on in the front, a vigorous attempt was made to get into our rear, over a road guarded by AMES' Third division of the Tenth corps. This effort was at length repulsed, the enemy's rear had to be cut in our rear, for our withdrawal. Our total loss was nearly five thousand men, a great proportion of them being captured on the right, from HECKMAN'S brigade, consisting of the 9th New Jersey, and the 23d, 25th and 37th Massachusetts. ASHBY'S and BELOIN'S batteries, also a few guns.

Thus, a movement which promised considerable success, failed when at the point of fruition. General GILLMORE'S left had advanced on Friday and Saturday so as to secure an excellent position. Between Richmond and Drewry's Bluff, our readers will notice that the James runs nearly directly South. The Richmond and Petersburgh railroad takes the same direction, west of the James. The long and narrow parallelogram of land included between the railroad and the river, is bisected by the turnpike running between the two cities. Easterly and westerly of Drewry's Bluff runs the Rebel line of entrenchments, its left supported on the river at Fort Darling, and its right stretching across the road and railroad. The easterly end was obviously too strong to assault. But the westerly extremity was carried by General GILLMORE, who took and held the rifle-pits at that point. Obviously, it was needful to prepare to lay siege to the Fort, and first to guard against sorties by entrenching our own lines. Our neglect to entrench caused the success of the enemy, who attacked under the advantage of a dense fog. Perhaps the day might have been saved, even after the loss of the brigade on our right, the rest of the line being intact. At all events, this was deemed prudent to undertake. Our great error was in failing to protect and cover our right, which was in such circumstances as not to get the advantage of the river or the gunboats.

These remarks are predicated upon the supposition that an attack on Fort Darling or a movement against Richmond was seriously contemplated. That such a plan was possible, with our large Army, in that quarter, is obvious, especially if it had been conducted immediately upon the sudden landing with which General BUTLER surprised the enemy. It has been alleged, however, though the evidence of the fact is not yet conclusive, that the movement was mainly designed as a demonstration to cause cavalry expedition of General KAUTZ. General KAUTZ'S forces returned at sundown of Tuesday, soon after the arrival of the Army, having traversed a large region of the enemy's territory. Its primary object was the tapping of the Richmond and Danville railroad. This it effected first on May 12th, the day of the start at Coalfield, situated about twelve miles West of Richmond. Here, as at Powhattan, 22½ miles from Richmond, and at Chula Station, 30½ miles, rolling stock, government buildings, depôts, and army supplies, were destroyed in considerable quantities. A part of the command proceeded to the junction of the Southside and Danville railroad, and the main body moved on successively to Wellville, Wilson's, Black's White's and Brunswick Court-House.

At several of the points on the Richmond and Petersburgh road, General KAUTZ did some damage to the track and switches, and, finally returning to Jarrett's, the scene of his former exploits, he again destroyed the water tank which had been rebuilt, and the rails which had been re-laid, and some recon-structed bridges.

While considerable damage was effected by the bold raid of General KAUTZ, we doubt if it will, under existing circumstances, produce much more than temporary results. Such expeditions, when practicable are useful, but not absolutely necessary, to a military road. The amount of Government supplies left without guard at railroad depôts, is not commonly very great. Sometimes it is considerable enough to pay the trouble of destroying, but can seldom be regarded as the principal source of the enemy's subsistence. If track is destroyed by burning the ties and subjecting the rails to bending and twisting by heat, the damage is most complete. Yet, even then, a little time will effect repairs; and General KAUTZ'S own operations at Jarrett's show how quickly railroad which had been thought effectually destroyed, may be again got into working condition. The loss of bridges is more sure and lasting in its injury, especially if the bridge be long or heavy. Blowing up an iron bridge is commonly an effectual cutting of communication. General KAUTZ found that some of his former injuries to bridges, also, had been only temporary. The command had a little fighting on the way out, and was harassed on its return, but no important engagements took place.

After the withdrawal of our troops on Monday, there was little activity until Thursday and Friday. On Thursday, BEAUREGARD had moved down his forces in proximity to our line, and about midnight, he assailed GETTY'S First and AMES' Third divisions of the Tenth corps. A severe, but short contest followed, in which the enemy was ultimately repulsed; and the remainder of the night was quiet. About 9 o'clock next morning, the enemy again dashed against the same point in our lines, and succeeded in driving back our men, and the rifle pits they had occupied. A contest at once commenced for the recovery of the lost entrenchments, and lasted at intervals through the day of Friday. General TERRY'S line of rifle-pits was at last repossessed, and the enemy at night forced to withdraw. Our losses do not seem to have received any considerable addition the day's fighting seems to have been indecisive. The Rebel General WALKER was wounded and taken prisoner, making an effect for the capture of General HECKMAN on Monday.

On Saturday, the firing was renewed by the pickets in front of TERRY'S division, and a brisk skirmish ensued. Both forces employed their time in throwing up entrenchments, the enemy seeming satisfied with the vicinity as an eligible permanent location. He continued the skirmishing of the preceding day till night. On Saturday night, about 10 o'clock, the enemy once more made an attack at the same point, the centre of General BUTLER'S line, held by GILLMORE'S Tenth corps. His persistency at this point is only explicable by the fact that both our flanks were covered by wooded ravines, almost impassible. The enemy massed his troops, and advanced with yells, in great fury. General GILLMORE held his position silently till the enemy were within short range, when his batteries opened, resulting the desperate charges of the enemy again and again with great slaughter. The gunboats in the Appomattox and James shelled the enemy during the continuance of the action.

After Saturday night, there was little fighting for several days. On Sunday night, the 22d, a reconnoissance from General SMITH'S corps found the enemy in considerable force at Bakehouse Creek, two miles from our lines. On Tuesday morning, the 24th, General GILLMORE conducted another reconnoissance. Finding the enemy in some force, he attacked and drove him back, after a short skirmish. But the recent quiet would seem to show that BEAUREGARD has temporarily withdrawn a large part of his forces to Richmond, and perhaps to the reinforcement of LEE.

GENERAL SHERMAN'S OPERATIONS.

From the full accounts of General SHERMAN'S movements in Georgia, received during the week, we are able to supply details of the engagement of Resaca, of which we had nothing beyond the bare telegraphic reports at the time of our last writing.

When it became evident that the success of General MCPHERSON'S flanking movement toward Resaca had rendered unnecessary any attempt to approach Dalton through the almost impregnable defences at Buzzard's Roost, General HOWARD, with his Corps and STANLEY'S divisions, was left to amuse the Rebels there, while the remainder of General SHERMAN'S army was put in motion toward Snake Creek Gap, which lies about fifteen miles south of Buzzard's Roost, in the direct line of approach to Resaca from the northeast. Friday, the 13th, was occupied by the Army in deploying through the Gap and getting into position in Sugar Valley, just beyond. The movement of our troops was covered by the cavalry under General KILPATRICK, who was wounded here, receiving a musket ball through the fleshy part of his thigh. Heavy infantry skirmishing also took place during the day with some loss, particularly in the Fifteenth and Sixteenth corps. As the result of this skirmishing it was ascertained that the enemy was in force in front, having evidently lost no time in falling back from Dalton upon discerning our movement on his flank.

Sugar Valley, in which General JOHNSTON had taken his position to oppose our advance, is described as "a fertile plain of about ten square miles in size, "much broken by hills, which at this season of the "year are covered by a dense undergrowth of small "trees and vines," rendering them very difficult of approach.

During the afternoon our troops were rapidly put into position facing the enemy. Our lines extended completely around the valley for a distance of some seven miles, the right resting on the Oostanaula River, near the mouth of Oothkalpa Creek, just below Calhoun, and our left striking the river north of Lilton, near the junction of Sonap Creek, an insignificant stream rising among the hills of Sugar Valley, from which two other similar streams—Lick and Camp Creek—flow into the Oostanaula River, one near Resaca, and the other farther north. Our right was held by MCPHERSON, the left by HOOVEFIELD, and the centre by the Army of the Cumberland. Beside the protection of the river our flanks were covered by heavy bodies of cavalry. By the extension of his left to Tilton, General SHERMAN was able to open communication with General HOWARD, who had followed the retreating enemy from Dalton. Active skirmishing commenced about 3 o'clock P. M., when a reconnoissance by General PALMER discovered the enemy's position in front of Resaca, which is situated in a po-

minsula formed here by a bend of the river. Across this peninsula the Rebels had erected a line of rifle pits and earthworks, behind which they lay, with their flanks resting on the river. General HOWE, as we learn from the Rebel papers, being in command of their right wing, General POLK of the left, and General HARDEE of the centre. Friday night was occupied by the Rebels in still further strengthening their position by adding to the earthworks thrown up months before.

THE FIGHT ON SATURDAY, MAY 14.

Skirmishing began early in the morning of Saturday and continued throughout the day, varied with attempts to break the enemy's line at different points; the main object of General SHERMAN being to turn the Rebel flanks so as to prevent their retreat. Owing to their strong position this was found impossible. The heaviest fighting was on our left centre, where a desperate attempt was made by General PALMER to force the enemy from their strong position. The line of advance was over hills and through ravines thickly wooded and filled with undergrowth and fallen trees, which obstructed the progress of our columns. On reaching the crest of a hill, overlooking a valley beyond, our troops came in full sight of the enemy, who occupied a position on a somewhat slight elevation across the valley or hollow, at a distance of some five or six hundred yards. Between the two hills run a fortunate valley, knee deep in the brakes filled with stunted willows and interlaced with vines and other entanglements which the Rebels had prepared to oppose our progress. Under a murderous fire of artillery and musketry our troops charged down the hill and across the creek, where the line was interrupted and broken, the men becoming entangled in the muddy bottom of the creek or stopped by the obstructions beyond. Here they were exposed to a plunging fire from which they suffered severely; being neither able to find shelter from it or to return it with effect, and having no artillery supports to divert the enemy's attention, they were finally compelled to retire, after suffering heavy loss; 750 being reported killed and wounded in the division principally engaged—General MCLEAN's of the Twenty-third corps.

Further to the left an attack was made at nearly the same time by a column composed of JUDAH's division of SCHOFIELD's corps, and NEWTON's division of HOWARD's corps, assisted finally by COX's division of SCHOFIELD's corps, whose advance had been delayed through some mistake in regard to their orders. After a severe engagement, in which our troops were at first repulsed, the enemy were at last forced to abandon their position on the outer line of their works, which we did not attempt to hold, however, the retirement of the enemy enabling us to get over and form a position to prevent the reoccupation of the works from which we had driven them.

Meanwhile, the Rebels had been occupied on their right in repelling the advance of our left wing, under SCHOFIELD, supported by HOWARD. During the day the fight was continued here, but little artillery being used on either side on account of thick woods which also concealed the movements of the troops. With varing success the lines of the two armies swayed back and forth until about sunset, when the fire of the enemy slackened for a time, only to be renewed soon after in a fierce assault upon our line which we had been massing his troops, drawing them from other portions of his line. The attack fell upon STANLEY's division, which, after a stubborn resistance, was compelled to retire in considerable confusion from the hill upon which it had been posted.

Fortunately the enemy's bridge had been anticipated, and General HOOKER ordered around from the right centre to the support of the left wing. The situation was for a moment critical, but the timely arrival of General HOOKER checked the enemy in his triumphant advance, and compelled him in his turn to retire, after a short and sharp engagement, which closed with the day.

Taking advantage of the enemy's occupation with this movement against our left, MCPHERSON on our right assailed the enemy's extreme left in front of Resaca. Under the cover of artillery and a heavy line of skirmishers LOGAN's corps crossed Camp Creek, and by a bold charge drove the enemy from their rifle pits, and secured a position on the commanding hills in our front, which enabled us to bring the enemy's works under a destructive enfilading fire. An hour later the Rebels made a desperate but unsuccessful attempt to regain possession of their works.

As the result of the day's work we had secured this important advantage on the left, and made a slight advance on the centre, the remainder of our line remaining substantially as at first.

Saturday night was occupied by both armies in strengthening their positions and in making further dispositions of troops, those who had been the most actively engaged during the day being relieved by fresher men from the rear.

THE ATTACK ON SUNDAY.

Sunday morning opened with heavy skirmishing on our centre and left centre, under cover of which our troops were massed on the left for an attack upon the extreme right of the enemy's line, where an attempt was to be made to secure possession of two fortified hills which commanded each other, compelling a simultaneous attack on both. The direction of the assault was committed to General HOOKER, who selected General BUTTERFIELD's division as the storming column, to be supported by the divisions of GEARY and WILLIAMS. Forming under the cover of a ravine in the forenoon, they advanced without skirmishers, taking the enemy at first by surprise, and carrying everything before them, until, with the help of their supports, they had secured a lodgment in front of one of the enemy's strongest positions. Here they found shelter from fire, while the right and left flanks of the work were exposed to fire and their front silenced. At about 4 P. M. an assault was made on our new position by HOOD's corps, which was repulsed with heavy slaughter, and night closed with HOOKER still in possession of the heights he had carried.

The operations of General HOOKER in this, the main attack on the enemy's works, were assisted by heavy skirmishing along the whole line of the Army, a heavy fire of artillery and musketry being kept up during most of the day.

During the night a successful attempt was made to withdraw four guns which formed the armament of an earthwork on one of the hills where we had effected a lodgment. This annoyed the enemy, who opened fire which was returned with effect by our artillery and infantry. Later in the night the eeoemy quietly abandoned his works and retreated towards Calhoun.

Our total loss in this series of engagements is estimated at 800 killed and something over 4,000 wounded, of whom some 2,000 are so slightly injured that they are expected to be fit for duty in two or three weeks. Our captures are estimated at 1,000, probably somewhat less. Besides these, eight guns were captured, four of them five twelve-pounders, destroyed in all, limbers and carriages (taken by HOOKER), and the others old and useless pieces left by the Rebels in their retreat from Resaca. A considerable quantity of cornmeal was also found at Resaca, and some small arms and ammunition. With these exceptions, the Rebels seem to have found time to remove everything beyond our reach. They destroyed in their retreat the railroad bridge crossing the Oostanaula, one of the most important on the line of railroad. As they left the stoce abutments standing, however, our engineers will soon be able to restore it.

THE PURSUIT.

Early on Monday morning our cavalry under MCCOOK and STONEMAN was thrown forward in pursuit of the retreating Rebels, and later in the day General HOOKER crossed the river on pontoons near Resaca, and SCHOFIELD in the same way near Pelton, further down the line. The remainder of our Army was afterwards thrown across, and on Wednesday, the 18th, General SHERMAN reached Kingston, twenty-five miles by rail beyond Resaca. Meanwhile Rome was occupied by DAVIS' division of the Fourteenth corps. A large amount of provisions and seven fine iron works and machine shops were secured at Rome, where everything appears to have been left undisturbed by the Rebels.

At Kingston General SHERMAN halted for two or three days to recruit his army and provide for supplies. As the cars were already in running order all the way through from Nashville to Resaca, he would have little difficulty in completing his railroad communications. The Rebels made no attempt to destroy the road in their retreat, and both the railroad and telegraph were in operation to Resaca immediately upon its evacuation.

General SHERMAN is reported to have renewed his advance on the 23d with a larger force than ever, his losses having been more than made good by returned veterans and new recruits.

OTHER OPERATIONS.

GENERAL CANBY has arrived at the mouth of the Red River, and relieved General BANKS of the command of the Department. Our forces are reported to have evacuated Alexandria last week, and moved towards Sellsport. Previous to this the portion of Admiral PORTER's squadron, caught above the Falls at Alexandria, had been relieved from their perilous predicament, the water above them, thrown across the falls by a dam, having risen lower down on the 13th, high enough to float them out. They were greatly annoyed in passing down the river by guerrillas. We have as yet no authentic account of our loss in gunboats and transports, though several additions are reported. General ULLMANN has been busy strengthening his position at Portlandson sufficiently to make it secure against the Rebels operating in his vicinity. General KIRBY SMITH is reported to be gathering his forces to attack General STEELE.

General CROOK's forces have returned to West Virginia, and report the accomplishment of their object in the destruction of large amounts of supplies, and serious damage to the Virginia and Tennessee Railroad. The Rebel General JENKINS, before reported captured, has died of his wounds.

There is nothing new from North Carolina, beyond the report that the Rebels in Little Washington set fire to the town, destroying twenty houses and robbed the defenceless inhabitants of the place.

An expedition under General GILMORE, which went up the St. Johns River, Florida, recently, captured 1,000 head of cattle, some arms, and considerable Rebel property.

General SHERIDAN's cavalry has made another move towards Richmond, from Hazall's on the James River. General CUSTER marched to Hanover Court-House, where he found a large force of infantry guarding the railroad bridges across the South Anna.

REBEL REPORTS.

GENERALS LEE AND HETH CONGRATULATE THEIR TROOPS.

(From the Richmond Enquirer of the 16th inst.)

HEADQUARTERS HETH'S DIVISION, May 11, 1864.

I AM requested by General LEE and Lieutenant-General HILL to express to Major-General HEATH's division at the gallant conduct in attacking and carrying the enemy's lines of entrenchments on the 10th inst. Words are inadequate to express to the division our admiration for all its gallant deeds since the 6th inst. Much is yet left to be done, and I know from the past that all these brave men can do will be accomplished.

H. HETH, Major-General.

(Special Correspondence of the Richmond Enquirer.)

ARMY OF NORTHERN VIRGINIA, May 15, 1864.

The following General Order of General LEE, issued at it is chaste and beautiful, has just been published to, and received with enthusiasm by, the army:

GENERAL ORDERS, No. 41.

HEADQUARTERS ARMY OF NORTHERN VIRGINIA, May 14, 1864.

First: The General Commanding takes pleasure in announcing to the army the series of successes that, by the favor of God, have recently been achieved by our arms.

Second: A part of the enemy's force threatening the valley of Virginia has been routed by General IMBODEN, and driven back across the Potomac, with a loss of their train and a number of prisoners.

Third: Another body of the enemy, under General AVERILL, attacked by the Second and Tennessee Railroad at Dublin Depot. A portion of his force has been dispersed by Generals MORGAN and W. E. JONES, who are in pursuit of the remainder.

Fourth: The army of General BANKS sustained a severe defeat in Western Louisiana by the forces of General KIRBY SMITH, and retreated to the Mississippi, leaving thousand prisoners, thirty-five pieces of artillery, and a large number of wagons. Some of the most formidable gunboats that accompanied the expedition were destroyed to save them from capture.

Fifth: The expedition of General STEELE into Western Arkansas has ended in a complete disaster. Northern journals of the 10th inst. announce his surrender, with an army of seven thousand men, to General MAGRUDER.

Sixth: The cavalry force sent by General GRANT to attack Richmond has been repulsed, and retired towards the Pamunkey. Every movement of the enemy south of James River has, up to this time, been successfully repelled.

Seventh: The heroic valor of this army, with the blessing of Almighty God, has thus far checked the principal army of the enemy, and inflicted upon it heavy losses. The eyes and hearts of your countrymen are turned to you with confidence, and their prayers attend you in your gallant struggle. Encouraged by the success that has been vouchsafed, and animated by the highest interests that depend upon the issue, let every man resolve to endure all and brave all, until, by the assistance of a just and merciful God, the enemy shall be driven back, and peace secured to our country. Continue to emulate the valor of your comrades who

were fallen; and remember that it depends upon you whether they shall have died in vain. It is in your power, under God, to defeat the last great effort of the enemy, establish the independence of your native land, and earn the lasting love and gratitude of your countrymen and the admiration of mankind.

R. E. LEE, General.

About 3 o'clock P. M. yesterday a short and sharp fight occurred on the enemy's extreme left wing, lasting about 15 minutes, with heavy musketry firing and artillery cannonading. The firing occurred while a charge was being made by WAGNER'S, supported by HAMPTON'S brigade, on a hill and hill side to the left of the road, which was taken after a partial repulse.

At the green word of command WAGNER'S brigade charged past the intervening space, ascended the hill, and drove the enemy from their breastworks under a most severe fire. A hill to the left of the road was also taken, which was sufficiently long for the object of their capture, it was subjected to a rapid shelling by the enemy, after which the space was given the brigade for intrenching, the work which they had previously occupied.

General A. P. HILL having been unable to take the field in consequence of a severe attack of rheumatism, the brigade was commanded by Colonel HALE of the 3d Georgia regiment.

Seventy-five prisoners and a number of officers were secured from the enemy and brought off. The killed and wounded were considerable, but we have no means of ascertaining the number. Our loss was 141, 21 of whom were killed. The loss was sustained chiefly by the 3d Georgia regiment.

The prisoners captured on Thursday and yesterday were sent to Richmond to-day. One lot numbered upward of 1,200, including 41 officers, among whom were several colonels.

The wounded in Thursday's battle and yesterday consequent being conveyed to the rear from the battle field, the great battle they have remained here under most uncomfortable but unavoidable circumstances, and will be in operation on their arrival at Richmond to appreciate the ministrations of those good Samaritans, the Ambulance Committee. But few thus far have died of their wounds.

The bodies of several officers who fell in the early of reassuming them to their friends, have been buried, and are grave marked. Among the bodies interred is that of the lamented Brigadier-General PERRIN.

THE WOUNDED.

The number of wounded soldiers from the late battles on the Rapidan, now in hospitals in Lynchburgh, is about 3,500. A large proportion of them are but slightly wounded.

SECESSIONISM EXTRAORDINARY.

On Friday last, at 6 A. M., Major-General BENCHINGDON moved from Staunton down the valley to Newmarket. On Saturday following at 6 A. M. he moved from Newmarket, and by Sunday evening at 7 o'clock, had defeated and driven him from Newmarket, pursued him 18 miles from Newmarket, having marched 49 miles, fought, defeated, and routed the enemy, numbering from seven to ten thousand, in two days! Such a feat of arms and generalship will show our readers their celerity of movement, as well as vigor of action, did not desert our cause when STONEWALL JACKSON died.

GENERAL A. C. JENKINS.

This gallant officer, who was reported to have been mortally wounded and taken by the enemy, in the fight at Dublin, is, we are pleased to learn, not seriously hurt, as at first reported. He was only wounded by a pistol ball in the abdomen, and while seriously is not dangerously wounded. He was not captured by the enemy, but is, we learn, within our lines and doing well.

GENERAL OFFICERS OF THE ARMY.—The War Department, in response to a resolution of the Senate, has given information concerning the number of officers commissioned of the rebellion, from which it appears that in the Regular Army, Generals HALLECK, THOMAS, and Brigadier-General RUFUS KING have retired, and SCHNIDE, MANSFIELD and TOTTEN died, and THOMAS was dismissed. Of major-generals in the volunteer corps, FREMONT has resigned, and HUNTER revoked; WILLIAM F. SMITH'S and SCHOFIELD'S appointments expired by constitutional limitation, and they were reappointed; HOOKER, SIGEL and BANKS have resigned; PEMBERTON was appointed, is now in command of SEMMES'S corps. Their resignations are:—CASSIUS M. CLAY, JAMES S. GARFIELD, SCHUYLER HAMILTON, and HASBROUCK DAVIS. Brigadier-Generals KEYES, EDWIN D. MORGAN, BENJAMIN M. PRENTISS and GEORGE CADWALADER have resigned, and Brigadier-General and one brigadier-general declined the appointment. BUTLER'S, COX'S and MCDOWELL'S commissions expired by constitutional limitation. Brigadier-Generals C. P. T. BECKER and JOHN NEWTON were withdrawn; WILLIAM FRENCH was mustered out; FITZ JOHN PORTER cashiered. The Brigadier-Generals whose appointments expired at appointment was revoked; ten ceased to be officers by confirmation and were not reappointed; THOS. H. HOWARD resigned, as resignation returned; Brigadier declined the appointment as major-generals, including BANKS. Thus the promotions of Brigadier-Generals to be Generals; nineteen appointments expired by constitutional limitation. Of eleven rejections by the Senate one was reappointed—namely, SICKLES; another was restored to the army; one was cancelled; two revoked; BURNSIDE declined and RUFUS SAXTON dismissed. The total number of Generals in the army since the beginning of the present war is twenty-nine, viz:—One lieutenant-general, six major-generals and twenty-two brigadier-generals. The eighteen of all grades are now in the service, viz:—One lieutenant-general, three major-generals and fourteen brigadier-generals.

In the volunteer force one hundred and three have been appointed major-generals, including the promotion of twenty-one brigadier-generals, and four hundred and seventy-seven have been appointed brigadier-generals, of whom two hundred and seven are now serving as such. There are seventy major-generals at this time in the service.

MAJOR-General McCLERNAND had been assigned to New Orleans at last accounts seriously ill.

CORRESPONDENCE.

THE FIGHT WITH THE ALBEMARLE.

To the Editor of the Army and Navy Journal:

HATTERAS INLET, N. C., May 18, 1864.

SIR:—I venture to submit the following account of one of the most unusual and remarkable naval conflicts of this or any other war, in which the contending forces were so markedly disproportionate, and the result so contrary to preconceived ideas of the probabilities, that it may justly claim to take an historical position on the same page that records the brilliant exploits of DECATUR and JOHN PAUL JONES.

On the afternoon of May 5th, the *Mattabesett*, *Sassacus* and *Wyalusing*, side-wheel gunboats, were lying at anchor in Albemarle Sound, 20 miles above the mouth of the Roanoke River, having been assigned the arduous duty of endeavoring to capture the rebel ram, the iron-clad ram *Albemarle*, whose recent raid, in conjunction with the attack and capture of Plymouth, when she succeeded in sinking two of our gunboats, and sustained unharmed the repeated broadsides of the *Miami*, directed by the brave and accomplished OGDEN, rendered our prolonged occupation of the Sound, at least a problem to be solved, and created the expected contest with unusual importance.

The advance of gunboats of light draft, comprising four or five of the smaller vessels of our force, with the *Miami*, had been sent forward to the mouth of the Roanoke River, to decoy the "ram" from the protecting batteries of Plymouth, into the open waters of the Sound, and failing back before her, quickly draw her into a favorable position for our attack. At 5 P. M. the *Mattabesett* signalized "to get under way," and forming in line ahead, the three vessels left the anchor ground their moves have been written, proceeded at ordinary speed up the Sound, when at 4 P. M. the *Mattabesett* communicated with the Army transport steamer *Escort*, which had been detailed to remain in sight of "Ram is out," and we now discovered our retreating pickets, as they slowly retired before the advancing foe. As we neared the Roanoke we looked for a puff upon the water beyond our retiring vessels, with two other dark hulls hovering near, which we knew to be the ram accompanied by her consort, and as we neared the river mouth, and every preparation made for a determined and desperate struggle with our powerful antagonist, suddenly we were driving along under full steam, and closing rapidly with the enemy. The weather was perfectly charming, not a ripple disturbed the glassy surface of the water, and the sun of the declining sunshine gleamed upon the inclined sides of the ironclad like a mass of silver, as she lay defiantly bearing a broadside down upon us, with the flag of the Confederacy. As we approached, the Rebels were communicating hurriedly with boats, and soon the white stern-wheel steamer was observed steaming rapidly up the river towards Plymouth, being as we afterwards learned, the *Cotton Plant* river steamer, which had been converted into a floating sharpshooters and boarders. As she left, the other steamer, which proved to be the *Bombshell*, captured from the Army by the Rebels at Plymouth, and in which the rebel officers came up on the ram's quarter, in position for the impending action.

The whole scene was impressive and beautiful. Our vessels under a full head of steam, and the colors waving gracefully along, and as the *Mattabesett* approached nearer, she hailed up for the ram, followed by the others in line, when the Rebel ram opened broadside on us, our vessels in very good but useless shot, which was answered by the *Mattabesett* with a shell, which struck the ram on the starboard casitre. When abeam, and about 300 yards distant from the ram, the *Mattabesett* delivered her broadside, and passed ahead, when we were in close proximity with ahead, as the latter lay on the post quarter of the ram. Our attention was now abashed in the movements of our own ship and that of the ram, when the *Sassacus*, which was next to the *Mattabesett*, as she swept by, turned her bow fairly for the ram's broadside, but measuring the distance, she gave our vessel only a slight shock on the starboard bow, thus glancing off into a port, passed about 150 yards from her, delivering with precision her broadside consisting of solid shot, which bounded from her armor like rubber balls.

Sweeping around her stern, we now stood toward the ram, which was apparently not proceeding with small rapid shot directed at our pilot houses, and which came flying in quick succession over our hurricane deck—and training her broadside into the water, as we passed, we struck the Rebel ensign down and sent the white flag up, when cessation of our fire was ordered. Now was the time to know if they had surrendered, which was answered by shouts of "Yes," "Yes," "Yes," from a dozen throats. Ordered her to drop out of line ahead, which was responded to in good faith, and pushing on, to regain the time we had consumed in this capture, we noticed that the *Mattabesett* had again engaged the ram, and was firing rapidly. The *Wyalusing* had come up astern of the *Sassacus*, attracting the attention of the *Albemarle* from us, to whom she now exposed her whole side.

She was about 800 yards distant, and we were in just the position we desired. Our vessel began to be steamed slowly, as if waiting for events, but using her guns rapidly all the time, throwing 100-pounder Brooke's rifle shot and shell, with spirit and energy. Fortune seemed most favorable, and our intrepid commander determined to close with our antagonist, seized the opportunity without hesitation, and ordered, "Full speed ahead." As we pressed, as previously arranged with the chief engineer, who was acquainted with the channel, to run the vessel straight for what was supposed to be the weakest part of the ram, where her casemate or house joined the hull. Our fires were clean, and the fine, full draft of the throttle valve opened, and the *Sassacus* dashed at her grim adversary. We *seemed* to move frightfully slow, but each moment increased our speed, as the intervening space grew less, till we attained the rate of 9 to 10 knots, when we struck our iron foe a fair, perfect, right-angled blow, where intended. The shock to our ship was not nearly so heavy as we had expected. Something gave way. Was it our ship? Were we cut down? No! thank Heaven! We were untouched, and as her black hull was forced under by our bow, till the water flowed over it from side to side, we thought our foe was sinking down, and could hardly repress a shout of exultation, as unaware to her, ringing cheer with which our comrades on the *Wyalusing* greeted our bold grapple with the monster.

As we struck her, the ram drove a 100-pounder Brooke's shot through and through us, from starboard bow to port side. Our stem was forced into her side, and keeping up our head way, we careened her down beneath our weight, and pushed her like an inert mass before us, while in profound silence, our gunners were training their heavy ordnance to bear on our unresisting enemy. Now their muzzle protrudes from the ram's open port, and the loaders of our Parrott rifle, standing on the slide, serve the gun within fifteen feet of the muzzles of the enemy. It was a grand repetition of the *old days* of "broadside to broadside" and "yard-arm to yard-arm," but the immense guns, now grinning defiance across the few feet of space that guarded them, each one carrying the weight of metal of a whole tier of the old three-decker frigates, rendered that of gondolous ordnance a magnificent and imposing spectacle.

Still we pushed her broadside to before us, our engine at full speed ahead, and we low deeper and deeper into her. Still she gave way, and now we threw a hasty, anxious glance toward our consorts. Were they coming to assist us? Would they seize the golden chance and thoroughly hold out to them, and pushing on to the monster's unguarded side, help us to push her down, out of sight forever? Not a sound; not a movement; not a gun. All was quiet as the night throughout our fleet. It was a grapple for life. A silent fight. Everything depended on the enemy, relieved only by the sharp, scattering volleys of musketry, the whizzing of bullets bullets, and the deep, muffled explosion of hand grenades, which the rebels threw down in our decks from firing in the enemy's hatch, driving back their sharpshooters, and creating a consternation and dismay among the closely packed crew of the iron-clad; but not until our pilot house and smoke stack had been spattered all over with the incessant fire of the rebel balls. No one had fallen. We had thrown shot and shell square into her ports from our ride guns on the barricade deck, and driven volley after volley of musketry and grape and canister upon her gun deck, and now our heavy 100-pounder was training for another crushing blow.

Presently, a movement was felt in the two ships. We heard a crushing of timbers, as at the moment of collision. Our ram was slowly backing out of her slaughter pen, and now suddenly the vessel trembled with the shock, as our 100-pounder rifle, and that of the enemy, thundered at each other with a terrific concussion. Another round, more fearful than bursting shells or belching cannon, now reached our ears. The terrible sound of unloosed, unmanageable steam, rushing in tremendous volumes, scalding and blinding as it spread, till both combatants were enveloped and hidden in a dense, white cloud of stifling vapor. Each had pierced our boiler, and all was lost! Not all, not yet! Our sharp false stem, which had cut deeply into the side of the ram, now as we backed off, she forced bodily across our bow, crushing and bruising our more delicate craft in her progress, and this stem, when wrenched off, allowed the two vessels to drift apart for a few yards.

Now came the fierce duel for life. Our gunners could only hope to injure our antagonist by firing with accuracy into her open ports, as we were busy shot of the enemy would tell with fatal effect upon our wooden vessel. The guns were now served by the officers, assisted by the few people from those of the *Albemarle* blackening the bows and side of the *Sassacus*, as they passed within ten feet. A solid shot from our 100-pounder struck her port sill, and rebounding into fragments, one piece rebounded on to our own deck, but the rest flew into that threatening port hole, and shivered the muzzle of a gun. Another solid shot, and a 20-pounder shell followed through the same opening, in rapid succession as the two vessels, somewhat drifted clear of each, while our starboard wheel crushed and wrenched its iron braces, in grinding over her quarter, smashing the launches that she was towing, and the dinghies must of our boats, and grating over the sharp iron plates with a most dismal sound. Now she passed our wheel, and the crews of the after guns, which had been directed their solid shot at the iron prow. The elevating screw of our Parrott rifle was broken, and the gun could not be depressed to bear on the enemy's port, but hurled its shot over her iron mass, which left a scratch to mark the point of its impact. A 9-inch solid shot, fired with an increased charge, struck solid, and a 20-pounder shell followed through the same opening, in rapid succession as the two vessels somewhat drifted clear, while our starboard wheel crushed and wrenched its iron braces, in grinding over her quarter, smashing the launches that she was towing, and the dinghies must of our boats, and grating over the sharp iron plates with a most dismal sound. Now she passed our wheel, and the crews of the after guns, which had been directed their solid shot at the iron prow. The elevating screw of our Parrott rifle was broken, and the gun could not be depressed to bear on the enemy's port, but hurled its shot over her iron mass, which left a scratch to mark the point of its impact. A 9-inch solid shot, fired with an increased charge, struck solid, and a 20-pounder shell followed through the same opening, in rapid succession as the two vessels somewhat drifted clear of each

hours before. The broad ensign, which had waved so proudly over her ensanguined deck, was hauled down by her shrunken and worn, with its shattered flagstaff, and turning our vessel around, with hard-a-port helm, which she answered slowly, but steadily, we again passed down by our enemy. Our divisions still stood at their guns, and our brave commander, firmly enunciating his instructions and orders, and gaining every moment of his gallant ship with a coolness, precision, and resistless audacity that had no parallel since the days of Decatur and Lawrence, and these days of eighteen hundred and sixty-four cannot courage, calmly smoking his cigar through the whole eventful conflict, and displaying a perfect indifference to danger, was the pride of our Captain and crew, and as his guns at work on our retiring foe, so long as they could be brought to bear, with the accuracy and speed of well disciplined engine, slowly, gracefully, and defiantly, out of range.

Thus ended the single-handed encounter between the *Sassacus*, a sidelock river steamer, and one of the most formidable iron-clads that the enemy have as yet put afloat. The records of this novel and unequal combat engagement are most gratifying. The gunboat *Dunbridge*, with four rifled guns and a large supply of ammunition, was ordered to the all her offers and crew, and the *Albemarle*, which was on her way to Newbern to form a junction with the rebel force then moving upon that city, was beaten with her own weapons, and driven back with her guns disabled, her hull terribly shaken, and leaking so badly, that she was with difficulty kept afloat. So confident were the rebels of the ability of this invulnerable iron-clad to reach her destination, that General PALMER, commanding at Newbern, was summoned to surrender, and informed that "the river and Sound were blockaded below," and his communications cut off. The *Albemarle* did not come to time, but arrived in a most impetuous and unexpected manner, was forced by an inferior antagonist to beat a precipitate retreat, which she commenced the very moment she had escaped the grasp of the *Sassacus*. And, although she kept up a retreating fire, she hastened to regain the protecting harbor of Plymouth, leaving us the undisputed victors of the field, and by her defeat saving Newbern, and doubtless the Department of North Carolina, from being lost to our Government.

The *Sassacus* was disabled in guns, machinery, and hull. She suffered greatly in killed, wounded, and disabled, but still floats in safety, and with two months repair can be sent out again, as staunch, and strong as ever, ready for any service which may be required of her, and with the same unequaled in the fiery ordeal of battle. The injuries sustained by the iron-clad are not well known, but she has not made any subsequent demonstration to come down the Plymouth state that she arrived there in almost a sinking condition, and her guns heavily injured. Her injuries, it cannot be considered a drawn battle between such unequal and immensely different forces. The *Sassacus* is only an inland river steamer, of full average river capacity, but one built, but she was hurled with irresistible force and astounding boldness upon a formidable armored ship, and foregone with a determination to conquer or perish, or the destruction to beat on her adversary, weakened, disabled, and defeated. Twice on the 5th and 6th of May he brought the rebel ensign down. Let her name be written on the brightest pages of our Naval History. DOUBLE-ENDER.

ADMIRAL GOLDSBOROUGH ON IRON-CLADS.

To the Editor of the Army and Navy Journal:

SIR—I have just read in your Journal, of May 21st, some comments upon Admiral Goldsborough's recent report on iron-clads, by your big gun correspondent—"XV-Inch." He himself appears to be very well satisfied with his expertise of calculations, despite of their irrelevancy to the case in point. One of a more deliberative temperament would have looked about, as I have, and, as it seems, has preferred the course of the blind bull-frog in the fable, regardless of any difference of instinct.

In order to be distinctly understood in what I am about to say, let me first quote the passage of the report, in the very words of its author, at which your correspondent particularly levels his terrific gun. It is as follows:

"To appreciate these assertions fully, scarcely more is necessary than to compare the momentum of the *Dictator* arising from her weight of 4,000 tons, when at her contemplated speed of twenty feet, impelled with a velocity of fifteen knots per hour, or twenty-five feet per second, with that of a two hundred and fifty-two millions of pounds, and is therefore equal in point of shock to that of a ball weighing two hundred and fifty-two thousand pounds (more than a quarter of a million) striking with a velocity of one thousand feet per second; or, to that of an iron ball ten feet two and three-tenths inches in diameter, striking with the same velocity."

Now, sir, mark, if you please, that the only subject here under discussion is the *momentum* of the monitor *Dictator* when weighing 4,500 tons and when going fifteen knots per hour; and mark also, if you please, that whether she does weigh that much, or go that fast, or not, are not at all in dispute. They are assumed by the Admiral as the basis of his calculations, and no one thus far—not even your correspondent "XV-Inch," has disputed them, or controverted their general accuracy.

Well, then, as the *momentum* of the *Dictator* is the only subject presented for determination and consideration, it is, of course, to be deduced by the very simple process of multiplying the weight by the velocity, and expressing it by a particular instant of time, viz. fifteen knots per hour, or twenty-five feet per second. This, and nothing more or less than is expressed by the object in view, is what even the Admiral has done; and when he says it is equal in point of shock (meaning of course so far as momentum contributes shock) to that of a ball weighing 252,000 pounds striking (not starting) with a velocity of 1000 feet per second, he says in effect, nothing more intrinsically than that the product of ten millions and eighty thousand (the equivalent in pounds of 4,500 tons), multiplied by 25, and the product of 252,000, multiplied by 1000, are equivalent; in other words, that the momentum of the *Dictator*, and the momentum of the ball in view, are precisely alike in amount. Can any human being, with any show of reason, object to these conclusions?

That an iron ball, weighing 252,000 pounds must have the diameter assigned of ten feet two and three-quarter inches, can be readily verified. It is not disputed in fact, and the law upon the subject of computing diameter is of easy application.

Had the Admiral presented for discussion the *living force* of the vessel and ball, instead of their *momenta*, then the matter would have assumed a very different aspect, and "XV-Inch" would have had his big gun to show up with. He should have been used, and not at all the mere velocity itself, to determine results; for it is not necessary that the human head should be of the largest size in order to understand exactly the distinction between living force, and momentum.

And again, the remarks of your correspondent with regard to the Admiral's ideas about guns and ramsare scarcely less at fault. He says that "the Admiral bases upon grounds which he presents, that rams of a particular character, and intended *exclusively* for a particular purpose, shall not be provided with guns of any kind;" but as to his "practically ignoring the power of our heavy ordnance," this is but a matter of rather farcical deduction of the inferences, suggested, one might almost be inclined to think, rather by some feelings at apprehension growing out of the imaginary hostility established between our gun-correspondent and all other big guns, than by anything the Admiral really does advocate. With what semblance of propriety can your correspondent "XV-Inch" so construe, and build in the very face of all that is said in the report, in the most earnest manner, in favor of heavy ordnance with which our iron-clads and other vessels should be armed?

Time alone can develope whether the Admiral's views, in relation to the practicability of ramming, and also the true iron heitome of our Monitors, are correct or otherwise; and certainly nothing that your correspondent advances justifies that warlike spirit which he has so "XV-Inch"ally. No one, however, I am convinced, will be happier to find his views, in this particular, erroneous, than the Admiral himself. God grant that it may be so, human security, at least, that they may be so; but, *mon ormolu*.

ETE.

GENERAL COURTS-MARTIAL.

To the Editor of the Army and Navy Journal:

SIR—In the late case of Lieut. COL. BURNHAM, dated May 21, there appears, under the signature of "LEX," an article assailing one of the proceedings given in the summary for conducting general courts-martial, issued by General Orders, March 18. Your contributor LEX has been pleased to place a most unwarranted interpretation upon the expression referred to, and then to charge furiously upon this creature of his own fancy.

It may be stated in reply that the summary does not enter into details, but merely gives the laws which must be imperatively observed at the inception and during the progress of the trial, and the duties, authority, and also the proceedings, arranged in the order of time or precedence in which the act, whether of the court or of the prosecution or prisoner, should be performed. Hence, by reference to the summary, it will be seen that the "time when" the charges and specifications may be altered or amended is between the arraignment by the prosecution and the final pleading by the prisoner; also, that inasmuch as any alteration or amendment of the charges must be made at the sole instigation of the prisoner and by consent of all parties, it will be perceived that such alteration or amendment, if made, must be clearly intended, to the benefit of the prisoner—never to his injury. For this privilege of introducing amendments, at the request of prisoner, without, however, affecting the "matter before the court," see De Hart, pages 147, 148 and 191; and Benet, 107.

In fact, it is the privilege of the prisoner that no additional charges can be made after arraignment, and that the charges and specifications are unalterable after the prisoner pleads to them (Benet, 107, and De Hart, 148). It is difficult to understand how your correspondent Lex can give to the proceedings referred to the meaning he has, and the injustice of which he has so "unwarrantably" done it. I doubt any presiding officer or member of a general court-martial, "however incompetent" the new officers of our immense "provised military service may be," would ever think or dream of a similar interpretation.

A little attention and a little of time in the proceedings as given in the summary, would have saved your contributor Lex from the exhibition of much virtuous indignation against "official sanction," whenever he may be consulted under that term. R. D. C.

THE REGULAR NAVY—PROMOTION IN THE LINE.

To the Editor of the Army and Navy Journal:

SIR—The bill reported from the Naval Committee of the Senate has refused to increase the existing grades of the Navy beyond the limitation of the Act of 1862. I regret it. I have no doubt that many promotions have been or were to have been made. But the present organization is not, I think, satisfactory to the service. In electing that measure, I was governed by the belief that even to have been made to lead to the mathematical exaction of a certain number, the grade of commodore, to command single ships, is an anomaly in the Navy service. The grade of captain is very much what the grade of commander was before, and is the proper command for vessels of the second class. In time of profound peace, with the fifty-one Navy, we had on the Active List sixty-eight captains two commanders, and we may include nine rear-admirals not yet all appointed—total 135. The commanders, especially, are far too few for the duties designated; and the senior lieutenant-commanders are of necessity commanding vessels of the third class. This latter grade is singularly anomalous. Their average rank is equal to that of from ten years of sea service, nearly the maximum on the whole Navy Register; the younger ones as little as six years! The grade of lieutenant-commanders is numerically too large: that of lieutenants too small. The Navy (the line) has had little promotion by the war, notwithstanding the great number of resignations. A few admirals, one or two commodores and captains for special gallantry, and all the recent graduates of the school—these are all that have been benefited. The officers holding the middle grades, constituting the great bulk of the whole Regular Navy, remain the prime of life, middle-aged or no longer in their first youth (alas for the happy by-gone years! but they were given to their country!); young enough for energy and hardy and constant service, but unusually conscript experience—these officers have virtually received no promotion at all. On the contrary, they are very largely out-ranked by the old and non-combatant staff officers. Many have remembered the gallant and meritorious service has been and is now necessary to many the opportunity for brilliant distinction happens to but few. Many have, with no opportunities, mine modestly in their spheres; comets and meteors are apt to attract attention.

It does certainly seem unwise, in this hour of our country's tribulation, to take away from her servants militant the cold or dull reward of mere seniority. And I write especially with regard to the older lieutenant-commanders. The volunteer officers should be promoted to the rank of commodore, as is proposed and voted for by the House of Representatives, these so advanced will rank all lieutenant-commanders. A captain of this grade, to the South Atlantic Blockading Squadron, command six out of the eight Monitors; and of the first sixty on the list the commander-in-chief might select the best fifty to command with, McCLELLAN, BURNSIDE, FRANKLIN, FOSTER, THOMAS, W. F. (Baldy) SMITH, WARREN, and many more. It is remarkable that the names of many of our best officers are not less accomplished in the naval than those distinguished generals in the military profession.

A CORRECTION.

To the Editor of the Army and Navy Journal:

SIR:—In your paper of the 23d ult., 577th page, 3d column, you say, "Colonel GUILFOYLE defeated the enemy at 'Paint Rock,' &c., &c. This is not correct. It was Colonel G. W. GALLUP, 14th Ky. infantry, commanding 1st brigade, 1st division, 4th corps, A. T., who pursued the enemy to Hair Mountain, on Licking River, 12 miles above Sidneyville. Surprised him at half-past 12 M., April 10th. The engagement lasted three hours, and resulted in the capture of about 100 horses, 200 saddles, 200 stand of arms, and many horses killed. Enemy's loss in killed and mortally wounded, 30. Our loss, 4 killed and 7 wounded (here Colonel E. F. CLAY, mortally wounded. Our loss was 4 wounded; one seriously—none killed. Colonel GALLUP completely routed the enemy and camped on the field that night.

JUSTICE.

LEXINGTON, KY., May 15, 1864.

THE ARTILLERY CORPS.

To the Editor of the Army and Navy Journal:

SIR—In your journal of the 7th inst. your list of Army corps includes the Artillery Corps of the Potomac, Brigadier-General H. J. HUNT, commanding. This corps is the finest organization in the field, and the only corps of the Potomac Army. It is time it was commanded by a Major-General, and has no corps staff proper at present. But it is one of the corps of the Army of the Potomac.

C.

ELIZABETH, New Jersey, May 21, 1864.

CLAIM AGENCIES.

To the Editor of the Army and Navy Journal:

SIR—I am pleased with the subject of claim agencies, receiving a ventilation in your valuable journal. The public should be made acquainted with the facts in the case, and the frauds of the unprincipled discovered to them, and the widows of such as have fallen in the service of their country. It was to protect this class from shysters that benevolent gentlemen in the Army and Navy established the agencies through which the small pittance allowed by the Government might be obtained without expense. I agree with your correspondent that agencies charging to be "*connected*" and a regular correspondence kept up among them, that "each may get his share," is a humbug, and ought to cease. If no suggest, "professional charities" would be more the style of "establishment of charitable agencies"—and we have reason to believe that the members of the profession generally, would advise that applications be made through these agencies—would it not be well to call special attention to those already in existence? If the agencies would reduce fees or not only charged five dollars, and an additional fee of one dollar fifty cents for each affidavit for a bounty application, be added therefore, and of the fee of ten dollars for pension collected, and in one instance twenty per cent. of court, there is no cause for the profession.

The difficulties mentioned by your correspondent "R." in the prosecution of claims are somewhat magnified. It is not every man of average ability or acumen to enable any person of moderate ability to make such an application, especially where every form is furnished; and the exhaustive work of "Greene's Practice in Courts and Prize Laws" will settle every difficult point that may arise in preparing applications. In the case of a widow, proof of the death of her husband while in the service, and proof of marriage, with the affidavits of two identifying witnesses, are about all the requirements. Soldiers' claims are more simple, and where these are satisfactorily furnished, there is no difficulty in procuring certificates of pay.

In the case of a wounded soldier discharged for disability, all that is necessary after obtaining a certificate from the examining surgeon is that his application for pension should be subscribed by two identifying witnesses, and that he have a certificate from the commander of his company, setting forth the time when, place where, and circumstances under which he received the disability. If he has been wounded, though he may not have served two years, he can obtain a pension upon the usual form of proof by two witnesses as above, and sending to Second Auditor, accompanying the application, his discharge paper.

Soldiers obtain pension and bounty by furnishing proof

of death and marriage, with the additional proof in the case of pensions, that they depend in whole or in part upon the testimony of survivors.

In the case of brothers, sisters, guardians, &c., two indentifying witnesses to the applications is all that is necessary. The same law applies to applications for naval pensions, prize money, arrears of pay, &c., and any person of ordinary capacity can in a short time fill up and have properly executed any of the above-mentioned forms of application without any difficulty. Indeed, the process is so simple that the Commissioner of Pensions, Hon. Jos. H. Barrett, in a late circular, says:—"In this connection it seems proper to refer to certain erroneous impressions which appear to exist in some quarters as to the existence of serious obstacles, and the interposition of needless and burdensome formals. as to the prosecution of a just claim for a pension. So far are all such representations from being correct, that I do not hesitate to say that the simplest ordinary intelligence and education can, on application to this office for forms, and instructions suited to the particular case, establish his or her claim to a pension with prompt admission —without any other aid than that which will be readily given by the officer before whom his declaration is to be executed. Nothing is required of the claimant which is not necessary, and in most instances conveniently attainable."

S.

ARMS AND NAVY IN CONGRESS.

There is rather less military legislation than usual to record for this week in either House of Congress.

SENATE.

On Thursday, May 19th, Mr. Fessenden reported in favor of another Committee of Conference on the amendments to the Appropriation Bill. The report was adopted. On Friday, May 20th, Mr. Wade introduced a joint resolution to authorize the President to call out men by draft for one year. The bill was referred to the Committee Military Affairs. Mr. Edmunds, the Montpelier banker's petition, praying for pecuniary relief, was granted. The House bill prohibiting the sale of intoxicating liquors to Lieutenant Ames, Sixth Massachusetts, killed by the mob in Baltimore, April 19th, 1861, was passed.

On Monday the Senate considered a bill to prohibit the release of drafted persons by the payment of money, thus compelling drafted men who do not serve to procure substitutes. Mr. Wade and other Senators opposed the bill, Messrs. Grimes and Hale had a renewal of their old conflict on the Navy Department, the latter charging it with defending the Navy agents who furnish supplies. Considerable causality, however, was exposed in some localities. Mr. Grimes's speech was quite long. Mr. Davis also discussed the subject.

The Pacific Railroad Bill was passed, as amended, 23 to 5.

On Tuesday there was no military business transacted.

On Wednesday, the 25th, Mr. Morgan, from the Committee on Military Affairs, reported a bill to prevent the discharge of drafted persons by the payment of commutation money, with an amendment in addition. Notice may be given of a bill revoking all commissions in the Army which have not received the confirmation of the Senate. This motion has special reference to the Fitz John Porter controversial corps and the Corps d'Afrique. The bill appropriating $238,000 to pay the sufferers for damages incurred by the outbreak of the Minnesota Sioux was passed.

HOUSE.

On Thursday, May 19th, the Indian Appropriation Bill was read. Bitter "personal explanations" were then made by Messrs. Dawes and Holman, relative to the Pike matter; and a great deal of violent personal abuse followed between Messrs. Maldory, of Kentucky, and Julian, of Indiana, other gage of battle being thrown down, however. On Friday, the 20th, Mr. Cox stated, but was refused, leave to answer by resolution the military suspension of the *New York World* and *Journal of Commerce*, which remained till Monday.

On Monday, another unsuccessful attempt was made by Mr. Pruyn, of New York, to censure the suppression of the *World* and *Journal of Commerce*, and some time occupied in its discussion. The Committee of Conference on the Indian Bill reported called upon for the diplomatic explanation ask to have been given by Government to France of the recent vote of Congress on that point. On Tuesday, there is little of military interest.

On Wednesday, the 25th, the President transmitted to the House the correspondence Seward's correspondence with Spain on the invasion of Mexico. Its purport is that the nation having by a solemn declaration of the will of the people, although listening to the unanimous declaration of the House with profound respect. A report from the Conference Committee on the Army Appropriation Bill, providing for the full pay of thirteen dollars per month to certain regiments of colored troops for service previous to the 1st of January last, from which the law provides that all colored troops shall receive the same pay as white ones, rose to a long discussion, and was finally rejected 11 to 25, and a new Committee appointed on the matter. In short, the House says there shall be no distinction in pay in consequence of color. The Senate's amendment to the bill for a railroad to run from the Ohio River to and through East Tennessee, the consideration of which was fixed for next Tuesday.

THE RESISTANCE OF A WEAK GARRISON.

The following extract from "Halleck's International Law and Laws of War" (page 440), treats of a subject about which the Fort Pillow massacre has given rise to some discussion:

It was an ancient maxim of war, that a weak garrison forfeit all claim to mercy on the part of the conqueror, when, with more courage than prudence, it obstinately persevere in defending an ill-fortified place against a large army, and when, refusing to accept of reasonable conditions offered to them, they undertake to arrest the progress of a power which they are unable to resist. Pursuant to this principle, Cæsar ordered the whole of the people of Uxellodunum to be put to the sword, after they had compelled him to capture them, if they surrendered before the battering ram touched their walls. But, though sometimes practiced in modern warfare, it is generally condemned as contrary to humanity and inconsistent with the principles which among civilized and Christian nations, form the basis of the laws of war. Even when it was practiced by the ancients, for, when Petreius was ordered to be executed by Domitius on the ground that they obstinately defended the town of Rhegium, he protested against it as an unjust punishment, and called upon heaven to avenge his death. Diodorus, the Sicilian, relates that Alexander, after the siege of Alexandrine the Great, ordered some Milesians to be spared *on account of their courage and fidelity*. It is sometimes said, that when a garrison, after the breaching of a weak place, against an overwhelming force, it only causes useless effusion of human blood, and that, therefore, the authors of such a sacrifice ought to be punished. But who can say beforehand that such a defence may not save the State by delaying the progress of the enemy? There are numerous instances, in ancient as well as modern times, where courage has supplied the defects of fortifications, and where places generally regarded as tenable have been defended by a brave and determined garrison till the enemy consumed his strength in the operation of the siege, and wasted the most favorable season for conducting the campaign. In case a place is closely besieged it is customary for the besieging general to offer to the garrison honorable terms of capitulation; and if they refuse them terms and the place is carried by force, they may be considered prisoners of war, entitled to all the rights and treat such prisoners with all the severity of the law of war. But that law, says Vattel, can never extend so far as to give a right to kill men who have laid down their arms, unless he has been guilty of some crime against the conqueror. Where, however, the resistance is not only obstinately fruitless, but criminal in its character, but springs from the obstinacy instead of firmness of value, the object to resisting, is guilty of one of the greatest of crimes against society—the murder of the human life; and they does he deserve to be treated with extreme severity by the captor, but also to be punished capitally after he has by a guilty death with for so serious an offence. But the resistance in such a case must be obviously useless, and known to be such by the party. If there be any reasonable hope of success he is justifiable in holding out to the last extremity. (*Vattel, treat des Gens*, liv. 3, ch. 8, § 143; *Butterfield's Institutes*, p. 439; *Wheaton's Elements of Int. Pub.* lib. 1, cap. 3; *Grotius, De Jur. Bel. ac Pac.*, lib. 3, cap. 8, § 12; cap. 11, § 6; *Williams, Int. Law*, vol. 2, p. 5; *Rivgelius, Derecho Pub. Int.*, lib. 1, tit. 2, cap. 11; *Reid, Sciences du Gouvernement*, tome 5, ch. 2, sec. 6; *De Cussy, Droit Maritime*, liv. 1, tit. 3, § 24.)

STEEL ORDNANCE AND PROJECTILES.

At a late meeting of the Royal United Service Institution, Mr. Bessemer read a paper on the employment of cast-steel for the manufacture of ordnance and projectiles. The author said that the principle in the manufacture of crucibles exhibiting the process of manufacturing "Bessemer steel," and by specimens of the metal and round shot manufactured with it. The nature of the process was not, however, explained until the end of the paper. It consists of fabricating the crucibles in the ordinary way, but at the bottom of a bottle-shaped crucible containing molten cast-iron. The air, as it rises through the fluid metal, is distributed in the most minute manner by means of a blast conveyed with the carbon in iron, and form bubbles of flame as they rise to the surface. By this means the iron becomes thoroughly heated, and the carbon in the neck of the furnace in a volume of white light, nearly equalling in its intensity that of the rays of the sun. The operation is continued until all the carbon is consumed, and the metal that remains in the crucible is much softer than the best malleable iron; it is "dead" in the language of steel. As the process was originally conducted the combustion of the carbon was stopped at a certain stage, and the remaining product was a hammer steel. By the subsequent addition of obtaining greater uniformity in the results, the whole of the carbon is now consumed, and a known quantity of cast-iron is afterwards added to the contents of the crucible. By this improved method the exact quantity of carburet of iron required to produce any kind of steel is known, and therefore the uniformity of the quality can be accurately attained. In the manufacture of ordnance this is of great importance, for the strength to weight of the gun in question can be given to the steel when it has been determined in what proportions these qualities should be combined to produce the best working results.

Mr. Bessemer stated that the late Lord Herbert took great interest in the process, and had appointed a preliminary arrangement for its adoption in the Government works, by which the steel would have been manufactured at the cost of 20 per ton; but at the present moment the adoption of the process was submitted to Sir W. Armstrong, and he had heard nothing more of it. Mr. Bessemer expressed strong opinion that great improvements in the form of guns and projectiles, on account of the practical difficulty of welding the edges of the coils together. His objected to welding coils together, as the most complete method of the metal, and in mentioned experiments with welded iron and bomogeneous metal under the steam hammer, which showed that the welded parts always separate when exposed to continuous hammering, while the solid metal held firmly together under the same trials. He contended that solid metal was therefore much better adapted for ordnance than any structure welded together, not only because it was stronger of itself, but would have more resistance to the rough usage of warfare without the liability to disintegrate on the surface which was experienced in welded metal. Mr. Bessemer said he had manufactured 100 steel cannon in an unfinished state which were sent to Liverpool to be shipped, and he shrewdly suspected they were sent to America, but that had no means of knowing how they had worked. He observed that the advantages of steel for ordnance were becoming rapidly more appreciated, that the experiments now being made at Shoeburyness were with steel guns, and that 1,000 had been made for the Prussian Government by Messrs. Krupp, whose collection of steel implements attracted much attention at the Great Exhibition. Orders have lately been given to that firm for 300 other steel guns of large size. The steel exhibited by Messrs. Krupp, Mr. Bessemer said, was the finest he had seen of ordinary crucible steel, but that process of manufacturing presented much more difficulties than the process recommended at the present time than his own, which was also more economical. With regard to projectiles, he observed, that the quality of steel required to produce the best shot for penetrating armor-plates has not yet been determined, but when that point has been ascertained by his process shells and shot could be made of the exact degree of hardness and toughness required.

Several questions were put to Mr. Bessemer when he had concluded reading his paper, one of which related to the applicability of Bessemer steel to the armor plating of ships, to which purpose, he candidly admitted, that in the present state of its manufacture it is not adapted. At the same time he said he proposed making some improvements in the process of welding plates together that might overcome the existing difficulty and render his steel suited for the purpose.

OBSERVATIONS ON DANISH MILITARY OPERATIONS.

Major-General E. E. Napier reads to an English newspaper some "observations on the late military operations in Denmark," the object being "to suggest the feasibility of turning to account the British system of drill and bought "experience" acquired by both Dane and German:

It would appear, he goes on to say, that a great error was committed by the Danes at the opening of the campaign in constructing a line of fortifications more extensive than could possibly be effectively occupied by the small force at their command. This was the necessity of examining the works of the Dannewerk and exposing their army to the demoralizing effects of retreating during the depth of winter before a force superior in numbers, in discipline, and superior, likewise, from the better nature of their arms.

Whilst adverting to the inferiority of the Danes in the armament of their rifles, batteries and navy, the superiority is accomplished of keeping pace in this respect with the improvements of modern science in the art of war. In naval matters, we have seen that the guns of the Danish expedience acquired during the present hostilities in North America, have been turned to account by them, and are keeping pace with the military science of the day, still a few useful hints might be taken from recent proceedings in the present Danish war. The Danes are accounted by the Prussians with their breech-loading, self-capping rifles, being able to return five or six shots for one discharge from the Danish rifles, we are informed, that the Prussian breech-loading rifle-bullet is advantageously introduced into the British service, and if provided with Jacob's shell, such a weapon (supposing always that there be not reasonable objections to it) would be most formidable in the hands of British troops. A short double-barrelled rifle, with a long swivel bayonet, added to employment by our troops, by whom, in a bayonet charge, and barrel loaded, the reserve could be discharged at close quarters with tremendous effect.

In the accounts of the storming of Düppel, it is stated that the Prussians "had their knapsacks and their packs," wearing instead of the latter, their forage caps. Can any more convincing proof be offered of the uselessness of the helmet or shako for soldiers? Why, therefore, encumber the soldier with such additional baggage, instead of allowing him to march, fight, and sleep in a comfortable forage cap, such as the Prussians had from which the Scotch Glengary cap? No mention is made of what the Prussians did with their knapsacks during the storming of Düppel, but these were probably worn "*en bandolière*," and the "summer" were accurately not encumbered with still leather cases around their necks, or heavy "knickerbockers" on their legs.

ANSWERS TO CORRESPONDENTS.

C.—Under paragraph 25, Articles of War, "all officers, of what condition soever," have a right to put other officers, even their superiors, under arrest. It is not customary, however, nor is it considered courteous, under ordinary circumstances, for an officer commanding troops to put a member of a general's staff under arrest. The case you mention would be to your officer a delicate one.

"Cambridge."—We believe that the general Government is not at present raising colored regiments in any but the infantry branch of the service.

Watertown.—We do not question the extent of your military studies, though your over-confident assertion that General Halleck has no authority for the statement, in his "Elements of the Military Art and Science," before the battle of Waterloo, employed from six to seven thousand peasants in preparing defences, &c., renders it highly probable that you are mistaken in the assertion that you have made authentic accounts of that battle, French and English. You will find authority for General Halleck's statement in "Jomini' Siege."

E. B. Jackson.—The prize *Emma Lee*, captured by the *St. Lawrence*, is reported ready for distribution. The *Herald* is credited to the *Octopus* and the *Pilot* on the list of prizes for distribution by the Fourth Auditor. Of the *Petrel* we have no information.

Register.—Neither the Army or Navy Register is, as a rule, to be had from publishers, but is generally confined to officers in the service. Copies are sometimes obtained, however, by the booksellers in Washington, who charge their own price for them.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the line service, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers, and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to invitral and other matters.

The subscription price of the ARMY AND NAVY JOURNAL IS FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made by United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 39 PARK ROW, THREE BUILDING.

CITY SUBSCRIBERS who change their residences at this season, are requested to give notice of the fact at our office, No. 39 PARK ROW, in order that the addresses of their paper may be altered accordingly.

The editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 39 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, MAY 28, 1864.

THE CONTEST IN VIRGINIA.

TWO acts in the Virginia drama are over; and already the third progresses with a celerity not inferior to that of those which went to make it up, with portent of a *denouement* no less bloody, and no less momentous. Roughly generalizing the campaign hitherto, it is a succession of flanking and fighting; of fighting, in order to flank, of flanking in order to fight. First came ten days of fierce, pitched battles, the two gladiators resisting in strength, and wrestling with thirsty fury. The end to these first combatants more exhausted, if not less vindictive, and manœuvring was prominent, with deadly battle subordinate.

Two fields have now been thoroughly fought out and abandoned. The closed records of Spottsylvania and the Wilderness, display similitude, not only in their general, but in several particular features. The main topography of the regions was not unlike. The method of joining battle analogous. At both points the disposition of each Army to accept the onus of attack, was striking. A series of fierce battles, unparalleled for severity in American annals, was the substantial story of both. At each, the summary of any single day's fighting, showed it usually but an indecisive struggle, or, if the palm of temporary success was now awarded to one party and anon to the other, no such thing as a Waterloo result, so often predicted, was anywhere discernible. The contendings forces learned by many a hard and weary day's fight, from dawn to dusk, to expect only to sleep on their arms and in their morning's lines, without wrenching a rood of ground from the obstinate foe. If aught else is needed to fill the parallel, the silent withdrawal, at length, of the imperilled enemy, the instant pursuit, and the conflict of both the flight and chase, may be added.

Indeed, it is this latter fact which now attracts one's attention. Which of the two leaders first left his ground? So closely did the Union general follow, both at Spottsylvania and Wilderness, that it is commonly thought that he rather forced the marching by himself initiating it. Our own judgment is that, at both places, it was General LEE that first changed position. In this view, the movement of General GRANT was rather a pursuit than an outflanking; though, in either case, the desired end was attained. Or, to speak more precisely, the intention in hand seems to have been boldly projected by the Union general, and the other, not surprised, as is commonly said, but fathoming the intent, moves off but just before its execution. The cool withdrawal from Germanna Ford, before the fierce roar of Friday's battle in the Wilderness had died away, and before news of any retirement of the enemy seems to have reached him, shows a definite purpose on the part of General GRANT to thrust himself across the enemy's road to Richmond. No less does the similar withdrawal of our right on Thursday and again on Friday, the first attempt being foiled by EWELL, indicate a similar purpose, independent of any scheme of the enemy. Yet, in both cases, the Rebel general actually began to march his army before our own was moved, anticipating the attempt to flank, prefacing it in both cases by a savage and partially successful rush upon our right wing, then hastily but in order retreating. It is this which gives, we repeat, our intended outflanking the character of a pursuit. On either supposition, however, the withdrawal was equally compulsory, and was the legitimate sequel of the Union general's efforts.

As the campaign rolls on, the plan which unfolding events clearly reveal as the one which General GRANT had fixed upon for the Army under his personal supervision, seems to be crowned with steady success. Not all his schemes have been equally fortunate. But he appears only to have relied upon them to pair off, as it were, with the Rebel armies in their front. The main burden of conquest he took on his own shoulders. It appears now that the failure of GRANT would be the failure of all the rest, as his success is the success of all. JOHNSTON, reinforced, might visit SHERMAN with severe repulses, on his present advanced ground. And the consequences to BUTLER and SIGEL of GRANT's retirement need hardly be stated. But GRANT is competent to push his immediate antagonist back and back, though both SIGEL and BUTLER should fall him. SHERMAN is striking at a vital point in Rebeldom. But the observer feels that the blow will not prove vital, for the mortal thrust must be delivered in Virginia.

Our opinion is that (not to criticise the coöperative movements) each step of LEE hitherto has not only been contemplated, but intended and forced by General GRANT. Whether his ultimate desire can be gratified, in the shape it now has, is another question. Brilliantly successful as is the record of Chickamauga, the Lieutenant-General would be better pleased with a repetition of the story of Vicksburgh. It remains to be seen how, after a protracted struggle in the outer defences of Richmond, General LEE will decide the hard question of what to do with the city he now has on his hands. Our people are prone to think that he will huddle and coop seventy or ninety thousand men in a single city, to eat themselves into capsitulation. Should he commit so improbable as well as so fatal a mistake, failing to leave his main army as an outlying and harassing force, the necessary would quickly make the name of LEE, so long the omen of skill and victory, but a synonym for ill-starred PEMBERTON.

THE REMOVAL OF GENERALS.

VERY promptly after the occurrence of the sad affair at Fort Pillow in April, General HURLBUT was relieved of his command in West Tennessee. Very promptly after the disastrous affair at Grand Ecore, in Louisiana, in the same month, General BANKS was removed from the command of the Army in the Department of the Gulf. Whether the late unlucky affair at Plymouth, in North Carolina, General PECK was removed from command in that State. On the very heels of the recent inopportune affair at Newmarket, General SIGEL was relieved from the command of the column operating in the Shenandosh Valley. It is reported that an order has been issued removing still another officer from the commanding a heavy column, who has not fulfilled the great expectations which his admirers entertained of him. But the order has not been published, nor has it yet taken effect.

We do not know precisely how the Lieutenant-General stands related to these removals. They have all taken place since his appointment to the early part of March to the command of all the Armies in the field. Each of them has followed hard upon some real or apparent failure in duty, and the principle involved has been made applicable to *every case* of this character that has occurred within the past three months. It would appear, at all events, that there is a uniform system in the matter, and that the long complained of capriciousness and vacillation in regard to removals and reinstatements, as well as in regard to appointments, no longer exist.

Some have declaimed against these removals as part of the alleged universal war against "civilian generals," and in favor of "West Pointers;" but this is invalidated by the fact that two of the four removed officers are "West Pointers," and the successor of one of these two "West Pointers" is a "civilian general." But these and other points are difficult of discussion from our necessary lack of knowledge of some of the important facts in individual cases. There is, however, in this matter, a larger question for thought, which may be discussed on wide principles, without criticising the general action thus far, or the specific action in the case of any one of the officers alluded to.

It may educe from the facts mentioned in our opening paragraphs the underlying principle of those facts, it would seem to be this—that the failure of a commanding general to perform any assigned duty shall be followed by peremptory removal from his field of duty, if not finally from command.

Is this a just principle? Should it be universal and permanent in its application?

As a principle—and we say this quite independent of any or all of its recent actual applications,—we believe it to be abstractly and practically just. The necessities of military duty are very imperative. The responsibilities of high military position are very great. The penalty for failure should be rigid and severe, and should bear at least some proportion to the fatal consequences that may be its result. It is implied in this, of course, that no impossible task be assigned to an officer—that no unjust demands be made of him, and that he be not thwarted in the carrying out of his plans, by any action on the part of his superiors. But when given a force competent by skillful use to the performance of the duty assigned, and when given freedom in the control of that force, any commander fails in effectively employing it,—he should, as human life and the honor and success of our country are valuable, be summarily relieved from the liability to a repetition of his failure. The application of this rule should be just as wide and as constant as the circumstances call for it.

It by no means follows—nor would we be understood as saying—that all failures of every kind, and without regard to their magnitude or bearing, should be followed by the infliction of any such penalty as removal from command. In the duty, for example, of the commander of a department to hold all his posts and to guard securely his lines—independent of offensive operations; but were he liable to removal when the enemy captured an outpost or broke through some point in his lines, it would be as ruinous as foolish. It is always the bounden duty of a general to win battles; but when, owing to causes beyond his control, or to the operation of "that unknown and mysterious force which we call Fate," he meets with a reverse, it is no more just to blame or to punish him, than it would be to punish him for the belligerency of his enemy, the breaking of a thunder-cloud, or the antecedent course of history. It is brief, to merit punishment, failure should always be traceable to defect in the character or in the conduct of the responsible party. Hence the great value of courts-martial for the prompt trial of all military delinquents or of all officers accused of delinquency.

There is a kind of failures which may be very trivial in themselves, and in many significance, and the verdict upon which may seem unjustly severe, though it be but severely just. We refer to what may be called *indicative* failures—such as reveal the want of knowledge, or courage, or promptitude, or watchfulness, or readiness of resource, on the part of an officer. A very small matter, a very trivial affair, may furnish such an indication. The unskilful formation of line of battle, impropriety in the disposal of forces or of the different arms of a force, incapacity to fight in force, negligence of detail, lack of definite purpose or of force of will, feebleness of character,—it certainly needs not that an officer whose career exhibits any one of these or similar features should suffer also the total overthrow of his army, before being dealt with.

We have said that we do not know precisely how the Lieutenant-General stands related to the recent action in the cases of commanding officers; but if the PRESIDENT has put upon him the responsibility in this matter, as well as in the movement and management of all the armies in the field, it will be a very hard thing for the political, personal or other friends of these officers to bring any "pressure" to bear for

their reinstatement, or to make any party capital out of the fact of their removal from command. GRANT will pay little attention to the incident of his subordinates being "Abolitionists" or "Conservatives," or "Germans," or "Irishmen," but will only see to it that they are *soldiers*. And his action in their cases will not be at all effected by the outcries of noisy partisans. Delegations of "intelligent gentlemen" will find it as hard to obtain an interview with him at the front, as they would to make their pressure effective if they got it.

From the account of General SHERMAN's movements which we publish this week, it will be seen that he has accomplished more than half the distance between Chattanooga and Atlanta with comparatively trifling loss thus far, our total casualties amounting to but about 5000: while the enemy's loss is stated by the Charleston *Mercury* at "six thousand, one thousand killed, three or four thousand wounded and "the balance missing." It is evident, however, that General JOHNSTON has not yet opposed our progress with his full strength, and the Rebel papers have much to say of some deep game of strategy he is supposed to be playing. All his victories, they tell us, have been won by retreat—drawing the enemy from their position and falling upon them as suddenly as a panic. General SCOTT's advice to a Federal commander, they add, was: "Beware of LEE advancing, and watch "JOHNSTON the retreating." Count on what JOHNSTON is at stand; but the devil himself would be defeated in the attempt to whip him retreating."

However this may be, the indications are that he has thus far had no intention of submitting to any decisive trial of strength with SHERMAN. With his inferiority of force it is doubtless wise for him to postpone the issue until General SHERMAN has advanced so far as to seriously weaken himself in the effort to guard his extended line of communications, and the Rebel army has secured the advantage of reinforcements which the Charleston *Mercury* hints that they are expecting. But this policy is that of weakness and not of strength, and if our advance is conducted with the caution that we have reason to expect, the wily Rebel general will this time be found at fault in his strategy.

The capture of Rome is important to us apart from its loss to the Rebels. It completes our possession of that triangle of which the Tennessee from Chattanooga to Waterloo, Ala., is the base and Rome the most salient, the possession of which, as we have before had occasion to remark is necessary to the full security of the strategic position which commands the Rebel centre. With in it our possession, whatever the issue of this attempt at Atlanta, we are able to permanently contest the entrance into the great seaboard plains of Georgia and Carolina without being exposed to flank attacks. This is presuming, of course, that we are protected against an assault from Virginia by way of the Virginia and Tennessee Railroad. But while LEE continues to be so thoroughly occupied with General GRANT, there is little danger of any incursions from this direction with which our Western militia cannot contend.

CONGRESS has enacted a new system of admeasurement for ship tonnage, which is founded upon the correct internal cubature of the hull and cabins above deck. The standard of the ton is fixed at 100 cubic feet. The new mode is essentially the same as the British, which has been in operation about nine years. The mode is therefore international with the British, so that a British ton and an American ton will hereafter be the same, namely 100 cubic feet of capacity, or space for freights and passengers. The immense number of transactions annually made by and between the commercial men of the two nations, if considered for a moment, will make manifest the convenience of such a system. After our shipping shall have been remeasured, as provided by the law, we shall have certain knowledge of the true relative capacities of our own and British vessels. No peculiarities of form and dimensions will any longer present obstacles to a correct survey for tonnage. It will be useful then to inquire the tonnage of a vessel with a view to a knowledge of her capacity, which will be a novelty in shipping economy in this country.

The new system will introduce certainty and reliability into all statistics, and will formulate connected with shipbuilding, insurance and navigation, having tonnage for the base of formation. Under it the models and constructions of our ships will be greatly improved, because the old system (which was really no system in its effects) induced the building of vessels of a form and dimensions calculated to carry the great, est burthen on the smallest nominal tonnage capable of being given under its imperfect and imperfect operation, while the new mode, giving the correct cubic contents of vessels of whatever form or dimensions, will leave the shipbuilder free to exercise his ingenuity to put the capacity required for a ship into the model which is known, or may be expected, to be the fastest sailing and the best sea-boat for the kind of cargo and the particular navigation it is to be employed in. It will also influence the construction of stronger vessels, and induce ship owners to include in the hull much of the capacity now obtained by littering the decks with houses and cabins, which interfere with the safe working of vessels in gales of wind. Last, but not least, the new system will fairly and equitably distribute the taxes and dues now laid upon ship tonnage. The experience of Great Britain under this system has been eminently satisfactory to her shipping interests. It will go into operation on the first day of January, 1865, but new vessels may be measured by the new mode from May 6th, instant.

A WEEKLY contemporary which has installed itself as military book-keeper for the Nation, has lately been in the habit of presenting a regular statement of account current between its supposed employer and Lieutenant-General GRANT. This account, like a sapper's reckoning with his seedy customer, was astonishingly against the Lieutenant-General, being nearly all on the debit side. Struck by this fact, the JOURNAL at once suggested that the *wrong man* had been charged with the score. We now note, in later numbers of the paper, the disappearance of the trial balance. What is the trouble? Has the General called on the book-keeper, and at a swoop squared and cancelled his account? If so, it would seem that, having posted him as a bad debtor, it would now have been fair to state that the unfortunate General had at length been able to liquidate his debts.

Obviously perceiving that the further publication of the account, in face of the jubilant news, would make it ridiculous, the paper in question merely indulges in a general estimate of the campaign, exhibiting some shrewd and good *a priori* military criticism, but as much confusion with regard to the actual facts. We suggest that the simplest way to get out of the quandary in which it has placed itself will be to turn to the next leaf of the Book-Keeper a receipt representing the following style:

> Received of Lieutenant-General U. S. GRANT, 5,000 prisoners, 22 colors, and 18 pieces of artillery, in full of account to date.
> UNITED STATES.
> By "New Nation."

We learn from our recent French and English files that the "Confederates have closed the navigation of "the Mississippi," and have kept it closed the greater part of the current year. We were not aware of it, and a recent trip up that lively stream led us to think that the facts were otherwise. We, however, our European admirers wish to be confirmed in their view of the matter, let them read the ship news and the steamboat advertisements of the New Orleans *Picayune*, Memphis *Bulletin*, St. Louis *Republican*, and Louisville *Journal*.

On another page of this issue will be found an alphabetical list of officers killed and wounded. Though we believe it to be the most complete which has yet been published, we are well aware that it is far from perfect completeness. The great care spent upon its preparation has also failed to prevent its containing inaccuracies—in the spelling of names, in the denoting of regiments; but these are inevitable even where our information of casualties is official, as in this case, with the exception of a few regiments, it is not. This long list of casualties, embracing nearly two thousand names of commissioned officers, attests the severity of the contests in which our armies have been engaged since the opening of the campaign. By far the larger proportion are in the Army of the Potomac; comparatively few in General BUTLER's Army, and an insignificant number in that of General SHERMAN, of whose losses we have but few detailed statements. The list of killed will be found to have benefitted to put down the names of any of whose death we had not sufficient official evidence. Two weeks ago, we published a list of about six hundred casualties, to which this list is the supplement. We may here say that by far the larger proportion of these wounds are of the character classed by surgeons as slight, and that very many of the officers have either already returned to service, or will soon be able to resume their duties.

The detailed and graphic account we publish elsewhere of the encounter between the wooden gunboat *Sassacus*, and the Rebel iron-clad *Albemarle*, will kindle the enthusiasm of those old sea-dogs who think, with regret, of the days when the strength of our Navy was measured by its pluck and seamanship, and not by the thickness of its iron-clads or the calibre of its heavy guns. In a fair fight between a wooden gunboat and an impregnable iron-clad the gunboat is the victor; the pluck and determination of her crew proving more than an offset to the weakness of their vessel.

From such encounters as this we learn why it is that the high spirit of our brave blue-jackets chafes at armor, and that they ask only for "a fair fight and no favor." Our iron-clads are well, but let us not forget how much is still dependent on boldness and spirit. In spite of science, it remains true that the most powerful weapons in use are those moral influences which cannot be measured in inches or ciphered by the multiplication table. To the true soldier the very presence of danger and difficulty is itself a source of strength.

The PRESIDENT has accepted the resignations of the following officers:—Brigadier-General C. B. MATTHIES, U. S. Vols.; Colonel GEO. GRAY, 6th Michigan Cavalry; Captain CHAS. R. COSTER, 12th U. S. Infantry; First Lieutenant JOHN S. GIBBS, 1st U. S. Artillery.

Mr. WILSON from the Military Committee has reported to the Senate a bill to increase the efficiency of the Staff of the Army. It provides that officers assigned to an Army, Military Department, Army Corps, or Division, as Chief of Staff, Adjutant-General, Inspector-General, Quartermaster, or Subsistence Department, or Engineer, or Ordnance, or Artillery, shall have rank and pay as follows: To an Army, or Military Department of more than one Army Corps, rank and pay of Colonel; Army Corps or Military Department of not more than one Corps, Lieutenant-Colonel; a Division, Major, to be so assigned from army or volunteer forces by the President. Officers of higher grade may be thus assigned without loss of rank. Medical Directors of armies in the field or more Corps, to have rank, pay, and emoluments of Colonels of Cavalry while serving as such, and medical Directors of Army Corps, those of Lieutenant-Colonels of Cavalry.

On Wednesday evening at the Athenæum Club house, in Union Square, New York, a number of friends of Commander RICHARD W. MEADE assembled to assist in the presentation to that veteran sailor of an elegant case of silver-mounted pistols. The pistols were of COLT's manufacture, and were presented in the most exquisite manner. They bore the inscription: "Presented to Commander R. W. "MEADE, by his friends, through the Metropolitan Fair in "aid of the United States Sanitary Commission." Underneath this was engraved the motto of the Commander: "I "dare and I will." The presentation was made in behalf of the Committee on Arms and Trophies, by WILLIAM CURTIS NOYES, Esq., in a graceful speech, to which the Commander made a short but feeling reply, accepting the gift with the modesty of a true and gallant sailor. After the ceremony of the presentation was over the guests partook of a collation.

The officers and crew of the U. S. Steamer *Lodona* have sent to the Sanitary Commission Fair at Philadelphia, two hundred and twenty-eight dollars and fifty cents, as their voluntary offering to that useful organization. It is suggested that other officers and crews follow this example so handsomely set by the *Lodona*. If the officers and crews of the 650 vessels should each contribute one day's pay to this object, the sum realized would make a handsome contribution.

The following promotions have been made in Ohio regiments: Cavalry—Lieutenant-Colonel Geo. A Pennington to colonel; Major Dudley Smart to lieutenant-colonel, and Captain M. Weeks to major. 17th Infantry—Captain Ben. Shower to lieutenant-colonel, and Captain Willis G. Clark to major. 38th Infantry—Captain R. Irving to major.

Colonel Wiswell, Military Governor of the District of Washington has been assigned to the command of the First brigade of the Veteran Reserve Corps.

CASUALTIES AMONGST OFFICERS.

Though this list of casualties has been prepare t with great care, we cannot guarantee its entire accuracy. There no doubtless omissions and errors in the spelling of names and in the designation of regiments, &c.; but our reports of casualties at this time are considered as to forbid anything but an approach to accuracy.

OFFICIAL DISPATCHES.

TWENTY-NINTH DISPATCH.

WAR DEPARTMENT, WASHINGTON, }
May 19—10 P. M. }

To Major-General Dix:

No official report of military operations to-day have been received by this Department from General Grant or General Butler.

Reports from General Sherman's command, dated at Kingston, Ga., 8 p. m. to-day, announce that Sherman reached Kingston, and occupied that place with his whole force, without opposition. All is again reported well.

Reports received at that white it was being written, Hooker's and Howard's grand wing was still engaged with the rear guard of the enemy, a few miles east of Kingston.

Both armies are in touch with each other, two miles east of Kingston.

Major-General Sherman reports the weather fine, roads good, and country more open and less encumbered.

EDWIN M. STANTON, Secretary of War.

THIRTIETH DISPATCH.

WAR DEPARTMENT, WASHINGTON, }
Friday, May 20—6:30 P. M. }

To Major-General Dix:

The afternoon mail has only dispatches dated at 8½ this morning, from General Grant.

Last evening an effort was made by Ewell's corps to turn our right. They were promptly repulsed by Birney's and Tyler's divisions, and came in force on Hancock's corps, and drove it back. About 200 prisoners fell into our hands, besides many killed and wounded. Our loss foots up a little over 600 wounded and 150 killed and missing.

General Grant says that probably our killed and missing are overestimated.

Over 25,000 veteran reinforcements have been forwarded to General Grant. The condition of the Army and its contrabands operations are entirely satisfactory. The army is abundantly supplied.

Official communications from this Department to Colonel Schriver, commanding near Fredericksburgh and his vicinity, nine persons are in custody of the provost marshal, and will be brought here for examination.

The Mayor had made his escape before intelligence of the outrage reached Fredericksburg, and the slut and wounded, what could not be transported overland, will be brought here on water transports.

No reports have been received from General Butler to-day.

Major-General Dix, Commanding the Eighteenth Corps, and of the Department of West Virginia, including the Shenandoah Valley.

Latest dates from Major-General Sheridan, at Winchester.

The Red River was reported to be blockaded by the sharp battery of the enemy at Alexandria. The gunboats had been taken by him, which were believed to be adequate, for clearing the river of all such obstructions. Admiral Porter was at Alexandria, where he will take command of the Army.

EDWIN M. STANTON, Secretary of War.

THIRTY-FIRST DISPATCH.

WASHINGTON, May 20—10:30 P. M.

Major-General Dix:

Dispatches from General Sherman, dated Kingston, 10 o'clock last night, state that during the day he had gained a colonial beyond that place by the railroad bridge. The enemy's cavalry there was skirmishing in the latter part of the day with Hooker's corps.

The rear was reported to be in front of Cassville.

A hard fight for Atlanta is looked for.

EDWIN M. STANTON, Secretary of War.

THIRTY-SECOND DISPATCH.

WASHINGTON, Saturday, May 21—9:30 P. M.

To Major-General Dix:

Dispatches from General Sherman state that our forces found in Rome a great deal of provisions and seven fine iron works and machine shops. The enemy destroyed the railroad bridge on the railroad bird across the Etowah. The rear are now arriving at Kingston with stores, and our advance is reported to be beyond Cassville.

A dispatch just received from General Banks, dated at Alexandria, the 18th of May, announces that the fleet left the mouth of Spotsylvania (this details at which, for obvious reasons, should not be made public). On that day the gunboats passed the bluffs at Alexandria. Orpe started at 11½ o'clock Friday night, one hour and a half after Admiral Porter, and reached the mouth of Red River on Saturday. All indications are that the rebel army has fallen back beyond the North Fork.

Hooke's brigade has joined Lee.

The movement of the Red River fleet has thus far been accomplished without any severe engagement or serious interruption. Wilson's Cavalry Division, Sherman's command, is in front of the line of retreat on that line.

A dispatch received this morning from General Canby, dated Baton Rouge, 14, at the mouth of the Red River, says: "We have reasons to believe that Kirby Smith's army is concentrating at Shreveport in order to fling over the bluffs at Alexandria on the day mentioned in General Banks' dispatch.

EDWIN M. STANTON, Secretary of War.

Dispatches from Kingston, Ga., state that General Sherman's forces are resting, and replenishing their supplies of provisions.

EDWIN M. STANTON, Secretary of War.

THIRTY-FOURTH DISPATCH.

WASHINGTON, Monday, May 23, 1864.

Major-General Dix:

Dispatches from Major-General Canby, dated "Mouth of Red River, at Sunset, May 19," state that Admiral Porter has just arrived. The remainder of the gunboats will arrive to-night. General Banks will be here with the remainder of the troops by daylight to-morrow.

A dispatch from Admiral Porter, dated "on board the flagship *Black Hawk*, mouth of Red River, May 19," states that the portion of the squadron which has arrived has been gotten across the bar from their employment position, owing to the indefatigable exertions of Lieutenant-Colonel Bailey, of the 19th Army Corps, and the 30th Army corps, who projected and built a trestle-dam of 600 feet across the river at the lowest point of the bar, where there was but seven feet water. A back water of the Mississippi reaching Alexandria, and allowing them to pass over at the mouth of the Red river, is planned by the enemy to a point of safety. Lieutenant-Colonel Bailey will be immediately employed in the construction of a dam at Alexandria, if necessary.

An additional report from Cairo, dated May 22, states that the Army and gunboats were all safe at the mouth of the Red River and Atchafalaya.

Major-General Banks, at Alexandria, May 20th, in a last night reports that he would be ready by this morning to resume his operations. Transport was being collected, and the troops had been supplied at leases and detachments.

We have no official report from any last telegram from General Grant or General Butler.

Dispatches from the War Department show that within eight days after the great battle at Spottsylvania Court-House, many thousand veterans troops were sent forward to the front.

The whole Army has been amply supplied with full rations of subsistence.

Upward of twenty thousand sick and wounded have been transported from the front to the hospitals at Washington, Philadelphia, and placed under surgical care.

Over eight thousand prisoners have been transported from the field to prison depots, and large amounts of artillery and other implements of war captured from the enemy.

Several thousand fresh cavalry horses have been forwarded to the Army, and the grand Army of the Potomac is now fully as strong in numbers, and better equipped, supplied and furnished, than when the campaign opened.

Several thousand reinforcements have been forwarded to the Army of the James, and it is amply supplies to-all.

During the same time, over fifty thousand men for the navy have been sent from the recruiting rendezvous, clothed, armed, equipped, and transported to their respective stations.

This statement is due to the chiefs of the Army, staff and bureaus, and their respective corps, for their energy and fidelity.

EDWIN M. STANTON, Secretary of War.

THIRTY-SIXTH DISPATCH.

WAR DEPARTMENT, WASHINGTON, }
Wednesday, May 25—9 P. M. }

Major-General Dix:

The latest date from General Grant's headquarters, received by this Department, is dated at Mount Carmel Church, 1 P. M. yesterday. The dispatch says everything is going well. Warren has four hundred prisoners. Hancock some three hundred, and Wright has picked up some. The enemy's dead and wounded left between the two armies will not fall short of a thousand. Warren's loss is not over three hundred, killed and wounded. Wright's is reported to be a trifle over. Burnside's loss is not over two hundred. Hancock's loss is the heaviest of the day. Still Hancock and Warren will reach the South Anna by nightfall.

General Butler is in a dispatch dated at headquarters in the field, at

Yorktown this morning, reports that Major-General Fitz Hugh Lee, with large mounted force, with cavalry, infantry and artillery, on steamers his post at Wilson's Wharf, south side of James River, below Fort Powhatan, surrounded by two regiments, all negro troops, Belmeder-General Wild commanding, and was handsomely repulsed. Before the attack Lee sent a flag, stating that he had force enough to take the place, demanded its surrender, and in that case the garrison should be turned over to the authorities at Richmond as prisoners of war, but if this proposition was rejected, he would not be answerable for the consequences when he took the place. General Wild replied: "Come and try it." Reinforcements were at once sent, but the fight was over. The enemy fled, leaving their dead and wounded. No other reports or military operations have been received by the Department since my telegram of 8 P. M. last evening.

EDWIN M. STANTON Secretary of War.

THIRTY-FIFTH DISPATCH.

WAR DEPARTMENT, WASHINGTON, }
May 24—10 P. M. }

To Major-General Dix:

A dispatch from General Grant, dated at 10 o'clock last night, states that the army was then crossing its South Anna at Jericho Ford, following closely Lee's army. The Fifth and Sixth corps marched by way of Jericho Ford, and the Second by Chesterfield Ford, and succeed in effecting a crossing, and getting position without much opposition. Hancock, after crossing, they were visited by Lee's army, but successfully repulsed the assault without much loss to us. We captured some prisoners. Everything was progressing satisfactorily.

Another dispatch, giving in detail the movements of our corps, and speaking of the enemy's assault on the Warren's corps, says they attacked with great vehemence. I have never heard more rapid or destructive fire of artillery and musketry. The dead lay as thick as a destructive repulse to the enemy. At the position attacked by Hancock, the fire was more concealed, and in consideration for whom the creek he had crossed and the river, and made a portion of his command cross the river, leaving the rest to hold the position from their works, and driven them across the stream. It is also said that in three assaults the enemy lost slaughter of the most very great. Our losses were inconsiderable. The notes charged against the enemy are probably overestimated.

A dispatch from General Grant, dated at 8 o'clock this morning, has also been received, stating that the army was then five miles back from the North Anna, and we are in pursuit. Sheridan who have came to the North Anna, and destroyed the railroad bridge. Deserters and dispatches from headquarters say that Warren, Burnside and Hancock are all across the North Anna, and Wright nearly. They captured a good number of prisoners last evening, but had not time to ascertain the exact figure. The enemy's loss in killed and wounded was also heavy in the river. Last evening he also took between one and two hundred prisoners. Lee's army is reported to have left Hanover Court-House, and to be concentrated on the upturned some officials' papers, amongst them an order calling out a portion of the militia. Many of the citizens of Hanover Court-House and vicinities are also ordered to the ranks.

Dispatches from this morning, at Dunkirk, state it will be delivered to-night.

No dispatches have been received to-day from General Sherman, and none are expected for several days.

Dispatches from General Butler have been received to-day, relating briefly to the operations of the respective forces. Admiral Lee, in a telegram, dated the 24, to the Secretary of the Navy, says that last night (Saturday night) the enemy attacked the Army and were handsomely repulsed.

A dispatch from Major-General Canby, dated the 18th, at the mouth of the Red River, states that General Banks' troops had crossed at Semmerport yesterday, and will reach Morganza to-day. Admiral Porter is in command. Banks was expected, and will soon be ready to resume offensive operations.

EDWIN M. STANTON, Secretary of War.

MEMORIAL OF CONTRACT SURGEONS.

THE following memorial of the acting assistant or contract Surgeons of the Army, will shortly be submitted to Congress:

To the Honorable the SENATE AND HOUSE OF REPRESENTATIVES of the UNITED STATES of AMERICA in Congress ASSEMBLED:

The undersigned, acting assistant surgeons, United States Army, respectfully ask the following amendment and, representing as we do, a majority of our profession in the service, feel sure that it will meet with due consideration and attention of your honorable bodies.

We are private physicians employed under contract by the Medical Department to perform the duties of surgeons on the transports, in the field, regiment, post and general hospitals, or "wherever our services may be required, for the sum of seventy-five (75) dollars per month," less one and one-half per cent internal revenue (except in the case of those sent into the field, who are paid $113 83 per month) and rations. We are liable to be ordered "anywhere whatever"—as mileage, rations, forage and servants' wages.

We are liable to perform all the duties required and perform all the duties of commissioned officers, according to army regulations, and are subject to strict military discipline.

We are frequently ordered away from our posts or stations, at a moment's notice, on detached service, in medical charge of troops, to distant places, and for such service receive no extra pay or compensation, but are compelled to defray our own traveling expenses, with the exception of transportation in kind which is furnished by the quartermaster. We are exposed to all the dangers, fatigues, hardships and privations of the field, and to the dreadful incidence of unhealthy climates, and the perils of the ocean, many contract surgeons having been killed, wounded and captured by the enemy, or by accident, and those who have died at their posts from sickness or been lost at sea. At the same time we are denied nearly all the honors, privileges and immunities of officers, and many others, make no right to demand a court of inquiry or trial by court martial, if charged with any breach of military law, but are amenable to be drafted into the military service of the United States. Our position is anomalous, inasmuch as we are neither citizens nor officers.

A large proportion of contract surgeons employed in our army are men of great professional ability and experience, with families dependent upon them, to have left them, and in many cases a lucrative practice, to serve their country.

At the beginning of the rebellion, the pay of a surgeon was paid in gold, $100 or $113 83 per month was perhaps a fair compensation for our services; but, owing to the present depreciation of the currency, and the consequent great increase in the cost of all the necessaries of life, it is not so now.

In view of these facts we pray that by an act of Congress our pay hereafter may be increased from twenty-five to thirty-three and one-third per cent; that we may be allowed mileage, or at least our actual travelling expenses when on detached service, and also be exempted from conscription.

ASSISTANT-GENERAL Lorenzo Thomas has returned to Washington, in good health, from his long and arduous tour of service in the Mississippi Department.

ARMY GAZETTE.

CASUALTIES AMONGST GENERAL OFFICERS.

The Secretary of War has sent to the Senate a communication in reply to its resolution, asking for information concerning general officers, since the commencement of the Rebellion. The following is the list:

SECULAR ARMY.

Lieutenant-General Winfield Scott, retired.
Brigadier-General Robert C. Wright, resigned.
Brigadier-General Wm. S. Harney, retired.
Brigadier-General J. E. Wool, retired.
Brigadier-General Robert Anderson, retired.
Brigadier-General James W. Ripley, retired.
Brigadier-General E. V. Sumner, dead.
Brigadier-General S. F. Mansfield, dead.
Brigadier-General James G. Totten, dead.
Brigadier-General Andrew J. Smith, declined an appointment.

VOLUNTEERS.

Major-General Frank P. Blair, resigned, and resignation revoked.
Major-General William F. Smith, expired by constitutional limitation, and re-appointed.
Major-General John M. Schofield, expired by constitutional limitation.
Major General Horatio G. Wright, rejected by Senate—since appointed.
Major-General Casimir M. Clay, resigned.
Major-General James A. Garfield, resigned.
Major-General Schuyler Hamilton, resigned.
Major-General Charles S. Hamilton, resigned.
Major-General Erasmus D. Keyes, resigned.
Major-General Edwin D. Morgan, resigned.
Major-General Benjamin F. Schermerhorn, resigned.
Major-General Robert C. Schenck, resigned.
Major-General Rufus Ingalls, dead.
Major-General Hiram G. Berry, dead.*
Major-General Wm. Nelson, dead.

CORRESPONDENCE AND NEWSPAPER CORRESPONDENTS.

CIRCULAR FROM MAJOR-GENERAL SHERMAN.

HEADQUARTERS, MILITARY DIVISION OF THE MISSISSIPPI, }
IN THE FIELD, ACWORTH, GA., May 19, 1864. }

I HAVEBEEN an impression to attach that the Commanding-General has prohibited the mails to correspondents with the army, a mere method of securing all officers and men that, on the contrary, he encourages them, by all his influence and power, to write to their most unreserved correspondence with their families and friends. Whatever may be the cause of delay, the regulations commanding should perfect arrangements for the safe and rapid transmit mails; and the officers and soldiers and agents of correspondents should seek the authority under which alone they can act.

What the Commanding-General does discourage is the existence of that class of men who, under the guise of agents, writers, etc., who follow an Army to pick up news for sale, speculating on a system of communication which is designed for the use of officers and men, and who are more used to looker up life and worthless officers, than to facilitate the legitimate business of correspondents, who are usually equal to their outrage, and who seem to serve the interest of the press.

W. T. SHERMAN, Major-General.

APPOINTMENTS BY THE PRESIDENT.

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

Colonel Samuel S. Carroll, of the 8th Ohio Vols., and Captain in the U. S. Army, to be Brigadier-General of Volunteers from May 12, 1864, for gallant and distinguished services in the eight days battles in the Wilderness, including the fights at Spottsylvania Court-House, Va.

NOTICE TO DELINQUENTS.

Captain J. M. Kepler, 16th C. S. Infantry, having been reported to the Headquarters of the Army for failing to report at Cincinnati, Ohio, according to the terms of his parole, by the 10th instant, is hereby dismissed from the service of the United States, unless within fifteen days from the publication of this order he shall report to the Commandant in session in Washington, D. C., of which Brigadier-General Guilford, U. S. Vols., is President, and make satisfactory defence to the charges against him.

MEDICAL DEPARTMENT.

ORDERED.

Captain J. C. Pellen, will report in person to the Surgeon in charge of Mower U. S. General Hospital, Philadelphia, Pa., for duty in the Medical Purveyor's Department, relieving Captain Richard Dillon. Captain Dillon on being relieved, will report in person to the Surgeon in charge of the Depot.

Surgeon Charles Sutherland, to duty as Medical Purveyor at Indianapolis, Ind., relieving Surgeon Wm. Hammond.

Shoemaker Johnson will report for duty to Surgeon Sutherland.

RELIEVED.

Surgeon J. R. Peabody, U. S. Volunteers, is relieved from duty in the Department of the Missouri, and will report in person, without delay, to the commanding officer of the department of Kansas for duty.

DISMISSED.

Assistant Surgeon N. S. Drake, 15th New York Cavalry.

HONORABLY DISCHARGED.

Assistant Surgeon Wm. Simpson, 20th Massachusetts Vols., on account of physical disability.

MISCELLANEOUS.

The United States Steamer Wissahickon at Point, New York Harbor, is hereby turned over to the Surgeon General for Hospital purposes.

NAVY GAZETTE.

AN ACT to appoint certain officers of the Navy.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That during the existing the present insurrection, the President, by and with the advice and consent of the Senate, be authorized to appoint such number of lieutenant-commanders and acting commanders, who shall have the rank of lieutenant-commander on board or ashore of a similar grade in the Navy.

SEC. 2. *And be it further enacted*, That the proviso in section ten, chapter one hundred and twenty-six, volume twelve, of the statutes at large, which requires the grade of line officers of the United States Navy, appointed from the merchant service, to be that of captain, be and the same is hereby repealed, and that said section shall read as follows:

SEC. 3. *And be it further enacted*, That no person shall hereafter be received, or shall hereafter receive, a temporary appointment as acting master, acting lieutenant or acting ensign in the Navy, from civil life, authorized by act of Congress of July twenty-fourth, eighteen hundred and sixty-one, who shall not be examined in all respects as in the Navy and passed in the line of promotion, from the date of said commission, upon the recommendation of the Secretary of War, he receives the thanks of Congress for highly meritorious conduct in conflict with the enemy, or for extraordinary heroism in the line of his profession, or for extraordinary heroism in the line of their profession, may be promoted to the next grade above that which he holds at the time, and may be boat qualified, upon the recommendation of their commanding officers, approved by the Secretary of the Department; upon such promotion they shall receive a gratuity of one hundred dollars, and a medal of honor, to be prepared by the Navy Department.

Approved, May 17, 1864.

AN ACT relating to appointments in the naval service and courts martial.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That hereafter all appointments in the volunteer naval service of the United States, above the rank of acting master, shall be subject to the Senate for confirmation, in the same way and manner as appointments in the regular service are now by law required to be.

SEC. 2. *And be it further enacted*, That naval courts-martial shall have power to punish any offence which by naval courts-martial from their commands without leave to be reduced to the rating of ordinary seamen.

Approved May 18, 1864.

VOLUNTEER NAVAL SERVICE.

ORDERED.

Acting Volunteer Lieutenant Henry Eaton, to the command of the *Tuscarora*.

Acting Third Assistant Engineer John Doyle, to the *Circassian*.

Acting Master Wm. Hall, to the *Arthur*.

Acting Assistant Paymaster Charles Loucks, to the *Wamsutta*.

Acting Assistant Paymaster C. H. Noyes, to the *Manhattan*.

Acting Master Thos. T. Reed, to command the *Mount Vernon*.

Acting Assistant Paymaster Daniel Bowcorth, to instruction at New York.

Acting First Assistant Engineers Samuel C. Midlam and William H. Miller, to the *Manhattan*.

Acting Assistant Paymaster Frank H. Arms, to temporary duty at the Bureau of Provisions and Clothing.

Acting Ensign Henry Kloepfel, to the *Marietta* for medical survey.

Acting Ensign Wm. H. Ogilvie, to the *Marietta* for medical survey.

Acting Volunteer Lieutenant Thomas F. Wade, to the command of the *Commodore Jones*.

Acting Master W. H. Wood, to the *Kansas*.

Acting Ensign Jas. Ogilvie, and Acting Ensign F. R. Arnold, to the *Tallapoosa*.

DEPARTMENT AND FLEET ORDERS.

THE THIRD DIVISION AND KITCHEN'S BRIGADE.

HEADQUARTERS, ARMY OF THE POTOMAC, May 20.

The Major-General commanding desires to express his satisfaction with the good conduct of Tyler's division and Kitchen's brigade of heavy artillery in the affair of yesterday evening. The gallant manner in which they advanced, the steadiness with which they held the line under fire, and checked the persistent attack of a corps of the enemy, by the use of the bayonet, entitled the commanding general in the special commendation of troops, who, henceforward, will be called the 3d Division of the 5th Corps, and the 2d Brigade and Fifth corps, at the same time engaged.

By command of Major-General MEADE.
(Signed) S. S. WILLIAMS, A. A. G.
Brigadier-General TYLER, Commanding Division.

NEW POSTS NAMED.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, }
WASHINGTON, May 15, 1864. }

General Orders No. 197.

The new posts recently established in the Department of the Northwest will be named as follows:

The post on Jones River—Fort Wadsworth.
The post on Devil's Lake—Fort Totten.
The post on the Upper Missouri—Fort Rice.
The post on the Yellowstone River—Fort Stevenson.
By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant-General.

MAJOR-GENERAL SIGEL'S FAREWELL ORDER.

HEADQUARTERS DEPARTMENT WEST VIRGINIA, }
NEAR CEDAR CREEK, VA., May 15, 1864. }

GENERAL ORDERS No. 27.—By an order from the President of the United States I am relieved from the command of this department. Major-General Hunter, U. S. Vols., is my successor. In leaving the troops upon which I first had the honor to serve, I have to give my most sincere thanks to the officers and men who have assisted me so faithfully during the last campaign. Having no other wishes or suggestions but to serve and promote the great cause which we are all bound to defend, I hope that kind success may crown the indefatigable zeal and good will of this army.

F. SIGEL, Major-General.

MAJOR-GENERAL HUNTER ASSUMES COMMAND.

HEADQUARTERS DEPARTMENT WEST VIRGINIA, }
NEAR CEDAR CREEK, VA., May 21, 1864. }

GENERAL ORDERS, No. 23.—Agreeably to the order of the President of the United States, the undersigned assumes command of the Department of West Virginia. All reports and returns will be made to headquarters of the Department, as at present directed; and all communications for the Commanding General of the Department will promptly forwarded to him in the field. In addition to the present Department staff, Lieutenant-Colonel Charles G. Halpine is announced Assistant Adjutant-General, and Major Samuel W. Stockton as Aide-de-Camp. All will please govern and be governed accordingly.

D. HUNTER, Major-Gen. Commanding.

CORRESPONDENCE AND NEWSPAPER CORRESPONDENTS.

CIRCULAR FROM MAJOR-GENERAL SHERMAN.

HEADQUARTERS, MILITARY DIVISION OF THE MISSISSIPPI, }
IN THE FIELD, ACWORTH, GA., May 19, 1864. }

I HAVE been an impression to attach that the Commanding-General has prohibited the mails to correspondents with the army, a mere method of securing all officers and men that, on the contrary, he encourages them, by all his influence and power, to write to their most unreserved correspondence with their families and friends. Whatever may be the cause of delay, the regulations commanding should perfect arrangements for the safe and rapid transmit mails; and the officers and soldiers and agents of correspondents should seek the authority under which alone they can act.

What the Commanding-General does discourage is the existence of that class of men who, under the guise of agents, writers, etc., who follow an Army to pick up news for sale, speculating on a system of communication which is designed for the use of officers and men, and who are more used to looker up life and worthless officers, than to facilitate the legitimate business of correspondents, who are usually equal to their outrage, and who seem to serve the interest of the press.

W. T. SHERMAN, Major-General.

APPOINTMENTS BY THE PRESIDENT.

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

Colonel Samuel S. Carroll, of the 8th Ohio Vols., and Captain in the U. S. Army, to be Brigadier-General of Volunteers from May 12, 1864, for gallant and distinguished services in the eight days battles in the Wilderness, including the fights at Spottsylvania Court-House, Va.

NOTICE TO DELINQUENTS.

Captain J. M. Kepler, 16th C. S. Infantry, having been reported to the Headquarters of the Army for failing to report at Cincinnati, Ohio, according to the terms of his parole, by the 10th instant, is hereby dismissed from the service of the United States, unless within fifteen days from the publication of this order he shall report to the Commandant in session in Washington, D. C., of which Brigadier-General Guilford, U. S. Vols., is President, and make satisfactory defence to the charges against him.

MEDICAL DEPARTMENT.

ORDERED.

Captain J. C. Pellen, will report in person to the Surgeon in charge of Mower U. S. General Hospital, Philadelphia, Pa., for duty in the Medical Purveyor's Department, relieving Captain Richard Dillon. Captain Dillon on being relieved, will report in person to the Surgeon in charge of the Depot.

Surgeon Charles Sutherland, to duty as Medical Purveyor at Indianapolis, Ind., relieving Surgeon Wm. Hammond.

Shoemaker Johnson will report for duty to Surgeon Sutherland.

RELIEVED.

Surgeon J. R. Peabody, U. S. Volunteers, is relieved from duty in the Department of the Missouri, and will report in person, without delay, to the commanding officer of the department of Kansas for duty.

DISMISSED.

Assistant Surgeon N. S. Drake, 15th New York Cavalry.

HONORABLY DISCHARGED.

Assistant Surgeon Wm. Simpson, 20th Massachusetts Vols., on account of physical disability.

MISCELLANEOUS.

The United States Steamer Wissahickon at Point, New York Harbor, is hereby turned over to the Surgeon General for Hospital purposes.

NAVY GAZETTE.

AN ACT to appoint certain officers of the Navy.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That during the existing the present insurrection, the President, by and with the advice and consent of the Senate, be authorized to appoint such number of lieutenant-commanders and acting commanders, who shall have the rank of lieutenant-commander on board or ashore of a similar grade in the Navy.

SEC. 2. *And be it further enacted*, That the proviso in section ten, chapter one hundred and twenty-six, volume twelve, of the statutes at large, which requires the grade of line officers of the United States Navy, appointed from the merchant service, to be that of captain, be and the same is hereby repealed, and that said section shall read as follows:

SEC. 3. *And be it further enacted*, That no person shall hereafter be received, or shall hereafter receive, a temporary appointment as acting master, acting lieutenant or acting ensign in the Navy, from civil life, authorized by act of Congress of July twenty-fourth, eighteen hundred and sixty-one, who shall not be examined in all respects as in the Navy and passed in the line of promotion, from the date of said commission, upon the recommendation of the Secretary of War, he receives the thanks of Congress for highly meritorious conduct in conflict with the enemy, or for extraordinary heroism in the line of his profession, or for extraordinary heroism in the line of their profession, may be promoted to the next grade above that which he holds at the time, and may be boat qualified, upon the recommendation of their commanding officers, approved by the Secretary of the Department; upon such promotion they shall receive a gratuity of one hundred dollars, and a medal of honor, to be prepared by the Navy Department.

Approved, May 17, 1864.

AN ACT relating to appointments in the naval service and courts martial.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That hereafter all appointments in the volunteer naval service of the United States, above the rank of acting master, shall be subject to the Senate for confirmation, in the same way and manner as appointments in the regular service are now by law required to be.

SEC. 2. *And be it further enacted*, That naval courts-martial shall have power to punish any offence which by naval courts-martial from their commands without leave to be reduced to the rating of ordinary seamen.

Approved May 18, 1864.

VOLUNTEER NAVAL SERVICE.

ORDERED.

Acting Volunteer Lieutenant Henry Eaton, to the command of the *Tuscarora*.

Acting Third Assistant Engineer John Doyle, to the *Circassian*.

Acting Master Wm. Hall, to the *Arthur*.

Acting Assistant Paymaster J. H. Mulford, 2d, to the *Mendota*.

NOTICES TO MARINERS.

FOLLOCK RIF AND CROSS RIF LIGHTVESSELS.

BOSTON, May 24, 1864.

Notice is hereby given that the repairs having been nearly completed on the Follock Rip Lightvessel, she will be replaced upon her station in a few days, and the Relief Lightvessel removed to Cross Rip Station, which position she will occupy until further notice.

The Relief is accompanied by a red can buoy, with painted head, and painted red, with "Relief" in white letters, on each side.

She will show every night from sunset to sunrise one fixed light of the natural color.

By order of the Lighthouse Board,

JOHN MASERON, Commodore, U. S. N.,
Lighthouse Inspector, 3d Dist.

FIVE FATHOM BANK LIGHTVESSEL OFF CAPE MAY.

Lighthouse Service, Fourth District,
Philadelphia, May 18, 1864.

The Five Fathom Bank Lightvessel was returned to her station off Cape May, on the 16th inst.

By order of the Lighthouse Board,

JOHN RUDD, Lighthouse Inspector.

LIGHTVESSEL AT WILLOUGHBY SPIT, CHESAPEAKE BAY.

Official notice is given that the Lightvessel exhibiting two lights at Willoughby Spit, Chesapeake Bay, has been removed for repairs, and one with a single light is placed there temporarily. So soon as the necessary repairs are made, she will be replaced, the notice of which will be given.

NORTH SEA: COAST OF BELGIUM—LIGHTVESSEL NEAR SOUTHWEST END OF WEST HINDER BANK.

Hydrographic Office, Admiralty,
London, April 16, 1864.

The Belgian government has given notice that since the 4th day of April, 1864, a Lightvessel would be placed near the SW end of the West Hinder Bank, in the North Sea.

The light is on the revolving principle, showing successively two bright lights and one red light, at intervals of half a minute. It is elevated 50 feet above the level of the sea, and should be seen in clear weather from a distance of 12 miles.

The vessel, having a skeleton framework in the form of a pyramid on the starboard, is painted black, with red streaks, and "West Hinder" in large white letters on her sides, and has in 12 fathoms low water, sighting, half a point, open with the land from the S end of the bank.

Newport Lighthouse bears S by E¼E, distant 18 miles.
Dunkirk Lighthouse, S½W by W, 18 miles.
Red Buoy on the S end of the Middle Sand Spit Bank SE¼E, 5¾ miles.
South Foreland Lighthouse W southerly, 42½ miles.
Gallopper Sand Buoy, N by E northerly, 28¾ miles.
North Hinder Lightvessel NE½E northerly, 13¼ miles.
Outest Lightvessel of Scroby, 26¾ miles.
The Outer Buoy at the Entrance to the Wielingen Channel E by S¼S bearing.
The vessel is in
Latitude.....51 22 39 N.
Longitude.....2 26 36 E of Greenwich.

The Elbow Buoy, which is moored to the NE end of the Lightvessel still remains.

All bearings are magnetic. Variation 19 30 W in 1864.

By command of their Lordships

BEDFORD PIM, Captain, R. N.,
Hydrographer.

BOUTS OFF TARMOUTH.

TRINITY HOUSE, LONDON, April 26, 1864.

Notice is hereby given that consequently upon alterations in the Cockler and Scroby Shoals, the following buoys have to move the following buoys:—

CASTOR SHOAL BUOY

This Buoy has been moved from its last known length NE¾N of its former position, and now lies in 6 fathoms low water spring tides, with the following marks and bearings:—

St. Peter's Church in line with the Roman Catholic Chapel, SW ¾ S, sighting.

The Water Works Column at Caistor in line with Caistor East, NE¾W, W.

Inner Barber Buoy, NNE¼E, distant 8-10ths mile.

Middle Barber Buoy, ENE easterly, distant 1 9-10th of a mile.

West Scroby Buoy, SSE¼E, distant 9-10ths of a mile.

The Buoy has been removed about 3 cables length W by N from its former position, and now lies in 4 fathoms low water spring tides, with the following marks and compass bearing:—

St. Peter's Church in line with the Old Chapel Hillet at Yarmouth, WN¾N.

The Lightvessel Hill at Gorlestone on with the Pilot House on the Pierhead, WN.

The Wind Mill, NW¾N.

Scroby Spit Buoy, S.

St. Nicholas Lightvessel, W by S.

By order

P. H. HESTHON, Secretary.

VARIOUS NAVAL MATTERS.

The Naval Depot formerly at Cuba, has been removed to Mound City.

Steam-wheel steamer *Pontoosuc*, 10, went into commission at Portland last week, and was hauled into the stream.

The machinery of iron-clad *Dunderberg* necessary to be put on board the vessel before she is launched, is nearly completed and will be put on board next week.

The iron-clad *Oneota* was launched from the Niles Works, Cincinnati, on Saturday, 21st inst., at three o'clock P. M. The launch was in every regard successful.

The Department has received information of the capture, on the coast of Texas, of the English schooner *Isaac* and the *Penang*, by the U. S. steamer *Conneo*. The captures were made in the middle of last month.

The U. S. steamer *Iroquois*, which has been thoroughly repaired at the Philadelphia Navy Yard, hit there last week Friday for New Mahon, where she will receive her complement of powder, and sailed on Saturday for a foreign station.

The following named vessels were at Key West on the 9th inst.:—*Penobscot*, *Sabine*, *Sachem*, *Tioga*, *Sara* and *Stromboli*, *Clyde* and *Chicora*. The *Huntsville* sailed on the 7th inst, for Havana, for repair. The *Stars and Stripes* would follow soon.

The New York papers say that the examination of the capstan recently, off Mobile Bar, of the schooner Judson, with forty bales of cotton on board. She had run out of Mobile during the previous night. The steamer was not discovered by the blockaders.

The new steam screwne cutter Wyanda is now lying at the Washington Navy Yard. She is the first in commission of six of the same class ordered by the Secretary of the Treasury last year. She was built by Messrs. John P. Foley & Bro., of Baltimore, is three hundred and sixty tons, carries six guns, and is a fine specimen of naval architecture.

By order of Rear-Admiral Goldsborough, the following uniform has been adopted in the Department of the South for the Masters of Armed Transports: Coat-blue blue cloth or flannel, with Artillery lapel buttons. Vest-blue flannel, single breasted, with arranged with single knot. Sentor Masters, two stripes. Shoulder straps, similar to that of Ensign in the Navy, less longitudinal.

The services of Acting Ensign Edward being needed by the Navy Department, he has been relieved from duty at the Headquarters of the Department of the South. The following appointments on the Staff of Department Commander, are announced: John H. Mare, Esq., Chief Marine Engineer; Acting Ensign Cecil C. S. N., S., A., D. C., and Sup. of Armed Transports.

The iron-clad *Passaic* was towed down to the vicinity of the Brooklyn Navy Yard. The *Accuinog*, foot of Ninth street; the *Kearsarge*, at the Fulton Iron Works; the *Nyack* and *Shamrock*, at the Atlantic Dock; the *Tallahoma*, at Twenty-third street; the *Vanderbilt*, near the foot of Jackson street; the *Wisconsin* and *Perrin*, at Delamy street.

Secretary Welles has issued an order, dissolving from the service Acting Master Edward Jones and Acting Assistant-Surgeon W. M. Haslin from the navy for maltreatment of a sailor by the former, and an attempt to screen the offender by the latter. The Secretary's order concludes as follows: "Persons enlisted in the naval service may be assured that their complaints of maltreatment, properly made and forwarded, will receive due attention from the department, and the laws enacted for their protection will be strictly, and in such cases as the circumstances may require, enforced."

Work at the Philadelphia Navy Yard is progressing rapidly. The large steamer *Nahcmog*, now building at the upper slip house, has received her planking, and workmen are now engaged in lofting the deck. The monitor *Tonawanda* is attached to one of the wharves. Workmen are engaged on the interior. The deck will soon be planked. The steamer *Pontoosuc*, formerly the *Susquehanna*, after docking will be ready for active service and sail by the end of this month. The *Juniata* is lying at Kaighn's Point receiving her machinery. The monitor which is to be named after the ship however, Kaighn's Point will be ready for launching in a few weeks.

The U. S. supply steamer *Massachusetts*, Lieutenant West commanding, arrived off the Philadelphia navy yard last week Saturday, from the South Atlantic blockading squadron. The *Massachusetts* brought up 500 passengers, comprising officers, invalids, and discharged men. She was accompanied by two monitors, *Passaic* and some dark-plates, one torpedo from St. Johns, Fla., broken shot from the decks of vessels, and various other curiosities, for exhibition at the Sanitary Fair. The smoke-stacks have been perforated in every part by the rebels.

The following vessels are now lying at the Brooklyn Navy Yard undergoing repairs, or in commission and awaiting orders:—The *Susquehanna*, *Merrimack*, Acting Master Rodgers; *Chenango*, Acting Master Thomas Stevens; *Owasco*, Acting Master Hamilton; *Sassacus*, Lieutenant, R. B. Cuyler, Commanding; *Iowa*, Acting Master Dennison, Lieutenant Rogers commanding; *Sassaraja*, Acting Master Wm. Rowe; *Sassacus*, Acting Master Quick; *Shawsheen*, *Mount*, *Chicopee*, Commander Harrell; *Benshee*, *Panamet*, *Kickapoo*, Acting Master Edward the *Jamei*; *Pensacola*, *Guinea*, Commander Guest, recently in from blockade off Wilmington; *Augusta*, Captain Engle, *Dacotah*, and the supply steamers *Newborn* and *Union*. The monitor *Manhattan* is on dry-dock and being painted. The iron-clad *Wyandotte*, with raising apparatus attached, is lying at the Navy Yard wharf. Her wheels, preparatory to receiving her new boilers and armament. The *Iroquois*, which has been undergoing repairs at the Philadelphia yard, has received her machinery, and will be ready for sea in a few days. The steamer schooner *John Griffin* arrived on the 25th from duty in the East Gulf Squadron, and sailed again on the 26th. The *Sea Foam*, arrived on the 25th from the Gulf on the 24th, and the steamer schooner *Henry Janes*, Acting Ensign L. B. King commanding, from Havana, arrived on the 24th, and sailed on the 26th. The old frigate *Savannah*, now a school ship for boys, has been hauled out into the stream, and is now at her Summer moorings. A detachment of boys from the *North Carolina* will be sent to Portsmouth to man the *Colorado*.

THE LATE MAJOR-GENERAL TOTTEN.

TREASURY DEPARTMENT, OFFICE OF THE
LIGHTHOUSE BOARD, WASHINGTON,
April 25, 1864.

At a special meeting of the Lighthouse Board, held on the 20th inst., the following resolutions were adopted:

Resolved, That the members of the Lighthouse Board feel most deeply the loss which they and the public have sustained under their charge, in the death of Brevet Major-General JOSEPH GILBERT TOTTEN, who for many years was the most useful and efficient officer of the Board from its first appointment in pursuance of law in 1852, and who, previous to that time, had been in charge of Engineering duties on the Lighthouse Establishment of the United States, through all the various changes which led to the establishment and of the executive department.

Resolved, That the high scientific attainments, the admirable administrative capacity, the professional zeal, energy, and industry, and attention to every minute detail of the system, together with the kind and courteous manner of General TOTTEN during his long and active career, have left a way to make his mind eminently a leading one of the Board; while the members of the Lighthouse Board individually have always looked to him one of the most charming of associates in executing work to which he was devoted with unbounded zeal.

Resolved, That in the discharge of the duties of the first Board, the members have always found that the utmost privacy and forethought in the subject of construction, theoretical and practical, and the most thorough knowledge of Engineering, the experience and executive ability of General TOTTEN were of the highest value to the Board, and that general application to every subject of importance to the Lighthouse system, and that in the large quantity of work which has been done by the Board, General TOTTEN was as well as technical, and to his high sense of justice, directing great moral power, the Board always looked with confidence and respect, as one to be relied upon for guidance in all difficult questions of administration.

Resolved, That this affectionate quotation of General TOTTEN's heart as endeared him to the members of the Board, now separated by death themselves in regard to his death they are fully prepared to share to the fullest extent of their feelings, to which they add their sincere condolence for the loss of one not to be replaced, but to be ever remembered by all who knew his worth and virtues.

Resolved, That a copy of these resolutions be transmitted to the family of General TOTTEN, and to the Hon. Secretary of War and Hon. Secretary of the Treasury.

Resolved further, That these proceedings be published.

By order of the Board:
A. D. BACHE, Supt. U. S. Coast Survey.
ANDREW A. HUMPHREYS, Brevet Brig. Gen. U. S. Army.
HARMAN SAMPS, Colonel of Engineers.
C. H. DAVIS, U. S. N.

TREASURY DEPARTMENT, May 12, 1864.

SIR:—I regret that I did not receive the resolutions of the Lighthouse Board upon the decease of General TOTTEN, until to-day

Without the same opportunities of forming a correct judgement of the merits of the lamented General, my own estimate of them corresponded with that of the members of the Board, and my sympathies with them in sorrow for the loss which the Department and the country has sustained, are profound and sincere.

Yours, very truly,

S. P. CHASE, Secretary of the Treasury.

Admiral SMITH, Chairman Lighthouse Board.

LIEUTENANT-Colonel Chas. G. Halpine, Assistant-Adjutant-General on the staff of Major-General Dix, has been ordered to report for duty to Major-General Butler.

OBITUARY.

Official intelligence has been received, through the Surgeon-Generalship Office, under date of 20th May, of the decease of Assistant Surgeon JOHN T. HALL, U. S. Army, April twenty-fifth years, at Helena, Ark., after a "few hours' illness." It is but just to the memory of the distinguished young officer, a grandson of Major WILLIAM REILY, of the Army of the Revolution, whose heroic and patriotic zeal for fully historical, to state that he was brave, learned, and noble, in the true celebrities in the cause of the Union. Appalled by no danger on the field of battle, he was stricken down by disease and exposure faithfully in the country and to the Army. He was present at all the seven days battle around Richmond, and complimented by General HANCOCK in general orders of Whenever there was a necessity to convey an order in the heat of the engagement. He was also at the battles of Fredericksburg, Chancellorsburgh, &c., in all of which he was attached to the regular artillery, commanded by the brave and distinguished Captain (now General) ARNES. In camp disease and exposure to the malarious air of Virginia widowed mother and sister, and children will be left friendless to the cold charities of the country will long be cherished and his virtues remembered.

J. H. R.

BUSINESS NOTICE.

MORTON'S GOLD PENS are sold at the same price as before the commencement of the war; this is entirely owing to the Manufacturer's improvements in machinery. The present Reed Pattern, with new Cash-in-Advance System; for, until he commences advertising, his business was done on Credit and strictly with the Trade.

The Morton Gold Pens are the only ones sold at old prices, as the manufacturer of all other pens advance 50 Premium on the Gold, Government Tax, &c.; but Morton has in no case changed his prices, Wholesale or Retail.

Of the great numbers sent by mail to all parts of the world during the past five years, not one in a thousand has failed to give entire satisfaction, thus showing that the Morton Gold Pen can be obtained by any one, in every part of the world, at the same price, gaining only receipt.

Reader, you can have an enduring, strong, ready, and reliable Gold Pen, made and shaped to your hand and style of writing, which will do your writing vastly cheaper than Steel Pens; and as the process almost universal, Gold Premium is not charged in your purchase a Morton Gold Pen cheaper, in proportion to the later great upon it and material used, than any other Gold Pen in the World. If you want one, send the "Pen is Mightier than the Sword," in another column.

ADVERTISEMENTS.

Advertisements of a character suited to the columns of the JOURNAL will be inserted, to a limited extent, at twenty cents a line each insertion. Advertisers are requested to make their favors as short as possible.

NATIONAL BANK OF THE COMMONWEALTH,

CITY OF NEW YORK,

For $2 25 a No. 1 Pen, 1st quality; or a No. 2 Pen, 1st quality;

For $1 00 a No. 2 Pen, 1st quality; or a No. 3 Pen, 1st quality; or a No. 4 Pen, 2d quality;

For $1 25 a No. 3 Pen, 1st quality; or a No. 4 Pen, 1st quality; or a No. 5 Pen, 2d quality;

For $1 50 a No. 4 Pen, 1st quality; or a No. 5 Pen, 1st quality; or a No. 6 Pen, 2d quality;

For $2 25 a No. 6 Pen, 1st quality;

For $2 50 a No. 7 Pen, 1st quality; or a No. 8 Pen, 1st quality;

For $3 00 a No. 8 Pen, 1st quality; or a No. 9 Pen, 1st quality;

For $4 00 a No. 9 Pen, 1st quality; or a No. 10 Pen, 1st quality.

FOR SOLID GOLD PENS, IN SILVER EXTENSION CASES, WITH PENCILS.

For $1 00 a No. 1 Pen, 1st quality; or a No 2 Pen, 2d quality;

For $1 75 a No. 2 Pen, 1st quality; or a No. 3 Pen, 1st quality; or a No. 4 Pen, 2d quality;

For $2 00 a No. 3 Pen, 1st quality; or a No. 4 Pen, 1st quality; or a No. 5 Pen, 2d quality;

For $2 50 a No. 4 Pen, 1st quality; or a No. 5 Pen, 1st quality; or a No. 6 Pen, 2d quality;

For $3 00 a No. 6 Pen, 1st quality;

For $3 50 a No. 7 Pen, 1st quality; or a No. 8 Pen, 1st quality;

For $4 00 a No. 8 Pen, 1st quality; or a No. 9 Pen, 1st quality;

For $5 00 a No. 9 Pen, 1st quality; or a No. 10 Pen, 1st quality.

GOLD PENS, ALL FIRST QUALITY, IN SILVER-MOUNTED DESK-HOLDERS.

For $2 50, No. 1 Pen; or $3 00, No. 2 Pen; or $2 75 a No. 6 Pen; for $3 50 a No. 7 Pen.

For $4 00 a No. 8 Pen; for $5 00 a No. 9 Pen; and for $6 a No. 10 Pen.

The "Quality" are pointed with the very best Iridosmin Points, carefully selected, and none of the inferior kind used. The largest pens are hard and flexible and the closest scrutiny can detect.

The "10 quality" of Gold Pens and Pens made by him previous to the year 1860.

The "Gold and Silver Pen" shall open in respect to Dumbility, Elasticity and Good Writing Qualities the only Pens of Government, and by no Gold Pen ever close.

Attached to the Cheap Gold Pens, he begs leave to say that, previous to each Pen there are made 50 Gold Pens, and that no cause but there are made 50 Gold Pens, and that no cause but there are made 50 Gold Pens, and that no cause but

CHICKERING & SONS,

MANUFACTURERS

OF

GRAND, SQUARE, AND UPRIGHT

PIANO-FORTES,

Warerooms, 652 Broadway, New York.

The superiority of these Instruments is amply demonstrated by the following testimonials of the first musical artists of the day, who claim for them excellence of tone and workmanship hitherto unattained by any other makers. Mr. Gottschalk's eminent use of Chickering Pianos has severely tested their musical qualities, and resulted in establishing the justice of his very flattering estimate of which they are entitled.

Messrs. C. & Sons have been awarded 10 FIRST PRIZES, over all competitors, for the superiority of their manufacture, their eminent claims upon the consideration of great power, brilliancy and purity of tone, and singing quality.

BOUNTY, PRIZE MONEY, BACK PAY, &c.—Soldiers of all kinds, Back Pay and Bounty enlarged by recent acts of Congress, and full instructions sent to all parts of the country. Claims made payable at any Bank. Address

ALLEN, VAN BUREN & LOCKEY,

343 Broadway, opposite the Park, New York.

NEW MUSIC.—"THE DYING DRUMMER," one of the sweetest songs ever written.

Chorus—Have you come to see your darling
Do speak but a word
For from home so sad and lonely,
I have you count your boy to mind!

"The Band Never Struck Me, Mother," a very fine and touching song, describing a young hero's last words to his mother through the battle. "The Band never struck me, mother."

Both songs are from the pen of the popular composer, Mr. Rudolphsen, and are perfect gems of music. Published by HORACE WATERS, Publisher, No. 481 Broadway, New York.

METALLIC COLLARS.

METALLIC COLLARS.

METALLIC COLLARS.

The only Collars made in metal furnishing a substitute for those now manufactured by the American Linseed Metallic Collar Company, which are in extensive use in the army, navy, hospitals, penitentiary, and asylums of British, noble, and countless others.

Humanity cleansed with a cloth and water, they require no indispensable necessity to the traveller and soldier, and are unsurpassed for adapting the hygienic necessary and naval gentlemen. Orders from the trade solicited.

Metallic Collar sent by mail, prepaid, upon receipt of the measure as a "Collar," or "Cuff," or "Collar" or surcuffy-five cents for a "Cuffer," to

94 Pine street, New York.

BALTIMORE AND OHIO RAILROAD

RE-OPENED!

This great National thoroughfare is again open for FREIGHT AND PASSAGE. The cars and steamboats destroyed are being replaced by new running stock, with all recent improvements; and as the bridges and track are again in substantial condition, the well-earned reputation of this Road for SPEED, SECURITY and COMFORT, will be more than sustained under the reorganization of the business. In addition to the unequaled attractions of natural scenery heretofore conceded to this route, the following notables upon the Border have associated numerous points on the Road, between the Ohio River and Harper's Ferry, with pastoral but instructive interest.

CONNECTIONS

At the Ohio River, with Cleveland and Pittsburgh, Central Ohio, and Ohio and Mississippi Railroads, and through them with the whole Railway System of the Northwest. Central Ohio Railroad, with the Washington Junction, with the Washington Branch and Washington City and Point Lookout Railroad. Baltimore work four daily trains for Philadelphia and New York.

TWO DAILY LINES of Steamers run through Tickets to Baltimore or the Northern Cities, giving the privilege of visiting WASHINGTON CITY en route.

This is the ONLY ROUTE by which passengers can procure through tickets and through checks to WASHINGTON CITY.

PROPOSALS FOR ANCHORS AND RIDGES.

NAVY DEPARTMENT,
BUREAU OF EQUIPMENT AND RECRUITING,
WASHINGTON, May 17, 1864.

The Bureau of Equipment and Recruiting will until the 14th of June, 1864, at 10 o'clock A.M., receive proposals for the delivery at the Navy Yard Gosport, of each NINE Yards as may be designated, the following described anchors and ridges:

25 of	2,000 pounds.
10 of	1,800 pounds.
20 of	1,600 pounds.
70 of	1,400 pounds.
70 of	1,200 pounds.
60 of	1,000 pounds.
60 of	900 pounds.
60 of	800 pounds.
60 of	700 pounds.
60 of	600 pounds.
60 of	500 pounds.
60 of	400 pounds.
60 of	300 pounds.
60 of	200 pounds.

The above weight is exclusive of the shank, which will be 3 inches square, and they are to be made of the best scrap iron, of the size, dimensions, and finish of models now on hand for the navy service, and to be subject to such inspection as the Bureau may direct.

Each bidder will be required to state the number of the 1,936 to 500 pounds inclusive, must be delivered in one hundred days from the date of the notification of the award of the contract, and the remainder in one hundred and sixty days from the same date.

The conditions of the contract will be similar to those used in the Navy.

The bids must be accompanied by the guaranty required by law, that if awarded a contract will enter into the same.

No proposals must be considered, "Proposals for Anchors," and may be delivered at the office of the Bureau of Equipment and Recruiting, addressed to the Chief of the Bureau of Equipment and Recruiting, Washington, D. C.

Dealers in Government and State Securities, Quicksecurities and Gold, Bought and Sold, and Certificates of Indebtedness.

Orders for the purchase and sale of Stocks and Loans promptly executed.

TO PURCHASERS OF RIFLES.

In consequence of the numerous applications which I have received since the publication of my "Hints to Riflemen," I am induced to offer my services to the public as an Agent for the purchase of rifles of every description. Having no personal interest in any particular arm, and having made such arrangements with the principal manufacturers and dealers that I can buy for purchasers with ease at any pattern that is in the market, I will select for any one who leaves the matter with me, with a promise to go of my searching and prove the prospects of such arm as will enable me to certify to its merits.

It is proper to add that the moderate annual charge for rifles renders it impossible to procure immediate attention to the orders of those who are impatient. I will enable me to do so at the earliest possible date, and communications will be served in the order of their application. Address H. W. S. CLEVELAND, Hyde Park, Mass.

MILITARY & NAVAL AGENCY.

J. LOEWENTHAL & CO.,

267 Pennsylvania-av.,

WASHINGTON, D. C.,

Authorized Agents for procuring BOUNTY MONEY, BACK PAY, PENSIONS, and for prosecuting all claims on all kinds of claims against the Government.

CORRESPONDENCE SOLICITED FROM AGENTS THROUGHOUT THE UNION WANTED.

STARR ARMS COMPANY,

THE CAMPAIGN IN VIRGINIA.

MORE correct, as well as more particular, accounts of the bold and brilliant movement of the Union Army from the environs of Spotsylvania to the banks of the North Anna, have come to us since our former description. But that march is already amongst the achievements of the past; and, in the pressure of events still more pregnant, there is little time for pausing to elaborate the details of the retreat and the pursuit. The pathetic taverns, insignificant depôts and villages, and, the obscure and ill-conditioned roads between the two points, after furnishing a seven days' sojourn, have relapsed into oblivion.

To briefly review, about midnight of Friday and Saturday, May 20th and 21st, the advance of HANCOCK's corps, which had on Thursday moved across to our left for that purpose, began quietly and cautiously to steal out from the old battle-ground towards Guinea's. Although this movement is sometimes stated as a complete surprise to the enemy, it seems evident that he had for a day or two been anxiously awaiting it. The Thursday attack of EWELL's, which may, perhaps, be regarded as comprising a double purpose,—a sweep upon our communications and a flank reconnoissance in force,—had sufficiently demonstrated to him the withdrawal of HANCOCK for some purpose from right to left. Very quickly after the advance division of the latter had broken camp on Friday night, the rattle of drums was distinctly audible, showing that, even in the dead of night, the vigilant and insidious enemy was determined to lose no time in securing for himself the right of way to Richmond. His advance corps was specially followed by another. But, having not yet complete faith in General GRANT's sincerity, the enemy paused awhile with his Third corps, and, about 5 o'clock of Saturday, sallied out of his entrenchments to strike at our Sixth corps, still holding a portion of the old battle-field. The attack, however, was ill-managed and ineffective, and, possibly, was not designed for a serious effort, though such an one would seem to have been advisable. Withdrawing, he pushed his remaining corps after its predecessors, who were already far along on the road southward.

Some particulars of this retreat and chase have already been given. In brief, although our forces moved with commendable rapidity, the enemy, starting at the same time, and having a shorter road to the desired point, was able to get his army thither and into complete position before our two advance corps could come up. In the meantime, he had kept allying body at work to harass our advance and flanks, though nothing was done sufficiently vigorous to impede the pursuit. EWELL and LONGSTREET's corps passed over the Telegraph road, A. P. HILL's over the Negrofoot road, further to the west. Our own troops struck out first to the southeast, leaving behind them successively Massaponax Church, Newport, Guinea's and Bowling Green; then southwesterly to Milford and Downer's Bridges, and so on to the North Anna, a part of the force continuing on the Stage road and the rest crossing over to the Telegraph road. Our advance cavalry found that EWELL and LONGSTREET had preceded them, and our men, to their great astonishment, heard in some places, that they had been "expected the day "before."

CROSSING THE NORTH ANNA.

Passing the description of the march with its incidents and skirmishes already recorded, the whole Army on Monday evening found itself along the hither bank of the North Anna. In the region where our forces crossed, *i. e.*, just above Sexton's Junction, there are three fords, Island, Jericho, and Chesterfield or Taylor's bridge fords, the former the farthest to the northwest. The two latter our forces took. Taylor's Bridge is about a mile above the point where the Richmond, Fredericksburgh and Potomac Railroad crosses the North Anna. Jericho Ford is about four miles farther up. Our two advance corps, the Second and Fifth, reached the fords about 2 P. M. of Monday, the Second arriving at Taylor's Bridge and the Fifth at Jericho Ford. About a hundred rods in front of the former point, is Long Creek, a diminutive stream, parallel with the North Anna and forming junction with the latter below the railroad crossing. Their configuration gives the interlying land, which is easily defensible, almost an insular character. The bridge across the North Anna was commanded at its entrance by a well built redan, whose extremities were covered by the river, and its flanks swept by artillery in field-works on the opposite bank, as well as by infantry in rifle-pits. The island formed a broad, open space, intervening between the redan and our forces drawn up in front, and making the storming of the works a matter of no little enterprise and peril. About 6 o'clock, the Second corps prepared to assault. BIRNEY's Third division was in the advance, supported by BARLOW's First and GIBBON's Second, TYLER being in reserve. BIRNEY's division sprang gallantry to their task, and, in the most brilliant and rapid manner carried the works with the bayonet, pressing on through a galling fire from artillery and rifles on the opposite bank, which swept the flanks of the salient, leaping the ditch, and climbing up the parapet. A part of Colonel BLAISDELL's Excelsior Brigade with those of EGAN and PIERCE first touched the redan. The bridge-head was immediately held, and a part of the Second corps thrown across the river, menacing the retreating enemy, which consisted of MCLAW's division of LONGSTREET's corps. Thus the bridge was won. But so hostile was the disposition of the enemy, that, contented with the advantage already gained, no effort was made by General HANCOCK to throw his whole corps over the North Anna that night. Meanwhile, General WARREN's Fifth corps had already crossed the river several hours before, at Jericho Ford, wading it waist deep, without opposition. The enemy, always cautious now of their right flank, had made few preparations so far, on their left. The stream, however, was quite defensible at this point, the current being rapid, though shallow, and the banks bold, rugged, and precipitous. The roads down to the river were tortuous and difficult. Pontoon bridges were thrown across, after the fording by the infantry, and, when the enemy's skirmishers had been driven off, preparations were made to entrench. Meanwhile, CUTTER's division crossed on the pontoon bridge, and joined GRIFFIN's and CRAWFORD's, all ready on the other side. About 5 o'clock, the enemy, who had been hurrying forces from points lower down on the river, attacked GRIFFIN's division with extraordinary fury, pouring in fierce volleys of musketry, and adding a hot cannonade from several batteries. The Second brigade, SWEITZER's, which was still in advance, was heavily pressed, but behaved with most conspicuous and admirable gallantry. Meanwhile, a flanking brigade of the enemy nearly turned the right of GRIFFIN's line. They were met, however, by BARTLETT's brigade, and, after a severe encounter, thoroughly repulsed. Both SWEITZER's and BARTLETT's brigades behaved very handsomely. The Rebels then withdrew in haste, and, though afterwards, during the night, they once more gained possession of a part of the battle-field by a spirited attack, and carried off their dead and wounded, no further attempt was made to dislodge us from possession of the river. The enemy consisted chiefly of WILCOX's division of A. P. HILL's corps, supported afterwards by other troops, including some regiments from BRECKINRIDGE's command. Of the unusual ferociousness of the Rebel attack was made in our last number. BIRNEY's division of the Second corps and GRIFFIN's of the Fifth corps had the chief honor of the gallant achievements of the day. The former received the hearty praise of their corps commander, and to the Fifth corps a letter of thanks and congratulation was promptly sent by General MEADE. Our losses at both points amounted to about a thousand men. The enemy's loss was not probably so great in killed and wounded, but we are reported to have taken during the day and the next morning several hundred prisoners. The crossing of the North Anna may therefore be regarded as surprisingly successful. The character of the river and its banks rendered operations extremely hazardous, and we could not be without anxiety as to its results. But the very dash and daring which carried the two advance corps against the enemy before the rest of the Army came up, prevented him from reaping the results of a delay on the bank. And, having once maintained their perilous ground, their permanent foothold was secured. Later in the evening, BURNSIDE and WRIGHT arrived, and occupied the northerly bank of the river, filling up the gap between the Fifth and Second corps.

The greater part of the Fifth corps remained all night on the further bank of the river, and, on his part, HANCOCK held Taylor's Bridge securely, though without crossing a great part of his force. During the night, the Rebels made an unsuccessful attack on the Fifth corps, as has been stated, but were forced to retire. About eleven o'clock, they made a sortie from their works south of Taylor's Bridge and endeavored to retake the bridge, but were quickly driven back. An hour later, they attacked more vigorously, and for a while drove back our forces, and began to fire the bridge. But a speedy rally again dispersed them, and left us in undisputed possession. One day, therefore, may be said to have given us the control of the river, about the magnitude of whose defences a year's speculation has been expended. Fiercely as our passage was resented, and severely as the battle raged, according to official dispatches, it seems a little surprising, in view of the natural defences of the region, and the jaded condition of our men, who rushed into the thick of deadly battle after wearisome marching under an oppressive sun, that no more elaborate or obstinate defence was made by the enemy, provided he did indeed rely on that river as one of his strong lines.

SOUTH OF THE NORTH ANNA.

Early on Tuesday, the 24th, General MEADE pre-

pared to place the whole Army on the south side of the North Anna. Warren's corps was already across. Wright's Sixth corps proceeded to follow at once, and, when the crossing was effected, drew up in position in the rear of Warren, supporting him and covering the ford; a portion of it afterwards operated in the front. Warren then moved out towards the railroad, and, advancing southerly, skirmished towards Little River, engaging the enemy. Having at length reached the Virginia Central Railroad, which is only about two miles distant from Jericho Ford, and there follows the general direction of the North Anna, he held it and began to destroy it, in the region of Noell's Farm, southwest of the ford. Continual reconnoissance and skirmishings occurred, to ascertain the position and strength of the enemy.

Meanwhile, the Second corps, at seven in the morning, essayed a crossing at Chesterfield or Taylor's Bridge. This, however, was a matter of some difficulty, as the works commanding the further end of the bridge were strong and still filled with the enemy. The portion of the southerly bank, also, which lies between Jericho Ford and Chesterfield Bridge, was still held by the enemy, and any attempt to cross from the other bank exposed the right flank of the crossing party. The left division of the Fifth corps, however, was eventually extended along the bank, and, while the enemy was occupied with them, soon after noon Birney's division of the Second corps quickly crossed, swept the Rebels from their works, and held not only the bridge but its approaches. The remainder of the corps followed, and the object was accomplished. An advance of half a mile resulted in pushing back the enemy's skirmishers after considerable firing, but our subsequent progress was checked by his main force, which was found to be well posted this side Little River.

Between the two fords, as has been said, the banks are precipitous, and the current of the river swift. The southern bank is especially steep, and fringed with woods and undergrowth. We had, as yet, only partial possession of this locality. About 2 o'clock in the afternoon of Tuesday, Crittenden's first division of the Ninth corps started on the road leading about half a mile above Taylor's Bridge, at Ox Ford. Ledlie's first brigade held the advance, with skirmishers deployed, and steadily advanced, driving the enemy through the woods to an open space. Here they met a raking fire from batteries and riflemen posted in commanding positions in front, and were in turn driven back to the river with a reported loss of 450 men. With better fortune Potter's Second division crossed the river, meeting no important opposition. Wilcox's Third division was retained on the northerly bank. The enemy continued to dispute the ground in the region of Ox Ford. On the left, Hancock extended his line to the railroad bridge, a trestle structure 400 feet long, spanning the North Anna. But the enemy checked him here, and, in the night, succeeded in destroying the bridge by fire. Our losses during the day were rather less than a thousand men; that of the Rebels about the same, as our men had the advantage in the number of prisoners.

On Wednesday morning, the 25th, all the troops were in good position on the south side of the North Anna. Preparations were at once made to communicate with Port Royal, on the Rappahannock, as a new base, to which point trains of wounded were sent. Our position being established, there was now opportunity to see how decided had been the success. Draw a straight line from Spottsylvania Court-House to Richmond, and it will exactly cut the region where our troops forded and pontooned the North Anna, and where the enemy was found retreating. So straight to Richmond did both pursuer and pursued take their course, and so little superfluous territory had been marched over. Extend the line northwesterly, and it will touch the camping-ground which the advance corps of General Meade's Army occupied, the night after the passage of the Rapidan.

On Wednesday noon, headquarters were at Jericho Mills. The line, resting on the south bank of the North Anna, ran as follows, from right to left: Wright's Sixth corps, Warren's Fifth, Burnside's Ninth, Hancock's Second. Wright's corps was held rather in the rear, covering Jericho Ford. Hancock's extreme left touched on the railroad, and was but very little advanced from the river. Between our right and left the enemy was found in strong force opposite our centre, with his left a little thrown back. Our own line extended about four miles. The reconnoissances of the day showed that the enemy's line lay northwest of Sexton's Junction, in the general form of a V. The apex, or his centre, stretched towards the North Anna, his right wing resting on the formidable marsh known as Bull Swamp, through which the creek of that name empties into the North Anna, and extending across the Fredericksburgh railroad, protecting it and covering the junction. His left wing ran along Little River, crossing the Virginia Central, and protecting it also at Sexton's Junction. The salient, an obtuse angle, was pushed out towards Ox Ford, confronting Burnside. Hancock's corps lay pretty nearly parallel with the enemy's right. This position, naturally strong, appeared to be fortified with extensive and elaborate entrenchments, to which the enemy was busily adding others. The whole position looked formidable, and the enemy did not yield to the slight pressure of our reconnoissance.

On Thursday, headquarters were at Quarles' Ford. Reconnoissances again went on, but showed nothing new. The strength of the Rebel army, the morass on the right and the river on the left, with its centre dangerously inserted between the two fords, and threatening to penetrate our own centre, was again obvious. In case with a bank, the rapidity with which troops could be thrown back and forth from flank to flank, as occasion required, was no less obvious. The position was skillfully chosen, and, it would seem, threatened our security, as well as provided for its own. General Grant had already come to a determination. It was, to dislodge the enemy, not by an assault, which would have been enormously destructive, but by a repetition of the flanking movement already twice successful.

MARCH TO THE PAMUNKEY.

The new plan was to cross the North Anna and again stretch out easterly, in the new flanking movement "by the left flank." The recent rains, swelling the streams, made it prudent to commence passing them as speedily as possible. To cover the scheme, a strong demonstration was made during Thursday on the enemy's left, some divisions of infantry attacking the enemy in front, while Wilson's Third division of Sheridan's cavalry, which returned from Hazall's, moved up the Virginia Central Railroad and began to burn the track. Under cover of this attack, on Thursday evening, the Sixth corps quietly and swiftly withdrew to the north branch of the river, followed by the other corps in quick succession, and moved out easterly by Winsboro. Hancock protected the rear, and, meanwhile, a strong skirmish line was left in front, to engage the enemy's attention and disarm suspicion. At 9 o'clock on Friday morning, Torbert's First and Gregg's Second division of Sheridan's cavalry took possession of Hanover Ferry and Hanovertown, where only a Rebel vidette. General Torbert captured seventy-five cavalry, including six officers. The First division of the Sixth corps arrived at 10 A. M., and the rest of the column closely followed. Hanovertown is on the Pamunkey, fifteen miles northeast of Richmond, nine miles in an air line from Hanover Court-House, and sixteen from White-House, on the same river by road. But the exceedingly tortuous nature of the river makes the two latter distances very much greater by river and somewhat greater by road. It was at once evident that the familiar spot known as White-House was henceforth to be our base of supplies; and, as a proof that this flank movement was a well-considered change of position, but one previously contemplated, transports laden with army supplies were found to be already on their way to the new base. Thirteen miles east of White-House is West Point, where the Mattapony and Pamunkey form, by their confluence, the York River. The distance by which this stream is much greater. A railroad connects the two points.

In the afternoon of Friday, General Meade's headquarters were at Mongnhick Church, situated at the Cross roads on Mehixen Creek, in King William county, ten miles north of Hanovertown. In the advance, the cavalry continued to press on, General Sheridan's whole force codperating, having rejoined the Army on Wednesday, the 25th. Having left Hazall's, he had started from White-House on the 23d, camped that night at Aylettsville, a village two miles south of the Mattapony, and the scene of Kilpatrick's operations in the Stoneman raid. The next day he consumed in the march to Westerville Station, the half for the night being about nine miles to the east of that place. The day following, the cavalry again reported for duty, after an absence of sixteen days.

On Saturday morning, the 28th, our troops had obtained complete possession of Hanovertown and the neighboring region, having marched probably twenty-five miles. Headquarters were, since Thursday night. All day long the troops continued to press forward, and before night the passage of the Pamunkey was effected. The weather continued clear and fine. The enthusiasm and spirit of the troops cannot be spoken of in terms of too high praise, and they did with alacrity all that was asked of them. It was discovered that Lee was already extending his line southerly. He had undoubtedly occupied Hanover Court-House in force before our departure from the North Anna. His had now, however, swung about his army to face us again. Breckinridge's troops, lately victorious in the Shenandoah, supported by Wickham's and Lomax's cavalry, were the forces across us. It was evident that the enemy could not long attenuate his line by holding the Court-House in great force, and that, at most, it would be but a point of support for his extreme left. To ascertain his real views upon this important point, a reconnoissance was pushed on Saturday far down towards Mechanicsville by Torbert's and Gregg's division of cavalry. A little south of Hawes' Store, a point not far from Telopatemey Creek, which is a tributary of the Pamunkey, a severe engagement occurred with the enemy's cavalry, which resulted in our forcing him back some distance, so that something could be determined of his new line.

The battle began about noon of Saturday, Davies' brigade of Gregg's Second division being in advance. Very soon the entire division was hotly engaged, and our cavalry force had a taste of the severe and deadly fighting to which the infantry are thoroughly accustomed. The Rebel cavalry were skillfully disposed, taking advantage of the neighboring woods. The artillery on both sides was briskly engaged. About two o'clock, while the fight was hottest, and Gregg's division had hardly been able, even with great loss, to hold the desired ground, Custer's brigade of Torbert's First division came up, and pressing gallantly forward, overlapped the Rebel forces. This brigade is armed with the Spencer repeating rifle, and proved very efficient. Under the concentrated fire the Rebels retired, leaving the battle field in our possession, with a part of their killed and wounded in our hands. Our loss was about four hundred, and the enemy's not less. Major-Heon Lee and Hampton were in command of their forces.

While Gregg's and Torbert's divisions had been thus employed, for two days, in clearing the roads from Chesterfield to Hanovertown, in effecting crossings of the Pamunkey, and finally in skirmishing and reconnoissance towards the enemy south of that river, Wilson's Third division was briskly engaged in tearing up the Virginia Central and Fredericksburgh railroads to Richmond, west and north of Sexton's Junction. Such a destruction was advisable from the fact that our forces have now left the railroad communication between Richmond and Gordonsville free from infantry attack. The injury to the track is said to be so considerable as to create annoyance, in case it should be important for the enemy to use the road. The destruction of the Fredericksburgh road must at once have convinced the enemy that that line had now been entirely abandoned, and that our forces had been thrown round into the old battle-ground northeast of Richmond.

On Sunday, the 29th, the whole Army was successfully across the Pamunkey, and fronted southwest, about three miles from the river. The corps moved cautiously forward, and an attack from General Lee was expected. None such was made. Skirmishers, and the only firing came from reconnoitering parties far in the front. Reconnoissances were made from each corps, followed up by a gradual advance. It appeared that the enemy was in force half a dozen miles distant from our lines, across Telopatemoy Creek, with his extreme right holding Shady Grove and Mechanicsville, his right centre in front of Adler's Station on the Virginia Central, and his left still persistently covering Hanover Court-House. Trains now began to run to and from White-House, and dispositions were made for battle.

On Monday LEE's forces were officially stated to be on the Mechanicsville road, south of Tolopotomoy creek road, between the stream and Howe's Shop, his right wing resting on Shady Grove. Our position of battle appears to have been substantially as follows: WRIGHT's corps on the extreme right, extending in the direction of Hanover Court-House, HANCOCK's on the right centre, on the Shady Grove road, WARREN's on the left, centre, on the Mechanicsville road, SEDGWICK's on the left, and a little to the rear, en echelon, so to threaten Richmond. Our right and rear were covered by WILSON's Third cavalry division, which had previously been ordered to destroy the railroad bridges over the Little River and South Anna, and to break up the roads leading thence to Howe's Shop. GREGG's and TORBERT's divisions were disposed of on our left flank. The Cold Church and Cross-roads, were held by TOBBERT's division. Major DEVLAND having a picket force of two squadrons of the 17th Pennsylvania along the road leading from Cold Harbor to Old Church Tavern. About noon his pickets were driven in, and the long expected aggression of the enemy commenced. DEVINE's brigade soon reinforced our skirmishers, and, MERRITT's and CUSTER's successively arriving, a brisk engagement followed. Our forces succeeded in driving the enemy back on the Cold Harbor road, preventing his attempted raid in the rear of the Army. The loss on each side was eighty or ninety men. Meanwhile, about 5 o'clock in the afternoon, WARREN's corps, which was gradually moving out to the left, along the Mechanicsville road, was suddenly and hotly attacked from both sides of the road by RHODE's division of EWELL's corps, with two brigades of cavalry, engaged in reconnoitering. CRAWFORD's division which was a little detached from the rest of the corps, being well up towards Shady Grove Church, was forced back in spite of all resistance. The advantage was so rapidly followed to endanger the turning of WARREN's flank. But the timely arrival of reinforcements from the other divisions prevented that disaster. A sharp engagement, however, followed in which the enemy was forced to retire in full parallel to that where WARREN had successfully encountered and driven back their cavalry. As soon as news of WARREN's situation came to headquarters, General MEADE ordered to attack all along the line, in order to relieve him. General HANCOCK was the only one who received in order in time to attack before dark, and immediately dashed upon the enemy's skirmish line, captured their rifle-pits, and held them all night. The engagement was rapid and brilliant, and the losses not large. The enemy left his dead and wounded on the field. General WARREN held his ground, about seven miles distant from Richmond, and near Mechanicsville. The enemy at once moved down troops to prevent any further dangerous concentration on his right. It is probable, however, that BURNSIDE is already approaching in that direction, having crossed the Tolopotomoy creek and moving up to our extreme left. Perhaps General SMITH may reinforce in the same direction, as he is now in position to form position with GRANT when occasion requires.

Annoyed by HANCOCK's presence in their outer lines, the enemy attempted to dislodge him by throwing a heavy force upon him at midnight of Monday. But the effort was unavailing, and they were repulsed after a severe contest, in which they left several hundred prisoners in our hands. On Tuesday a general advance all along the line was attended with considerable firing, the enemy being little inclined to be pushed further back from his position. A dispatch from Mr. STANTON, published below, gives further and later intelligence.

In a final word, we are now at last on the familiar fighting-ground of the campaign two years since. But two years to a day from the battle at Hanover Court-House is to-day, our Army occupying that vicinity, General WARREN carrying his corps in the advance in this last campaign, as he had commanded a provisional brigade in the PORTER's corps in the former action. The Army is now gradually swinging round from it first position after crossing the Pamunkey, when it faced Richmond, to a westerly front, in which it faces LEE's army. General SMITH has reinforced our Army, as Generals BRECKINRIDGE and BEAUREGARD have the army of the opponent. The decisive conflict cannot long be delayed.

DISPATCH FROM SECRETARY STANTON.

WASHINGTON, June 2—12:15 P. M.

Major-General DIX:—

A dispatch from General GRANT's headquarters, dated yesterday, June 1, at ten A. M., has been received by this Department. It states that about 5 P. M. yesterday (May 31), General SHERIDAN perceiving a force of rebel cavalry at Cold Harbor, which proved to be FITZHUGH LEE's division, attacked, and after a hard fight routed it together with GENERAL'S brigade of infantry, which came to LEE's support. SHERIDAN remained in possession of the place. He reported at dark that he had a considerable number of prisoners, and that there were many rebel dead and wounded on the field. He was ordered to hold the position, and at 9 P. M. the Sixth corps was moving out to it.

We have not yet heard from WRIGHT or General SHERIDAN this morning, and do not know whether the former got his troops to their destination. SMITH must be close upon WRIGHT's column.

This morning the enemy are also moving a heavy column in the same direction. The order has just gone to WARREN to fall upon their flank.

WILSON had a fight last evening near HANOVER COURT House with YUNG's brigade of cavalry. He routed YUNG, killing and capturing many. There has been a good deal of artillery firing in that direction this morning.

WARREN reported last night that in his fight of Monday afternoon, near Bethesda Church, Colonel TYRELL, 13th Virginia, and Colonel WILLIES, commanding PEGRAM's brigade, were killed. Colonel CHRISTIAN 49th Pennsylvania, was wounded and captured; so was the Assistant-Adjutant-General of RAMSEY's brigade, name not reported. Ten other commissioned officers were captured and seventy privates. Sixty Rebels were buried on the field.

In our centre BURNSIDE reports his advanced line as being this morning (1st) within a mile and a half of Mechanicsville.

No other military intelligence has been received by this department since yesterday.

EDWIN M. STANTON,
Secretary of War.

A later dispatch from Mr. STANTON, embodying advices from General GRANT up to 7 A.M. on Thursday, states that on the previous day, Cold Harbor, where the Rebels had works, was taken by our forces, after a sharp fight lasting three hours. Smith's corps and the Sixth corps were the ones chiefly engaged. The enemy attacked desperately in the evening, but failed to dislodge us. Cold Harbor is a place of strategic importance, several roads branching from it.

GENERAL BUTLER'S COMMAND.

THERE has been little fighting during the past week in the neighborhood of Bermuda Hundred, and even the skirmish of Saturday night, the 21st, now appears to have been magnified by report into some considerable affair. Minor reconnoissances and entrenching have been the chief work of the week, while, on his part, the enemy in front has been scouting and spading with assiduity not inferior to our own.

On Tuesday, the 24th, a brigade of cavalry under General FITZ LEE, supported by artillery, approached General BUTLER's front at Wilson's Wharf, on the northerly bank of the James, below Fort Powhatan. The post was garrisoned by two regiments of negro troops under command of Brigadier-General WILD. Before attacking, LEE sent in a flag, stating that he had force enough to take the place, and demanded its surrender, adding that, in the latter event, the garrison should be handed over to the authorities at Richmond *as prisoners of war*; otherwise, he would not be answerable for the consequence of capturing the place. General WILD replied—"We will try that." The attack commenced at noon, the enemy dismounting and fighting as infantry. The skirmishing line was specially driven in to the entrenchments, and then the works were charged repeatedly with furious assaults. In front of the works was a broad, open space, and a deep ravine was to be crossed. The negro troops fought with that marked courage which has been so often successfully put to the severest test that it seems hardly necessary now to defend it by special parade of eulogistic comment. When well officered and well drilled, negro troops need no more be suspected of cowardice than whites. After three or four hours of unsuccessful attempts, the assault was abandoned, leaving twenty-five of his dead on the ground. His officially conjectured that he met a total "loss of killed and wounded of more than 200." The wisdom of General WILD's brief response to the deceptively-worded missive to surrender was thus fully indicated.

On Thursday, the 26th, a reconnoissance was made, which disclosed the presence of the enemy in some force, and dispelled the doubts entertained of his being in the vicinity. Before daylight, General MARTINDALE, commanding the Second division of W. F. SMITH's Eighteenth corps, with a part of the One Hundred and Forty-eighth New York, pushed through the strip of woods on our left flank, to the mouth of Bakehouse Creek, about half a mile from our lines, just beyond Fort Walthall on the Appomattox. The Rebel pickets were met and driven in on their reserve, which was found to be of considerable strength. While our men held their skirmish line advanced, General SMITH sent up DEVENS' (formly WISTAR's) Second brigade of MARTINDALE's division, with BELGER's Rhode Island battery, to their support. The artillery soon got engaged, however, a portion of the artillery from doing anything more than cover a break in the line. A slight skirmish followed, the Rebels being behind log breastworks. No attempt was made to force them, and our troops were quietly withdrawn, the Rebels moving out in their rear. Our loss was not more than twenty or thirty. A similar reconnoissance, with a part of the Third brigade of the Fifth division of SMITH's corps, was made on the right, but no decisive results were reached. On Thursday night and Friday morning there was a little casual firing, but nothing worth recording.

The important move of the week was made on Sunday, the 29th, when, in pursuance of orders from General GRANT, General SMITH, taking with him a portion of General BUTLER's command, conducted them, on transports, with celerity, up York River to White-House, the new base of supplies for the Potomac Army. The troops first proceeded to FORTRESS MONROE, arriving there on Sunday evening, and, stopping a while for coal and other supplies, left for White-House, thenceforth to act in conjunction with the Army of General MEADE.

It has been suggested that the remainder of General BUTLER's Army is penned into an uneasy position, with a river on either side, and a watchful and potent army stretching his hostile cordon across from the James to the Appomattox. But in truth, at present, so far from being in a critical, this Army is in a very safe and a very excellent position. Its communications and supplies are beyond all doubt safe and perfect. Its flanks are thoroughly covered by gunboats. And, with its entrenchments, it could hold a greater force than itself at bay. Indeed, it is the natural strength of the position which led us to the opinion that the apprehension so often avowed, that LEE would detach a corps from his army to unite by forced march with BEAUREGARD and crush our southside forces, was unnecessary. We small advantage of numbers to drive out General BUTLER's Army, so long as it remains in its defensive attitude. And an attack in any important disparity of strength pre-supposes the utter repulse of General MEADE—an event not likely to occur at present, and one which, if it did occur, would carry in its train events to which the dislodgment of General BUTLER would be a trifle.

We judge, rather, that recent operations have reduced the army confronting General BUTLER to proportions less than his own, even after the subtraction of W. F. SMITH's corps. A serious advance would probably push the enemy, apparently so vivacious and hostile, into his entrenchments at Fort Darling. But he will certainly oppose to the bitter end any attempt to break into Richmond on the south and southwest side, the possession of these points being important to him as exits, as well as entrances to his city.

On Monday the enemy heavily attacked General BUTLER's lines with artillery, opened from new batteries. Our gunners promptly responded, and the interchange of shot was very brisk. Nobody on our side was hurt.

GENERAL SHERMAN'S OPERATIONS.

General SHERMAN continues his vigorous march into Georgia, meeting with scarcely a show of opposition from JOHNSTON, who would appear to have hardly strength sufficient in his heterogeneous army of conscripts and militia to even embarrass the march of our victorious columns. After a brief detention in crossing the Oostanaula River after the battle of Resaca, the several wings of our Army were on the march again, along roads running parallel to the railroad, over which the cars were soon transporting sup-

plies direct from Chattanooga and Nashville. On Monday evening, the 10th, there was some slight skirmishing with the Rebel rear-guard. On Tuesday, the 17th, our centre reached and passed Calhoun—a thriving town of some 400 inhabitants, the capital of Gordon County, 80 miles northwest of Atlanta, and 30 miles beyond Chattanooga. Three miles beyond here, a brisk little fight occurred, the Rebels having occupied with their sharpshooters an octagon cement building, called the "Graves House." After a fight of two hours, the skirmishers of NEWTON's division, of HOWARD's corps (Fourth), aided by artillery, succeeded in dislodging the enemy. Early Wednesday morning (18th), the Army was again upon the march, the Fourth corps leading the way, and before night our troops occupied Kingston. The Twentieth and Twenty-third Army corps advanced on the left by way of Cronsville, skirmishing heavily by the way. After a halt of a few days at Kingston, for rest and refreshment, the advance was continued as far as Altoona, when the Rebels availed themselves of a strong position among the Etowah mountains, to stay our progress. But with their inferiority of numbers, they were soon forced from this position by another movement in their flank, by which our left reached the railroad near Rome, on the 24th, the 20th still, having a lively fight of nearly three hours' duration in that vicinity,—taking some 400 prisoners, and a railroad train of sick and wounded Rebels, with several cannon and some small arms.

Meanwhile the strong flanking column, under General MCPHERSON, had pressed on beyond Rome, far around to the right, and through Dallas to the Chattahoochee at Sandtown—a post village of Campbell Co., Georgia, 11 miles due west of Atlanta. This important position was not reached, however, without resistance —the official dispatches reporting a fight near Dallas (probably beyond it), in which the Rebels were driven back, with a loss to them of 2,500 killed and wounded left in our hands, and about 800 prisoners; and in all McPHERSON's loss not being over 300 in all.

News is said to have been received at Cincinnati, direct from Kingston, Tenn., by telegraph, which says that General SHERMAN arrived at Dallas last Saturday, the 28th ult., and pushed on reinforcements to McPherson, who would reach Atlanta by Sunday, the 6th, unless a heavy force of the Rebels was met on the way. At last accounts, he was at Sweetwater town, and had driven the Rebels across Powder and Nickajack creeks, and got possession of the bridges across the Chattahoochee, 12 miles from Atlanta.

It is said that General JOHNSTON, with fragments of his disorganized army, has crossed the Chattahoochee, and is falling back to Athens, east from Marietta about 60 miles; while POLK, with an army of all sorts of men, mostly conscripts and "PEMBERTON "boys," is retreating to Macon, on the Central Georgia road.

OTHER OPERATIONS.

The great news from General BANKS is the safe exit of his command from the late expedition, and his own return to New Orleans. Alexandria has been abandoned, and the last has been heard of the Red River expedition, the Bull Run campaign of the Southwest. The brilliant achievement of Lieutenant-Colonel BAILEY, in relieving the gunboats by damming the Red River, we have presented elsewhere. On the 14th, the Army retreated from Alexandria under protection of the gunboats, and, as office happens in similar cases, "a fire broke out" in the city, consuming a great deal of it. On the 15th, the enemy, who escorted the Army a long way, and harassed its rear, attacked in force at Avoyelles Prairie, but, after a severe fight, were driven off. On the 18th, under POLIGNAC, they attacked again at Yellow Bayou, but were repulsed with a reported loss of 300 prisoners, besides as many killed and wounded. This final check was admitted by General KIRBY SMITH, who took command of General A. J. SMITH whose presence with the Red River Army has been a fortunate occurrence. Yellow Bayou unites with the Bayou de la Glaise, and empties into the Atchafalaya a short distance above Semmesport. On the 19th, the Army reached and pontooned the Atchafalaya. On the 20th, it crossed at Semmesport, and moved towards the Mississippi. The next evening it reached Morganzia, where General CANBY assumed its command, and it was safe. General BANKS proceeded to New Orleans the same day.

Guerrilla operations are not yet over. Guerrillas still infest the southwestern rivers, and FORREST is reported to have a considerable force of these troops in Northern Mississippi. Very few Lapidan MOSBY continues his marauding, and has burned down block-houses, bridges and warehouses in the neighborhood of Fairfax Station and Union Mills. But these theories now sink into insignificance.

CAPTAIN COLES AND HIS SHIP.

MR. COWPER COLES, R. N., will have to try again. The *Royal Sovereign*, turret-ship, was fairly under steam for the first time on April 10, when a preliminary trial of her machinery was made. She realized a mean speed of a trifle over 12 knots (13.252), her draught of water being 18 feet 8 inches forward and 21 feet 9 inches aft. She steered well; and by this time we would doubtless be flooded with dissertations upon the superiority of British over American turrets-ships, were it not for an important discovery which it did not take long to make. Before the *Royal Sovereign* had completed half her trip, a sudden escape of steam startled all on board. An investigation developed the fact that the stop valve box and its communication with the steam pipe had been torn off after the boilers; nor was the accident one which might have happened to any other vessel upon her first trial trip. It was the result of faults in the construction of the *Royal Sovereign*, and what is more to the point, of faults peculiar to Captain COLES's system of placing the turrets in the vessel. The London *Times*, which would of course willingly conceal any and defect in the Coles ships or system, if it were possible to do so, frankly states that the bottom of the *Royal Sovereign* has altered in form since she was taken out of dock, and that this change had tipped up the back of two after bollers, thus causing the serious break mentioned. It was hoped that the turret-ship, when weighing over 13 tons, with its gun and carriage, is directly over these bollers. Captain COLES, as will be remembered, has persistently claimed as one of the strongest points in favor of his mode of placing the turret in the vessels of his construction, that its heaviest weight is distributed upon the circumference of the iron road upon which the turret revolves. Now we learn, for the first time, that this is the case only in theory, and that, as the *Times* expresses it, "the "weight is in reality supported by four iron columns under "the deck and immediately above the boilers." These columns stand in the small space of eight feet, and just there the ship's bottom in the vicinity of the keel has bulged out under the pressure, collapsed slightly at the sides, and thus displaced the boilers. Although the *Times* affects to regard the sinking fund to be expended on the *Royal Sovereign* is "most undoubtedly weldon her bottom below the "armor plating," and she will have to go again into dock to be strengthened and repaired and have her boilers reset in their new form," which is possibly all that may be required to render the ship efficient for the purpose for which "she has been converted." Thus, on her very first trial trip, the *Royal Sovereign* has developed a weakness which has never afflicted our monitors, and that, too, in the identical point where Captain COLES claimed for her superior strength. Possibly this little mishap will lead him to put a higher valuation upon actual experience, while it will compel him to distrust the theories he has urged with so much persistency and overweening confidence. We have much to learn in the construction of iron-clads, but we seriously doubt whether Captain COLES is the man to become our tutor.

The *Royal Sovereign*, it is well known to all who have watched her history, has been constructed by piece meal. Shortly after the news of the encounter between the *Monitor* and *Merrimac* reached England, Captain COLES obtained permission to apply his system of "reciprocal" to the low-freeboattle-ship *Royal Sovereign*. The success of his cupolas depended on the success of the Armstrong breech-loader, and when the failure of that species of ordnance was proven, the cupolas were of course also disallowed as a matter of course, as muzzle-loading guns could not be used within his *cone*-shaped structure. It was then, and not till then, that his cupolas were abandoned and the American cylindrical *turret* substituted. The American turrets are of course very much heavier than COLES' originally proposed cupolas, and are supported in our monitors by longitudinal and transverse bulkheads of wrought iron of immense strength, so that it is impossible for any strain to so alter the form of the vessel that it will interfere with the proper revolution of the turret as well as to stiffen the vessel itself.

It appears that in the *Royal Sovereign* no provision was made for the additional weight of the cylindrical turrets, and that the attempt was made to sustain them on a series of slender stanchions, the same as were originally intended for the cone-shaped cupolas. The defects exhibited in the trial are sufficient comment on the worthlessness of that method.

In conclusion we would state that COLES' system, even if he succeeds in making it work, is totally at variance with ours. He aims his gun by means of man power operating a wrench between decks; we aim our 450-pounders by simply moving a delicate lever placed directly in the rear of each gun; which lever is operated by the officer who aims with the utmost accuracy the monster cannon.

The American system is to mount monster cannon within a *single* impregnable turret, placed on a small impregnable and easily manœuvred vessel, with a *harbor draught*, and for more extended operations on a fine modelled vessel combining immense steam power so as to attain *speed* combined also with impregnability.

OUR MONITORS IN RUSSIA.

THE RUSSIANS, who are actively at work constructing an ironclad navy, have complimented American genius by following the model of our Monitors in the construction of a portion of their vessels. Commencing last January, they have in but little more than three months completed four monitors, two of which were launched on the 1st of May. These are described as two hundred and one feet in the extreme length, one hundred and fifty-nine in interior measurement, forty-six feet beam, and eleven and a half feet in depth. They have two steam engines, one of one hundred and sixty horse power for propelling the ship, and the other of thirty horse power for revolving the turret. Their cost is a trifle over one hundred and nine hundred silver rubles ($484,260). The adoption of the American model for these vessels has met with some objections in Russia, in answer to which an article has appeared in a naval journal published at St. Petersburg, a translation of which has been transmitted to the War Department by Admiral LESOFSKY, the officer detailed by the Russian Government to study the system of Monitor Iron-clads in the United States.

Accepting Admiral LESOFSKY assurance of the official character of the opinions expressed in the article he translates, they furnish a very gratifying endorsement of the efficiency of our Monitors. Detailing the history of the ironclad movement in this country, and describing the seven vessels of this class which have been completed, the conclusion is arrived at that, "*the attack on Charleston, entirely "proves the Monitors capable to compete, and probably with chances "of success, with the best iron-clad vessel of the French and Eng-"lish Navies.*" "The fighting test through which the "Monitors have passed," it is added, "is certainly more effectual and decisive than the experiment made in England of "setting the sides of a *Warrior* on a *La Gloire*, 44 inch plates "of which were fractured by occasional shots. We may "well ask what would have become of the vessels covered "by such plates, if they were presenting a larger surface, "and if (as it happened with the *Nahant*) they would be "exposed for some time to a concentrated fire of 160 guns "at a distance less than 1,600 feet! It is not difficult to "answer. Not only the *Warrior* with the *La Gloire*, but "also the *Minotaur*, *Northumberland*, *Agincourt* and *Solferino*, constructed on improved models, would be unable in "such circumstances; while the *Nahant* got out of the "action with injuries comparatively not very important."

For the faith of the Russian Government in these constructions we have the evidence of the Monitors they have already built and the others they have in process of construction. In Russia we are told,

> The Navy Department, in the person of his Highness the Grand-Admiral, has had no assets whatever to aid him in the matter from the beginning the trials of armored ship-building in other states, but was precisely such as it was obliged to create for itself, and in which it must be confessed it has been sufficiently tested. In consequence, after the first battle between the ironclad vessels of America, the Navy Department has selected without there several officers belonging to different branches of the naval service, to study them more attentively. In the first place, they noticed the connexion with which they were charged in the most successful manner. In their opinion there is no doubt that the battle in question that out of all known systems of iron clads the Monitor was preferable, as combining, principally in a single shelter waters. Its protection of Crusoist, our principal naval port, an object of constant solicitude to the Government, and the construction of vessels of the local conveniences for the use of those vessels as cannot be found every where. In consequence of all these reasons we have determined to build the exact model of the American monitors. Those vessels destined exclusively for the defence of the capital are already on the stocks, and will be completed. All the improvements, the necessity of which has been proved by the experience of the war, will be introduced into our vessels, and it is expected that those vessels will be a very effective and honorable addition to the fleet of the Baltic.
>
> At the time time the Navy Department did not neglect the part of construction in other ports, and especially in the Black Sea territory, and we hope that our shipbuilders vessels representing the same type. We also attempted to construct vessels with horizontal batteries, combining all the new improvements, and give satisfaction to all the requirements of modern military navigation.

The reports of the Captains of the Monitors engaged at Charleston are regarded as confirming the solidity of the Monitors. In one word, It is said of them,

> Even whatever side you look upon the results of the battle, they are positively favorable to the Monitor system of constructing vessels, inasmuch as the same is subject to improvements which can be partly adopted on the Monitors building at the present time, and unconditionally on those which will be built in future. Taking into consideration the reports from the Monitors, is easy to prove that taking into consideration the circumstances under which the battle took place, and within a certain specified time it not be very important as in the open sea, then they proved to be invulnerable. The Washington Monitor, which cost the Government to force the Atlanta, a beautiful iron-clad vessel, which cost the Confederates a million dollars, to strike her flag.

and it is certain that a shot from a 15-inch gun fired by the *Passaic* or any one similar turret in a contest with the *Merrimac* or *Virginia* No. 2 would have at an hour the Federal squadron before Charleston, supposing, of course, the Confederate ram to remain, that the Admiral's ship, the *New Ironsides*, scarcely participated in the fight, it appears that the mean number of shots sent from the 15 guns of the remaining seven Monitors, during the action, was 9, or one shot for every five minutes; a result, if not particularly brilliant, still very satisfactory, if we remember that the continual stoppages in firing are fully explained by inevitable accidents in first experiments, and for which not are set aside by another system of artillery, possible improvements in the latter will be made.

In conclusion, it will not be unfair to remark that in examining the results of the Charleston engagement, the Monitors are not to be considered as the only vessels engaged, but as the especial, in fact, the only effective, ones. Monitors, like all other special vessels, are designed for special objects. Their object is to fight ironclads. Their mission is to destroy them. Their *forte* is *fire fight against fortresses they are nearly useless*. Their weakness is their want of speed, and consequently, the heavy sailing ships, when we commanded their construction, but at the present time, after all the experience we have had with them, we do not hesitate to say any other system for constructing coast vessels more useful than the Monitors. Their invulnerability to shot and shell, their immense armor and other citadels, and particularly is there no other system more adapted to the use of heavy guns. They are the best ships we have ever had.

All Monitors that are being constructed at the Petersburgh yards unfortunately are not in a condition to cope with Charleston, or to take part with, but they will soon be ready for service, and will be of great use as in prevent an unmolested bombardment of the fortifications of the port of Cronstadt, which are so important to Russia.

NAVAL ENGAGEMENT OFF HELIGOLAND.

Our own grander military operations have for some time claimed our attention, to the neglect of the comparatively insignificant contest which has been carried on by the Danes and Germans. The only interesting engagement of late in that sea was the one off Heligoland, between the Danish fleet on one side, and the Austrian and Prussian on the other. The fight came off on the 9th of May, both parties seeming eager to give and accept the cage of battle. On the German side were the Austrian frigates *Schwarzenberg* and *Radetzky*, and the Prussian gunboats *Arcona* and *Frauenlob*, four armed steam frigates, carrying 50 guns—60 and 24-pounders, four rifled, the rest smooth-bored—a crew of 540 men; the *Radetzky*, a frigate of the same class, carrying 30 guns, the two fore and aft on her upper deck being rifled 24-pounders, the rest smooth-bored 30 men; the gunboats *Arcona* and *Blitz* both rated with plates 21 inches thick, and carrying four rifled guns each on the upper deck. Captain TEGETTOFF commanded the combined German flotilla.

The Danes had three frigates, the *Niels Juel*, 40 guns, and the *Jylland* and *Skjold*, 28 guns each. We have no particulars as to the calibre of the guns.

The fight opened at about two o'clock on the afternoon of the 9th of May, with the firing of three blank shot by the *Schwarzenberg*. The moves left unanswered by the Danes, whereupon Captain TEGETTOFF ordered the fire to be opened upon the *Niels Juel* and the *Dagmar*, and fired a double broadside against the enemy's ships on either side of him. Although somewhat taken aback by this piece of seamanship, the Danish frigates lost no time in returning the fire, and the engagement became general. The fire of the Danes was kept by the *Niels Juel* struck the officer second in command of the *Schwarzenberg* full in the breast, and of course killed him on the spot. The next shot from the same ship, the *Schwarzenberg* near the same spot, by one of the heavy guns which was served by Danish gunners, and which carried an 84 pound ball on the spot and nine wounded, only one getting off unscathed. This episode was shortly followed by a shower of shot and shell from the Danish frigate's ship. The sails were of course furled, and, as ill luck would have it, a shell forced its way into the canvas, and bursting, set the whole afire. The fire was soon got under, but not before having her head to the wind, it became necessary to put her under, to prevent the flames communicating themselves to the magazine. All manner of efforts to get the vessel out of impurship reduced to the sole use of her two aft rifled guns. While the fight was raging the ship's flames burst in the outer chamber of the powder magazine, setting the timbers on fire, and creating a momentary panic among the crew. The flames, however, were soon extinguished, and no danger averted. To complete the discomfiture of the *Schwarzenberg*, her bowsprit was carried away by a round shot. During the action the *Schwarzenberg* and her consort were struck seventy times by shot and shell, and once by each shot. Her foremast was burnt down to a stump, and on side of the mainmast turned towards the flames was burned all over from the heat. The actual loss on board the *Schwarzenberg* amounted to 18 killed, 24 severely wounded, and between 40 and 49 slightly wounded.

Whilst fared in this manner with the *Schwarzenberg*, the *Radetzky* did her part in the engagement with the Danish frigates, which showed a wise unwillingness to attend to other business, until they should have succeeded in completely disabling the Austrian frigate, and thereby bring to the conclusion of the engagement, the *Radetzky* was struck by shot, mostly on her port side. The gunners of the Danish frigates were in great confusion, and fired wildly and more than once recharged their guns with Danish balls, which fell on the deck. The total loss of the *Radetzky* amounted to five killed and thirty-one wounded. The *Adler* and the *Blitz*, owing to the long range of their guns, had almost no loss, all the Danish shot falling short of their mark.

The loss on the side of the Danes was but two killed and fifty wounded. While the allied ships were much injured, the three Danes came out of the engagement in good condition.

The fight had lasted two hours and would have resulted in the total destruction of the allied ships, had not the near vicinity of neutral ground enabled them, when their case became desperate, to draw off from further conflict.

In spite of his ill-fortune, Captain TEGETTOFF did not lay the responsibility of the defeat of his squadron low enough to suit him, hastened to show his sense of the distinguished Captain's services by promoting him to the rank of Admiral.

CORRESPONDENCE.

ADMIRAL GOLDSBOROUGH ON IRON-CLADS.

LETTER FROM CAPTAIN ERICSSON.

To the Editor of the Army and Navy Journal:

SIR.—Admiral GOLDSBOROUGH'S proposition to employ rams for the protection of our harbors has excited great attention and stimulated the inventive talent of the country in a high degree. The earnest manner in which the Admiral recommends the adoption of his system to the Secretary of the Navy, and the precision with which he establishes the almost irresistible force of the proposed instrument of destruction, are well calculated to incite the inventive mind to devise practical means for carrying out successfully the startling proposition of the distinguished Admiral. It has not, it would appear, occurred to those patriotic and industrious persons, who have offered their time and means to the *practical solution* of this great problem, to ascertain if the *theory* on which it rests is a sound one. It will be well therefore both in a national point of view, and in order to save worthy inventors from possible loss and disappointment, to scrutinize the subject carefully.

The grand feature of the system advocated by Admiral GOLDSBOROUGH is the property of the ram to strike with irresistible force, and thereby to destroy an enemy's vessel in an instant. Accurate computation of this force should therefore precede all other considerations in determining the propriety of the application of rams as projectiles for the protection of our harbors. The Admiral evidently takes this view of the matter, as he does not at all consider the numerous difficulties to be surmounted before the great idea can be rendered practically available. He simply points to the destructive effect of the blow and proves its irresistible force. The Admiral is very happy in his mode of conveying to the mind, by a familiar illustration, the enormous force exerted—he compares the blow to the effect of a solid shot, the exact size, weight and speed of which he computes with great minuteness.

As a basis, in this calculation Admiral GOLDSBOROUGH assumes the ram to weigh as much as the *Dictator*, viz: 4,500 tons, and his velocity at the moment of impact, or 24 feet per second. With these elements he proceeds to estimate, and states the result of his computation to be, that the force of the ram "is equal to the striking force of a ball weighing two hundred and fifty two thousand pounds striking with a velocity of one thousand feet per second." The correctness with which the Admiral has made the result of his calculation leaves nothing to question, and well may our inventors devote their time and means to solve the practical part of a problem apparently so simple, and so fraught with the most important results. But as a ball weighing upwards of two hundred thousand pounds, a velocity of 1,000 feet per second (the maximum speed of a common ball at ordinary ranges) would be so great as to tear into fragments the most massive structure that could be built by modern art, the practical engineer hesitates before he admits the possibility of such a force being developed by any the simple means as that of a ram, without serious mechanical considerations of deep importance, it is fortunate that the soundness of the theory on which it rests may be decided by the simple process of mathematical calculation, without entering on the abstract question of momentum and vis viva. In order to ascertain the correctness of the accuracy of Admiral GOLDSBOROUGH'S assertion, that, under the stated conditions, the ram and the ball strike with equal force, will be to calculate the striking force of

The ram weighs 4,500 tons or 10,080,000 pounds, moving at the rate of 25 feet per second. In accordance with dynamic laws this speed would be produced by a free fall through a height of 9.76 feet (the square of 25 divided by 64). By one of all conversant with practical matters will be struck with the moderate exhibition of force, that is that produced by the ram falling through a space of only 9 feet 9 inches. To find the height to which a cannon ball or the ball, the weight of which is 252,000 pounds, or 112 tons, moving at a rate of 1,000 feet per second. To acquire such a speed the ball must fall freely from a height of 15,625 feet (the square of 1,000 divided by 64) or a little short of 3 miles! The mind is overwhelmed by contemplating the result that would be produced by the impact of iron weighing 112 tons falling from an altitude of 3 miles. Yet such is the force exerted by the Rear Admiral, as a cannon ball or ball of 10 feet 21 inches diameter to strike an object with a velocity of one thousand feet per second.

To the above Admiral GOLDSBOROUGH now solidmnly devoting their time to the subject, it will be proper to estimate precisely the difference of the force exerted by the proposed ram and the supposed equivalent. The weight of the ram, 10,080,000 pounds, multiplied by 9.76 feet, proves its actual dynamic force to be a fraction over 98,400,000 of foot pounds (practically speaking 98,400,000), while that of the ball is 252,000 multiplied by 15,625 or 3,906 millions of foot pounds, consequently more than 39 times greater than that of the ram.

Many insuperable objections might be urged against the proposition of applying rams to defend our harbors in place of the Monitors with their fifteen inch guns, but probably Admiral GOLDSBOROUGH will abandon the ram system on finding that the *Dictator*, assuming every particle in her structure to be efficiently opposed, would be perforated part of the crushing effect of the ten feet ball, which the Admiral employs as his standard of destruction. I am, Sir,

Yours very respectfully, J. ERICSSON.

NEW YORK, May 30, 1864.

THE CASUALTIES OF THE COMMODORE JONES.

To the Editor of the Army and Navy Journal:

SIR:—To correct the erroneous statements of the list of officers, as also of the list of killed and wounded and saved, of the late U. S. Steamer *Commodore Jones*, I would beg, for the sake of the friends and others of the officers of the ill-fated vessel, to publish a *correct* list of the same.

LIST OF OFFICERS.

Acting Volunteer Lieutenant-Commanding, THOMAS F. MAY; Acting Ensign, Edward Everett office; GEORGE W. ADAMS; Acting Master's Mates, A. J. KANE, W. H. BOLTON, and PRINCE M. WYE; Acting Assistant Paymaster, EDWARD T. CHAPMAN; Acting Second Assistant Engineers, T. MCCARTHY; Acting Third Assistant Engineers, J. B. MCKENZIE, ISAIAH L. SAWYELLS, and HORACE WHITWORTH; Pilot, GEORGE A. MCCARTY; Paymaster's Clerk, J. H. BAUMUN, JR.

KILLED.—Acting Assistant Paymaster E. T. CHAPMAN, Acting Third Assistant Engineer ISAIAH L. SAWYELLS.

WOUNDED.—Pilot GEORGE A. MOORE, since dead; Acting Ensign GEORGE W. ADAMS, severely; Acting Master's Mate and Commanding THOMAS F. WADE, slightly; Acting Assistant Engineer H. BOLTON and P. M. WYE, slightly; Acting Third Assistant Engineer B. MCKENZIE, severely; Acting Third Assistant Engineer H. WHITWORTH, slightly; Paymaster's Clerk, J. H. BAUMUN, JR., slightly.

Second Assistant Engineer T. MCCARTHY was working the engines at the time of the explosion of the torpedo, and was thrown through the after engine room hatch, his injury feet into the air and fell overboard, escaping uninjured, not wounded, as before reported.

Third Assistant Engineer I. LYMAN SAWYELLS was also in the engine room, and was instantly killed by the explosion of the boiler.

Acting Assistant Paymaster E. T. CHAPMAN was in his office, and was thrown fifty feet into the air, and fell through the hurricane deck instantly killed.

Acting Master's Mate A. J. KANE was in charge of the first cutter, and a crew of twelve men, searching and dredging for torpedoes, at the time of the explosion. He was nearly along side of the vessel, and his boat was thrown some ten feet into the air. All escaped uninjured. Mr. KANE afterwards rescued the party on shore who fired the torpedo, immediately drew his pistol and fired, and ordered the fire of his men to do the same. KANE afterwards rendered efficient service in picking up the wounded and drowning men and transferring them to the different vessels of the fleet, and was mentioned in hours of his vessels, which immediately repaired to the scene of the disaster.

Total killed, officers and crew, 23; wounded, 48; saved, uninjured, about 23.

C. O.

U. S. NAVAL HOSPITAL, NORFOLK, VA., May 20, 1864.

IRON-CLADS.

To the Editor of the Army and Navy Journal:

SIR.—Having but lately joined the South Atlantic Blockading squadron, and as I did from a station where iron-clads were comparatively unknown, I naturally felt a great curiosity to see their fighting qualities and defensive powers, as well as their habitability; I therefore made inquiries of officers who had been familiar with their appearance, and was favored by them in action. Upon modestly inquiring what was the particular objection to the Monitor type as a class, I was met by a storm of indignant reply, and one enthusiastic and very young officer, who weighed nearly two hundred pounds, appealed to my sympathy in the most tragic way, asking me to look at him. I did look at him, and, as I supposed my eyes betrayed a genuine survey they had made of boots, tubular necktie, and heavy moustache to the face, he stated his case in the most heavy tragedy air, and whispered hoarsely, "Fourteen months on board an iron-clad."

I supposed he looked rather stolid, and as if I didn't take, for he was about to repeat his performance, when an idea struck me. "Ah, ha! oh, yes! I see: you want to go home, oh! yes, I see." And he replied in the most charming manner, and then we both laughed heartily at my poor appreciation of the joke; at least that is what I suppose we laughed at.

More fiercely still did other young, and equally enthusiastic officers inveigh against the Monitors' defensive qualities, stigmatizing them in no measured terms as useless, calling them old iron pots that couldn't fire oftener than once an hour, and that required monthly, in the face of so much knowledge, what they supposed was the cause of their being so unhealthy, they answered, "Oh, well, it's the heat and the monotony, and the—and yes, you know, the infernal iron-clad."

Supposing that you might be some mystery about them only known to the squadron, and that, perhaps, these might be conventional terms significant of meaning to the initiated, I couldn't applaud the press, but ejaculated, "certainly, of course, I understand now."

At last, however, I am stationed with one of these condemned iron-clads, and I am constantly on board of her, feeling the curiosity I have felt all along in regard to them. I propose to make a thorough inspection of them, and for the benefit of those who are interested in such matters, give the result.

Before I take place, I tried to make the inspection after dark, and had approached quite close to the side of the Monitor, when I was hailed, a musket shot whistled by my head, and I heard the rattling of chains, and was told me the turret was turning. Before I could get out of the way, or, indeed, go which direction I pleased, I was presented to the officer of the day, who was only the most earnest expostulations and explanations that I at length prevailed on the sentry to believe, and that I was an inoffensive member of society, and didn't have a torpedo in the boat. But what a strange, truculent looking craft it is at night, with the low black hull and deck awash with the water, and it like a half-side rock, and the shadowy lookout moving about on the combs, threatening turret.

The second time I got on board my own vessel, I made a note of my impressions, feeling disgusted that such an inroad should have been made upon all established models and customs, preventing friendly ship-visiting at night, and feeling confident it was the worst possible way to conclude our Southern business, who would seem to wage war, themselves, in a way so foreign to all the glorious principles of chivalry, and would like as much more—have a higher appreciation of the world we live in.

In the morning, too, I found cutriggers and a supernatural rig on deck, and the officers in mufti, and place left open during the day, and thither I pulled, joining the captain,

who was perambulating his part of the ship, taking his *otium cum dignitate* with the air of a man-of-war's-man.

Here let me remark, in parenthesis, is another innovation on time-honored custom. Making the forecastle the quarter deck! Oh, Spirits of DUNCAN and BOSCAWEN!

Entering the turret, I found the guns in good order, and saw too that the ex-inch monster, instead of having a range less than any other smooth bore gun in the Navy, as I had been led to suppose, actually had one much greater, and had, of course, as all artillerists will at once see, more accuracy.

The ingenious arrangement of pipes, with bits of iron crossing their blades at right angles, to keep them from going too far through the grating, amused me. Boarders swarm upon your deck, and slap one to "Surrender! you beseech Yankee!" Prick their legs and feet with these persuaders through the grating; piece of iron keeps the spike from pulling the pike through, and you have to jump off. Boarders run round on deck behind the turret, as it turns, to keep clear of the fifteen inch.

Signal pass from turret to powder division. Doctor and paymaster in the wardroom, wink at each other, then the latter thrusts an iron bar up into a cleat fastened over a seam in the deck called a "deck scraper;" another wink, a gentle tap, and away go the obituary, leaving only a little grey cloth and some buttons marked on the deck.

Quite a neat little plan this, I admit.

Wardroom large and comfortable—for an iron-clad—and quite safe. Cabin ditto.

It was a hot day, and I expected to find the vessel like an oven, but, on the contrary, had to move my chair out from the current of air which came pouring down the ventilator.

"What a ship! a perfect anomaly!" my friend, the senior officer present, exclaimed. "I really feel my health suffering."

Supposing he wanted me to look at him, I cast my eyes deliberately over his Apollo-like figure, and then said sympathizingly, I hope he did look as if he needed either some dinner or orders to the North.

"It's so doosed unnatural you know," he explained.

I remarked that during the cruise, all the way up my Mr. Vesuvius, the outpourings of an American's patriotic soul in a neat and elegant epigram, and quoted the verse as near as I could recollect—

"In summer cold, in winter hot,
Jess regulates! what a wonder!
That Columbia, wot is so blest and thunder'd!
General Jackson, hill and thunder!!!

"Yes," he said, "either Vesuvius, Mammoth Cave, or a Monitor," and then seemed much relieved.

It appeared I had labored under a wrong impression in regard to the temperature, and that the vessel was not, as in winter, somewhat cold in summer, due of course in the former to the calefactory arrangements of steam pipes, and in the latter to the temperature of the water in which the apartments are immersed. But no man in his senses would try to refute the arguments against the extremes of temperature in question so tremendous.

With regard to physical weakness and prostration, I had not been on board long enough to form an opinion, for often on my own account, but I saw unmistakable evidences of it after my unfortunate companion had eaten dinner for two, manifested by the deep-drawn inhalations he expressed to my exertion requiring much energy.

Though I heard a deep, heavy-muffled base sort of noise like that of the far off, the largest drum in the world, I never detected in it the snore of a human being sleeping sweetly on the other side the bulkhead—an evidence my learning was not put altogether—my friend the senior officer told me his is so bad he hasn't heard home for two weeks, and he adds, in the plaintive voice, he has become somewhat addled from the effects of the Monitor; he hasn't seen his mouth's pay since he took command. That the sight is seriously impaired, I myself can testify, for, often as I may have been on board, such is the influence of the ship, not with the most rigid scrutiny have I ever been able to discover the smallest drop to drink.

But what can you expect on board an iron-clad!

LT.-COMMANDER, U. S. N.

P. S.—Every one knows that a vessel which fires but once in four minutes, is not very formidable against sand batteries, yet because the Monitors are not so good as vessels of the *New Ironsides* class for this purpose, it is but puerile folly to underrate their transcendent qualities for all others; and because four dozen guns did not do it, Monitor-ridicule is then and had to go home, the tale has spread, and all iron-clads are per force terribly unhealthy.

ARMY AND NAVY IN CONGRESS.

SENATE.

On Thursday, May 26th, Mr. HALE reported his bill to authorize the enlistment, on the part of the Government, of enlisted persons desiring to enlist in the naval service, to serve during the remainder of their term of enlistment, and permits any seaman credited into the military service to accept naval service instead. It credits naval enlistments on the quota of each district, and gives the same bounty as in the ARMY.

On Saturday, May 28th, Mr. DOOLITTLE, of Wisconsin, offered a joint resolution tendering the thanks of Congress to Lieutenant-Colonel BAILEY for the distinguished genius, skill, energy and success, as the leading Engineer of the Nineteenth Army Corps, in the Red River expedition, in Red River, by which he saved the fleet under Admiral PORTER, and that the Executive cause a medal, with suitable emblems, to be presented to him in the name of the people of the United States, with a copy of this resolution.

Mr. MORRILL, of Maine, reported a bill to provide that all officers or privates of the military or naval forces are prohibited from buying or selling the products of insurrectionary districts, under penalties of the sale, and a fine of $5,000.

Neither Monday nor Tuesday was any important military bill passed. On the latter day, Mr. DAVIS introduced resolutions to investigate charges of peculation, &c., against General BUTLER, but no action was taken thereon.

HOUSE.

On Thursday, May 26th, Mr. GARFIELD asked leave to report a bill for the summary punishment of guerrillas, and Mr. ANCONA objected. On Friday little was done in military matters, and the House adjourned till Monday.

On Monday, May 30th, Mr. ROLLINS' resolution on the objects of the war, was discussed, and finally referred to the Committee on the Judiciary. Mr. SCHENCK's bill for the summary punishment of guerrilla cases was, but the House refused to suspend the rules for its consideration by 79 to 62, not two-thirds. On motion of Mr. COLE, the Committee on Military Affairs were instructed to inquire by what authority the state militia are put upon an equality with the National soldiers throughout the Washington hospitals, and as to their comparative treatment, and, also, to inquire whether persons who are not in the military are employed in places of trust and profit by the Government at Colchero Point, Maryland, and, if so, how many persons are thus employed, and in what capacity; and, also, whether any disloyal persons are employed as clerks by the Government; if so, who are responsible for such employment.

Mr. LAZEAR offered a resolution that the PRESIDENT be required to adopt measures for the suspension of hostilities between the North and South, and to ascertain in order that a convention may be called of all the States, to restore the Union, with their constitutional rights.

Objection was made, when Mr. LAZEAR moved a suspension of the rules, pending which the House adjourned.

On Tuesday, May 31st, resolutions for the PRESIDENT to construct a military railroad from the Valley of the Ohio to East Tennessee, was passed, 64 to 56.

OFFICIAL DISPATCHES.

THIRTY-SEVENTH DISPATCH.

WASHINGTON, Thursday, May 26, 1864.

Major-General DIX, New York:

Dispatches from General Grant, received this morning, inform the department that the rebel army still holds the position between the North and South Anna rivers, where their forces appear to be concentrated.

It will probably require two or three days to develope his operations, which are not now apparent to the public eye.

The Ninth Corps has been incorporated with the Army of the Potomac.

No dispatches have been received from any other field of operations.

EDWIN M. STANTON, Secretary of War.

THIRTY-EIGHTH DISPATCH.

WAR DEPARTMENT, WASHINGTON, }
May 27—10 P. M.

To Major-General DIX:

A dispatch from Major-General Butler, dated May 21, on the Misssippi River, was received to-day. It details the most complete, daring achievement of General Butler, in constructing a line of entrenchments from the Appomattox to the James river, and the capture of which have already been reported to you.

The rebels attacked with a land two regiments with the view, as they say, of driving us back into Bermuda Hundred. In both the land and river fight, General Burke states that "no prisoners, guns, wagons or other material of any kind were captured by the enemy except that abandoned by him in the unexpected engagement at Baylors Creek-Rodes on the morning of the 16th of April, that with the exception of the losses sustained there, the material of the army is complete."

A dispatch has been received from General Butler, but no number is made of any troops, under the command of Fitz Hugh Lee or Wilcox's Wheel, by the colored brigade of General Wild.

No intelligence has been received from the main kingdom from General Grant or General Sherman.

EDWIN M. STANTON, Secretary of War.

THIRTY-NINTH DISPATCH.

WASHINGTON, May 28—9:30 P. M.

Major-General DIX:

An official dispatch from the headquarters of the Army of the Potomac, on Monocacy Church, has been received. It reports that yesterday skirmishing with rear guards of the enemy commenced at Hanover Court House, and continued to North side of the Pamunkey, developing that the enemy had fallen back to a strong line, and about noon began preparing for crossing the Pamunkey. At 9 o'clock Friday morning, Sheridan, with his cavalry and horse artillery, began the crossing, in advance of Hancock's and Warren's Corps, and by 4 P. M. had effected a lodgment on the south bank of the river, driving the enemy's cavalry before him. The remainder of the corps is pressing forward with rapidity. Weather fine.

A later dispatch, dated at seven o'clock this morning (28th), from headquarters, Hanover Church, has been received. It reports that everything goes on finely; weather clear and cool; the troops came up finely; the Sixth Corps was over the river at night, to defend the Pamunkey by noon. Breckinridge is at Hanover Court House, with a force reported at 8,000 men, and Fitz Hugh Lee's cavalry threatened. Wickham's and Lomax's brigade of cavalry are also there. The dispatch further says that on Saturday Harney's army yesterday, General Torbert captured six sixty-five cavalry, including six officers; took the rebel camp, and the pursuit continued, and three before guns are every occasion.

A dispatch from General Meade, May 28, 6 A. M., near Dallas, reports that the enemy, discovering his move to turn Allsopin, moved on to meet our forces at Dallas. Our cavalry and artillery engaged one side east of Pumpkin-vine Creek, and we pushed them back to the high ground in front of Dallas, where we found Hill and Longstreet. Hancock's corps was on the left, Wright's in the centre, and Warren's on the right. Our troops are now in position, and have been skirmishing all day. Our loss is small. Weather clear and hot; the troops in good health and spirits.

No dispatches from any other field of operations have been received to-day.

EDWIN M. STANTON, Secretary of War.

FORTIETH DISPATCH.

Major-General DIX:

WASHINGTON, May 29—8:30 A. M.

No official dispatches from the Army of the Potomac have been received since my telegram of Saturday evening.

A telegram from General Sherman, dated near Dallas, yesterday, May 28, 7:30 A. M., announces that heavy skirmishing occurred the day between the enemy and McPherson's Corps, in which the rebels were severely beaten and driven back with great slaughter. Logan still wounded left in our hands, and about three hundred prisoners. General McPherson's loss in killed and wounded small.

EDWIN M. STANTON, Secretary of War.

FORTY-FIRST DISPATCH.

Major-General DIX:

WASHINGTON, May 29.

A dispatch from General Grant has just been received, dated 10 o'clock yesterday, 28th, at HANOVERTOWN, and states that—

"The army has all crossed the Pamunkey, and encamped quite a force about three miles south of the river. Yesterday two divisions of our cavalry had a severe engagement with the enemy south of Hawes' Shop, driving him about a mile upon what appears to be his new line. We will find out all about it to-day.

Our loss in the cavalry engagement was three hundred and fifty killed and wounded, of whom not fifty-four are ascertained to have been killed. We fighting drives the enemy, most of them killed and many of the wounded left into our hands.

Another dispatch, dated yesterday afternoon at 2 o'clock, details the movements of the several corps. The move is progress, but up to that time there was no engagement.

Further dispatches from headquarters have been sent, but they failed to reach Washington.

EDWIN M. STANTON, Secretary of War.

FORTY-SECOND DISPATCH.

WAR DEPARTMENT, WASHINGTON, }
Tuesday, May 31—8 A. M. }

Major-General DIX:

A dispatch from General Grant, dated at 6 o'clock this morning, at Hawes Shop, has just been received. It says:

"The enemy came over us last night in force, and attacked. They were easily repulsed with very great loss to the enemy. To-day General Sheridan, with his cavalry and Wright's Corps, drove the enemy from his attack by the balance of our lines. Our loss in killed and wounded will be light. The enemy's loss must be great, as he has been driven from every position he has attacked. He drove the enemy from his entrenched skirmish line on the left of Hawes' Shop. I have no report of our losses, but those then to be light."

Other official dispatches, not from General Grant, were received at the same time, and gave more details. They are as follows, the first from General Sheridan, dated Fifth of May, 1864:

"In the course of the afternoon Wartrin had pushed down on our right until he struck the Mechanicsville road, and Custer's brigade of Brady Gove Church. Onward having got Getsfield from the enemy then drove a force which appears to have consisted of Rosser's brigade, Lomax's brigade, and Wickham's brigade. They were repulsed. The engagement was short, sharp, and decisive. Warren holds the ground as a distance of about two miles from Mechanicsville. He reports that he has taken a considerable number of prisoners, and that there is a considerable force in his front. Our loss has been so light as yet made report. His latest dispatch says the enemy are moving into his front in force, and that he will be attacked in the morning in that direction. Our right an active conflict has been raging ever since 10 o'clock. The enemy have made a fierce attack upon the left of Warren, Wright and Hancock were ordered to patch in, but no report has been made of the result, and only meagre information has yet been received from them."

A dispatch from Sheridan above referred to is dated at 8 o'clock this morning, and states that on Monday evening skirmishing commenced with the enemy's rear guard, the enemy retreated skirmishing and holds the line of the Pamunkey from Hanover Court House to the vicinity of the Polegreen Church, last evening, and is in full force on the north bank of the river, with the right of his line on the left of the Creek. The Sixth Corps is upon Hancock's right, and crosses at the first ford of the river.

Smith ought to arrive at Newcastle by noon, whence he can support Warren and Sheridan if necessary.

Sheridan, with Gregg and Torbert's Divisions of cavalry, are on the left flank.

Wilcox is on the right and rear, for purposes reported in a former dispatch.

The country thereabout is thickly wooded with pines, with fair good openings.

The indications this morning are that the enemy has fallen back north of the Chickahominy.

Nothing of later date has been received by the department.

EDWIN M. STANTON, Secretary of War.

FORTY-FOURTH DISPATCH.

WAR DEPARTMENT, WASHINGTON, }
Wednesday, June 1—11:30 A. M. }

Major-General DIX:

The following dispatch has been received from General Butler:

"Yesterday all day heavy firing in the direction of Petersburg."

Fifty refugees from Richmond, among whom was an ex-Mechanicsville turnpike, fourteen miles from Richmond, yesterday, and they heard the cannon all day and night upon that line.

A woman reports that a meeting was held yesterday, while she was in Richmond, to consider the propriety of the unconditional surrender of Lee's army. The Mayor advocated surrender, and was put into Castle Thunder.

The enemy attacked my lines yesterday, and were repulsed. Our loss was light. They have been reinforced by Beauregard's troops, of Spring Hill, on the easterly side of the Appomattox, but are reported to be demoralized.

Other parties bring me telegram of this evening from General Grant.

EDWIN M. STANTON, Secretary of War.

FORTY-FIFTH DISPATCH.

WASHINGTON, Wednesday, June 1—7:30 A. M.

Major-General DIX:

We have no intelligence this morning from General Grant later than the dispatch of yesterday.

An unofficial dispatch received here at 4 o'clock this morning from Fortress Monroe, reports the arrival there of Colonel Mann, of General Sheridan's staff, came from the front this afternoon (yesterday) at 4 o'clock, and left Sheridan's headquarters when the mail was over, the enemy repulsed, and our left reached the railroad near Cold Harbor. No official dispatches by Sheridan have had been the purpose of General Sheridan's movements. Additional forces are reaching this and ample reinforcements.

EDWIN M. STANTON, Secretary of War.

MAJOR-GENERAL MCCLERNAND is convalescent.

MAJOR B. B. FOSTER, having reported to Major-General Steele for duty, has been announced as Assistant Adjutant General at the Headquarters Department of Arkansas.

CAPTAIN JOHN A. KOCH, of the Fifty-first Pennsylvania Regiment Pennsylvania Reserves, and Lieutenant A. J. B. Baumstark, Battery H, independent Pennsylvania artillery, have been tried by court-martial, recently held at Alexandria, Va., of which Lieutenant-Colonel LEMUEL TRESCOT, First District of Columbia regiment, was president, and dismissed the service of the United States for conduct unbecoming officers and gentlemen.

MAJOR JOHN B. STONEHOUSE, Inspector of the 9th Brigade, Colonel Emory's Corps, 19th Army, and Acting Assistant Adjutant-General, has been appointed Assistant Adjutant-General of the State of New York, with the rank of Colonel.

CASUALTIES AMONGST OFFICERS.

We continue an alphabetical list of casualties amongst officers, as we would again ask that such errors as may occur in it may be referred to the book of official reports.

KILLED.

Aiken, Lieutenant 54th Ohio
Allen, Lieutenant 1st Me
Bailey, W. G., Captain 9th Pa
Bamford, J. D. Captain 11th N Y
Barker, Lieutenant-Colonel 2d Ill
Beck, Jesse, Lieutenant 2d Ill Cav
Bell, Lieutenant-Colonel 7th Ind
Bennett, W., Lieutenant 4th N Y
Bird, C. T., Captain 1st Long Island
Bird, Lieutenant 1st Me
Bradley, T. J., Captain 9th Penn
Brown, Captain 8th Ill
Brown, Captain 84th Ill
Bull, F., Captain 50th Penn
Burnham, Captain 1st Me

NOTICES TO CORRESPONDENTS.

The Editor of the JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels, of casualties among officers, and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to technical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is merely nominal, and is prepaid quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 39 PARK ROW, THOS. SUTHERD.

CITY SUBSCRIBERS who change their residence at this season, are requested to give notice of the fact at our office, No. 39 PARK ROW, in order that the addresses of their paper may be altered accordingly.

The editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 39 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JUNE 4, 1864.

THE OPERATIONS OF GENERAL GRANT.

TWO years and a few days ago the battles of Hanover Court House and Fair Oaks were fought, the one a few miles in advance of the right flank of the present position of the Army of the Potomac, the other across the Chickahominy not far from its present left rear. Practically, the Army of the Potomac occupies to-day the same position as it did just previous to these two engagements. It may proof were at this late day needed of the solidarity of those general laws of military strategy which it was so much the fashion in the early periods of this war to decry, it would be found in the fact that every campaign occurring within the comparatively limited sphere of operations contended over by the Armies of the Potomac and of Northern Virginia, has of necessity taken routes nearly, if not precisely, similar, and tending towards the same objective points.

Richmond, the decisive point in all aggressive campaigns in Virginia, is once more within sight of the much enduring, much abused, but ever faithful and gallant Army of the Potomac; an Army whose fighting record will go down to history as unparalleled in ancient and modern warfare, save by that misguided but brave foe with whom for three years it has contented with varying fortune. Twice in that period has the Army of the Potomac had to fight for the safety of our Northern Capital upon Northern soil, and nobly at Antietam and Gettysburgh did it redeem the trust reposed in it. Once before in bold onslaught it has threatened the enemy in his leading stronghold, and if it retired baffled from the contest, it showed at Malvern Hill that though forced to fall back, it was not yet beaten; though diminished in numbers its spirit and its bravery made it still a foe not to be despised.

We are now entering upon a campaign parallel to the Peninsular campaign of 1862. A series of operations preliminary in character and calculated only to produce that relative position of both armies which we now see has just been completed. Yet in the ferocity of the conflicts these operations necessitated; in the endurance of the troops under fatiguing marchings; in the brilliancy with which our young, and, in such responsible positions, hitherto untried commanders—Hancock and Wright—have handled their corps; in the persistency with which GRANT in the new sphere of operations to which a people, impatient of delay and wasted opportunities, has called him; in the nature of those military combinations by which our Army has been moved from a false position to one from which it can operate securely and strongly,—we have all the elements upon which to form a calm and candid judgment as to the probable success of future operations. We can predict nothing. In war all is uncertain. He is the best general who makes fewest mistakes; he is the most successful one whom Providence helps. We are, however, in a position to judge both of the skill and gallantry of our opponents and our brave defenders. GRANT has been matched against LEE, and the strengthened and renewed Army of the Potomac against all the forces which the South can collect for the defence of its capital. The result has been such as to justify the most sanguine expectations.

The strategetic principles involved in the district of country now the sphere of Eastern operations have been frequently and clearly laid down in this journal. They can be thus recapitulated: The decisive object of any aggressive campaign on our part is Richmond, not only on account of its political significance, but because it, together with Petersburgh and the James River, affords the only possible base of operations for movements in Southern Virginia and North Carolina. Washington is, from its political importance, the decisive object of the enemy's aggressive campaigns; but as a military position it depends upon Baltimore and the security of the railroad between them. Hence the Shenandoah Valley is the only aggressive route for the South, and the advance by such a route will always be directed upon Baltimore. The Antietam and Gettysburgh campaigns illustrate these points. The position best calculated to defeat all such aggressive movements is that of Culpepper, because the enemy cannot move into the valley without at once exposing his communications. Warrenton is nearly as good as Culpepper, but does not command as many of the enemy's communications with the valley. It is evident that if the defence of Washington has to be made by a battle outside its walls, that battle had better take place on the enemy's territory, and as far from Washington as possible. The occupation of Culpepper by MEADE gave us this advantage.

The road to Richmond via Culpepper and Gordonsville is not an available aggressive route; it is too long; its communications require too many men to defend; the country is too difficult to operate in; and the advantage possessed by the enemy of retreating from Gordonsville upon either Lynchburgh or Richmond, protecting the latter place, directly in the one case, and so less efficiently because indirectly in the latter, render an advance by this route the least desirable of all that can be undertaken.

The proper aggressive routes against Richmond in the order of their advantages are the route from Bermuda Landing on the south side of the James; that from Harrison's Landing on the north side of the James; and that from White House on the Pamunkey.

In resuming the offensive, the task assigned to GRANT was plain. He had first to secure Washington against any aggressive movement by LEE. He had, then, either to remove himself to a convenient position for operating, or to threaten it, if he could do so without exposing Washington, or he had to operate upon it independently, or combine this double course. In discussing the combinations which have actually taken place, it will be evident that important changes in the original programme have occurred, resulting from the failure of one or more of the cooperating columns to perform the duties assigned to them.

GRANT in advancing to attack LEE had either to force the passage of the Rapidan, in front, or turn it by strategy above or below. The first course was impracticable. To have turned LEE's left would have cut off LEE from Lynchburgh and reduced the operations between the armies to a single line. This would have thrown us upon a line of great length and very indefensible, and would have enabled LEE to fall back steadily, if forced, without the possibility of his being out-manœuvred or outflanked. If it had been absolutely certain that BUTLER could capture Richmond, or so much of it as lies south of the James River, within ten days of his landing, this would probably have been the best course. LEE, out off from Lynchburgh by GRANT, would have been severed from Richmond by BUTLER, and would have had to abandon a large portion of his artillery and trains to cross the James and establish a new base somewhere in North Carolina. Like all combinations, however, which are eccentric towards the enemy, this combination would only have been sound so long as every part of it worked as directed. It is not a combination capable of adjusting itself to the accidents of all war, to the blunders and incapacities of those entrusted with the detail operations. There was left, therefore, but one course for GRANT, that of moving by his own left on to Richmond, crippling LEE in doing so in such manner as to prevent his advance upon Washington. The landing of BUTLER at Bermuda was a main element in the success of this scheme. Without it LEE might safely have retired upon Lynchburgh, threatening, if GRANT advanced upon Richmond, to attack his communications, and menacing an invasion. But BUTLER being on the James River, LEE dared not do this, for GRANT would have pushed him back upon Lynchburgh, and then, reinforcing BUTLER with BURNSIDE, or sending this latter to operate upon the North of Richmond, would have inevitably captured that city. Hence the initiatory movement of GRANT, combined with the movement of BUTLER'S column, compelled LEE to fight or to fall back upon Richmond. He chose the former alternative, and the battles of Thursday and Friday, the 5th and 6th of May, were the result—battles forced upon LEE by strategetical causes, and, therefore, defensive upon our part; but in the actual conduct of which our chief was too sound a tactician, and our soldiers and corps commanders too eager for the fray not to win much that was aggressive. LEE baffled, retired upon Spottsylvania during Saturday, covering Richmond directly: the same causes led to the same manœuvres and the same conflicts. From right to left on Sunday, Monday, Tuesday, Wednesday, Thursday, Friday and Saturday, our Army fought LEE in his new position, feeling its way to new bases on the Rappahannock and Pamunkey. These conflicts were chiefly aggressive on our part, and, like the previous fights in the Wilderness, were indecisive, except that of HANCOCK on Thursday moraiog. The result of the whole was our attaining a position which compelled LEE again to fall back, if he did not intend us to eat him off from Richmond, and enter into cooperative lines with BUTLER. The cavalry raid of SHERIDAN was probably intended much more for this latter purpose than for the mere advantages to be gained in cutting the railroads North of Richmond. It had become evident that BUTLER had lost goldea opportunities not to be recovered—that he was on the defensive with no prospect of an immediate change. His position has, however, been established in pursuit of forcing LEE to follow GRANT'S initiative, and that being done, a large portion of the troops could be better employed with GRANT. Hence SMITH has been called to reinforce the Army of the Potomac, and it is far from impossible that GILLMORE may follow.

These movements upon the North Anna are similar in their character to those around Spottsylvania. To guard against a repetition of the movement which under JACKSON in July, 1862, prevented MCDOWELL reinforcing MCCLELLAN, and under LEE to person in August, 1862, resulted in the disastrous campaign of POPE, it is necessary for GRANT, now that all the troops available for the route to be expected from BUTLER'S movements have been accomplished, to force LEE directly back upon Richmond, if that be possible. But if it be not possible, or if it should entail too great an expenditure of life to assault him in selected positions, then it remains for GRANT to hang so close upon the enemy that every day's engagement, as nearly daily possible, he may become unable to make any large detachments from his own force, to aid a diversion like that of JACKSON.

If these views of recent movements be correct, we find in fact one of the campaign which has just closed all combinations have been shown to be sound in general principles, and admirably adapted to the varying contiogencies of the movement. He has displayed in this campaign, as at Vicksburgh, a rare combination of persistency with adaptability, and the power of rightly appreciating facts as they are. What he finds it impossible to do in one way to-day, he accomplishes by a new combination to-morrow. Is LEE's right too strong? before the next day's dawn HANCOCK's veterans are breaking into his left. Is the position of the North Anna almost impregnable? within twenty-four hours LEE is forced to abandon it for a new one. Do BUTLER and SIGEL fail? the

troops rendered useless by their incapacity are speedily transferred to a sphere in which there is no such danger. Give a general who possesses these great qualifications for success the resources of the North, and the result cannot be doubtful; but let timid counsels prevail, as they have done in times past, let incapable men be forced upon him, and resources be withheld and the Army will have to add one more to the chapter of disasters recorded too forever.

THE ADVANCE UPON RICHMOND.

The Peninsular Campaign of 1862 has rendered so familiar to every one the ground of operations that it will be very easy to make the present position of GRANT and the distribution of his forces clear to our readers.

GRANT, drawing his supplies from the White-House, holds a position between the Chickahominy and the Pamunkey. Richmond is southwest of him. Lee is to the North of Richmond, is also between the Chickahominy and the Pamunkey. GRANT is facing LEE rather than Richmond. He has Richmond therefore upon his left or rather left rear. Above Meadow Bridge the Chickahominy is an insignificant stream, below it becomes formidable with its deep banks its swampy bottom is rendered impassable by rains.

GRANT'S position as facing LEE is one *en échelon*—his left thrown forward to Mechanicsville—his right withdrawn to White-House—his reserve massed on the Chickahominy, in rear of his left between Mechanicsville and Bottom Bridge. LEE occupies the position from which BRANCH was driven in the battle of Hanover Court-House, and from which JACKSON advanced to the attack of Gaines Mill.

This, then, is evidently the point from which danger is to be anticipated in an advance from the White-House upon Richmond; and GRANT'S dispositions are especially calculated to frustrate any such attack. In order to turn, however, to attack Richmond, it is necessary for him to combine with this defensive position an aggressive line. LEE while threatening GRANT'S right, now that it is retired, would have to turn his back upon Richmond, and, if unsuccessful, would be driven from it. In case of success with respect of success, as the whole reserve of his army is massed behind it. His own communications with Richmond are in the direct prolongation of his right flank. Here then lies LEE'S weak point. But while GRANT'S left is not sufficiently thrown forward to clear the swampy bottoms of the Chickahominy, this point is not so much exposed. For GRANT does not intend crossing with LEE so close. The moment, however, that GRANT is able to advance from Mechanicsville to Meadow Bridge, the aspect of affairs is changed, the whole reserve massed in rear of the left might be thrown over into Richmond in a couple of hours. Hence we find GRANT on Tuesday morning pushing on towards Mechanicsville, while LEE confronts him at Shady Grove and Meadow Bridge, not half a mile from the advance of our Fifth corps. If LEE, therefore, intends to defend Richmond by remaining outside of it, here will occur the decisive conflict for its possession.

It is impossible to suppose that he will repeat the blunder of PEMBERTON, and permit himself to be shut up within the fortifications of any town. It is equally impossible to believe that GRANT will give him time to fortify the position he now occupies. Hence, unless the fertile genius of GRANT discovers some shorter cut to victory, it is at this point that the great battle which will determine the fate of LEE'S army, of Richmond and of Virginia must take place. Let its value not be underrated, and let no means of ensuring success be neglected. Every soldier not present with the Army of the Potomac in that decisive struggle is wasted. Raids in the Shenandoah Valley, operations in Western Virginia, threats upon Petersburgh, guerrilla fights near Fairfax, are all matters of minor importance compared with this great struggle. Let us hope then that the Government realizes this, as the country does, and all will be well.

THE law establishing the grades of Rear-Admiral, Commodore, and Lieutenant-Commander, and assigning to the different grades their appropriate rate of vessel, though adequate at the time to the wants of the service, now utterly fails to comply with the demands of a navy so largely increased. By that law, Commodores were to command first rates, the number of Commodores being limited to eighteen; Captains to command second rates, and the grade not to exceed thirty-six; Commanders to command third rates—their number not to exceed seventy-two; and Lieut.-Commander, to command fourth rates, their number not to exceed one hundred and forty-four. We give below the numbers of officers of these different grades and the numbers of vessels of the different rates, according to the respective rank of the grades, set opposite them:

16 Commodores to command 26 first rates, excess		8
36 Captains	" 61 second "	25
72 Commanders	" 130 third "	61
144 Lt.-Commanders	" 260 fourth "	116
Total excess,		240

But as this number of fourth rates includes storevessels, purchased sailing vessels, brigs and schooners, besides the smaller steamers, it would perhaps seem unfair to count the entire number; though it would be well to arrange this formidable list under the title of fifth rates. Out of the 360 fourth rates, however, we select 60 vessels, which are Navy built gunboats, screw steamers above 500 tons, and a few side-wheel steamers with powerful batteries; so that if we let eight captains command the excess of first rates, eighty-three commanders examine the excess of second rates (25 by 8); and one hundred and twenty-four Lieut.-Commanders command the excess of third rates, (91 by 33); we have left but twenty Lieut.-Commanders to command sixty regularly built vessels of the fourth rate. Add to these forty ships, thus left so cruelly without husbands, the rest of the fourth rates of all kinds, and we have a total of four hundred vessels without legitimate commanders. It is evident then that the grades of Commodore, Captain, and Commander, should be largely increased; enough at least to allow of an officer of each grade being on hand for one of each of the rates assigned by law as their commands, and also to make allowance for those stationed at the vitally necessary positions of Navy Yards, Bureaus, Naval Academy and Ordnance.

THE Dano-German war, which now seems to have been brought to a close, did not tend to elevate our ideas of the military capacity of Danish people. They made a resistance which was far from stout, and we look in vain for the evidences of courage and tenacity in their land operations. On the sea, however, they proved themselves true Northmen. The particulars, which we give elsewhere, of the fight between the Danish and German fleets off Heligoland, show that the Danes manœuvred their ships admirably, worked their guns with skill, and gained an easy and decisive victory over a superior force of their enemy. The story of this naval exploit will do much to soften the sadness of their memories of defeat and failure on the land.

THE exercises connected with the Annual Examination of the Cadets at the U. S. Military Academy commenced on Wednesday, June 1, with the usual inspection and review of the corps, in the presence of the following named gentlemen, who were invited by the War Department to report upon the condition and progress of the Institution:

Hon. Asa O. Aldis, Vermont; Judge Mason Brown, Kentucky; Hon. Robert H. Chapman, Indiana; Rev. William G. Eliot, Missouri; Colonel William Goddard, Rhode Island; N. N. Halsted Esq., New Jersey; Hon. John R. McBride, Oregon; Hon. John Potter, Wisconsin; Judge Thomas Ruffin, Tennessee; Bishop Simpson, Pennsylvania; J. Young Scammon, Esq., Illinois; Hon. Henry A. Swift, Minnesota; Rev. George P. Wisewell, Delaware.

The examinations will continue for a period of two weeks, and each day varied military exercises will be exhibited to the crowds of visitors who delight to frequent this always beautiful spot. The experiment of selecting cadets from the army who have distinguished themselves in the field, has proven an entire success, and the corps, invigorated by such *material*, has never presented a more soldierly state of efficiency. The graduating class, this year numbering twenty-seven members, is anxiously awaiting the period when they may join their former comrades who are engaged in the work of restoring the Unity of the Nation. Of the 112 vacancies in the Academy, upwards of 75 have been filled, and we are gratified to announce that in the class now daily reporting for duty, the Army has furnished a full proportion of select and tried soldier from the ranks of our gallant volunteers. Until a system of competitive examinations in each State be adopted, there can be no better method of making cadet appointments. The following list embraces the graduating class:

Charles J. Allen, New York; Vanderbilt Allen, New York; E. Van Arsdale Andruss, N. J.; Cullen Bryant, Ill.; Arthur H. Burnham; Alex. G. Clarke, at large; James W. Cuyler, at large; John T. Cantwell, New York; Andrew N. Dennett, Massachusetts; John Elliott, Pennsylvania; William Emile, Rhode Island; Oswald H. Ernst, Ohio; David F. Hexp, Pennsylvania; Reno G. Howell, Kentucky; William A. Jones, Illinois; Samuel H. Kinney, Utah; Melville R. Lemoke, New York; Garret J. Lydecker, New York; William Ludlow, New York; Isaac W. Maclay, New York; Alexander Macomb, Michigan; Charles E. Phillips, Massachusetts; Marion L. Poland, Vermont; Amos Stickney, New York; William P. Vose, Maine; O. Douglas Waterman, Pennsylvania; Edward D. Wheeler, Ohio.

We shall next week give a full report of the progress of the examination.

LIEUTENANT-COLONEL BAILEY'S inestimable service in saving a part of the fleet of Admiral POWER is worthy of especial comment. Not quite three years since, he entered the Volunteer Army as Captain of a company in the Fourth Wisconsin Regiment, and was promoted to his present position for services before Fort Hudson. For three months he has been on the staff of General FRANKLIN, and is at present Chief Engineer of the Nineteenth Army Corps. His experience as a lumberman in shallow and tortuous streams and rivers in Wisconsin, is the source of the skill and judgment so fortunately at the service of the country. The details of his exploits our readers will derive from Admiral POWER'S very complimentary and grateful report. The prompt action of Congress, in voting thanks and a medal, will be found in the Congressional column. Finally, we are happy to learn that his nomination as Brigadier-General was made at once; and, the name being sent in to the PRESIDENT, he was immediately confirmed. It is well to reward merit so promptly, that it may stimulate others to equal achievements. The capturing at Red River was accomplished under great difficulties, and amidst considerable opposition from those who had more sneers than pains to lend to the undertaking.

THERE appears to be a great difference of opinion among the authorities as to the spelling of the name of the obscure little town in Georgia which General SHERMAN has so recently made famous. The Southern papers spell it Resseca; our government maps Resseca, while the Gazetteers, the Railroad Guides and the common maps spell it Ressca. Analogy would indicate that the latter is correct, as the town doubtless receives its name, in common with the numerous other Ressacas, from the historical *Ressaca de la Palma*.

Col. W. W. H. DAVIS, of the 104th Penn. regiment, has been relieved as commander of the District of Hilton Head, Department of the South, and granted a leave of absence, to respond to an urgent call to his home. Col. Davies has been absent from duty scarcely a day during nearly three years service. Brig.-Gen Wm. Birney, succeeds him temporarily in the District. Gen. Birney has announced the following officers on his staff: Major E. L. Rogers, 140th P. V., A. A. G.; Capt. P. F. Young, 107th Ohio Vols., A. D. C.; Capt. John A. Hennessey, 52d P. V., A. A. Inspector-General; Capt. Charles B. Fosenden, 9th U. S. C. T., A. A. D. C.

BY order of Major-General Butler, Second Lieutenant S. K. Shaw, Company K, Ninth Regiment Maine Volunteers, who, six months ago, was promoted from the ranks to his present position, having on the 20th of May, while in command of an outpost picket, fallen back with the men under his charge some six hundred yards, thereby losing a position, and making it necessary to retake it at a large loss of life, has been reduced to the ranks, and directed to report to the commanding officer of his regiment for duty subject to the approval of the President of the United States.

CAPTAIN G. D. WISS, Assistant Quartermaster, has been assigned to duty in the steam transport branch of the Quartermaster General's office, at Washington, and ordered to report to Colonel Clery, Aide-de-Camp and Quartermaster, to attend particularly to the charters and settlements with the vessels employed on the James river expedition.

THE Military Department of Washington (under control of General Augur) has been extended so as to include all east of the Blue Ridge and north of the Rappahannock.

MAJ.-GEN. Buell has been mustered out as Major-General of Volunteers, having declined a command under Major-General Canby, to which he had been ordered.

FOREIGN MILITARY AND NAVAL MATTERS.

A new military and naval magazine is announced to be published in England on the first of July next, entitled *The British Army and Navy Review*.

The annual commemorative service for the repose of the soul of Napoleon I. has been celebrated at the Invalides. Amongst others present were Prince Clarmont and the grand daughters of King Joseph.

M. Dumontheil has applied a dagger-blade to pistols in such a way that the two uses or a knife or poignard and a fire-arm are united. He supplies either with either, barrelled pistols or with revolvers.

The allowance for forage for the Commander-in-Chief of the British Army is £967 ($4,835). A member of Parliament thought this rather high, but it was replied that it was no more than he was entitled to as a Field-Marshal.

Lord Hotham has lately suggested that every British soldier should be provided with a little book defining his duties and his rights. Lord Harrington seems to promise that the idea should be carried out. The *formation* of the French soldier eases his officers and himself a deal of trouble.

The report of the Iron Plate Committee of the British House of Commons consists of four bulky volumes, in which are many hundreds of wood cuts with the results of the firing on the plates, of the shape of the balls, and various other matters. Though very voluminous, the report can hardly be said to possess much value.

The death of Mr. Gladstone having left a vacancy in the Academy of Sciences, in the section of mechanics, to which the Emperor Napoleon I. formerly belonged, it is intended to offer the candidateship to the Emperor Napoleon III., in order that all the honories connected with artillery are well-known. He is a long-cherished wish of his Majesty to belong to the institute.

The camp at Chalons is being set in order, and the vegetable garden cast ready for the troops. The usual quota of about 30,000 men will be assembled by the end of June. A commission of about twenty Egyptian officers is under orders to witness the manœuvres at the French camps, so that on its return home to impart military light to its brethren.

The attempt to launch the Russian iron-clad *Lefand* did not succeed. The *Monarch*, launched, for which a similar failure was apprehended, was successfully launched. The length of each Monitor, according to the *Scientific American*, is 201 feet; its breadth 46 feet. The motive power is equal to 160 horse power. Machinery is provided to secure good ventilation, as not to turn the towers with them.

In the Royal Military Academy of England are 250 pupils, costing, on an average, £161 ($805) each. In the Ecole Polytechique, the number of pupils is 260, and the cost £36 ($180) each. The entire system of this great excess of expenditure in England is attributed to the heavy cost of administration. In the Cadets' College there is not more than one for every 5 pupils, but in the Ecole Impériale Spéciale Militaire there is only one teacher for every 35 pupils.

The rapidity of the French artillery fire being has been often commented on during late operations in Denmark. Voltaire, in his account of Frederick the Great's first field, says of the latter that he mounted rather unpromisingly rag, writes:—The second line of infantry reestablished everything by its unshakable discipline, and by the continual changes of the soldiers, who fired at least five shots a minute, loading in a moment their muskets with an iron ramrod.

The total of the forces of Bavaria, as estimated near the opening of the year, is as follows:—26 battalions of infantry, 76,134 men; 48 squadrons of cavalry, 9,552 men, 7,284 horses; 4 regiments of artillery, 11,959 men, 5,564 horses; 2 companies corps, 2,240 men, 87 horses; Surgeons' corps, 932 men, 12 horses. Total, 100,247 men, 13,057 horses. The staff officers, commissariat, &c., are not included in this list. They amount to about 3,000 men.

A series of experiments have been ordered by the Admiralty at Portsmouth, with the floating signals of Commander Cleverod, R. N., and Captain Bolton, of the British Army. Captain Bolton's signals have been already adopted in the army, and Captain Colomb's are to be shortly introduced into the navy. The object is to establish a combination of both systems for naval and military purposes, and more especially with reference to coast defence.

A letter from Germany shows how Prussia came by her present large force of artillery. When rifled cannon were discovered, it was decided to buy a battery. Great tumult followed, as it was difficult to find pure iron, ground sufficiently extensive. The projectile fired by this battery fell in the kingdom of Buckeburg, and those discharged by Buckeburg fell some two duckies further on. The small sovereigns were in despair, when, providentially, war broke out, and they were thus enabled to dispose of toys of troublesome to their neighbors.

The *Index*, Confederate organ in London, publishes a list of blockade runners, and their fortunes, from November, 1861, to March 10, 1864. It appears from the statement that 84 steamers have been engaged in this business. Of these, 11 were captured or lost on the first run, 37 have been captured, 25 have been lost; 22 are still running, having paid for themselves many times over. Of attempts to run the blockade from the single port of Nassau, 363 have been successful, and 52 unsuccessful. Beside the steamers, about 100 schooners have have arrived at Nassau from various Confederate ports.

The Austrian Government, profiting by its experience in the Italian campaign, has issued an order that, in consequence of the failure of ammunition in the height of battle, and the deplorable and fatal consequences which follow such failure, each brigade of infantry have in its train a special light store of ammunition. Each regiment of infantry and each battalion of chasseurs shall receive a two-horse caisson, containing 60,000 cartridges, loaded with cartridges. These, united, shall form a brigade train, the responsibility for which shall be laid on the brigadier.

During a recent debate in the British Parliament it was complained that the Germans had obtained maps of the fortifications of Frederician from the English Topographical Department. The Marquis of Hartington replied that the map of Fredericia in the Topographical Department was constructed from a map in the British Museum, which was of course open to all the world. At the same time he did not believe that the map could be of any use to the Germans, as it referred to the fortifications as they were previous to the year 1848. He quite agreed that great care ought to be taken with regard to the publication of maps under these circumstances; but he was quite certain that, in this case, no information could have been supplied to either army that they were not acquainted with before.

Field-Marshal Hellen, who recently died at Vienna, was a distinguished Austrian soldier. He was born in Wurtemberg, and at the age of seventeen fought at Austerlitz. Moscow, Leipsic and elsewhere. When peace was declared, he left Wurtemberg, and sought advancement in Austria. He entered the corps of engineers, and in 1813 and 1814 made the campaign of Naples in 1821. He soon rose to be an officer, and began afterwards to distinguish himself by his writings on the Austrian military annals. He became a captain in 1834. In 1849 he was in Hungary, attached to the person of the Russian General Bem. He published a valuable account of this campaign, as well as an edition of the military correspondence of Eugene, of Savoy, and the biography of Radetzky. He retired in 1856 with the rank of field-marshal.

A foreign military garter, discussing the effect of imported arms upon the mortality in warfare, says:—These ingenious inventions (unknown in part, with the less martial nature of modern habits) have given to recent warfare a slow, lengthy, and languid character, which, of old, when the onslaught, the fight and campaign are each longer and less decisive. America and Denmark both illustrate this position. Dodging is the order of the day. Men fall, including the closer pursuit, were probably more bloody, as they were certainly more decisive formerly than they are now. But as gunpowder was the order and type of life from warfare is greater now than ever. If fewer men are killed in one day than was the case when gunpowder was in fashion, the slower process of killing some men every day for weeks and years together tells in the end. Wounds, too, are worse with modern weapons. It is not the age of increased humanity in battle.

The honor of inventing the Parrot gun is disputed by Edward Lindner, of Berlin, who, as the Darmstadt *Allgemeine Zeitung* says, has made the same wrought-iron rings or bands. It is claimed that Lindner suggested to Parrott the application of such rings before Parrott's gun was made. But they were rejected by him on the ground of the impossibility of getting a uniform and close contact between them and the barrel. It is said that, however, the rings were subsequently applied, and an invention secured upon them by the American gunmaker. Lindner has also made a rifle gun, on the principle passing even all American rifles, both guns being forged in a single piece, bored and rifled, and superior in all respects. But this new invention, the *Gazette* adds, has not been yet received by the United States. It thinks that no better material can be had for ordnance than the cast-steel prepared at the Prussian works at Essen.

M. Alfred Assolant announces another History of Napoleon about to appear in Paris, in which that great warrior's politicians, and legislator is to be judged without passion. The following paragraph is by M. Assolant's article indicates the freedom he will give to the subject. To read most of the histories of Napoleon, it would seem as if he had accomplished everything by the mere force of his genius, and that circumstances would have had no connection. The very contrary is the truth. Napoleon became First Consul at the moment when France was putting forth all her strength, guided by the "full speed" which the revolution had communicated to the first people of the world. He created no new force, but knew how to turn to marvellous account that which existed. For war and administration he is without equal. His great force lay in acting, governing, administering, finding armies to war, passing rivers, giving battles, setting the Rhine of the county in order. Unhappily his genius extended no further, and he committed the fault common enough in those who are despotic—he hated everything he could not understand.

Mr. Scott Russell has lately delivered a lecture before the Royal Institution on gun-cotton. He first stated the well-known facts of the history of gun-cotton—its discovery twenty years ago; its rapid progress at first; its abandonment as a propulsive force for projectiles on account of the difficulties of its manufacture; the late successful experiments made by the Austrian Government, under the charge of General Lenk; that the Emperor of Austria had allowed the secret of the manufacture to be divulged in England; and that the Government of the British Government was sitting to consider the desirability of its adaptation to purposes of war. He then stated briefly the chief improvements of the powder and gun-cotton. He then proved from well known chemical analyses by Bunsen and Kaiimo that 68 per cent. of powder is lost in smoke, whereas gun-cotton only 32 per cent. is usefully employed; that in gun-cotton 75 per cent. is usefully employed, and 25 per cent. of water is lost. The loss by water, by the heat of combustion, becomes steam, and immensely increases the expansive force of the cotton. He proved by figures that the useful expansive force of powder is only two-thirds that of gun-cotton. He then showed that, owing to there being no residue, or "filthy smoke," in cotton, it is eminently fitted for firing between decks and in casemates. He then illustrated by diagrams the much greater effect of cotton than of powder against military obstacles, and as a torpedo against vessels, and concluded by making an interesting lecture by hoping it might soon be adopted in the Navy.

ARMY GAZETTE.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

CHIEF OF ORDNANCE

Colonel George D. Ramsey, to be chief of ordnance in the Army of the United States, with the rank of brigadier-general, September 15, 1863, vice Ripley, retired.

BRIGADIER GENERALS.

Colonel S. G. Griffin, of the 6th New Hampshire Volunteers, to be brigadier general by brevet.

Colonel Henry Guy Gray, of the 121st New York Volunteers, and Brevet Lieutenant Colonel in the regular army, to be brigadier general of volunteers, from May 12, 1864, for gallant and distinguished service in the eight days' battles in the Wilderness, and at Spottsylvania Court House, Virginia.

CORPS OF ENGINEERS.

Lieutenant-Colonel James K. Graham, to be colonel, June 1, 1863, vice Long, retired.

Lieutenant-Colonel Richard Delafield, to be colonel, June 1, 1863, vice Thayer, retired.

Major Peter S. Woodbury, to be lieutenant-colonel, June 1, 1863, vice Graham, promoted.

Major George H. Thompson, to be lieutenant-colonel, June 1, 1863, vice Delafield, promoted.

First Lieutenant Orlando M. Poe, of the corps of Topographical Engineers, to be captain, from May 12, 1864, for gallant and meritorious service in the battles of the Wilderness, and at Spottsylvania Court House, Virginia.

Captain Robert S. Williamson, to be major, May 7, 1863, vice Delafield, promoted lieutenant-colonel, June 1, 1863.

Captain Quincy A. Gillmore, to be major, June 1, 1863, vice Woodbury, promoted.

Captain Frederick E. Prime, to be major, June 1, 1863, vice Thompson, promoted.

Captain James H. Wilson, to be major, May 7, 1863, vice Williamson, promoted.

First Lieutenant Orville E. Babcock, to be captain, June 1, 1863, vice Prime, promoted.

First Lieutenant John M. Wilson, to be captain, June 1, 1863, vice Poe, promoted.

First Lieutenant Francis Harwood, to be captain, June 6, 1863, vice Cross, killed in action.

First Lieutenant John N. Barlow, to be captain, July 5, 1863, vice Babcock, promoted.

First Lieutenant Peter C. Hains, to be captain, August 1, 1863, vice Wilson, promoted assistant adjutant-general.

First Lieutenant Francis U. Farquhar, to be captain, October 2, 1863, vice Gillmore, promoted.

First Lieutenant Arthur H. Dutton, to be captain, November 6, 1863, vice Gray, resigned.

ORDNANCE DEPARTMENT.

Lieutenant-Colonel George D. Ramsey, to be colonel, June 1, 1863, vice Craig, retired.

Lieutenant-Colonel Wm. Maynadier, to be colonel, June 1, 1863, vice Symington, retired.

Lieutenant-Colonel William A. Thornton, to be colonel, September 15, 1863, vice Ramsey, appointed chief of ordnance.

Major Henry K. Craig, to be colonel, to be lieutenant-colonel, June 1, 1863, vice Ramsey, promoted.

Major Peter V. Hagner, to be lieutenant-colonel, June 1, 1863, vice Maynadier, promoted.

Major Alexander B. Wainright, to be lieutenant-colonel, September 15, 1863, vice Thornton, promoted.

Captain Daniel Tyler, to be major, June 1, 1863, vice Whittemore, promoted.

Captain Frederick T. S. Laidley, to be major, June 1, 1863, vice Dashiel, promoted.

Captain Edward G. Benton, to be major, September 15, 1863, vice Wainright, promoted.

APPOINTMENTS BY THE ADDITIONAL PATHMASTERS.

William Bailey, of Missouri.

John A. Bingham, of Pennsylvania.

Daniel W. Dyckes, of Ohio.

Franklin Gowen, of Pennsylvania.

Mathew J. McKeon, of New York.

Andrew J. Perry, of Rhode Island.

Andrew J. Young, of New Hampshire.

Edward Wade, of Ohio.

Matthew Tallmadge Scantle.

N. P. Bowman, of Vermont.

Henry L. Dawes, of Massachusetts.

A. C. Washburn, of Massachusetts.

Fletcher W. Seward, of Connecticut.

James V. Bourgeur, of Massachusetts.

Thomas Hillhouse, of New York.

William G. Woodcock, of Kentucky.

Ralph P. Buckland, of Ohio.

Thomas H. Gardner, of Maryland.

Albert S. Bushnell, of New York.

W. C. B. Preston, of Massachusetts.

George W. Coleman, of Connecticut.

Charles C. Jones, of New York.

George W. Lane, of Iowa.

James F. Smily, of Delaware.

Henry S. Goodrich, of Pennsylvania.

Lot Clinchantant, of New York.

William B. Parish, of Missouri.

Foster A. Hixson, of New York.

George B. Seney, of Ohio.

Joseph A. Sumner, of Indiana.

C. S. Underwood, of New York.
Israel D. Dewey, of New Hampshire.
George M. Dewey, of New York.
Asa L. Fitchett, of New Jersey.
William T. Sessions, of Florida.
Henry G. Nimms, of Massachusetts.
William H. Stevens, of Maryland.
C. C. Willetts, of Kansas.
C. C. Wilson, of Massachusetts.
Joseph D. Evans, of Vermont.

CAPTAINS IN THE REGULAR ARMY.

PROMOTIONS.

First Lieutenant William H. Harris, to be captain, June 1, 1863, vice Bingham, promoted.

First Lieutenant Alfred Mordecai, to be captain, June 1, 1863, vice Ridley, promoted.

First Lieutenant David R. Ruel, to be captain, July 20, 1863, vice Rose, died of wounds received in battle.

First Lieutenant Samuel N. Pickard, to be captain, September 18, 1863, vice Benson, promoted.

Second Lieutenant Lucius Arnold, to be first lieutenant, April 27, 1863, vice Porter, promoted.

Second Lieutenant William H. Rollins, to be first lieutenant, April 27, 1863, vice Edson, promoted.

Second Lieutenant Frederick H. Beebe, to be first lieutenant, July 1, 1863, vice Ruel, promoted.

Second Lieutenant Charles D. Ramsay, Jr., to be first lieutenant, September 15, 1863, vice Lybrd, promoted.

APPOINTMENTS.

Cadet John R. McGinness, to be first lieutenant, June 11, 1863, 2nd Artillery, vice Gaston, killed.

Cadet George W. McKee, to be first lieutenant, June 11, 1863, vice Hoppin, killed.

Cadet Frank H. Phipps, to be first lieutenant, June 11, 1863, vice Corbett, promoted.

Cadet James W. Reilly, to be first lieutenant, June 11, 1863, vice Hall, promoted.

Cadet Josiah H. V. Field, to be first lieutenant, June 11, 1863, vice Lovell, promoted.

Cadet Charles F. Rockwell, to be first lieutenant, June 11, 1863, 2d Artillery, vice Gibbon, promoted.

Cadet William S. Beebe, to be second lieutenant, June 11, 1863, 2d Artillery, vice Rockwell, promoted.

Lieutenant-Colonel John A. Kress, of the 54th New York Volunteers, to be second lieutenant, September 24, 1863, vice Edie, promoted.

Second Lieutenant John E. Michaelis, of the Signal Corps, to be second lieutenant, November 24, 1863, vice Parker, promoted.

Lieutenant William H. Lamed, of the 2d New York Volunteers, to be second lieutenant, January 29, 1864, vice Rohrbt, promoted.

Lieutenant Charles A. Phelps, of the 2d New York Volunteers, to be second lieutenant, January 29, 1864, vice Chaffee, promoted.

Lieutenant W. E. Smoot, of the 2d New York Volunteers, to be second lieutenant, January 29, 1864, vice Meyers, promoted.

TRANSFER.

First Lieutenant Jacob H. Sypher of the 5th Artillery to the Subsistence Department, April 16, 1864, vice Bayley, promoted.

Second Lieutenant Isaac Rollins, of the 2d Artillery, to the Ordnance Department, April 21, 1864, vice Harris, promoted.

Second Lieutenant James H. Rollins, of the 2d Artillery, to the Ordnance Department, April 21, 1864, vice Mordecai, promoted.

First Lieutenant Clifton Comly, of the 1st Cavalry, to the Ordnance Department, April 21, 1864, vice Benson, promoted.

Second Lieutenant George D. Ramsay, Jr., of the 1st Artillery, to the Ordnance Department, September 15, 1863, vice Lybrd, promoted.

Second Lieutenant John A. Winebester, of the 2d Infantry, to the Ordnance Department, November 24, 1863, vice Earley, promoted.

Second Lieutenant John G. Butler of the 6th Artillery, to the Subsistence Department, April 21, 1864, vice Shaff, promoted.

DISTANT QUARTERMASTERS WITH THE RANK OF CAPTAIN IN THE ARMY.

Frank M. Wever, of Iowa; Lieutenant Fillmore A. Wheeler, of the 5th Iowa Volunteers.

COMMISSARIES OF SUBSISTENCE, WITH THE RANK OF CAPTAIN, IN THE ARMY.

Captain Al-xander M. Wilson, of the 30th Illinois Volunteers.
Lieut. H. Rooss, of Illinois.
John C. Thiele, of Illinois.
Nathan S. Jones, of New York.
Edward Bowen, of Illinois.
Edward B. Watson, of Kentucky.
Charles G. Smith, of New York.
Edward A. Perry, of Massachusetts.
John K. Loring, of New York.
A. G. Randall, of Illinois.
John F. Garwood, of New Jersey.
Edward A. Perry, of Massachusetts.
Robert McQuillen, of Ohio.
Thomas R. Welles, of Maine.

MARINE CORPS.

First Lieutenant James Forney, to be captain, from the 23d of April, 1864, vice Zeilin, promoted, September 1, 1863.

Second Lieutenant William B. Remey to be first lieutenant, from the 30th of February, 1864, vice Forney, promoted, April 23, 1864, deceased.

Second Lieutenant Henry J. Bishop, to be first lieutenant from 31st of April, 1864.

Second Lieutenant Robert L. Meade, to be first lieutenant, from the 23d of April, 1864.

Second Lieutenant Lyman R. French, to be first lieutenant, from the 25th of April, 1864.

RELEASED OFFICERS ORDERED TO THEIR COMMANDS.

WAR DEPARTMENT, ASSISTANT-GENERAL'S OFFICE, }
WASHINGTON, May 31, 1864.

General Orders No. 192.

The following officers, unconditionally released by the rebel authorities, will proceed to join their commands for duty, reporting to Major-General Dix:

Surgeon N. F. Graham, 12th Ohio Vols; Assistant Surgeon W. S. Newton, 81st Ohio Vols.; Surgeon N. D. Ferguson, 8th N. Y. Cavalry; Assistant Surgeon J. W. Richards, 184th Pennsylvania Vols.; Surgeon W. S. Wood, 25th West Virginia Vols.; Assistant Surgeon G. H. Turnbull, 1st West Virginia Vols.; Chaplain John L. Ives, 16th West Virginia Vols.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant-General.

DISMISSALS

For the week ending May 21, 1864.

Captain C. T. Lemberg, 168th Ohio Volunteers, to date May 16, 1864, with loss of rank, for disobedience of a subsistent order, disobeying under false pretences Assistant Surgeon Greening, a recruit who had been ordered to undergo a physical examination, and who was therefore not mustered into service.

Captain William H. Peck, 81st Illinois Volunteers, to date June 1, 1864, for desertion.

Captain George H. Roberts, 10th Pennsylvania Cavalry, to date May 16, 1864, for cowardice, conduct unbecoming an officer and gentleman, neglect of duty, and incompetency.

First Lieutenant Joseph Hall, 10th Pennsylvania Cavalry, to date May 14, 1864, for cowardice in the face of the enemy, making false returns, misappropriation of public property, and theft.

Second Lieutenant S. F. Platt, 124 Pennsylvania Veteran Volunteers, to date April 19, 1864, for absence without leave and disobedience of orders.

The following officers, to date April 16, 1864, for absence without leave, having been published officially, and failed to appear before the Commission:

Lieutenant-Colonel John E. Bull, 68th Indiana Volunteers.
Captain A. M. Wilson, 30th Illinois Volunteers.
Captain John Conrad, 35th Indiana Volunteers.
Captain G. B. Hamilton, 30th Illinois Volunteers.
Second Lieutenant James M. Brasher, 37th Indiana Volunteers.
First Lieutenant Benjamin Bowers, 30th Illinois Volunteers.
Lieutenant S. G. Boughton, 2d Michigan Volunteers.
Lieutenant R. R. Gaden, 12th New York Volunteers.
Second Lieutenant John C. Myers, 35th Indiana Volunteers.
Second Lieutenant Joseph Jeffries, 30th Illinois Volunteers.
Second Lieutenant James McHugh, 15th Indiana Volunteers.
The following officers, to date April 23, 1864, for absence without leave, having been published officially, and failed to appear before the Commission:
Captain William B. Coon, 16th Connecticut Volunteers.
Second Lieutenant A. C. Williams, 14th Indiana Battery.
Second Lieutenant R. Brewster, 16th New York Artillery.
Second Lieutenant A. Bandy, 15th Indiana Volunteers.

DISMISSALS CONFIRMED.

The orders dismissing Lieutenant-Colonel William D. Bowen, 16th Missouri Cavalry, to date October 14, 1863, on the charge of mutiny, and Captain Charles Hall, 10th New York Veteran Volunteers, to date April 22, 1864, for practicing fraud on the Government in relation to the commutation of rations, are confirmed.

The order of dismissal heretofore issued in the case of Captain F. Hall, 82d Illinois Volunteers, is revoked and amended so to honorably discharge him, to date November 16, 1863.

DISMISSAL REVOKED.

The order for dismissal of Lieutenant in the case of First Lieutenant S. H. Morrill, 18th Indiana Volunteers, has been revoked.

RESTORED TO COMMISSION.

The following officers, heretofore dismissed, are restored, with pay from the date at which they rejoin their regiments for duty, promotion to rank from date of vacancy filled by the promotion of their respective States:

Lieutenant-Colonel Christian Schnure, 11th Pennsylvania Volunteers.

Second Lieutenant Michael J. Kagan, 19th New York Volunteers.

NOTICE TO DELINQUENTS.

The following officers having been reported at the headquarters of the Army from their respective regiments, are hereby notified that they will stand dismissed the service of the United States, unless they appear before the Board of Officers, convened at Washington, Military Commission, in session in Washington, of which Brigadier-General Thomas M. Vincent, Assistant Adjutant-General, is President, and make satisfactory defence to the charges against them:

For borrowing men from one company to swell the ranks of another, in violation of paragraph 89, Mustering Regulations, thereby making false musters.

Major Lewis C. Pace, 11th Missouri cavalry.

For being in the city of Washington, D. C., without proper authority, and failing to report under arrest at headquarters Military District of Washington, as ordered.

Lieutenant Frederick Schmidt, 1st Veteran Reserve Corps.

Absence without leave.

First Lieutenant Julius D. Ricker, 21st New York cavalry.
Captain Wm. Finch, 1st Maryland Potomac Home brigade, Maryland cavalry.

EXEMPT FROM DISMISSAL.

The following-named officers, charged with offences, and brought forward for trial before a General Court Martial by order of the United States, the Military Commission instituted by Special Orders No. 191, dated May 30, 1864, from the War Department, and satisfactory defence has been made in their respective cases, viz:

Colonel Thomas J. Lucas, 3d New York Cavalry.
Captain Joseph S. Cook, 1st Maryland Volunteers.

DISMISSALS

For the week ending May 28th.

Captain Isaac Hall, 82d Illinois Volunteers, to date March 4, 1864, for making use of obscene language in the presence or his brother officers and subordinates, and for the habitual neglect of the same after having been reprimanded therefor by Brigadier-General Ransom, Chief of Cavalry, and for the habitual neglect of duty, and insubordinate nature upon a respectable woman employed in the military service of the United States, Miss Dorothea Dix.

Captain Jordan Lasley, 81st Illinois Vols, to date March 4, 1863, for desertion.

Captain Thomas Clancy, 6th New York Vols., to date May 2, 1864, for falsely certifying that he had been absent from his company and regiment, and thereby fraudulently obtaining full pay for a period during which he was absent on leave.

Captain Henry A. Chobora, 38th Iowa Vols., to date February 24, 1864, for drunkenness, neglect of duty, and absence without leave, published officially and failed to appear before the Commission.

First Lieutenant Levi Sargent, 131 Illinois Vols., to date January 28, 1864, for drunkenness, neglect of duty, and absence without leave, published officially, and failed to appear before the Commission.

First Lieutenant Jacob Mattern, 203 Pennsylvania Vols., to date May 2, 1864, for drunkenness, neglect of duty, and absence without leave.

NAVY GAZETTE.

REPORT OF REAR-ADMIRAL PORTER.

MISSISSIPPI SQUADRON, FLAGSHIP BLACK HAWK, }
MOUTH OF RED RIVER, April 10, 1864. }

HON. GIDEON WELLES, Secretary of the Navy:—

SIR: I have the honor to inform you that the vessels lately caught by low water above the falls at Alexandria have been released from their unpleasant position. The latter fall is now so that I had no hope or expectation of getting the vessels out this season. I am glad to say, however, that the Department will be spared the anxiety before it as to the destruction of the best part of the Mississippi squadron. Their services are now of an especial professional bearing out for us in providing a sum equal to the emergency. Admiral Farragut has left for New Orleans in the Hartford. Army corps, proposed a plan of building a series of dams across the rapids. I was not sanguine that they would succeed, but the vessels gave over. This proposition looked like madness, and the best engineers officers in the army scouted it. Colonel Bailey, of the Pioneers, who requested General Banks to have it done, as he entered heartily in the plan, and I must say that I never saw a man work as he did, and the dam was pronounced to be finished in ten days, or the Army would have to leave us. Colonel Bailey went to work with a will, and in less than the ultimate successful time would only permit. General Banks placed at his disposal 4,000 men, and with this force Colonel Bailey, consisting of some three thousand men, and seven hundred axemen, with a large number of contrabands who were torn down for the occasion, went to work on the second day after my arrival in Alexandria from the mouth of Red River. The dam was built, the water rising with great rapidity; trees were moved in all directions bringing in brick houses, stables, and fences, and the whole force of the Army came down from above; and every man seemed to be working with a vigor that showed that he understood that the success of the Army lay solely in the success of the undertaking. There falls are about a mile in length, and the vessels had to pass through a narrow channel filled with rapids, and the water was so low that it was impossible to make a channel.

The dam was constructed directly across from the left bank of the river a tree dam, made of the bodies of very large trees, brush, and stone, and filled in with brick houses, stables, and fences, brought in every way which ingenuity could devise. This was run out some three hundred feet into the river; four large coal barges were then filled with brick and sunk at the end of it. From the right bank of the river piles filled with stone were built out to meet the barges. All of which was successfully accomplished, not withstanding there was a current which would have carried a steamer's head round to sweep everything before it. It will take too much time to give you the details of the work, suffice it to say that the dam was built and the vessels passed over it, one by one, in safety, and that the dam was mostly constructed on the upper edge of which the vessels lay, ready to pass over it as soon as the water be ready to float them.

The dam is another day it would have been high enough to enable all the other vessels to get over the falls. The Eastport was on the receiving end of the dam, the pressure of water because so great that it swept away two of the stone barges, which swung in below the dam on one side. During this unfortunate accident, I stepped on to the Eastport, and by a vigorous use of steam and anchored and ordered the Lexington to pass the upper falls, if possible, and immediately attempt to go through the dam. I thought I might be able to save the four vessels below, not knowing whether the pressure employed on the work would ever have the least to renew their enterprise.

The Lexington succeeded in getting over the upper falls just in time—she was not partially fallen as she was passing over. She then steamed down for the opening in the dam, through which the water was rushing so furiously that it seemed as if nothing but destruction for the vessel. The Lexington was steered for the centre of the opening with a full head of steam on, plunged down the roaring torrent, and was in the twinkling of an eye in the still water below. Her success was hailed with cheers by the troops on the surrounding hills, and rushed to safely into the basin. Thirty thousand volunteers and contrabands had been employed in getting this dam in operation for seven days and twenty-four hours. The Eastern followed next, all her hatches battened down, and every precaution taken to prevent accident. She did not do as well as the Lexington, her pilot having become flustered as he approached the dam, and not understanding how to steer. Unfortunately, she struck a full mess of steam to be carried; the result was that for a moment she was completely unmanageable, and the last thing I saw of her she was broadside on to the current, and apparently going down stream stern foremost. Her pilot had not got hold of the wheel in time to save her from the whirlpool.

Admiral Farragut, who was very fortunate in the dam carried away, so that very large numbers of contrabands were employed in getting her out, and against some rocks on the left, and made a fine cushion for the vessel to strike against, and thus saved her. Afterward appeared to be entirely uninjured by the accident. The accident to the dam, instead of embarrassing Colonel Bailey, only helped him to renew the work, and after he had seen the success of getting four vessels through

Colonel Bailey commenced building their labor of the two eight days swept away in a moment, cheerfully went to work to repair the damage occasioned by the accident, and in a short time the dam was brought over. These men had been working for eight days and nights, with but little intermission, and were completely worn out, but they went to work with a will, and not just ceased working and among them. On the whole it was very fortunate the dam carried away, as the two large vessels would have passed over it with ease, and not have against some rocks on the left, and made a fine cushion for the vessel to strike against, and thus saved her. Afterward appeared to be entirely uninjured by the accident. The force of the water and the current being too great to permit the vessels to be towed up, they were towed down to the river in so short a time, Colonel Bailey determined to leave a gap of fifty feet in the dam, which would make a very good place to run the upper falls. This was accomplished in three days' time, and on the 8th instant, at 10 A. M., the Lexington, the pilot-boat would go over the upper falls, a good deal of labor having been expended in hauling them through, and the Eastport very cautiously steamed down through for them. Next day the *Osark*, *Louisville*, *Chillicothe*, and two tugs also succeeded in getting over the falls, and the following day (Sunday) the *Mound City*, *Carondelet* and *Pittsburg* started in succession to pass the dam. Every one was on the lookout, and every precaution taken to prevent accident. The passage of these vessels was a most beautiful sight. They passed over without a hitch, and in a few minutes without an accident, except the unshipping of one or two rudders.

The vessels are now all in the river, and have been generally cheered as they passed over. Next morning at 8 o'clock the Eastport, Lexington, and Chillicothe, with the transports and tugs, started down the river, and arrived at the mouth of Red River the same day at 5 o'clock that afternoon the vessels were all ended, and the Army of the Red River commenced its march on the return way of transports is coming. A good deal of difficulty was anticipated in getting the vessels over the falls, but the success has more than reported only five fleet—gunboats were drawing six. Providentially we had a rise from the mouth of the Mississippi, the first one we have very high at this time, the back water extending to Alexandria, and the vessels passed over the falls without touching bottom, and no serious obstructions will delay.

It is my pleasant duty to express the admiration I feel for the abilities of Lieutenant-Colonel Bailey. This is without doubt the most remarkable piece of work ever done. Under the circumstances a private company would not have completed the work under one year, and Colonel Bailey has done it in eight days, and has displayed an utter incapability. Leaving out his abilities as an engineer, the energy and perseverance he displayed in urging his men to action is a valuable first worth nearly two millions of dollars. More, he has inspired his men with the same energy which would have rendered them to carry on this work a year or two longer, for the intended destruction of the fleet. I am happy to say that Colonel Bailey will be one to do in case that event occurred but destroying every part of the work, and I am sure that every officer and man in the fleet will be delighted to see the Government do justice to Colonel Bailey on the highest honors the Government can bestow on the country. To General Banks I am also indebted for many favors. I do not believe there ever was a case where such difficulties were overcome in such a short space of time, and with such complete success. I had been so anxious this cause of some of the persons engaged on this work, as I think that every one of them will be entitled to a medal. I am not able to give the names of all, but sincerely trust that General Banks will do all in his power to reward those engaged in this work when he makes his report. I only regret that time did not enable me to get the names of all engaged. Colonel Bailey's name must stand at the most prominent persons.

Lieutenant-Colonel Bailey, Acting Military Engineer, Nineteenth Army corps, in charge of the work.

Lieutenant-Colonel Duff, Assistant.

Colonel Douglit, Acting Assistant Inspector-General.

Lieutenant-Colonel Locke, Quartermaster, 165th New York Vols.

Lieutenant-Colonel Hubbard, 30th Maine Vols.

Major Bell, Assistant Quartermaster, 19th Army Corps.

Lieutenant-Colonel Williamson, Ordnance Officer.

The following were a portion of the regiments employed:—

Twenty-third Maine, commanded by Lieutenant-Colonel Emerson.

One Hundred and Fifty-sixth New York, commanded by Colonel George H. Love.

One Hundred and Sixty-first New York, commanded by Captain Preston.

One Hundred and Thirty-third New York, commanded by Colonel Curtis.

The Engineer regiment and officers of the Thirteenth Army corps were also employed.

The work has been done but feeble justice to the work or the persons engaged in it—being severely interposed. I feel myself unable to go into details, but I trust the proper future historian will point this matter as it deserves to be treated, because it is a subject in which not just the country but the whole civilized world is interested, and who succeeded so admirably in this task should not lose one atom of credit as justly due. Admiral Farragut joins me in a word of praise for the gallantries it is under to Lieutenant-Colonel Bailey, Acting Military Engineer, Nineteenth Army corps, in charge of constructing the vessels over the falls. I had nearly all the guns, ammunition, provisions, and everything else except my vessels and crews taken from me, and I was left with a force entirely inadequate to the work before me. I was left with a force entirely inadequate to the work before me. I was left with a force entirely inadequate to the work before me.

where a number managed to make their escape in the boats, though many were killed in attempting to do so. The vessel herself was immediately rounded to and opened there gun on the batteries, and particularly on endeavoring to secure the *Warner* from being taken in tow. They had, however, as much as they could do to take care of themselves, the cross-fire of the forts being very severe and their bullets terrible missiles. Their steam-pipes were soon shot and their bulkheads perforated with shot, notwithstanding being cut off in places, and many (as for five days past, the case has been) lying full of water.

The *Signal*, Acting Volunteer Lieutenant Edward Morgan, still pushed her prize for Hatteras Inlet under a heavy fire from the forts. He found it impossible to destroy his vessel by burning, her decks being covered with wet material, and finding that he was approaching the fleet of the noble fellows who had defended their vessel so gallantly. He was grounded on the bar, and the prize was taken in tow so. Some of them attempted to get off by climbing up the bank. Many were killed while doing so, by musketry fire, and others were captured from the opposite side. The captain remained by the vessel and was captured. He remembers but 1 boat getting off, and that getting regarding him. The rebels took the guns off of her, and placed her ashore and used as a battery against the fleet.

General Banks, on hearing the news, sent out word to Admiral Porter that he would hold on to Alexandria until the 10th, and then fall into Alexandria. A number sailed from the mouth of the Red to above Grand Gulf, and were coming up at the time to the scene of action, but were not in time to participate in the fight. It is very much to the credit of the rebels that, in the midst of the excitement, they succeeded in saving the most valuable, and committed outrages at which humanity revolts.

The vessels will all return to their stations in a few days, as there is no gunboat under present circumstances to spare for service in this part of Louisiana, the season having passed for operating with any chance of success. I am sorry to say that many guerrillas have become quite troublesome on the Mississippi since I left, all of which will be remedied with the coming season.

I have the honor to be, very respectfully,

Your Obedient Servant,

DAVID D. PORTER, Rear-Admiral.

PAY OF PERSONS ENLISTED IN THE NAVY.

NAVY DEPARTMENT, May 26, 1864.

General Order No. 56.

From and after the 30th of June, 1864, the pay of persons enlisted in the Navy, and receiving regular or veteran bounties for service, will be in conformity with the table hereto annexed.

GIDEON WELLES, Secretary of the Navy.

RULES FOR PREVENTING COLLISIONS.

NAVY DEPARTMENT, May 4, 1864.

General Order, No 54.

In pursuance of the following act "fixing certain rules and regulations for preventing collisions on the water," to take effect on the 1st day of December next, all vessels belonging to the Naval service of the United States from this date. As most of the collisions occur from the neglect of proper and ordinary attention, the commanders of the commanding officers, to approaching another vessel, to slacken and stop in time to avoid the possibility of collision.

An Act fixing certain rules and regulations for preventing collisions on the water.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after September one, eighteen hundred and sixty-four, the following rules and regulations for preventing collisions on the water be adopted in the Navy and the mercantile marine of the United States: *Provided*, That any exhibition of any light on board of a vessel-of-war of the United States may be suspended whenever, in the judgment of the officer of the Navy, the commander-in-chief of a squadron, or the commander of a vessel acting singly, the special character of the service may require it.

REGULATIONS FOR PREVENTING COLLISIONS ON THE WATERS.

CONTENTS.

Article 1. Preliminary.

Rules Concerning Lights.

2. Lights to be carried as follows.
3. Lights for steamships.
4. Lights for steam-tugs.
5. Lights for sailing ships.
6. Exceptional lights for small sailing vessels.
7. Lights for ships at Anchor.
8. Lights for pilot vessels.
9. Lights for fishing vessels and boats.

Rules Concerning Fog-signals.

10. Fog-signals.

Steering and Sailing Rules.

11. Two sailing ships meeting.
12. Two sailing ships crossing.
13. Two ships under steam meeting.
14. Two ships and one steam crossing.
15. Sailing ship and ship under steam.
16. Ships in sight of one another.
17. Vessels overtaking other vessels.
18. Construction of Articles 12, 14, 15 and 17.
19. Power to issue special cases.
20. No ship under any circumstances to neglect proper precautions.

PRELIMINARY.

Article 1. In the following rules, every steamship which is under sail and not under steam is to be considered a sailing ship; and every steamship which is under steam, whether under sail or not, is to be considered a steamship.

RULES CONCERNING LIGHTS.

LIGHTS.

Article 2. Rules mentioned in the following articles, and no others, shall be carried in all weathers between sunset and sunrise.

LIGHTS FOR STEAMSHIPS.

Article 3. All steam vessels when under weigh shall carry—

(a) At the foremast head a bright white light, so fixed as to show an uniform and unbroken light over an arc of the horizon of twenty points of the compass, so fixed as to throw the light from right ahead to each side of the ship, viz: from right ahead to two points abaft the beam on either side of the ship, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.

(b) On the starboard side, a green light, so constructed as to throw an uniform and unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(c) On the port side a red light, so constructed as to show an uniform and unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the port side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

(d) The said green and red lights shall be fitted with inboard screens projecting three feet forward from the light, so as to prevent these lights from being seen across the bow.

LIGHTS FOR STEAM-TUGS.

Article 4. Steamships, when towing other ships, shall carry two bright white lights in a vertical line one over the other, not less than six feet apart, so as to distinguish them from other steamships. Each of these masthead lights shall be of the same construction and character as the masthead lights which other steamships are required to carry.

LIGHTS FOR SAILING SHIPS.

Article 5. Sailing ships under way, or being towed, shall carry the same lights as steamships under weigh, with the exception of the white masthead light, which they must never carry.

EXCEPTIONAL LIGHTS FOR SMALL SAILING VESSELS.

Article 6. Whenever, as in the case of small vessels during bad weather, the green and red lights cannot be fixed, these lights shall be kept on deck, on their respective sides of the vessel, ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make it certain that the green light is not seen on the port side nor the red light on the starboard side.

To make the use of these portable lights more certain and easy, they shall each be painted outside with the color of the light they respectively contain, and shall be provided with suitable screens.

LIGHTS FOR SHIPS AT ANCHOR.

Article 7. Ships, whether steamships or sailing ships, when at anchor in roadsteads or fairways, shall, between sunset and sunrise, exhibit where it can best be seen, but at a height not exceeding twenty feet above the hull, a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform and unbroken light visible all round the horizon, and at a distance of at least one mile.

LIGHTS FOR PILOT VESSELS.

Article 8. Sailing pilot vessels shall not carry the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a blue-gun or a blue light every fifteen minutes.

LIGHTS FOR FISHING VESSELS AND BOATS.

Article 9. Open fishing boats and small fishing vessels shall not be required to carry side lights required for other vessels; but shall, if they do not carry such lights, carry a white light, which shall be on the one side and a red slide on the other side, and on the approach of or to other vessels which shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side, nor the red light on the starboard side. To make the use said open boats when at anchor, or attached to their nets and stationary, shall exhibit a bright white light. Fishing vessels and open boats shall however, not be prevented from using a flare-up in addition, if considered necessary.

RULES GOVERNING FOG-SIGNALS.

FOG-SIGNALS.

Article 10. Whenever there is a fog, whether by day or night, the fog-signals described below shall be carried and used, and shall be sounded as best suited for the circumstances of the case, at the times hereinafter named.

(a) Steamships under weigh shall use a steam-whistle or other efficient steam-sounding apparatus, placed as far from the deck as possible.

(b) Sailing ships under weigh shall use a fog-horn.

(c) Steamships and sailing ships when not under weigh, shall use a bell.

STEERING AND SAILING RULES.

TWO SAILING SHIPS MEETING.

Article 11. If two sailing ships are meeting end on, or nearly end on, so as to involve risk of collision, the helms of both shall be put to port, so that each may pass on the port side of the other.

TWO SAILING SHIPS CROSSING.

Article 12. When two sailing ships are crossing so as to involve risk of collision, then if they have the wind on different sides, the ship with the wind on the port side shall keep out of the way of the ship with the wind on the starboard side, except in the case in which the ship with the wind on the port side is close-hauled, and the other ship free, in which case the latter ship shall keep out of the way. If both have the wind on the same side, or if one of them has the wind aft, the ship which is to windward shall keep out of the way of the ship which is to leeward.

TWO SHIPS UNDER STEAM MEETING.

Article 13. If two ships under steam are meeting end on, or nearly end on, so as to involve risk of collision, each shall put her own starboard side shall keep out of the way of the other.

TWO SHIPS UNDER STEAM CROSSING.

Article 14. If two ships, one of which is a sailing ship and the other a steamship, are proceeding in such directions as to involve risk of collision, the steamship shall keep out of the way of the sailing ship.

SHIPS UNDER STEAM TO SLACKEN SPEED.

Article 15. Every steamship when approaching another ship so as to involve risk of collision shall slacken her speed, or, if necessary, stop and reverse; and every steamship shall, when in a fog, go at a moderate speed.

VESSELS OVERTAKING OTHER VESSELS.

Article 17. Every vessel overtaking any other vessel shall keep out of the way of the said last-mentioned vessel.

CONSTRUCTION OF ARTICLES 12, 14, 15, AND 17.

Article 18. Where, by the above rules, one of two ships is to keep out of the way, the other shall keep her course, subject to the qualifications contained in the following rule.

POWER TO SUIT SPECIAL CIRCUMSTANCES.

Article 19. In obeying and construing these rules due regard must be had to all dangers of navigation, and due regard must also be had to any special circumstances which may exist in any particular case rendering a departure from the above rules necessary, in order to avoid immediate danger.

NO SHIP UNDER ANY CIRCUMSTANCES TO NEGLECT PROPER PRECAUTIONS.

Article 20. Nothing in these rules shall exonerate any ship, or the owner or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper lookout, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Approved April 29, 1864.

Should a collision unfortunately take place, such commanding officer is required to furnish the Department with the following information.

1st. His own report, that of the pilot, the officers of the deck, and other officers who witnessed the occurrence. These reports and statements are to be made in writing, and should fully and clearly state the courses steered, the point at which the vessel was first seen, the bearing, the distance apart, the speed, the time the engines were stopped, whether in motion, and, if so, at what speed at the moment of collision, the direction of the wind, the condition of the weather and atmosphere, what lookouts were placed, what lights were displayed by both vessels, whether either vessel changed from the above rules and regulations, whether any blame can attach to any one, and, if so, to whom, and all the other important facts bearing upon the subject.

2d. Written statements and estimate of damage from officers of the vessel with which the vessel of the U. S. Navy collided, if they can be obtained.

3d. Survey of the injury to both vessels by the proper officers.

4th. If the vessel is in charge of a pilot, and the collision has occurred from his acting in violation of the above rules and regulations, the fact must be stated specifically in the report, and charged on him.

GIDEON WELLES, Secretary of the Navy.

DEATH OF COLONEL HARRIS.

NAVY DEPARTMENT, May 12, 1864.

Circular.

The Secretary of the Navy announces to the Navy and the Marine Corps the death of Colonel Harris, Commandant of the Marine Corps, which occurred in the City of Washington on the morning of the 12th inst.

The deceased entered the Marine corps on the 12th April, 1814, as a 2d lieutenant, and was promoted to 1st lieutenant 18th Feb. 1817. For half a century he performed the duties entrusted to him with zeal and efficiency, and was ever ready to meet a vacancy in the grade of officer, earning himself on all occasions to maintain the discipline and gallantry of the corps.

In respect to his memory, it is hereby directed that, on the day after the receipt of this order, all flags at the different Navy Yards and at the Washington Navy Yard be hoisted at half mast; and also that minute guns be fired from the Navy Yard, beginning at noon.

Officers of the Marine corps will wear crape on the left arm for thirty days.

GIDEON WELLES, Secretary of the Navy.

AN ACT for the classification of the clerks to paymasters in the Navy, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the annual pay of clerks to paymasters in the Navy, shall be as follows, viz:—Clerks to paymasters at the Navy Yard, New York, Washington and Philadelphia stations, twelve hundred dollars.

At other stations, one thousand dollars.

Clerks to paymasters in charge of provisions and clothing at Boston, New York and Philadelphia, twelve hundred dollars.

At other stations, one thousand dollars.

Clerks to paymasters attached to the Boston and New York, twelve hundred dollars.

At other stations, ordered, and in vessels of the first rate, and at the Naval Academy, one thousand dollars.

Clerks to fleet paymasters, and to paymasters of vessels of the second rate, eight hundred dollars.

Clerks to paymasters of vessels of the third rate, having complements of one hundred and fifty men and over, seven hundred dollars.

Clerks of receiving vessels and store vessels, seven hundred dollars: *Provided*, That no clerk to a paymaster shall be allowed more than one assistant clerk to a vessel having the complement as one hundred and forty men and over, and no clerk to a paymaster of receiving and store vessels: *And provided further*, That nothing in this act shall be construed to increase the pay now allowed by law to the paymasters' clerk at Mare Island.

Approved, May 26, 1864.

REGULAR NAVAL SERVICE.

ORDERED.

Lieutenant-Commander Gridley to the *Shenandoah*.

Lieutenant Alfred T. Mahan, to the *James Adger*.

Lieutenant W. S. Hogan, to the Naval Academy.

Surgeon Wm. Johnston, jr., to the Naval Hospital, Norfolk, Va.

Surgeon Wm. Bird Powell, to the Naval Hospital, Chelsea, Mass.

Boatswain Joseph Lewis and Sailmaker James G. Gallagher, to the *Wyoming*.

Paymaster A. W. Russell, to the receiving ship *North Carolina*.

Lieut. Robert Boyd, to the *New Hampshire*.

Commodore Henry S. Ide, to the Philadelphia Navy Yard.

Lieutenant-Commander Edward Barfield, to the *Sonoma*.

Gunner Joseph Swift, to the Norfolk Navy Yard.

Lieutenant-Commander Wm. Gibson, to the command of the naval reserve vessel, 346 Water street, New York.

Lieutenant-Commander Francis A. Bigelow, to the *Tuscarora*.

Assistant Surgeons Edward M. Stein and Henry M. Weiss, to examine for promotion.

Lieutenant Commander Fleigat B. Lowry, to the command of the *Sonoma*.

Second Assistant Engineer Orland Linsley, to the *Delaware*.

Second Assistant Engineer Edward Wilson, to the command of the *Cayuga*.

Lieutenant H. S. Stuyvesant, to the *Minnesota*.

Lieutenant Wm. Gibson, to the Naval Academy, Portsmouth, N. H.

Carpenter Wm. D. Jenkins, to the New York Navy Yard.

Lieutenant-Commander Wm. Budd, to the command of the *Pawnee*.

Paymaster George L. Davis, to the receiving ship *Clara Dolsen*.

Paymaster George Slamin, to report for special duty to the assistant paymaster of pay officer.

Lieutenant Commander Edward P. Lull, to the *Canandaigua*, Baltimore, Md.

Lieutenant Commander Joseph E. De Haven, to the command of the *Ridgeway* at New York.

Lieutenant-Commander Henry A. Adams, to duty in the North Atlantic Blockading Squadron.

Acting Ensign G. H. Cassell, to the *Brooklyn*.

Commodore Wm. Mervine, to the temporary command of the *New Hampshire*, at Portsmouth, N. H.

Lieutenant-Commander Edward B. Harrison, to duty at *Providence*, R. I.

First Assistant Engineer Edward Farmer, to the *Alabama*, at Portsmouth, N. H.

Assistant Surgeon F. R. A. Lowe, to the Naval Academy.

Sailmaker George C. Berrum, to the receiving ship *North Carolina*.

Lieutenant-Col. Jno. Harris, to the Marine Barracks, Washington.

Assistant Surgeons John S. Rumney and Joseph F. Cottrell, to report for the examining board at the Philadelphia Navy Yard.

Lieutenant H. Farquhar, to the *Santiago de Cuba*, at Boston.

Carpenter Wm. Hall, to the receiving vessel at the *Santiago de Cuba*.

Commander Daniel Ammen, to take charge of a division of vessels of the Western Gulf Blockading Squadron, and other following them to Acting Rear-Admiral Charles H. Bell, to return to New York.

Boatswain Thomas C. Bell, to outfit in tugs charge of a draft of men to Panama, by California, steamer of the 25th inst., and to return to New York, there to Acting Rear-Admiral Charles H. Bell, to return to New York, and proceed to Washington, and resume duties at the Bureau of Provisions and Clothing.

DETACHED.

Assistant Surgeon D. M. Kilmer, from the West Gulf Squadron and waiting orders.

Lieut. Wm. H. Douglass, from the *Rhode Island* and settling accounts.

Commander Daniel Ammen, from temporary command of the Mississippi and waiting orders.

surgeon J. A. Lockwood, from the Pacific Squadron, as fleet surgeon, on account of ill-health, and waiting orders.

Lieutenant H. H. Piersall, and assistant surgeon Samuel O. Webber, from the whale Island and waiting orders.

Acting Ensign Douglass B. Cassell, from the *Rhode Island* and ordered to the *Alabama*.

Acting Ensign Douglass B. Cassell's orders to the *Alabama* revoked and waiting orders.

Assistant Paymaster C. S. Perley, from the *Marietanna* and ordered North.

Ensign G. M. Brown, from the West Gulf Squadron and waiting orders.

Third Assistant Engineer Wm. B. Matthews, from the Omaha and ordered North.

Lieutenant Commander Wm. H. Dana, from the command of the Cayuga and ordered North.

Lieutenant Commander George H. Perkins, from the command of the Sonoma and ordered North.

Lieutenant Commander Henry A. Adams, from ordnance duty at Philadelphia and ordered to the command of the Seneca.

Third Assistant Engineer Wm. Van Sweering, from the *Rhode Island*, and ordered to the Juniata.

Lieutenant Commander George A. Bigelow, from the command of the Juniata, and ordered to the Sonoma.

Second Assistant Engineer George D. Emmons, from the Catskill, and ordered North.

Ensign G. H. Maxwell, from the West Gulf Squadron, and waiting orders.

Lieutenant Commander Edward Simpson, from the command of the Pawnee, and ordered North.

Paymaster Rowan Hall, from special duty at New York, and ordered to the New Ironsides.

Captain Wm. Rogers Taylor, from special duty, and waiting orders.

Commander James H Strong, from the command of the *Penacola*, and waiting orders.

Lieutenant G. V. Menkle and F. W. Sumner, Surgeon Philip Lansdale, assistant surgeon Wm. H. Dorsey, and acting assistant surgeon W. Forbes, Second Assistant Engineers C. M. Bernhard and A. H. Allen, Acting Third Assistant Engineers J. E. Wilson, Wm. Bell, and Carpenter Joseph R. Cox, from the Receiving ship *North Carolina*, and ordered to the *Pawnee*.

Commander R. H. Wyman, from the command of the Receiving ship *North Carolina*, and ordered to the command of the Sonoma.

Master Wm. Wallace, from special duty at New York, and ordered to the New Ironsides.

Captain Wm. Rogers Taylor, from special duty, and waiting orders.

Commander James H Strong, from the command of the *Penacola*, and waiting orders.

Lieutenant G. V. Menkle and F. W. Sumner, Surgeon Philip Lansdale, assistant surgeon Wm. H. Dorsey, and acting assistant surgeon W. Forbes, Second Assistant Engineers C. M. Bernhard and A. H. Allen, Acting Third Assistant Engineers J. E. Wilson, Wm. Bell, and Carpenter Joseph R. Cox, from the Receiving ship *North Carolina*, and ordered to the *Pawnee*.

Commander R. H. Wyman, from the command of the Receiving ship *North Carolina*, and ordered to the command of the Sonoma.

Master Wm. Wallace, from special duty at New York, and ordered to the New Ironsides.

Lieutenant Commander Edward Simpson, from the command of the Pawnee, and ordered North.

Paymaster Rowan Hall

We call the attention of officers of the Army and Navy to the advertisement of the New England Mutual Life Insurance Company of Boston, which is on the outside of our paper. This Company has been in existence more than twenty years, and is well known as occupying a high position for plain dealing and promptness in the settlement of claims. The financial position of the company is such as to secure it the endorsement of those who are well informed upon insurance matters. Their Army and Naval risks have been divided into two classes, combatants and non-combatants, the rates for which are proportionate to the risks incurred in each class. It must be evident that a larger amount can be taken by a company upon a non-combatant, and at the same rate, than upon an officer or private whose duties lead him into the very heat of battle. The payments for the extra risks may be made quarterly by the officers, relying upon pay at stated periods, or may meet their dues with regularity. Any information concerning the detail of the company's operation can be had by correspondence with the agent in this city, or the officers in Boston.

MARRIED.

[Announcements of marriages should be paid for at the rate of fifty cents each.]

PARKE—WARE.—In English Neighborhood, N. J., on Monday, May 23d, at the residence of the bride's mother, by Rev. A. R. Taylor, D.D., Lieutenant Edward Parke, Jr., Assistant, U. S. Sanitary Commission, youngest daughter of the late John C. Ware, M.D., of Philadelphia, Pa.

GILLESPIE—GILLESPIE.—In Fredericksburg, at the residence of the bride's father, F. G. Gillespie, Esq., on Monday, May 23d, Major Alexander J. Gillespie, A. A. G., to Miss Fannie D. Gillespie.—Fort Gillespie Gazette, D. C., Gillespie.

RUSSELL—GRISWOLD.—In Hopkinton (R. I.), Wednesday, 4th inst., by Rev. Dr. Bullock, Lieutenant Edward S. Russell, 2d R. I. Cavalry, to Miss Mary Griswold, daughter of William Brabner, Esq., all of that city.

SMITH—WHITNEY.—In Boston, May 25th, by Rev. J. W. Chickering, D.D., Lieutenant Charles Smith, 2d Mass. Cavalry, to Miss Mary, daughter of Isaiah Whitney, Esq., all of Boston.

WHITNEY—GARDNER.—At the Parish church of Bromley, England, on Wednesday, April 6th, by Rev. Frederick Gardner, Esq., uncle of the bride, Major Russell Whitney, Esq., Commissary of M. S. Missouri, to Miss Harriet Gardner, third daughter of the late Major-General Carpenter, of the Royal Artillery.

PITCHER—HOWARD.—In Baltimore, on Thursday, May 26th, by Rev. F. Pitcher, Frank G. Pitcher, of Utica, N. Y., to Miss Theresa A. Howard, of Baltimore.

DAVIS—LOWE.—In the English church, Bermuda, on Tuesday, 26th April, Captain Francis Davis, 2d Battalion 60th Rifles, to Miss S. S. Lowe, of New York.

HARVEY—GRIFFIN.—At Fort Gaines, April 14th, by Rev. S. Cooke, D.D., Lieutenant Alexander Harvey to Miss Sara Griffin.

DIED.

BLAISDELL—Killed, in the battle of the Wilderness, on Friday, the 6th of June, Captain Lorenzo O. Blaisdell, 16th Regiment U. S. Infantry, and Aide-de-Camp to Major-General Gouverneur K. Warren. Captain Blaisdell had participated in the various battles of the Army of the Potomac since the commencement of the campaign, under Major-General Banks, and they sincerely mourn for him as one who "had done what he could."

FURLOW.—On Sunday, May 8th, at St. James' Hospital, New Orleans, Private Alfred Furlow, Company A, 4th Regiment Veterans, from Sergeant S. Y. Furlow, in the 68th year of his age.

KEYES.—On May 15th, of typhoid fever, at Officers' Hospital, Rochester, Penn., Lieutenant Edward Keyes, 2d Minnesota Volunteer Cavalry.

MORGAN.—At Hastings Springs, May 6th, Anna Maria J. Morgan, wife of Lieutenant-Colonel Thomas Morgan, Commissary, U.S.A., and daughter of Dr. S. G. J. Decamp, U.S.A.

LAY.—On May 18th, Lieutenant Henry Lay, 2d U. S. Infantry, of wounds received on the previous day in battle near Spottsylvania Court House.

ADVERTISEMENTS.

Advertisements of a character suited to the columns of the Army and Navy Journal, will be inserted, in a limited extent, at twenty cents a line each insertion. Advertisers are requested to make their favors as short as possible.

"THE PEN IS MIGHTIER THAN THE SWORD."

THE GOLD PEN—THE REPOSE OF ALL PENS.

MORTON'S GOLD PENS.

The best Pens in the World.

On receipt of any of the following sums in Cash, Post-Office Stamps, or Postage Currency, the Pens will be sent, as directed, a Gold Pen or Pens—*selecting the same according to description:*

GOLD PENS WITHOUT CASES.

For 25 cents, the Magic Pen; for 38 cents, the Magic Pen, and Pencil; for 50 cents, Magic Pencil; for 75 cents, the Elegant Pen; and for $1.00, the Excelsior Pen.

The Magic Pens have a Gold Pencil, tipped with Iridosmin Points, the average wear of every one of which will far outlast any Gold Pen in the Gold Pens; although they are unwarranted, and therefore, sold cheaper.

MORTON'S WARRANTED PENS

The name "A. Morton," "Number Two," and "Quill-ty," are stamped on the following Pens, and the Points are warranted for six months, unless otherwise mentioned.

The Numbers indicate size only; No. 1 being the smallest, No. 9 the largest, adapted for the pocket; No. 4 the coarsest, and No. 1 the finest, except the Gold Pen, for the stub.

Large Print Pens, suitable for all size and qualities. Stout Nibs of Numbers 4, 5, 6 and 7, and made only to order.

The Long and Short Nibs are fine pointed; the Medium Nibs are fine pointed, but not quite so fine. The engravings are fac-similies of the sizes and styles.

For 50 cts. No. 1 Pen, 1st quality; or a No. 2 Pen, 1st quality;

For 61 cts. No. 2 Pen, 1st quality; or a No. 3 Pen, 1st quality; or a No. 4 Pen, 1st quality;

For 75 cts. No. 3 Pen, 1st quality; or a No. 4 Pen, 1st quality; or a No. 5 Pen, 1st quality;

For $1 00 No. 4 Pen; $1 25 No. 5 Pen; $1 50 No. 6 Pen, 1st quality;

For $2 00 No. 6 Pen; $2 75 No. 7 Pen; $3 25 No. 8 Pen; $4 00 No. 9 Pen, 1st quality;

THE 14 CT. GOLD PENS, IN SILVER EXTENSION CASES, WITH PENCILS.

For $1 00 No. 1 Pen, 1st quality; or a No. 2 Pen, 2d quality;

For $1 25 No. 2 Pen, 1st quality; or a No. 3 Pen, 2d quality; or a No. 4 Pen, 3d quality.

For $1 50 No. 3 Pen, 1st quality; or a No. 4 Pen, 2d quality; or a No. 5 Pen, 3d quality.

For $2 00 No. 4 Pen, 1st quality; or a No. 5 Pen, 2d quality; or a No. 6 Pen, 3d quality.

For $2 50 No. 5 Pen, 1st quality; or a No. 6 Pen, 2d quality;

For $3 00 No. 6 Pen, 1st quality.

GOLD PENS ALL FIRST QUALITY IN SILVER EXTENSION CASES, WITH PENCILS.

For $2 50 No. 4 Pen; For $2 75 No. 5 Pen; For $3 00 No. 6 Pen;

For $4 00 No. 7 Pen; For $5 00 No. 8 Pen; and for $6 00 No. 9 Pen;

The "1st quality" are pointed with the very best Iridosmin Points, and are the finest pens made. The "2d quality" are tipped with the slightest imperfection which does not impair the usefulness of the pen.

The "3d quality" are top-sawn to any Pens made. The "4th quality" are split Pens.

The "2d quality" he intends shall equal in respect any 1st quality pen made by any other house, and the only true economizing any Gold Pen made in the world.

In regard to the Cheap Gold Pens, he begs leave to say that, after many experiments, he has found a Pencil Machine he could not have made as Good Writing Pencils, and therefore, he does not sell them. He has been furnished gratuitously

To all customers specify the Numbers and "Name" or the "Number" and "Quality" of the Pens needed, and in ordering a Pencil, state whether for Gold, Silver and for Smoker, more or fine.

Pens and Pencils sent by mail or registered letters are at my risk; and I will pay the penalty exacted to charge for registering, in addition to the price of articles ordered. Pens sent by express at my expense.

Parties sending Gold or Silver will be allowed the full market value for the same.

TO CLUBS.—A Discount of 16 per cent. will be allowed to Clubs of 5 or more Pens, and of 25 per cent. on $50, if sent to one address at one time.

ADDRESS,

No. 25 Maiden Lane, New York.

706 BROADWAY, 706
CRONDALL'S PATENT CORK MATTRESSES.
CRONDALL'S PATENT CORK BEDS.

Are now everywhere introduced. For the Army and Navy, these Mattresses are a luxurious article, far less than half cost of hair, the most durable, healthy, cleanly, comfortable and elastic bed in use. In the recent Fenian Fair, in Dublin, Ireland, they received the highest premium, over seventy competitors. They are made in thickness for Navy Officers and Soldiers. They can be shipped to any part of the country, and transported and in entirety free from moisture or vermin.

ANTHRACITE COAL FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF EQUIPMENT AND RECRUITING,
May 24, 1864.

Sealed proposals for furnishing Anthracite Coal for the Navy, to be delivered during the fiscal year ending June 30th, 1865, will be received at this Bureau until 10 A.M., 18th June, 1864.

These proposals are to be addressed, "Proposals for Anthracite Coal for Steamers," and must state the place of delivery, and the time of delivery in future.

The other point for the delivery of 100,000 tons, of 2,240 pounds.

Coal to be equal to the best Bank Mountain or Black Heath, or of a kind equal to them in all respects, to be passed by proper Navy Inspectors, and to be determined by a Board appointed by the Secretary of the Navy after the receipt of the coal.

The name of the coal proposed to be furnished is to be stated in the bid.

It is to be delivered in lumps of suitable size for the consumption of furnaces, all inferior pieces and coal free from impurities, sunken—of which the contractor will be required to furnish a sufficient quantity to be satisfactory, and to subject to such inspection as the quality and quantity of the coal delivered may direct. The coal must in all respects be satisfactory to the proper Government Inspectors, and approved by the Bureau, who will have the right of peremptory rejection.

The coal to be delivered on board vessels, at a wharf in the port of Philadelphia as may be designated by the Navy Agent, in such quantities and at such times as, in the opinion of the Bureau, the exigencies of the service may require; consideration will not be issued or reported ready to receive cargo; forbidding, however, more than 1,000 tons per day, to be distributed to each vessel, as may be directed, until the whole is delivered.

Proposals will likewise be received for the delivery of the same coal at the navy yard, New York, to be delivered in the port of New York, on board vessels, as above specified.

In the case of failure to deliver the coal in proper quantity, or the proper quality, and at the proper time and place, the Bureau will reserve in the contract the right to purchase such coal, in the open market, at risk and expense, that which may seem necessary to supply the deficiency.

Any demurrage, or other charges to which the United States Inspectors may be subjected, are to be the penalty delivery of the coal by the contractors, or their agents, beyond the time fixed.

The price must be for the coal delivered on board vessels, at the wharf designated, including all expenses, in the contractor's risk and expense, and without extra charge for lighterage.

The offer, as required by law, must be accompanied by the guarantee, signed by one or more responsible persons, that if the offer be accepted a contract with the seller or bidder will, if his or their bid be accepted, be entered into by the bidder, and bonds with sureties prescribed by the Bureau, with good and sufficient sureties, will be executed by the proposers.

No proposition will be considered unless accompanied by such guarantee; and the Department reserves the right to reject all the offers, it considered to be to the interest of the service to do so.

Two or more sureties each in a sum equal to the amount proposed to be paid, will be required to sign the contract, and their responsibility will be certified by a United States District Attorney, Collector, or Assistant Attorney, Collector, or Navy Agent.

The contract will be executed within twenty days next—will be withheld from the amounts of all payments to the contractor, to be set by the Bureau, or by authority of the Secretary of the Navy, until the contract shall have been in all respects complied with; and the remaining eighty per cent., or other proportion, will be paid upon each bill, when a proper certificate is furnished by the inspector, and the Navy Agent, that the coal has been duly received by such Agents as the contractor may name, when such Agents are not present at the place where the coal is received by the Secretary of the Treasury.

In case of failure to comply with any part of delivery to make to the delivery of the coal—to the quality of the coal—to the time of delivery—to the place of delivery—to the quantity of the coal—the contractor and his sureties will forfeit and pay to the United States the sum of money named in the contract as the amounts to be paid during the time such failure to comply with any part of the contract shall exist.

Proposals must be addressed to the Secretary of the Navy, and endorsed "Proposals for Anthracite Coal for Steamers," and delivered to the Navy Department, Washington, D. C.

Should any (or any) offer be accepted, I (or we) pledge myself (ourselves) ——, and that the contract may be forwarded to —— for signatures and certification.

Dated, ——.

(Signed), A. B.

FORM OF GUARANTY.

We, the undersigned residents of ——, in the State of ——, and of —— in the State of ——, hereby guarantee that the above bid is made in good faith, and that the contract, if awarded to the foregoing bid or bidder, will be entered into by the bidder, and after the receipt of the contract at ——, the bonds, with sufficient sureties, for the faithful execution and delivery of the anthracite coal proposed, in compliance with the terms of the advertisement of the 24th May, 1864, hereto appended, and under which it was made, and to which the guarantee shall be in force, will be given; the contract aforesaid, we guarantee to make good and to secure between the offer of the said —— and that which may be accepted.

(Date), C. D.

(Date), E. F.

I hereby certify that, to the best of my knowledge and belief, the above-named guarantors, and —— are responsible persons.

(Date), G. H.

To be signed by the United States District Attorney, United States District Attorney, Collector, or Navy Agent.

NEW MUSIC.—"THE DYING SOLDIER," one of the sweetest songs ever published.
Sheet—Here you can hear our darling
Do upon the battle field,
As from his tent we stand and listen
Have you come your boy to shield?
Chorus—Mother, Mother, Mother, Mother," a very exciting and beautiful song, suggested by seeing a little fatherless boy of five years old, standing beside his mother through her tears, said, "His hand is gone, mamma, but mother."
The above songs are from the pen of the popular author, Mrs. Fairbrother, and are perfect gems in their line. Mailed free. HORACE WATERS, Publisher, No. 481 Broadway, New York.

METALLIC COLLARS.
METALLIC COLLARS.
METALLIC COLLARS.

The only Collars made in metal furnishing a substitute for linen now manufactured by the American Metallic Collar Company.
The mildness, lightness, durability, pliability and cheapness of this article, commend it to all.
Any collar cleaned with a cloth and water, they become indispensable necessity to the traveller and sojourner, and are superseding the expensive linen and paper collars.
Orders from the trade solicited.
Metallic Collar sent by mail, prepaid, upon receipt of twenty-five cents for a sample, or a dozen for twenty-five cents for a "Choker," to

TIFFANY & CO.,

MANUFACTURERS OF RIFLES.

In consequence of the numerous applications which I have received from the public, many of my friends and customers, for the privilege of my services to the public as an Agent for the purchase of Arms, and the difficulty which I find myself interested to any particular arm, and having made such arrangements with the principal manufacturers as declares that I can supply purchasers with arms of any pattern that is in the market, I will select for any one who loves the choice to me, or will procure a gun of any specified pattern and prove its capacity by such tests as will enable me to certify to its merits. It is proper to state that the unprecedented demand for rifles renders it impossible to procure immediately the best arms, but I trust that in a few months I will enable me to do so at the earliest possible date, and consequently in the order of their application. Address H. W. S. CLEVELAND, Box 1610, New York.

THE CAMPAIGN IN VIRGINIA.

OO various and conflicting are the statements respecting the position of our forces in Virginia, that it is impossible to understand the battles without first determining the situation of the hostile lines. On the morning, then, of Tuesday, May 31st, the headquarters of the Army were between Crump's Creek, and Hawes' Shop, about five miles southeast of Hanover Court-House, and less than that distance west of Hanovertown. West of this point, and extending at first southerly and then southeasterly, so as to face westerly on its right, and southwesterly on its left, ran our line of battle, stretching across Tolopatemoy Creek, full six miles in length. This latter stream, now made famous, like Hawes' Shop, by two campaigns, is an insignificant creek, its main portion running twelve or fifteen miles northeasterly into the Pamunkey, where it debouches about half way between Hanovertown and Newcastle. But a small tributary near its head waters and in front of Shady Grove, runs southeast, before the main stream turns sharply to the northeast. And, on the westerly bank of this smaller creek, the enemy were strongly posted, and had fought on Monday.

The Rebel line closely followed ours in general direction. It was designed to cover the Chickahominy on its right and the Virginia Central Railroad and the Chickahominy on its left. This historic stream is naturally the outer line of defence for Richmond on the northeast side, and every attempt of ours to approach it has been severely contested in the campaign, in this respect, differing from that of McClellan, who bridged the same river without serious difficulty. Most of the ground between the Chickahominy and Pamunkey is open, is high, and dry, and favorable for manœuvre. South of it are the swamps and wooded morasses, too well-known to require description. But even on the northerly side, the ground is, as would be expected, marshy for some distance; afterwards becoming more bold and ridgy, with here and there a fringe of woods. Parallel to the general course of the river, and a mile distant therefrom, a little more or less, runs a road or series of roads, extending from Winston's Bridge on the north above Atlee's, to Bottom Bridge on the south, and beyond the latter. Shady Grove and Mechanicsville are on this road. Still further from the river is another parallel series of roads, also parallel to it, on which Walnut Grove, Cold Harbor and Gaines' Mill are situated. In one word, the Rebel purpose was to hold the river, and, as far as possible, the parallel roads. They resist us stoutly at Cold Harbor that they may keep the interior roads for hurrying and massing their troops, and, if driven back new and then, they have not yet been forced to cross to the southerly bank of the Chickahominy.

To secure, therefore, the railroad and their supply roads on the left, and the river on the right, Lee's main line extended, we may suppose, and perhaps still extends, from near Atlee's Station to Gaines' Mills and Cold Harbor. His cavalry, and perhaps some infanty supports, are thrown out as far on his left as Hanover Court-House, and on the right to Bottom Bridge, facilities having long since been prepared for transferring troops from the centre of his line to its extremities, with great celerity.

The river, hitherto running rather southerly than easterly, at Meadow Bridge turns more sharply to the east, and this fact gives to the Rebel line, and, by consequence, to our line, the shape already noticed. Finally, on Tuesday, our line ran as follows, from right to left:—Wright's Sixth corps, Hancock's Second, Burnside's Ninth, Warren's Fifth. The enemy's line ran as follows, from left to right:—A. P. Hill, Longstreet, Ewell. How Beauregard and Breckinridge were disposed, will be seen hereafter.

The severe fighting of Monday, May 30th, already recorded, first by Warren, and afterwards by Burnside and Hancock, was brought on by mutual reconnoissances on our's and the enemy's part, and accomplished nothing except to develope the strength of the enemy's position.

Early Tuesday morning, the Second corps moved out, and Birney's division on the right rushed at and carried a breastwork of the enemy on the southerly side of Tolopotamoy Creek. The position was short, and our loss only about 30 men. About forty prisoners, of Breckinridge's command, were captured. It was the enemy's outer line of entrenchments at this point, and was easily carried.

But General Grant's real purpose on Tuesday was again to try his favorite plan of shifting position by successively subtracting the corps holding the extreme right and sending them over to the left. Torbert's First division of Sheridan's cavalry was therefore dispatched to reconnoitre thoroughly the condition of the ground in the vicinity of Cold Harbor, and to hold it at all hazards, for the occupation of infantry. While there, they came against a part of Fitz Hugh Lee's cavalry, supported by Clingman's brigade of Hoke's North Carolina division. A sharp fight resulted, Merritt's regular cavalry opening, and Diven's and Custer's brigades quickly joining. Our forces were able to hold the desired ground. Meanwhile, Chapman's brigade of Wilson's Third cavalry division was successfully skirmishing with Young's brigade of Wade Hampton's command, on the other wing of the Army. Ledlie's brigade of Burnside's corps, also, came into a brief action with the enemy, and advanced its skirmish line. There was desultory firing through the day along the whole line.

WEDNESDAY'S BATTLE.

On Wednesday, June 1st, the cavalry fighting, with artillery firing, was resumed on both flanks. In front of Hancock, also, and elsewhere, there was heavy skirmishing. At Cold Harbor, the conflict lasted longest, as the enemy were determined to drive us out, and Sheridan's orders were to hold it. Hoke's division was completely repulsed by Sheridan's dismounted cavalry, fighting with carbines. McLaws' division then reinforced Hoke, and, other portions of Longstreet's corps joining subsequently, our further advance was checked about noon, the affair having been very creditable to our cavalrymen.

Soon after the close of the morning affair, Wright's long expected Sixth corps, which, detached from the right the previous night, had marched across from Shady Grove, arrived at the Cold Harbor cross roads, and deployed into line, as its subdivisions came up, on the right of the Gaines' Mill road, as follows:—Ricketts' Third division, which had had the advance in columns, forming; on the right, Russell's First division in the centre, Neill's Second on the left. Torbert and Gregg were at once relieved, with their cavalry. About 3 o'clock, Smith's Eighteenth corps, for whose arrival Wright had been waiting, came into the field. They had left the White-House for Newcastle, and, after this detour, made by mistake, were then ordered to march directly to Cold Harbor. Their march, like that of the Sixth corps, had been extremely severe, and extended over a greater distance, being about twenty-five miles. The men came up briskly, and the line of battle was formed with the Eighteenth corps on the right of the Sixth, the former in one line, the latter in four. When the Eighteenth had deployed, Martindale's division held the right, Brooks' the centre, and Devens' the left. Devens' joined on to Ricketts' of the Sixth.

Without stopping to rest the Eighteenth corps, a charge was ordered at once. In front was a ploughed field, two-thirds of a mile wide, and, beyond, a strip of pine forest, in which the enemy lay entrenched. The artillery on our left and rear fired very sharply for an hour, and at length, about 6 o'clock, the line dashed forward. In the centre, as already explained, were Devens' brigade of the Eighteenth corps and Ricketts' of the Sixth. These two divisions rushed forward across the ploughed land, through a patch of green plain, and into the woods, while a deadly storm of artillery and musketry raked their ranks. The charge of course was made at the run, and the men of both divisions dashed over the Rebel earthworks with great spirit, taking and holding their first line of rifle-pits and capturing about 600 prisoners. In this charge, Drake's First brigade, in the advance of Devens' division, was badly cut up, and, by the time they had reached the abattis and entanglements in the woods had hardly enough men left to surmount them. Barton's Second brigade at this critical juncture sprang forward, and, gallantly crossing the open under murderous fire, swept the obstacles, and carried the rifle-pits, capturing two hundred prisoners in them. The enemy, however, still held his line on our right, and began to enfilade the captured rifle trench. Accordingly, Henry's brigade of Brooges' division, Eighteenth corps, was sent in on the right of Barton, and, after a sharp struggle, effected a lodgment in the line. But it was soon found that a redoubt in the second line of the enemy completely commanded this position, and, amidst a heavy fire, Henry relinquished his position. Meanwhile, Martindale on the right and Russell and Neill on the left, led up their divisions, but without the good fortune of Ricketts and Devens. Russell's brigade suffered very severely and charged gallantly, with the General at their head.

During the night, the enemy, recognizing the importance of the position lost, made desperate efforts to regain it, and succeeded in annoying our troops in the rifle-pits with an enfilading fire. But their desperate charges were all repelled. The gallant conduct of Ricketts' division was promptly acknowledged in a letter of thanks from General Meade, which was over 6000; that of the enemy, probably very much less in killed and wounded, as he was behind breastworks. He lost, however, 600 prisoners. This was the rough introduction of the Eighteenth corps to the Army of the Potomac.

It must be remembered that our line now, after the movement of Wright and Smith, extended from Bethesda Church to Cold Harbor, and was maintained as follows, from right to left:—Hancock, Burnside, Warren, Smith, Wright. Cold Harbor, the left

extremity, is simply an old house, the Cold Harbor Tavern, at the junction of the important roads leading to the White-House on the east, Dispatch Station and Bottom Bridge on the South, Richmond via Gaines Mill on the west, and Hanovertown and Newcastle on the north. It is a point of some importance, and was fought out once before at the old battle of Gaines' Mills. The possession of the road thence to White-House, is quite desirable. Bethesda Church, the right of the line, is also a single building, an old structure, on the road from Hanovertown to Shady Grove, not far from the latter. Our whole line was probably at least eight miles long.

While the battle was going on at the left, there was hot work in front of the other corps. All day there was cannonading and musketry firing in the region of Bethesda Church. Towards night, after the battle had opened at Cold Harbor, the skirmishing grew brisker, and the artillery on both sides rapidly fired. The Fifth corps had our left, with Longstreet on its left. Cutter in the centre, and Griffin on the right. The Ninth corps held the centre, with Cuttenden on its left, Wilcox in the centre, and Potter on the right. The Second corps held the right, with Gibbon on the left, Barlow in the centre, and Birney on the extreme right. On the night, in the afternoon, there was a forward movement of Gibbon and Potter, probably with a view to cover an intended withdrawal of the Second corps from right to left, to follow the footsteps of the Sixth, already gone to extend our flank in that direction. The result was a rally of the Rebels in force and a determined attack towards evening on our whole line, as soon as the two divisions had fallen back. The enemy came on closely massed, and regardless of the gaps the artillery made. As soon as musketry was of avail, both parties delivered heavy volleys, our men being behind their works, dearly packed. Several distinct and desperate charges were made by the enemy, and it was late at night before they desisted, their retirement being succeeded by the advance of our men to their skirmish line. All three of the corps took part in the severe fighting. No authentic estimate is given of the losses at this part of the line, but 1000 will probably cover the number of casualties. The enemy here must have suffered as severely as our own troops did on the left, during the same night.

Taking the day through, it may be said to have resulted favorably for us, as we had gained, on the left, the possession of Cold Harbor, a point of considerable importance, not only in reference to subsequent crossing of the Chickahominy, but also as commanding the road to our base of supplies at White-House. The strenuous efforts of Beauregard and Longstreet had been directed to dislodging us from that position, but without avail.

On Wednesday night it was determined to follow up the occupation of Cold Harbor by a serious attempt to push the enemy across the Chickahominy and establish for ourselves a place of fording. Accordingly, on Wednesday night, the Second corps was drawn off from the right, and marched across the line to the extreme left, which it reached before Thursday noon, so as to form a massive power at that point. The attack was ordered for Thursday evening, but a very heavy thunder storm, with torrents of rain, prevented its execution, and gave the enemy a chance to perfect their defensive preparations, if indeed they needed any such work. The attack was ordered for dawn of Friday.

Meanwhile, on Thursday, there was considerable skirmishing along the line, but no general engagement. On the extreme left, General Gregg pushed out his cavalry to cover Hancock's corps, and succeeded in making connection after brisk artillery firing and skirmishing. General Tyler's brigade got still farther to the left, in the region of Bethel's Bridge. The whole affair lost us about thirty men.

On the night some changes were also made in position, with a view to massing our line down towards the left, contracting and strengthening it, and arranging it for the attack of the morrow. These movements caused lively skirmishing, and, at length, in the afternoon, the enemy charged the Fifth and Ninth corps just after they had left their breastworks. Ayres' and Bartlett's brigades of the Fifth were particularly exposed, and a severe fight followed, in which these two brigades suffered considerable loss. The loss in the Ninth corps was about 300, that of the Fifth still greater. The enemy were thoroughly repulsed, our artillery and infantry firing having deadly effect on their charging columns. The old positions were then retaken, the Ninth corps also remaining substantially on its former ground, instead of moving down to occupy the place of the Fifth. The enemy had interfered with our manœuvre, but had gained no other advantage.

FRIDAY'S BATTLE.

Friday morning at 4½ o'clock was the time at which the momentous assault was to commence. Our line was well massed and compact, moving as follows from right to left:—Burnside, Warren, Smith, Wright, Hancock, reaching from Tolopotomoy Creek to and across the road from Cold Harbor to the Chickahominy. The ground was level along the line, with woodlands, swamps, and open, our left being on a position a little elevated, and the Rebel line lying in a strip of woods and covering the series of roads parallel to the river, of which particular description has before been given. Promptly at the hour appointed, the skirmishers advanced, and very quickly the whole line was wrapped in the fire and smoke of terrific battle. Hancock, on the extreme left, had placed Gibbon on his right, with Barlow on the left, Birney being in reserve. The two divisions of Gibbon and Barlow dashed gallantly forward, across woodlands and underbrush, and emerged into an open space, swept by shot and shell, straight up the acclivity on which the Rebels had concentrated their men and artillery, as being the stronghold of their line. Nothing has eclipsed, in the conduct of the campaign, the gallantry of the divisions of Gibbon and Barlow, certainly nothing unless it be the charge of the same corps at Spottsylvania. They drove the troops of Breckinridge from the summit, and, for a brief moment, were masters of the position. But the enemy, knowing better than we the necessity of holding this point, commanding as it did the road to Dispatch Station, massed and hurled his second line, composed of A. P. Hill's corps, upon our victorious columns. The gallantry of our two divisions had carried them beyond the front of our line, and had already exposed them to a enfilading fire of artillery, which the enemy poured in with murderous effect, on seeing their entrenchments lost. Swept by this flank fire, and now overwhelmed in front, these divisions now fairly pushed out of the entrenchments, but not until they had captured a color and 300 prisoners, all secured and sent to the rear. Indeed, at one time, they were masters of many guns and double the prisoners, if only they could have been supported for a few minutes, or protected by a friendly cannonade. At length they withdrew, under deadly fire, but persistently halted and entrenched themselves where a little fallen back from the ridge, they were under partial cover, remaining all day fifty yards from the enemy's breastworks. Barlow's line had been formed with Miles's brigade on the right and Brooks' on the left, the other two supporting as a second line. Gibbon's was formed with Tyler's brigade on the right, Smith's (formerly Carroll's) in the centre, and Owen's on the left, McKean supporting in the rear. Some of Owen's men were so far advanced in the earthworks as to be swept off in a body before they could withdraw, when the retreat was ordered. One of the enemy's batteries was captured and was already nearly turned on the enemy, when he recovered his position.

With not less gallantry, at the same early hour, Wright's Sixth corps and Smith's Eighteenth assaulted with their entire force, and with an experience quite similar to that already detailed. Charging through the underbrush and across the open, they succeeded in carrying the first line of entrenchments; but it was only to be received by the murderous enfilading fire, with which all our most advanced brigades found their daring repaid. For a long time, these latter hung obstinately to their conquests, which, at length, were wrung from them, and they were forced back with great loss. But here, as on the left, our men held and entrenched a position considerably in advance of the starting point, close up to the enemy's works. Our artillery was here brought into rather more effective play than in front of Hancock. The Sixth and Eighteenth corps were mainly in single lines, except that Devens, of the latter, was held at first in reserve, with Martindale on the right and Brooks on the left, connecting with the Sixth corps, Devens afterwards being moved up to the right.

Meanwhile, on the right, the Fifth and Ninth corps pushed out their skirmishing lines to take part in the fray. Burnside opened a heavy cannonading, and kept it up through the morning, and, about noon, Warren made a fine charge at the enemy, with Griffin's division, quickly carrying his skirmishing line. But the brunt of the battle was not here. The movements of their two corps seem to show that the enemy must have left this part of his line, quickly transferring his troops over the road parallel to the Chickahominy, and hurling them on our right and right centre. Investigation showed evidence, indeed, of great haste in the departure, knapsacks and camp accoutrements being left, as when men are ordered to fall in and are instantly hurried away at the double-quick.

All day long the fierce cannonading continued, with the crackling fusilade of skirmishers, it seeming as if our Generals could not yet thoroughly convince themselves that the day was decided, and were waiting to try the issue of conflict once more. Our whole line was advanced close to the enemy—within fifty yards for a great portion of it—and, on the extreme left, McKean's gallant brigade of Gibbon's division were reported to be but fifteen yards from the enemy. Retreat and advance were equally impossible for these men, but they fought with invincible courage, receiving and repelling repeated charges, till, at last, such of them as were left, were safely withdrawn, protecting fire, from their perilous position. Both armies kept close to their breastworks, the exposure of a figure above the entrenchments, at that narrow distance, being surely fatal. About 8 o'clock, a furious assault was made upon Gibbon and Barlow, on the extreme left, and on the very front of the line, extending down also to the front of Wright's corps, and perhaps still further. Musketry and artillery at once raked the attacking columns with a fire as fatal as that which our troops had experienced in the morning. At last the enemy was repulsed, and, though firing broke out again still later, the day was substantially done. On our right there was also hard fighting between Wilson's Third division of cavalry and Hampton's command, without very important results to either side. The enemy's movement was probably to cover the withdrawal of his left, in his successful massing on his right.

From all that can be learned, Breckinridge occupied the enemy's right, with Beauregard on the right centre, Longstreet on the left centre, Ewell on the left, and Hill in reserve, but afterwards brought up to the right. From all these, as well as from Buckner's corps, we took prisoners. But our loss in prisoners probably exceeded theirs, some of our harvest men being cut off in the rifle-pits they had taken. Our whole loss is a matter hard to estimate, but is probably included between five and seven thousand. That of the enemy, of course, was hardly as severe, as he fought under great advantages. Artillery on both sides was rapidly plied through the day. Our men exhibited generally most admirable gallantry.

SATURDAY TO WEDNESDAY.

Friday's battle, then, had, on the whole, disappointed our hopes. The enemy had been found too strongly posted for us to carry his works, and all efforts to cross the Chickahominy at that point had been repelled. But there was no disposition to retreat. Retrenching in position was the order of Saturday, and, accordingly, with whatever tools could be procured, if not with spades, then with anything else that would *scoop*, our men busily prosecuted the erection of temporary breastworks. In exposed positions, this work could only be carried on at night, the enemy's sharpshooters being very busy and picking our men and officers with fatal dexterity of fire. Our own marksmen retorted wherever practicable, and desultory skirmishing resounded along the line all through the day. To appreciate the situation of the parties, it must be remembered that the hostile lines were separated, for the most part, by distances ranging from fifty to one hundred and fifty yards. The position of the corps remained substantially as on Friday. Artillery firing, also, was kept up occasionally, through the day, from both sides.

About nine o'clock on Saturday night the enemy made a fierce attack upon Hancock, Wright, and Smith, but, after a desperate struggle, and with severe loss, they were repulsed. The fighting at such short range may well be supposed destructive to the attacking party, and the enemy's loss is reported to

reach nearly a thousand. The object was probably a reconnoissance, the enemy being ill-disposed to allow us to approach to the distance of forty or fifty yards, without resistance. He withdrew his left, however, from BURNSIDE's front, leaving only a skirmish line near Bethesda Church, and concentrating a force at and below Bottom's Bridge, fortifying on both sides of the river.

Sunday, with its fervent heat, renewed the scenes of the preceding day. Our line kept close up to the rebel entrenchments, and it was the part of prudence to keep quiet in the rifle-pits. The fire of the enemy's sharpshooters was constant, and, to many of our men, fatal. Staff officers and artillerymen were considerably exposed. The morning and noon were disturbed constantly by this desultory rattle of musketry. Meanwhile, entrenching went on, when practicable, and the face of the region was becoming greatly changed by the mounds and rifle pits, running in every direction. In the evening commissary supplies and reinforcements of troops arrived from White-House.

Just after dark the enemy made a fierce rush at SMITH's brigade of GIBBON's Second division of HANCOCK's corps. The white shoulder was covered by a dense fog, which must have reminded SMITH's corps of the impenetrable mist of that "blue Monday," under cover of which BEAUREGARD made his slashing and successful attack on them while under General BUTLER's command in the Peninsula. This time, however, BEAUREGARD was not so successful. It was but a moment's run from his picket line to ours, but no sooner was the hostile motion perceived than the alarm was rapidly given, and GIBBON's men, springing to their arms, greeted their foe with a deadly hail of infantry fire. The struggle began and continued briskly, but in an hour was all over, the enemy retiring discomfited to his works, with a loss at that point as disproportionately great as ours of Friday. The speedy repulse administered under circumstances so favorable for attack, is worthy of praise. The fierce discharges of musketry were accompanied by the roar of artillery and cohorn mortars. The assault broke out first along the front of RUSSELL's division of the Sixth corps, and was here as gallantly checked. About the same time, BIRNEY moved his division from position in partial reserve to the left of BARLOW, and the extreme left of the line, to guard against flanking, SHERIDAN still holding the extreme left, etc and beyond the road to Dispatch Station. While the engagement lasted, it was very fierce and impetuous. The enemy were so determined to surprise us that a part of them came creeping up to the entrenchments on hands and knees. The brigades adjoining the ones attacked, in both the Sixth and Second corps, kept up a heavy fire from their entrenchments.

Monday and Tuesday were like Sunday—with the deadly picket firing, the cautious manœuvring and change of disposition in brigades or larger bodies of troops, and the work of entrenching. On Monday afternoon, there was some unimportant artillery firing in front of LEDLIE's brigade of the Ninth corps, and also in front of GRIFFIN in the Fifth corps. On the left, according to official dispatches, a hundred picked men of the enemy made a rush to find out what was the meaning of HANCOCK's advancing siege lines, but were quickly driven back with severe loss. At midnight, an attack—the *fifth* successive night assault of the rebels—was made on BURNSIDE, but handsomely repulsed.

The proximity of the lines since Friday, has left that day's battle-field disputed ground, and the men since killed and wounded have in a great measure been left on the field, the dead unburied, and the wounded suffering. The rifles of both parties have covered the ground, and kill anyman bold enough to venture upon it. Accordingly, several letters have passed between General GRANT and LEE on this subject, and two flags have gone from the former to the latter; but with what results is not yet known.

The formation and position of our line, as well as those of the enemy's, remain pretty nearly as already described. But the Fifth corps has been detached from its former ground on the right centre, and moved out to rear and reserve, with intent, we should surmise, to be sent in on the left in the event of more fighting. The gap has necessitated, of course, the transfer of the Ninth, our extreme right, down to the post still held occupied by the Fifth corps. And so with the pen, the field of war looks more quiescent for a moment, than at the close of any previous chapter in our record of the campaign.

FROM BERMUDA HUNDRED.

AFTER the departure of General SMITH, with his Eighteenth corps, General BUTLER drew his lines in a little closer, and has been perforce comparatively quiet. There has been more or less cannonading on either side, but it was principally "sound and fury, signifying nothing." The correspondents, indeed, at one time kept up a brisk daily fire of reports of "severe battles—the enemy repulsed with prodigious slaughter," but the news regularly followed that "to-yesterday's engagement, nobody was hurt on either side." The gentlemen of the press down that way must have a care! That style of reporting has been patented for the "Department of the Gulf."

On May 30th and 31st the enemy made a powder-wasting demonstration against our lines, and also skirmished inefficiently on the latter day in the neighborhood of Spring Hill on the Appomattox opposite Point of Rocks, where General HINKS commands. General TERRY easily held the lines in front, and our artillery replied with considerable vigor and accuracy. The firing lasted with greater or less vigor during the day, but no assault was attempted by the enemy, though his troops were at one time pushed forward. Our gunboats added to the general roar of the day.

On the morning of Wednesday, June 1st, a heavy fire was opened on the right centre of our line, but was silenced in two hours, with a loss of only about thirty men on our side, nearly all of them wounded. On Wednesday night the enemy attacked again at the same point, it being the best for their purpose, and the firing continued some time, with slight loss. On Thursday again, the artillery firing was re-opened, still on our right and right centre, and a partial charge being made on our skirmish line, a number of our men were captured. On the left, also, there was an attack, and our picket line was temporarily forced back here and there. The fighting was quite brisk on both sides. On the left, the 22d South Carolina charged our lines, but its colonel was killed, and a lieutenant with twenty or thirty men made prisoners. The Rebels were also repulsed with severe loss. Thursday's engagement was the principal event of the week. Our skirmish line was speedily reinforced and established, and since then all has been comparatively quiet.

OPERATIONS OF GENERAL SHERMAN.

THE hasty dispatches from the West—which we gave last week, for what they were worth—outrun the truth in their report that General SHERMAN had advanced as far as the Chattahoochee on his way to Atlanta. The latest reliable advices report him as still manœuvring for that position in face of earnest opposition on the part of JOHNSTON, who is reported by the Rebel papers to have at length reached the vicinity of the position which he has selected for the final passage at arms for the possession of Atlanta. On his retreat he has been able apparently to gather some additions to his force and shows a better disposition than heretofore to resist any further advance. To meet the flanking movement on Marietta by way of Dallas, the Rebels joined battle with General MCPHERSON one day the latter place, on Thursday, the 26th ult., moving around to the Dallas and Marietta road to confront our lines, threatening their left flank and rear. On the morning of the 27th our right under MCPHERSON rested on Dallas, THOMAS, HOOKER and SCHOFIELD extending to the left and further toward the east. The Rebel position at the same time, as given by the Atlanta papers, with their right resting on the road from Ackworth to Dallas, at a point about three miles northeast from New-Hope Church (New-Hope Church is some four miles north-east of Dallas), and from thence running nearly west toward Dallas. The position held by us was gained at the expense of a sharp fight on the 25th and the 27th, taking advantage of the shifting of our lines. The Rebels made a succession of assaults at different points, but were unable to seriously disturb our lines, our troops defending themselves behind extemporized earthworks. On Saturday, the 28th of May, the fight was renewed and continued through the day. The accounts we receive of this engagement are too incomplete to enable us to give details. As was stated in the dispatch from MR. STANTON last week, the Rebels were driven back with heavy loss.

The intention of General SHERMAN was to attempt a movement by the left flank on the night of the 29th. This design was interfered with by an attack upon our right centre and right by the Rebels, who had learned of or suspected the contemplated movement. On the 1st of June, however, as the Secretary of War reports, MCPHERSON moved up from Dallas to a point in front of the enemy at New Hope Church. On Thursday, June 2d, SCHOFIELD and HOOKER, having been shifted to the extreme left, pushed forward Marietta. At the same time STONEMAN's and GARRARD's cavalry were sent to Allatoona pass which they reached and held possession of. These movements, the dispatch says, have secured the pass, which was considered a formidable one. A later dispatch from General SHERMAN, dated June 4th, eight, A. M., thirteen miles west of Marietta, reports that his left is now well around, covering all roads from the south to the railroad about Ackworth. His cavalry has been in Ackworth, and occupies in force all the Allatoona pass.

The possession of the pass will enable General SHERMAN to shut the door against an attack from the rear, while he continues his advance into Georgia.

We have thus as will be seen, advanced by successive stages through the mountain region of Northern Georgia to the outlying peaks of the Blue Ridge, and beyond which lie the fertile plains of Central Georgia—the granary of the Confederacy. We may well believe the statement of the Rebel papers that JOHNSTON in spite of his retreats contemplates serious resistance here.

OTHER OPERATIONS.

FROM the Shenandoah we get news of a decided success achieved on the 5th of June by General HUNTER over General W. E. JONES, near Mount Crawford, about 12 miles beyond Staunton. General JONES was killed, and his successor was driven back to Waynesboro, to the mountains near Charlottsville. No particulars are given, but the enemy acknowledges a defeat.

Charleston is again looming up into prominence. Our forces are reported to be at Seessionville, seriously threatening Charleston. Not long since, it will be remembered, the iron-clads once more pounded at SUMTER. Affairs in this direction will be under the able charge of Major-General FOSTER, who assumed command of the Department of the South on the 26th ult. The Navy tug-boat *Columbine* was captured on the 23d on the St. John's River, Florida, with two rifled guns and 26 men. The transport *Boston* was destroyed by the Rebels on the 25th on Ashepoo River, in the Hilton Head district.

Rebel guerrillas are very active in Southeastern Missouri and Arkansas, and annoy our boats on the rivers in those sections. General STEELE captured Dardanelles on the 31st, taking 200 of our men. MARMADUKE also has taken artillery, transports and stores from us, and is blocking rivers. Jacksonport and Batesville have been evacuated by our forces. A serious raid by JOHN MORGAN, who has been hitherto unaccountably quiet, is now reported in Kentucky. On the whole, therefore, the Mississippi news is not encouraging. RHODDY's cavalry, however, have been defeated by Colonel LONG, in Alabama, and RHODDY is reported killed.

MAJOR-GENERAL FREMONT had resigned his commission as Major-General of the Regular Army, to accept a nomination to the Presidency of the United States. FREMONT, it will be remembered, ranked second on the list of Major-Generals of the Regular Army. His resignation gives General HALLECK that rank, General MCCLELLAN being first. For the vacant place the names of several eminent officers are suggested, but no appointment has as yet been made.

THE PRESIDENT has accepted the resignations of the following officers:—Major-General J. C. FREMONT, U. S. Army; Surgeon BARNARD RENDT, U. S. Volunteers; Surgeon W. C. OTTERSON, U. S. Volunteers; Major T. E. WILLIAMS, Additional Paymaster; Captain O. C. GODDARD, Seventeenth U. S. Infantry; Captain C. C. SMITH, Thirteenth U. S. Infantry; First Lieutenant MOSES C. GREEN, Thirteenth U. S. Infantry; Captain P. R. FORNEY, Eighteenth U. S. Infantry.

MARSHAL PELISSIER.

AIMABLE-JEAN-JACQUES PELISSIER, the Duke of Malakoff, a gallant, resolute, and accomplished soldier, has just died in Algeria. He was born on the 6th of November, 1794, at Marcuzac, Lower-Seine, and was the son of a powder manufacturer. He was was first put to school in Brussels, where he proved so apt a scholar and manifested so decided a taste for the profession of arms, that in 1814, he was entered at Saint Cyr, while Napoleon's Empire was tottering under its fall. In 1815, Marshal Gouvion St. Cyr founded the Royal Staff corps, to be entered only after a severe examination. This Pelissier passed, two years later got his brevet lieutenancy, and to his great joy was permitted to make the Spanish campaign of 1823, as aide on General Guilleminot's staff. His services procured him the cross of the Legion of Honor, and that of Saint Ferdinand. He became successively aide to Generals Bourke, Vallin, and Ludre des Essarts, and, at the close of 1832, joined the 11th Bis as Captain. In 1828, he set out with the Expeditionary corps of Duperre to the Morea, and behaved very gallantly at the taking of the castle. Two years later he joined the Algiers expedition, took an active part in all the fighting of the campaign, and secured his majority. In 1840, he was wounded in the fight at the Wood of Olives, and again in 1842 in the Djurjura. He was promoted to a colonelcy, and commanded a brigade against the Sahara tribes. In 1846, he had charge of a column pursuing the Arabs, and then occurred the shocking affair of the grottoes of Dahra, which first gave him a European reputation. Having driven the Arabs into caves, he had kept up a hot fire on his attempts to dislodge them. He accordingly procured fire wood, lighted it at the mouth of the grottoes, and, the enemy still refusing to surrender, smoked them to death, men, women and children, five hundred in number. A thrill of horror ran through Europe at the news, but Pelissier's government regarded the affair as creditable. It was an official way of subduing the tribe, and that was the point aimed at, though every living being of them should be destroyed in the process. Pelissier's answer to all reproaches was that he had acted as a soldier, and had obeyed orders. His own temperament, we must confess, however, was such that this slaughter would have moved his sensibilities very little, even if less justifiable. The comment of one French writer on this affair is almost amusing in characteristics of the Parisian mind. He says that Colonel Pelissier's treatment of the Arabs "astonished "people by its novelty!"

Thenceforth till the outbreak of the Crimean war Pelissier continued to serve in Algeria, manifesting much skill in organizing and managing his department, and brilliant daring in the assault of Laghouat. Napoleon early recognizing his merits, hastened to place him in command of the First corps of the French Army, in the invasion of the Crimea, under Canrobert. The management of the campaign having soon showed Canrobert that Pelissier was his superior in talent, he resigned in his favor, Pelissier assuming command on the 16th of May, 1855. He carried the Mamelon Vert, experienced a defeat, but a defeat reflecting glory rather than shame, on the 19th of June, and, on the 7th and 8th of September, at which time not be reminded, stormed the Malakoff, and thus decided the fate of Sebastopol.

He was now made Marshal of France and Duke of Malakoff, and honors and wealth were poured upon him. Five years ago he headed the French Army which moved on Nancy, to guard against the war threatened in Germany, while another French army moved to the banks of the Mincio. The peace of Villafranca prevented further need of his sword or observation, and accordingly the old warrior was appointed Governor-General of Algeria, the scene of his early career. Here he managed affairs with great skill and success. On the 22d of last May, he was attacked with inflammation of the lungs, and died, leaving one daughter, his only child by his marriage in 1853 with Mlle. De La Fantega, to mourn his loss.

Pelissier was a good specimen of the soldier, bluff, honest, straightforward, and of remarkable personal courage. The chief stain on his reputation is that of cruelty, induced by the affair with the people of Dahra. It must be confessed that there was something shocking in the results of that undertaking; but there is no little, again, to justify it, on the plea of orders, the plea of the necessity of securing success, and the plea of the worth of a terrible example. We, the British reading condemning, and yet without some reason, to cite proof that Pelissier possessed, after all, a tender spot in his soldier's heart. Bazancourt tells of the tears which fell freely from Pelissier's eyes as he stood at the grave of Bizot. Another incident, possible, but a little more apocryphal, is this:—At one time, in the Crimea, the Russians, under a flag, asked permission to get and bury their dead. It was refused, from the proximity of the hostile lines, and other reasons. But the officer commanding the skirmish lines, misunderstanding, allowed it. Pelissier was very angry, but relented on hearing that a wounded man had been found among the dead, and said that the saving of one life should compensate the error. The manners of Pelissier were always brusque, not to call them brutal. He had little of the refinement and delicacy commonly attributed to Frenchmen, and was very poor at the rôle of courtier. His vanity, also, is usually represented to be very extravagant, but his portrait of himself more than his rudeness and coarseness of manners. It was but too evident that Algeria, not Paris, was the place for the great Pelissier. In his unofficial disposition to carry an important point, even at the sacrifice of many men, as evinced in the Crimea, Pelissier somewhat resembles our own General Grant. And the two, differing in most other respects, are not unlike in the attributes of personal courage and astonishing energy.

CORRESPONDENCE.

ANSWERS TO CORRESPONDENTS.

U. S. Colored Troops.—Paragraph 4, Army Regulations of 1861, arranges the order of rank in each grade between officers of the regular army. For 2d Regulates the question of rank between officers of the same grade serving under State and United States authorities, and also the gallantry conferred upon both in the course of war. General Orders No. 35, A. G. O. of 1863, amends paragraph 9 by adding "except commissions issued by the President to officers of volunteer regiments, which shall be considered as conferred by the United States."

General Orders No 65, A. G. O. of 1863, declares that commissioned officers of all volunteer organizations, no matter whether established or not by authority of the United States or the United States, will be regarded as having been commissioned on the day when mustered into the service of the United States, and will take rank in their respective grades from that date. Officers of the line of "United States Colored Troops" are *mustered into service* as other volunteer officers, and their rank must be decided according to provisions of G. O. 65 of 1863. Staff officers are appointed and issued to the volunteer forces *appointed by and with the advice and consent of the States*, are upon the same footing with each other in regard to rank, such action being governed by the provisions made for staff in paragraph 4, Army Regulations. The Colored troops are not usually a part of the Regular Army, but they are on the same footing as the Veteran Reserve corps and the State militia. It would require an act of Congress to make the Colored troops or Veteran Reserves a part of the Regular Army.

"Eal."—1. It is not proper for a member of a court-martial, who dissents from the sentence imposed by a majority of the members, to protest in writing and attach his protest to the record. On the contrary, such action would be highly improper, and each member by such member not to disclose or discover the *vote or opinion of any particular member*, unless required to do so by a court of justice in the course of law. You are required to divulge your own vote or opinion when you have to divulge those of others. No fear of being placed in "a tight box" for refusing to divulge" can excuse such action as you propose. If the votes or opinions of members are to be disclosed, few or how would seem destroy the purity of such tribunals. He respectfully refers you to them.

Soldier.—A person now in the military service who shall furnish satisfactory evidence that he is a mariner by vocation, or an able or ordinary seaman, may enlist into the *Navy: Provided*, That such enlistment shall not be for a longer period than one year of his military service, nor less than one year. Not less than two years sea service will entitle a person to a discharge as a landsman, but less than an able seaman: in absence of either proof the applicant will be made either as to length of service he has seen at sea. It is the duty of every company commanding officer to furnish every soldier to him for transfer to the Navy by men of his company, together with the proof of their sea service, to the headquarters of the Army or department in which they are serving.

Brush.—When a column by division, at a halt, is deployed, it is the company commander who gives the commands Front, and Stop front Annie.

Worcester.—General Short was retired from active service on the full pay and allowances of his rank as Lieutenant-General.

1. E. N.—Captain Richard I. Dodge, 8th Infantry, is at present, we believe, the ranking officer of Regular Infantry. He stands as No. 37 in the last Army Register.

THE GERMAN CONFEDERATION.

To the Editor of the Army and Navy Journal:

Sir.—In a late number of the Army and Navy Journal you give a table showing the strength of the different States of Europe as published by the *Annuaire Encyclopédique* for 1863, which table opens with the respective figures for "German" following the name of "Austria," "Prussia," &c. From this table it appears as if "Germany" on the one hand, and "Austria," "Prussia," on the other, were entirely disconnected military powers, and indeed, in occasionally conversing with Americans, I have found this idea quite prevalent. This is a mistake. The German Union, for Germany is a union of thirty-two monarchical states and four free cities, with a Republican government. The Emperor of Austria and King of Prussia being the two leaders of the former, they, together, form the German Confederacy. Each single state has her own government, and they are entirely independent of each other in all matters of internal government in concerned. As a European power, however, these States are represented by the majorities of the respective states. The Diet is the highest tribunal for each and all of the thirty-six single Governments. If the "German" interests should be threatened by any of the other European powers, the Diet alone has to decide what steps shall be taken—whether the Confederacy shall go into war or not. In case of war, each state is ordered to put on a war footing a certain portion of its standing army, the contingent (Bundes-Contingent), and these contingents are united into ten divisions, form the army of the German Diet. Several Provinces of Austria and Prussia do not belong to the Confederacy, and an aggression of any of them by a foreign power would not be considered as a question involving German interests. For that reason Austria alone, without the assistance of the German Diet, fought against France and Sardinia in the late Italian war: whilst the contingents of the several German states would have been called on, as soon as French or Sardinian troops had trespassed the boundaries of Tyrolis. This will, I think, give a general idea of the relation of the several German states to each other and to the entire Confederacy. Prussia, I may also, the reader may be enabled to judge of the wrong parties in the late war. The Diet has also placed themselves by opposing the decision of the Diet in the Schleswig-Holstein question.

In regard to the table above referred to, I believe the following figures, taken from the "Hof Kalender of Gotha," may be relied on:

Germany, that is the German Confederacy, 44,051,834 inhabitants. Army, 660,000. Germany, inclusive provinces of Austria and Prussia not belonging to the Confederacy, 79,455,153 inhabitants.

	In Peace.	In War.	Contingent.
Armies of Austria,	290,154	632,004	119,167
Prussia,	212,459	622,804	113,359
Bavaria,		72,000	34,234
Great Britain,	218,167.	Inclusive militia, colonies	
and India & Africa,			
France,	417,746	765,705	
Russia,	577,759	1,278,000	178,000

On war footing, One Million.
Switzerland, 170,122.

M. E.

UNEQUAL TAXATION OF OFFICERS.

To the Editor of the Army and Navy Journal:

Sir.—I wish to call your attention to the hardship worked by the present system of taxation, as it affects in fact all persons in the service of the Government, who have no income other than their salaries, by the Income Tax Law. The law allows a deduction of $600, and of the amount actually paid for house rent, but we only receive credit from the Government for the $600. The paymaster deducts $250 per month, and charges it to me in the balance without reference to what we must pay for house or quarters.

For example, in 1863 I paid $500 for house rent, which results in my having been obliged to pay 3 per cent. tax on that amount, while a man whose house government employe would have done who paid the same amount of house rent. If an officer is stationed where he gets commutation of quarters, he pays the government $300 out of that from the whole amount, so that we never get the benefit accounted for by the law, but are obliged to pay 3 per cent. on the amount we have not paid to Government, unless we have other sources of income equal to that of house rent, and on which 3 per cent. is not deducted before we received. Now, all persons living outside of cities, on interest on Railroad bonds, but 3 per cent. is deducted from the interest by law before I get it.

I hope you will call the attention of our lawgivers to the injustice of debarring a portion of our citizens from privileges accorded by law to others. The evil could be corrected if we were allowed to deduct to make us with our house rent, before deducting the tax.

Washington.

THE SIEGE OF DUPPEL.

To the Editor of the Army and Navy Journal:

Sir.—In your valuable paper of 7th of May contains a report on the capture of the Duppel by the Prussians. "Duppel Barren" is called an Austrian one. But General Raven is a Prussian officer, and not Austrian. During the siege, was composed of the Prussian 8th Regiment of Infantry and the Brandenburg regiments, the first with the surname, Regiment of Body-Grenadiers, and of the Royal Prussian 24th Regiment of Infantry (of the Posen regiments the 1st). Both regiments properly belong respectively to the 9th and the 10th Brigade of Infantry, both belonging to the 5th division of Infantry, which, with the 6th division, makes up the 3d Prussian Army Corps, besides its Cavalry, Artillery, Pioneers and trains. Against the 5th Division with his brigade, stormed redoubts No. 8 and 9, severely wounded in the leg, it was not the 24th Regiment. The Prussian brigade "Von Canstein" took redoubt No. 7 by storm, and in the same way the new entrenchments of the second line between the first line of fortifications, and those comprising the Tête-du-pont. Only redoubt No. 10 was compelled, by portions of the brigade Von Raven and of the Prussian Brigade "Wedell," to surrender by capitulation.

There were engaged in the siege of Duppel no Austrian troops at all. Undoubtedly they would have done as well as the Prussians did, but the latter had their laurels and dépôts nearer, and so it was quite natural that they were to win them. Very respectfully,

M.

Washington, D. C., May 18th, 1864.

A CORRECTION.

To the Editor of the Army and Navy Journal:

Sir.—In the correspondence of the issue, page 660, issue of the 21st ult., a mistake occurs in the reading of the second line—instead of reading that the experiments described below "were intended to prove that the adoption of small gunpowder is far from being fully utilized," &c., it should read, that those experiments were "to prove" this. The experiments were undertaken with no pre-conceived views on the subject, but to test the invention described. The results do seem to show that with regard to firing shell projectiles, that greater penetration can be realized than has been, and that may be accomplished with a piece equally well adapted to firing round shot and shell.

E.

The total number of Rebel prisoners captured in the late battles as reported to the Commissary-General of Prisoners, to June 4th, is about 9,000 also of whom are officers.

The Senate's Military Committee have under consideration the question of reorganizing the Invalid Corps. They will make a thorough investigation of many complaints which have been made against the corps on the ground of its inefficiency &c.

THE CONTEST IN VIRGINIA.

[From the London Times, May 25.]

The details of the great battles in America are calculated rather to enhance than diminish the sensation with which the telegrams were received. There has been no exaggeration, no overstrained description of the conflicts or the carnage. It, indeed, be recollected that even the long reports of former fighting, which were hurriedly published, still two days of sanguinary action unaccounted for, it must be allowed that we have never before been in a shape to judge.

Perhaps the Americans may be proud of the preeminence, but they have certainly fought more desperately, for a longer time, and with greater slaughter than any nation before them. It would not be impossible to match the results of any one day's battle with stories from the wars of the World; indeed, we may remember that in the history of men, were five such battles as these compressed into one week, the whole of the military annals of nations could have supported the exhaustion and the strain. We have been told that after a single day's hard fighting the hostile armies have been found to have expended so much that they fresh force might snatch its laurels from it; whereas here are two armies hotly engaged in the work of bloodshed from the early morning of Thursday, the 5th of May, on Tuesday with scarcely the intermission of an hour. On every day except Saturday there was a pitched battle, commencing with the hardest day's work and Saturday was devoted to marching and fighting on the march. Nor were these prodigious exertions and this unexampled carnage not brought into action by relays. Neither army numbered apparently over one hundred thousand men, and of these every man engaged in the first battle was in the second. Indeed, we are expressly told that the Federal "reserves" were brought up on the very first day.

The desperate character of the fighting may be inferred from the fact now reported that the slaughter was produced without the aid of artillery. The cannon or musketry fire did execution among crowded masses. The great battle of Friday, which is said to have cost the Federals upon upward of 20,000 men, was fought entirely by the Confederates were posted in the well-known woods in the vicinity of Chancellorsville, where Hooe in once repeated an history of the same kind. Here the use of the cannon could not come into play. Regiment against regiment, and man against man, the combatants fired and fought at each other with the musket and bayonet. Night closed in; and an intercepted report from General LEE actually tells us that the Federal dead remained on the field unburied, and that he had comparatively few wounded. If this be a correct version of the dispatch, it gives a more extraordinary picture of the battle than almost any other of the incidents reported. It is clear, indeed, that whatever may be said of the composition of the Northern armies, and however much they may be inferior to the patriot legions of the South, they have fought in this campaign with a valor as obstinate as that of their enemies. In mere intelligence, the Confederate soldiers may have been led from a battle like that at Wilderness to throw more into battle as figuratively as they have done, and to show the Federals are fighting in stern reality, and with a spirit as resolute as that of their adversaries.

Except that Saturday was the only one since emptied the Federals with a sudden attack in mass, and that his positions were always occupied with admirable skill, there appears to have been little variety in the battles. All of them were attacked, and with a result which at one moment looked very like success. On Friday GRANT attacked, and had repulsed him. On Saturday LEE attacked, and was checked again, with no better result; on Tuesday LEE appears to have been the assailant, and again in the course of little there was more fighting than manœuvring, and more loss than result. Now that the outlines of the earlier telegrams have been filled up, the impression which the contest spears even more indecisive and the issue more obscure than before. For the Confederates, it may be said that they have never actually been in full flight. They have only failed to inflict a complete defeat on the advancing Federals. On the second day he himself claimed the victory, and as the battle was renewed on the fourth and fifth days he repulsed every attack, and held his position; while on the sixth he was himself assailed and successfully acted again, with no better result; on Tuesday LEE appears to have been the assailant, and this is all we know.

ARMY AND NAVY IN CONGRESS.

SENATE.

On Thursday, June 2d, the Committee on Pensions were instructed to report whether further legislation is necessary to provide suitable relief for the widows and children of colored soldiers massacred at Fort Pillow. The joint resolution providing relief for the double-under gunboat contractors was discussed for some time, and laid over. The joint resolution tendering the thanks of Congress and a gold medal to Lieutenant Colonel Bailey, of Red River engineering fame, was adopted, after the portion relative to the medal had been stricken out.

On Friday, June 3d, Mr. Hosmer presented a memorial from the New York Chamber of Commerce in favor of the bill establishing a Navy Yard at New London. Mr. Wilson presented a petition setting forth that a great many disasters in our army result from the use of intoxicating drinks, and asking for some remedy from Congress. Laid on the table.

On Saturday, June 4th, the House bill to pay the Second Regiment, Third Brigade, Ohio Volunteers militia, for the time they were actually in the service, without regard to irregularity in the muster, was passed.

On Monday, June 6th, the Revenue Act being discussed, an amendment of Mr. Davis, providing that no part of the revenue derived under the act shall be applied to the payment of negro claims, was rejected after calling out some discussion as to the character of those troops.

On Wednesday, June 8th, a memorial petition was received from the President, enclosing letters from the Secretary of War and the Provost Marshal-General, urging a repeal of the clause in the Enrollment act whereby drafted men are exempted from military service on payment of three hundred dollars, whereupon Mr. Wilson called up the bill heretofore reported by the Military Committee, designed to meet the views of the authorities on this point. Some debate ensued, but without taking action on the subject the Senate adjourned.

HOUSE.

On Thursday, June 2d, the House passed the Senate bill to compensate the petty officers and seamen on the gunboat *De Kalb*, which was destroyed, by the loss of clothing, and also the Senate bill authorizing an issue of clothing to firemen and coal-heavers in the Naval service, the same as granted to seamen.

On Friday, June 3d, Mr. Washburne's bill authorizing the sale of the Marine Hospital at Chicago, and the purchase with the proceeds of a more healthy and retired location, was passed.

On Monday, June 6th, the bill to punish guerrillas was passed, after considerable discussion, 72 to 37. The Senate bill of thanks to Lieutenant-Colonel Bailey was also passed.

On Tuesday, June 7th, a resolution was adopted requesting the President to transmit to the House all the evidence of General S. B. Curtis, before the commission of which General McDowell was President, in relation to cotton transactions.

ARMY AND NAVY PERSONAL.

There are now four hundred and fifty-six Paymasters in the Army, including forty recently appointed.

Major-General Hurlburt, formerly in command of the Sixteenth Army Corps, has arrived in Washington.

Dr. George Perkins, Surgeon-in-Charge at Fort Warren, Boston Harbor, died very suddenly at that post on the 5th. The cause is supposed to have been disease of the heart.

Lieutenant James H. Merryman, United States revenue service, has been assigned to the command of the revenue steamer *Ashuelot*, now in New York harbor.

The Court-martial in the case of Captain O. W. Alexander, First Michigan Cavalry, has adjourned, fully acquitting that officer on all charges preferred against him.

Major-General Foster assumed command of the Department of the South on the 25th ultimo, General Gillmore and Hatch was assigned to the command of the Hilton Head district.

Major J. T. Kennedy, 3d New York Artillery, and Superintendent of Recruiting service, has been assigned to duty as Assistant Commissary of Musters for the District of North Carolina.

A General order from the War Department, just issued, commutes the sentence passed by courts-martial upon deserters, to imprisonment at Dry Tortugas, Florida, during the war.

By order of Major-General Butler, Brigadier-General G. F. Shepley has been placed in command of the District of Eastern Virginia, comprising Fortress Monroe, Yorktown, Williamsburgh, Norfolk, Portsmouth and the Eastern Shore of Virginia.

Captain Kip and Dr. Dubois, late of the artillery reserve, have reported for duty on the staff of Major-General Sheridan, at Camp Russell Alvord, formerly upon the staff of the late Major-General Buford.

Captain Jacob T. Adams, late of Dorchester County, Md., has been tried by a Military Commission and convicted on three years in the Albany Penitentiary for violation of the laws of war in conveying goods, contraband of war, and information.

Colonel H. L. Abbot, First Conn. Artillery (Captain U. S. Corps of Engineers), has been announced by Major-General Gillmore as Acting Chief Engineer of the Department.

Captain Jacob T. Adams, late of Dorchester County, Md., has been tried by a Military Commission and convicted on three years in the Albany Penitentiary for violation of the laws of war in conveying goods, contraband of war, and information.

Colonel H. L. Abbot, First Conn. Artillery (Captain U. S. Corps of Engineers), has been announced by Major-General Gillmore as Acting Chief Engineer of the Department.

By command of Major-General Schofield, Lieutenant-Colonel G. M. Bascom, Assistant-Adjutant-General, has been assigned to duty as Inspector-General of the Army of Georgia's office, at Headquarters Department of the Ohio, Knoxville, Tennessee.

Second Lieutenant Philip A. J. Russell, First Infantry California Volunteers has been dismissed the service, and is to do for ever disqualified, after the promulgation of his sentence, from holding any office of honor or trust under the Government of the United States. Captain R. N. Conwell, Second Mass. Artillery, has been dismissed the service.

The following statement of the killed and casualties amongst officers of the 11th Maine Volunteers, with General Butler in the fight of June 24. — Wounded, Lieutenant-Colonel W. P. Spurling, leg, serious; Lieutenant L. E. Newcomb, neck and shoulder, serious; Lieutenant James H. Thompson, leg, serious. Missing, Captain A. O. Moody.

Chaplain A. Gregory, U. S. A., who has been on duty some time past at the U. S. General Hospital in Covington, Ky., has been relieved from that duty, and repair before a General Court Martial now in session at Lexington, to answer charges preferred against him for refusing to enlist men for the hospital donations received by him from the U. S. Christian Commission.

By order of Major-General Hunter, Lieut. James W. Dunnington, 12th West Virginia Infantry, has been dishonorably dismissed the service, it having been proven that he, (they either cowardly or treacherously deserted his command at the late battle at Newmarket, Va., May 15th, 1864, remaining absent during the remainder of the engagement, and that he (Lieut. Dunnington) was subsequently absent from the following day, near Woodstock, Va.

Captain Fisk, the Commandant of two expeditions northward to obtain recruits for the Army, is again under orders to escort emigrants to the gold fields of Montana, and will probably take the route he has recommended via the Yellow Stone River. The escort service for emigrants will probably be at Fort Ridgely, Minnesota, and the expedition will move from that point about the 1st of July.

The following have been appointed assistants at the Naval Academy by the President:—Raymond R. Rogers, son of Commander C. R. P. Rogers, United States Navy; Edward Simpson, son of the late Rear-Admiral Theodore Richard Wainwright, United States Navy; William M. Berrymen, son of Lieutenant-Colonel H. Berrymen, United States Navy; Instructor of Steam engineering Francis Wilcox; Instructor of Seamanship F. H. Mearthur, son of the late Lieut. W. P. MacArthur, U. S. N.; Frederick D. Dudley, son of Lieutenant-Colonel, United States Volunteers; Louis Ashmun, son of the late Purser Ashmun, United States Navy; Randall Williams, son of Acting Master C. F. Williams, United States Navy; C. H. Verrable, son of Gunner T. P. Venable, United States Navy; Gustavus C. Guild, son of Acting Assistant Paymaster C. M. Guild, United States Navy; Midshipman Stephen C. Rowan, appointed as midshipman at the Naval Academy, are William R. Rowan, son of United States Lieutenant-Commander *Stevens*; Ellwood H. Hipple, on board the Metacomet; John Frederick Fuller, on board the iron-clad *Roanoke*.

An Army correspondent gives a new word which has lately been coined which is synonymous with "gobble" and with "skedaddle," and is used for any other word and for no other purpose. The word is "scyguid." The correspondent discussed ease at a moment ago. I inquired where he had been riding. He informed me that he had been sent out on a general scyguid that he had "scyguided" among the front, where the Johnnies 'scyguid' a bullet through his clothes; that on his return he 'scyguided' an ice-house, and 'scyguided' his servant, who, by the way, had just 'scyguided' three fat chickens, for a supply of ice; that after he had 'scyguided' his dinner he proposed to 'scyguide' a card down to Washington how I 'scyguided.'" The correspondent claims that this new word, like "skedaddle," is entirely original, and has not been used before. In the absence of our Liddell and Scott, we appeal to our readers.

One of the Potomac Army correspondents writes:—The rank and file have a pithy idea of speculation of the strategy of the campaign. They understand that it has been a series of splendid flank movements, and "flanking" has become a common word. A private account for evening from a night march to the capture of a sheep or a pig. A pack of hounds "flanking" a fox, would be to use the shell coming, "but hadn't time to flank it." And he enjoyed his joke with a smile and a chuckle, when his fellow-privates had enough time to appreciate it among bystanders. The shell had "flanked" him, by taking off an arm.

By order of Major-General Sheridan Col. Lowis M. Peck, 173d New York Vols., has been dishonorably dismissed the service, for having on the night preceding, to the pear of battle of Pleasant Hill, April 9, 1864; that he did not make proper attempts to rally his regiment while an confusion; that he was absent from his regiment, colors, or with those of his men who were rallied around them when they advanced against the enemy; that he was going to the rear, away from the enemy, he was going to the rear without permission or authority, and alone, and that he did not rejoin his command until 2 o'clock on the morning of April 10, when he went and from the colors of his regiment about twenty hours without authority. The Colonel, the order adds, is honorably discharged the service of the United States for misbehavior before the enemy, subject to the approval of the President.

A 15-inch Wiard gun, lately cast at the Wiard Ordnance Works, near Trenton, N. J., was last Saturday subjected to so severe a test as to completely destroy the weapon. The charge consisted of 80 pounds of quick-burning powder, the cartridge was 15 inches in diameter by 15 in length, the ball a solid double shot fifteen inches by twenty-one. The gun was fired about dusk, and caused an explosion by which the sky, for the space of two miles, were much alarmed; when the clouds of smoke and gravel subsided, it was found that the gun had been blown to fragments, one piece of about 15,000 lbs. weight being hurled a distance of about 200 feet. The gun was 13 feet in length, nine six feet in exterior diameter, and weighed over 46,000 pounds.

The Richmond *Sentinel* of May 31st, finds Grant a mercenary: "It is time for us all to cease speculations as to Grant's movements and attend to the facts. He has been offering fight when we thought he was retreating, and retreating when we thought he was offering fight; he has been advancing when we supposed that he was falling back, and when he had every reason to hurry down. He has gone by the rule of military contrariness, and has always disappointed us whenever we supposed that he would act logically or consistently with himself. We suppose that he has come to the final attack at last; though, without any experience, we express the opinion with becoming doubt."

The rations allowed prisoners of war, have been modified by the War Department. They will consist hereafter as follows:—Ten ounces pork, or bacon, (in lieu of fresh beef;) 18 ounces soft bread or flour, or soft bread and hominy; hard bread, fourteen, and corn meal sixteen ounces, (in lieu of soft bread) to one hundred rations of beans or peas, twenty-seven pounds potatoes, or eight pounds rice or hominy, four pounds soap, three quarts of vinegar, three and three-quarter pounds salt, fifteen pounds potatoes, (when fresh beef and tea will be issued each day) and six pounds, on the recommendation of the Surgeon in charge. This ration is the difference between the above and the regular army rations, form the "Prison Fund."

Medical Inspector Hamlin says that the statistics of the hospitals of the Department of Washington, for the last year show remarkable results. The rate of mortality is less than 2 per cent. The rate in the hospitals of London exhibit a mortality of more than nine per cent, and those of Paris more than ten per cent. In the hospitals of the Crimea the rate was seventeen. The death rate was twenty per cent., and in those on the Crimea the rate was over fourteen per cent.

The House Military Committee, at a late session, took up the House bill as amended by the Senate equalizing the pay of Paymasters in the Army. The amendments were agreed to, including that establishing a new bureau in the War Department, to be called the bureau of Military Justice. The bill provides that the Judge Advocate General shall have the rank and pay of a Brigadier-General. The committee also agreed to allow the pay of Paymaster's clerks at $1,200 per annum and rations.

During the month of May there were settled at the Fourth Auditor's office twenty-six hundred and twenty-eight claims for prize money, amounting to nearly half a million dollars. Two hundred claims, amounting to $772,406, were received during the same time.

OFFICIAL DISPATCHES.

FORTY-SEVENTH DISPATCH.

War Department, Washington, June 1, 1864—6 P. M.

To Major-General Dix:

A dispatch from General Grant, dated the morning, June 1, at Bethesda Church, just received, says that last night the enemy attempted to turn our extreme left, but was repulsed. This morning he made an attempt to advance on the centre, but was driven back with heavy loss. Our troops are now advancing on the enemy, occupying until after dark, and resulting in our carrying the enemy's works on the right of the 26th Corps, where we still lie, and also the first line in front of ours. The latter, however, were commanded in the rear, and the enemy withdrew from them last night. Our loss in the pushed onward on each of the corps not engaged in the main assault, but the casualties will be light. Over three hundred rebel deserters and prisoners were taken, but I cannot say what number, nor estimate either our or the enemy's casualties. General Grant says the night has passed off as quiet as regular what they had been, but before.

The dispatches from any other quarter have reached the Department to-day. Edwin M. Stanton, Secretary of War.

FORTY-EIGHTH DISPATCH.

War Department, Washington, June 2, 1864.

To Major-General Dix:

A dispatch received yesterday at 12 P. M., has this evening been received from General Sherman. He reports that on Wednesday, June 1, Northern moved up from Acworth to Big Shanty, and Schofield to New Hope Church. On Thursday, June 2, Schofield and Hooker, having moved to the left of the entrenched line, pushed forward to Pumpkin Vine, the same time Sherman's and Garrard's cavalry were sent to Allatoona Pass, which they reached without opposition. Logan's two corps moved, the dispatch says, have entered the Pass, which was considered a formidable position. Sherman says he will send a dispatch of the general which are pre-prepare for publication.

Nothing has been received from Grant since his dispatch dated at 7 o'clock yesterday morning. Telegraph communication has been destroyed by a violent storm at the Potomac Creek bridge, since last night, and cannot be re-established before some time to-morrow.

Edwin M. Stanton, Secretary of War.

FORTY-NINTH DISPATCH.

Washington, June 4, 1864.

To Major-General Dix:

Dispatches from General Grant's headquarters, dated 5 o'clock yesterday afternoon, have been received at the War Department to-day. They say, Yesterday, at 6:30 o'clock A. M., General Grant made an assault on the enemy's lines, which resulted in driving the enemy.

"We assaulted at 6:30 A. M., driving the enemy within his entrenchments with heavy loss, and capturing several thousand prisoners. Our troops now occupy a position close to the enemy, some places within fifty yards, and are entrenching. Our loss was severe, but we do not suppose the enemy to have lost heavily. We captured over three hundred prisoners, mostly from Breckinridge's corps."

Another later official report, not from General Grant, estimates the rebel loss at 5,000, of which about three hundred were Breckinridge. The following officers are among the killed:

Colonel Lamkin, Thirty-sixth Mississippi.

Colonel Perrier, Eighth New York Heavy Artillery.

Colonel Hall, Sixty-sixth Ohio.

Among the wounded are General R. O. Tyler—seriously—will probably lose a foot; Colonel McMahon, One hundred and Sixty-fourth New York; Colonel Byrnes, Twenty-eighth Massachusetts—probably mortally, and Colonel Brooke, Fifty-third Pennsylvania.

Edwin M. Stanton, Secretary of War.

FIFTIETH DISPATCH.

Washington, Sunday, June 5—1 P. M.

To Major-General Dix:

A dispatch from General Grant's headquarters, dated 8:30 o'clock last night has been received. It states that about 7 P. M. yesterday (Friday, of June,) the enemy previously attacked Smith's left wing, (Hancock

The battle lasted with great fury for half an hour. The attack was successfully repulsed. Smith's losses were considerable.

Gen. F. S. Wilkin, who was caught, fell upon the rear of a brigade of rebel division, which he had thrown around to his left, apparently in the interests of enveloping Burnside. After a sharp but short contest, in which more than four hundred rebels were captured, the rebels were driven. He had previously forced and retired Gordon's brigade of rebel cavalry.

Burnside fought his last several officers, among them Colonel Presley Fort Vermont Gowdey, killed, Colonel Bingham, Ralph New York Cavalry, severely wounded; Lieutenant Hemming, acting as his staff, was severely wounded yesterday (Friday).

Our entire loss in the engagement of Thursday and the three days' previous around Cold Harbor, will not exceed, according to the Adjutant-General's report, 2,000 men. Yesterday, June 4, the 9th corps' left wing, in front of Burnside, was found to have been drawn in to the main line.

In the meantime, a command of 4,000 men, sent here yesterday, returned from Port Royal, on the Rappahannock.

Heavy and continuous artillery firing was heard all day, but was not distinguished.

A dispatch from General Sherman, dated yesterday, June 4, 8 a. m., states that Marietta, reports that his left is well around, covering the road from Marietta to Allatoona, and that Kenesaw is now in his rear. Johnston's army is concentrated on Kenesaw and the Atlanta Pass. No other military intelligence has been received at the War Department.

EDWIN M. STANTON, Secretary of War.

FIFTY-FIRST DISPATCH.

WASHINGTON, June 5—7 P. M.

Major-General Dix:

The latest dispatches from General Grant's headquarters down to 10 o'clock this evening, which have been received by the President, state that the enemy made an attack on Saturday night upon Hancock, in front of Cold Harbor, very severely repulsed by him, and in which our troops lost fifty yards of the rebel works. The rebels were very severely cut up, attempting to withdraw under the cover of the darkness, at Bottom Bridge, and toward evening threw a party across to the east side.

A dispatch from General Sherman, dated yesterday afternoon, June 5, at 5 o'clock, at Allatoona Creek, reports that the enemy, during the night, swung round his right flank, abandoned his position last night, and retreated. Sherman's command occupied the gap and pursued the enemy on the direct Marietta road, and Schofield on his right, has been turned from Acworth to Kenesaw. The rapidity and completeness of the enemy's abandoned line of works here absent an immediate line of working. The enemy's dead in the works are numerous, and we have inflicted upon them "the army supplies of intense and certain are ample.

EDWIN M. STANTON, Secretary of War.

FIFTY-SECOND DISPATCH.

WASHINGTON, June 6—10 P. M.

Major-General Dix:

Dispatches have been received from General Grant's headquarters to-day, in their report fully confirming the previous intelligence of carry and completed operations. They state that everything is going on well.

The Chief Quartermaster of the army reports, from a personal inspection of the depot at White River, that the stock of forage and supplies of cattle supplies are on hand, and wagons easily transport them to the army. One thousand cattle arrived at White River Monday, and six hundred a moment.

A dispatch from General Sherman, dated 12 o'clock noon, to-day, at Acworth, says: "I am now on the railroad at Acworth Station, and am full possession of the railroad for miles of Marietta. Johnston has fled."

There is no other military intelligence to-day.

EDWIN M. STANTON, Secretary of War.

FIFTY-THIRD DISPATCH.

WAR DEPARTMENT, WASHINGTON, June 7, 1864.

Major-General Dix, New York:

Dispatches from the Potomac army of the Potomac, dated 9 o'clock this morning, have been received.

It appears that an attack was made about midnight, and successfully repulsed. On the preceding afternoon, a hundred picked men of the enemy made a rush for the rifle pits in front of Hancock, but were driven back with a strong supe inson. None of the party were captured, and the rest killed or driven back.

Several letters have passed between General Grant and General Lee in regard to collecting the dead between the lines, wherein the two commanders concur. In the closing letter, regrets that all this effort for all saving the sufferings of wounded men, for the time, has been rendered entirely nugatory."

For better efficiency and ex men, sent out to search for the wounded of the commands, were captured in consequence of the enemy not observing General Lee's letter, and which the latter had not received at the time. A general Grant has assured General Lee that they were captured through a misunderstanding, and that they would be returned, but will be instructed.

Further military intelligence has been received.

EDWIN M. STANTON, Secretary of War.

FIFTY-FOURTH DISPATCH.

WAR DEPARTMENT, WASHINGTON, June 7, 1864.

Major-General Dix:

A dispatch from General Sherman, dated yesterday afternoon at 3 o'clock, reports that all he boon very quiet to-day. No casualties are reported.

A dispatch from General Sherman, dated at Acworth, yesterday evening, at 6 P. M., says:

"I have been to Allatoona Pass, and find a very admirable for our force. It is the gate through the mountains, and commands the whole Allatoona. It now becomes as useful to us as it was to the enemy, and many thousand from either direction can be supplied from here. I wish the Georgia are large and good, and the country more open."

Details of the portions of each command unavoidably separated are given, but are too minute for public information.

The brigade, together with the wounded, have been sent in our immediate rear, but no reports are even at Lost Mountain and Kenesaw."

Dispatches from General Grant, dated 9 o'clock this morning, have been received, but report satisfactory progress in the organization of his command.

EDWIN M. STANTON, Secretary of War.

FIFTY-FIFTH DISPATCH.

WAR DEPARTMENT, WASHINGTON, Wednesday, June 8—1:45 P. M.

Major-General Dix:

A dispatch from Mr. Dana, at General Grant's headquarters, dated at 10:30 P. M. yesterday, says that the enemy withdrew their line from Bethesda, beyond Hancock, and that the rebel General Jones was killed in the battle-field. The dispatch is as follows:

The Assistant Inspector of to-day speaks of the defeat of General Early's rebel army in the Shenandoah Valley. Two thousand of the rebel dead have been buried on the field. His successor retired to Waynesboro, near Rockfish Gap, and Sheridan was pursuing him. Further particulars are awaited.

The paper further states that no hospitals or stores were captured by General Hunter.

Another dispatch announces that our forces occupy Staunton.

EDWIN M. STANTON, Secretary of War.

FIFTY-SIXTH DISPATCH.

WASHINGTON, Wednesday, June 8, 1864.

Major-General Dix:

General Butler's victory and our occupation of Staunton is confirmed by the following dispatch just received from General Butler:

HEADQUARTERS ARMY OF JAMES,
June 7 [five intelligence of a fight at Mount Sidney, between Staunton and Harrisonburg, on the 5th inst., between the rebel commander, was killed. Staunton is likewise occupied by the Union forces. The fighting was on both sides.

EDWIN M. STANTON, Secretary of War.

CASUALTIES AMONGST OFFICERS.

We contain an alphabetical list of casualties amongst officers and would again ask that such errors as may occur in may be referred to the lack of official reports.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give an early notification of all personal matters of general interest; of the movements of vessels; of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to any queries in regard to military and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers will please address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 20 PARK ROW, THEO SELDEN.

THE editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 20 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second door front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JUNE 11, 1864.

THE FIRST MOVE IN FRONT OF RICHMOND.

THE sequel of the obstinate engagement on Friday at Cold Harbor, proves it to have had no slight influence on the conduct of the campaign. To understand its purport, some record of earlier events must be premised. On reaching the Peninsula, after crossing the Pamunkey, our Army was first disposed in a southerly line, with primary intent to carry, by regular sieges, with its new base at White-House, and with subsequent purpose to confront at once LEE's army. The enemy at that time lay east of the Virginia Central Railroad, stretching across the headwaters of Crump's Creek and the Totopotomoy, a little north of the former, with the south end overlapping Mechanicsville. His flanks were protected by cavalry, holding Hanover Court-House on the one wing, and Sumner's Bridge on the other, and probably, also, Bottom Bridge.

General GRANT, once secure in his new position, immediately commenced operating again towards the enemy's right, in the region of Shady Grove and Mechanicsville; and on Tuesday night withdrew the Sixth corps from his own extreme right, and dispatched it to extend his left, in a repetition of that process made familiar by the tactics of Spottsylvania. Meanwhile, the cavalry had occupied on Tuesday the ground required on the left, holding it that day and the next, in spite of stubborn opposition. On Wednesday next, at length, the Sixth corps came up, and were joined by SMITH's corps from White-House, protracting our line far to the left and, in the severe battle of Wednesday, decided the point that we were to hold Cold Harbor. To continue the movement by the left flank, it remained to transfer another corps in the same direction from the extreme right. This accordingly was done on Wednesday night, under the usual cover of an attack in front, and HANCOCK in his turn traversed the line. To mass the Army more compactly, BURNSIDE and WARREN would naturally push down from the right to closer contiguity with the neighboring corps, and perhaps to overlapping them. We judge that this manœuvre was initiated on Thursday, but foiled by the fierce attack made on them while they marched by the flank outside of their works, as they appear after Thursday's fight to have resumed their old positions.

On Friday, the terrific and momentous conflict, two days prepared for, was opened at gray dawn. The enemy's right proved, as expected, the point of attack. The detailed conduct and the issue of the battle are elsewhere particularized. In brief, it was a temporary success, but a final repulse. Regarding it in the indistinct and blurred light which falls upon it as so recent a date as this after its occurrence, it shows at least that the enemy's position in front of Cold Harbor is quite as formidable as anything he has yet presented to us. Some augury of better fortune in the future, however, may be derived, perhaps, from the fact that our strength does not seem to have been entirely economized and expended against his stronghold on that day. The Second, Sixth, and Eighteenth corps were exhaustively employed and fought with admirable gallantry. But, on the right, the Ninth and Fifth, while doing all that was asked of them, found little more than a stubborn skirmish line in front, which they carried with ease. The enemy, then, had withdrawn his force from left to right, that he might fight our three corps with the bulk of his army. Surprisingly often we have been able to overwhelm his right flank, but this time he was wary and prepared, being schooled by experience.

These views are strengthened by the fact that on Thursday occurred the manœuvre on our right, which we can read only as an endeavor to mass the Ninth and Fifth corps farther down the line, with intent to hurl them also against the enemy on Friday. It may be conjectured that the Fifth was to have been retired to the rear of the left centre of the line, so as to occupy a correlative supporting position in the reserve or second line, to that which, it would seem, A. P. HILL was detached to maintain for the enemy on the same day. BURNSIDE would then, of course, have gone into the entrenchments left by WARREN, to render the line compact again.

But the attack could not be delayed beyond Friday, as the enemy had already got wind of our scheme, by the affairs of Tuesday, Wednesday and Thursday, and had already stretched his line so as to overlap our own left wing. It being determined to penetrate his line at Cold Harbor, the easy progress made by our right corps was not conducive to the general success, except so far as it engaged the attention of the enemy. It may be added, in confirmation of what has been said, that the Fifth corps is now drawn back in rear of the line, and, on a renewal of the attack, should one be ordered, will probably be engaged at the vital point.

The battle of Friday was evidently designed to be rather tentative than decisive. Its aim may have been to find out whether the enemy's line could be cut by heroic assault, and a way thus laid open to the control of the passage of the Chickahominy, or whether resort must be had to a mere laborious process of entrenching. The result of that disappointment may be admitted. It was the disappointment, however, of a general who tries his favorite plan first, but has not exhausted his reserve of ingenuity. Our faith in final success continues strong.

APPRENTICE BOYS FOR THE NAVY.

WE have often urged the necessity of educating boys for the service of seamen and petty officers of the Navy, that it is hardly necessary for us to commend the decision of the Navy Department to resume the enlistment of apprentice boys. The Department has authority, under the act of Congress, approved May 2, 1837, to enlist boys for the Navy, to serve, unless sooner discharged, until they arrive at twenty-one years of age. A law was considered desirable when, soon after the passage of this law, the naval apprentice system was adopted, it proved a complete failure. This failure was due largely to the ineffective manner in which the experiment was tried. The Department now, however, so modifies and improves the plan that its success ought not to be doubtful. The new regulations, as announced by the Department under date of May 27th, 1864, may be thus summed up:—Boys between the ages of fifteen and eighteen are to be enlisted with the written consent of their parents or guardians, certified before a magistrate. They are to be submitted to a physical examination, and their moral character, so far as it is likely to affect their efficiency as seamen, is also to be inquired into. The boys, as soon as they are enlisted, will be rated as of the second or third class, according to their age and ability, and afterwards they will be again rated, upon examination. Two vessels, properly equipped and fitted up as school-ships, will be assigned to suitable stations, and thither the boys will be sent. These vessels will be fully officered and sufficiently manned; will be kept ready for service, so as to be able occasionally to run out of harbor to sea, and, if necessary, from one to another port; their officers will mess and live on board; will keep watch in the same manner as if the vessels were sea cruisers, and will give especial attention to carrying out the ideas of the Department in regard to the boys. Each vessel will have its schoolmasters to teach the rudiments of education, including navigation. The boys will be carefully and systematically instructed, under the direction of the commanding officer, in the various duties of a seaman on a man-of-war; in rigging and unrigging masts and yards, in bending and unbending sails, knotting, splicing, heaving the lead, steering, making signals, using muskets, pistols and cutlasses, exercising great guns, target firing, and the thousand other details of a seaman's profession. Every quarter a return will be made to the Navy Department by the commander of the school-ship, showing the names and classes of the boys, their aptitude, deportment, &c. And at intervals of three or four months, an inspection by a competent board of officers will be ordered by the Department, to determine the condition of each schoolship, and report upon it.

Boys presenting themselves on the school-ship will be ot once vaccinated, and will be sold the necessity at tidy habits and admonished of the strictness of military discipline. They will be clothed according to the Navy pattern, their equipment being charged to their pay, except that they will have the same allowances of outfit of hammock, bags, &c., that enlisted men in the Navy receive. The pay of the boys, until further regulated, will be: For those of the third class, eight dollars per month, nine dollars for those of the second class, and ten dollars for those of the first class. Of the monthly pay of each boy, one dollar per will be retained until the expiration of his term of enlistment. The remainder will be expended in clothing and other necessaries for his use, and occasional payments will be made to him under the direction of the commanding officer.

The boys on the school-ships apprentices will be transferred to vessels in active service, selection being made, as a general rule, of those who have been longest under instruction. While on board such vessels their time will be devoted as far as practicable, to learning the duties of seamen, and they will not be permitted to act as waiters or servants to officers. Regulations are also given in relation to leave of absence, to being allowed liberty on shore in foreign ports, &c. When the enlisted boys reach the age of twenty-one, their term being over, they will be paid the money due them, and, if they deserve it, will receive from the Department a certificate on parchment, of their good conduct, and of the length of service they have served in each ship. These holding such certificates will, in all applications for promotion or appointment, other qualifications being equal, be considered as having a prior claim.

Such in brief is the system which the Department has just adopted. These school-ships will offer to the sons of respectable parents an opportunity for instruction in an honorable profession, and open to them the avenues of advancement to the highest grades in the naval service. Care will be taken to surround the boy with the safeguards of virtue, to educate his sense of honor, and to teach him a love of his profession. His commencing at eleven o'clock A. M. The exercises will consist of religious services, appropriate music by the Academy band, and an oration by Major-General GEORGE B. MCCLELLAN. Brigadier-General ROBERT ANDERSON has been invited to act as Marshal. The Executive Committee, in behalf of the officers of the Army, invite the attendance of the officers of the Navy, and the friends of both branches of the service, upon the occasion. For the information of those who may desire to attend, we would state that West Point can be reached most pleasantly by the steamer *Mary Powell*, which leaves the foot of Jay street, North River, every afternoon at 3½ o'clock. Conveyance can also be had by some of the early morning boats to Albany, and by the Hudson River cars as far as Garrison's, and thence across the river by ferry.

The spot selected for the site of the monument is "Trophy Point," the ground occupied by the guns—trophies of former wars. From it we have that grand

lookout on the Hudson, familiar to every visitor to West Point, where Constitution Island intercepts the river beyond, giving to the river the effect of a lake, and in by the Crow Nest and Bull Hill on either side, and beyond which can be traced the shadowy outline of Shawangunk Mountains. It is not intended to lay the corner stone of the monument for the present, as the selection of plans and the present high price of material and labor will compel some delay in its exercises. The committee are anxious to secure designs for the monument, and propose, we understand, to offer a prize for the one which shall be accepted. The plan, to which all designs must be accommodated, includes a mausoleum for the bodies of such officers as may be interred at West Point, and tablets for each officer of the Regular Army fallen in the present war, and a general tablet for the enlisted men. Some ten thousand dollars have already been received by the Treasurer of the monument fund, and it is expected that the amount will reach twenty-five thousand dollars when the subscriptions assessed upon the officers of the Army shall all have been received.

The military relations between Generals GRANT and MEADE are not entirely understood by the public. Notwithstanding the care which the Lieutenant-General takes in his dispatches to show that General MEADE is the commanding officer of the Army of the Potomac, and has direction of its movements, the press and the people seem to forget this fact. The truth is, General MEADE is just as truly the commander of the Army of the Potomac, as General SHERMAN of the Army operating in Georgia, and both those officers are under the general command of General GRANT. His presence with the former Army naturally leads to his assuming a more direct and personal supervision of affairs in Virginia than he is able to do of the cooperative movement of General SHERMAN in Georgia. We may also say that the orders of General GRANT are more likely to be, from the very general character, the manner of executing them being left to the sound judgment and fine soldierly skill of the actual commander of the Army of the Potomac.

The annual examination at the U. S. Naval Academy, which was commenced on Monday, the 22d ult., was to be concluded on Friday or Saturday of this week. The Visitors, appointed by the Secretary of the Navy, to witness the examination, and to inquire into the general administration of the Institution, consists of Commodore JOHN MARSTON, Commodore JOHN RODGERS and Captain C. W. PICKERING, on the part of the Navy, and of the following named civilians: Hon. HENRY BARNARD, late Commissioner of Education; Hon. C. D. ROBINSON, of Wis., JAMES A. HAMILTON, Esq., of N. Y., JOHN W. HARRIS, Esq., of Mo., and Hon. G. A. D. PARKS, of Ill.

The morning of the first day was occupied in the customary presentation of the Visitors to the Academic Staff, and, subsequently, in an inspection of the midshipmen's quarters and school-rooms, ships, offices, reception rooms, &c., the Board being divided into appropriate committees, each charged with some special subject of inquiry. In the afternoon the examination in the various branches of instruction was begun.

The daily examinations have been attended by the Board, the members exhibiting much interest therein. Exercises in the professional branches, such as practical seamanship, target practice, infantry tactics, howitzer drill, great-gun exercises, the use of the small and of the broad sword, have been witnessed with marked satisfaction, on the part of the Board. Such of the midshipmen as have been examined, and are entitled by regulations to a leave of absence during the vacation, are *en route* to their respective homes. The others are to make a summer cruise in vessels attached to the Institution, namely; the *Macedonian*, the *Marion*, the *Marblehead* and the *America*. The cruising ground, it is supposed, will be near our coast. The squadron will be under the command of Captain FARFAX, the commandant of midshipmen, assisted by a number of other officers attached to the Institution. The present first class, appointed as we hear, in the autumn of 1861, will be among those who make the summer cruise, and, that ended, will return to the Institution for a month or two, when they will receive their diplomas. On the morning of the 8th, the midshipmen were addressed in behalf of the Board, by one of its members, JAMES A. HAMILTON, Esq., of New York. The officers of the Institution were also present. The address, which was a most interesting one, will no doubt be published. The Board, it is believed, will in a day or two transmit to the Department a report of its proceedings, comprehending, no doubt, an expression of its opinions on all questions of interest connected with the welfare and usefulness of the Institution.

On the 31st ult., a very interesting cruise in Narragansett Bay, was made by the practice ship *Marion*, under the command of Lieutenant-Commander CAMPBELL, the instructor in seamanship. On this occasion, the vessel was manned and worked by midshipmen exclusively, the first being in charge of members of the first class, acting in succession. The Board took evident pleasure in this brief cruise. We should not omit to add that, in the course of its investigations, the Board has been furnished with every necessary facility by the Superintendent.

The difficulty of accumulating at Nashville a sufficient quantity of supplies to tide over that period of the year when the Cumberland is too low to admit of the passage of transports, has heretofore seriously retarded the advance of our armies southward for that important point; for, when taxed to the utmost, the capacity of the Louisville and Nashville Railroad has proved altogether unequal to the demands made upon it. On June 19th, the citizens of Nashville celebrated the completion of an enterprise which will simplify greatly the condition of the important problem which General SHERMAN is working out in Northern Georgia, for then an unbroken train will run over the railroad just completed from Nashville to Johnsonville, a town on the Tennessee River, which may be reached by light draft steamers at all seasons of the year. The distance to Johnsonville is but seventy-eight miles—hardly half that between Nashville and Louisville—and the district through which the road runs is by no means favorable to the operations of guerrillas as that between the Cumberland and the Ohio Rivers, which has witnessed so many of the exploits of these marauders during the last two years. This road is a section of that commenced in 1857 with the design of opening direct communication by rail between Nashville and Decatur, Alabama, on the Mississippi. Before the war broke out, 51 miles of the western section, from Hickman to McKenzie, had been completed, as had 24 miles of the eastern section from Nashville, and it was only after the exercise of much diplomacy, that Governor ANDREW JOHNSON, of Tennessee, succeeded in drawing the attention of the Government to the vast importance of promptly running the rails to Johnsonville. The work has been finished just in time to be of essential service, for we learn that MORGAN has already entered the eastern part of Kentucky with a force of 2,500 men, doubtless designing to disable the Louisville and Nashville railroad. His labor, however, will be wasted unless he succeed in reaching this newly constructed line, which it is hardly probable he can do.

The message of the PRESIDENT to the House of Representatives, enclosing and recommending to consideration a letter from the Secretary of War, who in turn encloses a report of Provost-Marshal-General, showing how unfortunately the exemption clause of the Enrollment Act is working, ought to induce Congress to repeal the obnoxious clause. It will be remembered that before the new law was passed, this journal expressed the opinion that this clause would defeat the purposes of the law, and proved that its result would be the bringing in of money, of which the Government was not especially in need, and not of the men for whose services there was and is pressing necessity. The opinion of the Provost-Marshal-General is undoubtedly correct; there is "no reason to believe "that the Army can be materially strengthened by "draft so long as three hundred dollar clause is "in force." The reports which he presents from sub-districts in eight different States show that in the draft now being conducted, 14,741 drafted men were examined, of whom 7,016 were exempted for physical disabilities and other causes, and 5,050 paid their commutation money. There were therefore left but 2,675 men. Of these, 1,416 furnished substitutes, and but 1,259 were held for personal service; and even this small number includes some who may scrape together the necessary three hundred dollars. The result is that out of 14,741 drafted men the Government will obtain but 2,000 soldiers. It is very evident that at this rate it will be impossible to reinforce the Army to any extent, and that the draft, with all its cumbersome and expensive machinery, is a mere farce.

Perhaps there never was a time in the history of the war when the Government needed a larger reserve of men to draw upon than at the present. The extraordinary battles of the campaign are battling thousands of soldiers *hors du combat*; and if we are to achieve the full measure of success we expect and must have, their places must be supplied. If the enemy is discomfited, we need troops to follow up our advantages. If he is successful in resisting our assaults, we must press into the field men enough to overcome further resistance. It would be worth a victory in the field to us to have a new army of a hundred thousand men at our call. Outside of other more direct advantages, the moral effect of such an army upon the hard-pressed enemy, with his fighting material already exhausted, would be immense. Let the people therefore cumulate the value and devotion of their soldiers in the field, whose splendid courage compels the admiration of the world, and show them that they are ready to share with them the dangers and the honors of military service.

We learn that General GRANT has made important changes in the organization of the artillery of the Army of the Potomac, with the view of increasing its mobility and its efficiency. The old organization of batteries of six pieces of like calibre—light twelves, or ten-pounder Parrots—is broken up, and the number of pieces in each battery is reduced to four. With a view of adapting the battery to the varying conditions of an engagement, the calibre of the pieces is mixed—two light twelves and two ten-pounders. The four guns are accompanied by six caissons, the intention being to provide a large supply of ammunition. Another innovation made by General GRANT is the breaking up of the reserve artillery. The guns have either been sent back or distributed amongst the corps, whose commanders, so far as we can learn, seem to have control of their artillery. Of the reserve artillery, but two horse batteries are left, and the commander of the corps has been assigned to duty in charge of the ammunition of the Army. The reduction of batteries to four pieces corresponds with the organization of artillery in the Swiss Army, the rifled batteries of which since 1862 have been reduced from six and eight pieces to four.

The annual examination of the Cadets at the United States Military Academy has been continued during the past week, the examination of the graduating class closing on Monday, the class oration being given by R. G. NORTHUP, Esq., agent of the Massachusetts Board of Education. The annual "hop" of the graduating class was given on Thursday evening in the Academic Hall, commencing at 9 o'clock.

We are glad to observe that the subject of competitive examinations for the appointment of Cadets is attracting increased attention, and that several members of Congress have this year had the good sense to adopt this method in the selection of their appointees. We trust that it will be established as the rule for the selection of Cadets. It is evident that our Army must in the future open a career to talent and energy such as it has never before afforded, and we shall undoubtedly have need of all the educated soldiers our Military Academy can furnish. We cannot afford, therefore, to have its advantages wasted on youths whose unfitness for a military training might, with ordinary care, be detected in advance of their appointment. Those general officers who have interested themselves in filling the vacancies at the Academy from the Army, will be gratified to know that their appointees are fully justifying the wisdom of their selection. One of them, CLINTON B. STARS, stands second in his class (the fourth) another, WILLIAM E. ROGERS, fourth; and of the whole number, thirty-one, seventeen are in the first half of the class, which numbers eighty-four in all.

The Army sword at the St. Louis Sanitary Fair was awarded amid much enthusiasm to General HANCOCK, he having received 2,403 votes. General MCCLELLAN received the next highest number of votes.

ARMY GAZETTE.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

BRIGADIER-GENERALS.

Brigadier-General John Gibbon, of the United States volunteers, to be major-general of volunteers.

Brigadier-General Gouverneur K. Dodge, of the United States volunteers, to be major-general of volunteers.

BRIGADIER-GENERALS.

Colonel Joseph Bailey, of the 4th Wisconsin cavalry, to be brigadier-general by brevet.

Colonel Byron R. Pierce, of the 3d Michigan Vols, to be brigadier-general of volunteers.

Colonel Nelson A. Miles, of the 61st New York Vols, to be brigadier-general of volunteers, May 12, 1864.

Colonel Joseph Hayes, of the 11th Massachusetts Vols, to be brigadier-general of volunteers, May 12, 1864.

Colonel John R. Brooke, of the 53d Pennsylvania Vols, to be brigadier-general of volunteers.

PROVOST-MARSHAL-GENERAL.

Colonel James B. Fry, Provost-Marshal-General of the United States army, to be provost-marshal-general with the rank of brigadier-general.

FIRST REGIMENT OF CAVALRY.

First Lieutenant Andrew Hayeraft, to be captain, December 20, 1863, vice Carr, retired.

Second Lieutenant Reuben F. Bernard, to be first lieutenant, June 24, 1863, vice Fisher, died of wounds received in battle.

Second Lieutenant William H. Wherry, to be first lieutenant, September 1, 1863, vice Nirdlen the regimental quartermaster.

Second Lieutenant Edward Ingraham, to be first lieutenant, September 10, 1863, vice Bigelow, retired.

Second Lieutenant Edward Spring, to be first lieutenant, October 18, 1863, vice Dean, the regimental quartermaster.

Second Lieutenant Harris Whitbeck, to be first lieutenant, November 1, 1863, vice Ogden, the adjutant.

Second Lieutenant Joseph Mc Cormick, to be first lieutenant, December 20, 1863, vice Haycock, promoted.

First Sergeant Henry Hall, of Co. I, 4th cavalry, to be second lieutenant, vice Bernard, promoted.

Sergeant Charles Lewis, of Co. H, to be second lieutenant, vice Fenwick, promoted.

SECOND REGIMENT OF CAVALRY.

Captain Frank Wheaton, of the 4th cavalry, to be major, November 5, 1863, vice Sumner, deceased.

First Lieutenant James P. McQuesten, to be captain, February 13, 1864, vice Gregg, resigned.

Second Lieutenant Elihu R. Wells, to be first lieutenant, October 17, 1863, vice Wheaton, promoted.

Private Stephen De W. Beekman, to be second lieutenant, vice Blakely, deceased.

THIRD REGIMENT OF CAVALRY.

First Lieutenant William Hawley, to be captain, February 10, 1864, vice Feary, deceased.

Second Lieutenant Charles Mehlodi, to be first lieutenant, December 31, 1863, vice Dubois, resigned.

Second Lieutenant Edward Ball, to be first lieutenant, February 10, 1864, vice Hawley, promoted.

Quartermaster's Sergeant George J. Campbell, of the 3d artillery, to be second lieutenant, vice Ball, promoted.

First Sergeant Henry Garrell, of the 3d artillery, to be second lieutenant, vice Jones, deceased.

FOURTH REGIMENT OF CAVALRY.

First Lieutenant Chauncey Mauch, to be captain, November 5, 1863, vice Wickersham, promoted to the staff.

First Lieutenant John A. Wilcox, to be captain, December 1, 1863, vice Stanley, promoted to the staff.

Second Lieutenant Thomas W. Sullivan, to be first lieutenant, November 5, 1863, vice Mauch, promoted.

Second Lieutenant John Lee, to be first lieutenant, November 7, 1863, vice Hollins, dismissed.

FIFTH REGIMENT OF CAVALRY.

Captain David S. Stanley, of the 2d cavalry, to be major, December 1, 1863, vice Whittlesey, retired.

Captain William R. Price, to be major, December 7, 1863, vice Hastings, retired.

First Lieutenant John B. McIntosh, to be captain, December 7, 1863, vice Royall, promoted.

Second Lieutenant Joseph H. Kuse, to be first lieutenant, November 18, 1863, vice Jones, dismissed.

Second Lieutenant Edward Murphy, to be first lieutenant, December 7, 1863, vice McIntosh, promoted.

First Sergeant Charles Ayer, of the 5th artillery, to be second lieutenant, vice Bullock, resigned.

Sergeant Army Hospital Steward Edward Harris, to be second lieutenant, vice Montgomery, deceased.

First Sergeant William H. Chamberlain, Co. K, to be second lieutenant, vice Wells, dismissed.

SIXTH REGIMENT OF CAVALRY.

First Lieutenant Benjamin T. Hutchins, to be captain, November 14, 1863, vice Sanders, died of wounds received in battle.

Second Lieutenant Andrew Stoll, to be first lieutenant, November 14, 1863, vice Hutchins, promoted.

Second Lieutenant Samuel M. Whitaker, to be first lieutenant, January 30, 1864, vice Hall, resigned.

FIRST REGIMENT OF ARTILLERY.

Hospital Steward Robert O'Brien, to be second lieutenant, vice Mason, promoted.

SECOND REGIMENT OF ARTILLERY.

Major William H. French, to be lieutenant-colonel, February 9, 1864, vice Gibbs, deceased.

Captain Edmund G. Beckwith, of the 3d artillery, to be major, February 9, 1864, vice French, promoted.

First Lieutenant Alexander C. M. Pennington, Jr., to be captain, March 6, 1864, vice Hoyt, deceased.

Second Lieutenant Samuel H. Marsh, to be first lieutenant, March 26, 1864, vice Pennington, promoted to regimental commissary.

Second Lieutenant Albert M. Mercur, to be first lieutenant, March 29, 1864, vice Cooper, who vacated by subsistent commission.

Second Lieutenant James H. Lord, to be first lieutenant, March 30, 1864, vice Fuller, resigned.

THIRD REGIMENT OF ARTILLERY.

First Lieutenant John S. Shinn, to be captain, January 20, 1864, vice Saunders, dismissed.

Second Lieutenant John L. Tiffany, to be first lieutenant, January 20, 1864, vice Shinn, promoted.

FOURTH REGIMENT OF ARTILLERY.

Second Lieutenant Arthur Murray, to be second lieutenant, November 15, 1863, vice Whitney, resigned.

FIFTH REGIMENT OF ARTILLERY.

First Lieutenant Henry A. Rogers, to be captain, March 24, 1864, vice Hazlett, appointed inspector-general.

Second Lieutenant Charles L. Scott, to be first lieutenant, March 24, 1864, vice Rogers, promoted.

FIRST REGIMENT OF INFANTRY.

Lieutenant-Colonel Robert U. Buchanan, of the 14th infantry, to be colonel, March 26, 1864, vice Miller, retired.

Major William H. Wood, of the 12th infantry, to be lieutenant-colonel, December 31, 1863, vice Buchanan, promoted.

SECOND REGIMENT OF INFANTRY.

Major Samuel W. Crawford, of the 13th infantry, to be lieutenant-colonel, February 17, 1864, vice Patten, retired.

First Lieutenant Charles W. Freeman, to be captain, October 20, 1863, vice Sweney, promoted to the 16th infantry.

First Lieutenant George H. McLaughlin, to be captain, December 1, 1863, vice Reed, retired.

MAJOR-GENERAL MCDOWELL ASSIGNED.

WAR DEPARTMENT, ASSISTANT-GENERAL'S OFFICE,
WASHINGTON, May 31, 1864.

General Orders, No. 221.

Major-General Irwin McDowell, United States Volunteers, is by direction of the President, assigned to the command of the Department of the Pacific. Headquarters, San Francisco, Cal.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant-General.

EXEMPTION CLAUSE IN THE ENROLLMENT ACT.

MESSAGE FROM THE PRESIDENT.

WASHINGTON, D. C., June 8, 1864.

To the Senate and House of Rep resentatives:—

I have the honor to submit for the consideration of Congress a letter and evidence from the Secretary of War, with my concurrence in the recommendations therein contained.

ABRAHAM LINCOLN.

LETTER FROM THE SECRETARY OF WAR.

WAR DEPARTMENT, WASHINGTON CITY, June 7, 1864.

SIR:—I beg leave to submit to you a report made to me by the Provost-Marshal-General, together with the views now going on in the discharge in the quotas in certain States, and recommending a repeal of the exemption clause in the enrollment act which has been found to defeat clause. The recommendation of the Provost Marshal-General is approved by the Secretary of War, and that it will be recommended by you to Congress.

The recent successes which have attended our arms lead to the hope that by continuous our military strength, and giving it such increase as the exigency may require, the rebellion may be early terminated in the way may be attained. But to accomplish this, it is absolutely necessary that efficient aid be given by the civil authorities to bring forward the strength, and supply deficiencies occasioned by the casualties in the field.

That end never must be lost to a draft; but simple experience has now shown that the exemption clause in the enrollment act is one of the greatest evils to the enrollment law by furnishing money instead of men.

As additional men are required for the military service, it is not considered to repeal the draft for compulsory service is short term. The hardship of voluntary service will therefore be lightened; but the ordinary and existing means is an absolute necessity to success.

I have the honor to be, your obedient servant,

EDWIN M. STANTON, Secretary of War.

LETTER FROM PROVOST-MARSHAL-GENERAL'S OFFICE.

WAR DEPARTMENT, PROVOST-MARSHAL-GENERAL'S OFFICE,
WASHINGTON, D. C., June 6, 1864.

To Hon. EDWIN M. STANTON, Secretary of War:

SIR:—In accordance with the amended Enrollment act, approved February 24, 1864, and your orders on the subject, I am now conducting a draft in various sub-districts for their respective deficiencies on quotas of troops heretofore assigned. The results of the draft, so far as shown by the reports to this date, are worthy of attention. They are briefly as follows:

Number of drafted men examined..... 14,741
Number exempted for physical disability..... 4,374
Number exempted for other causes..... 2,668
Number furnished substitutes..... 7,018
Number who paid commutation..... 681
Number who have furnished substitutes..... 1,418
Number held for personal service..... 1
The last numbers are those who may yet pay commutation money.
Total sent exempted..... 7,723

These reports come from sub-districts in eight different States.

I have not attempted to draw any inference or deduction from the number of the existing law. I see no reason to believe that the army is not to be recruited and kept up to its present force. Whether this is to be done by draft or not is not to assume that the commutation paid by drafted men will furnish the Government a proportionate number of recruits at this time.

I do not think the large bounties by the United States should be in the power of the States to offer.

I recommend that the three hundred dollar clause, as it is known, be repealed.

I am, sir, very respectfully, your obedient servant,

JAMES B. FRY, Provost-Marshal-General.

RESTORED TO HIS RANK, &c.

WAR DEPARTMENT, ASSISTANT GENERAL'S OFFICE,
WASHINGTON, June 1, 1864.

General Orders, No. 208.

The President of the United States directs that General Order No. 168, dated at Washington, May 19, 1864, by Brevet Major-General Halleck, U. S. Infantry, be revoked. Captain Kellogg will be restored to the former position and rank which he held previous to the date of the Army Register as it has not been dismissed. He will join his regiment in the field with all practicable speed.

By order of the Secretary of War,

E. D. TOWNSEND, Assistant Adjutant-General.

EXEMPT FROM DISMISSAL.

Captain J. M. Eyster, 10th United States Infantry, heretofore published for dismissal by reports of Court-Martial, is reported, is hereby notified that he is exempt from dismissal from the service of the United States, by reason of commission instituted by Special Orders No. 53, series of 1865, from War Department, having reported that satisfactory efforts have been made by the respective executive.

Major St. Clair Mulholland, 116th Pennsylvania Vols.
Assistant Surgeon J. B. Green, 4th Rhode Island Artillery.

NOTICE TO DELINQUENTS.

The following officers having been reported at the headquarters of the Army for the offences hereinafter specified, are hereby notified that they are required to appear before the Examining Board, within fifteen (15) days from June 8, 1864, they appear before the Military Commission instituted by Special Orders No. 53, of which Brigadier-General John C. Caldwell, United States Volunteers, is President, and make satisfactory answers to the charges against them:

Absence without leave.

Assistant Surgeon J. B. Green, 4th Rhode Island Artillery.

Desertion.

First Lieutenant Joseph W. Lee, 5th New York Cavalry.

DISMISSALS CONFIRMED.

The order heretofore issued dismissing Captain S. S. Vanwyck and Lieutenant William J. Hall, 13th Missouri Cavalry, to date April 26, 1864, with loss of all pay and allowances, for conduct disgraceful to officers and gentlemen, by having been arrested in a low house of ill-fame in uniform, and in a state of partial intoxication, has been confirmed.

SENTENCE REMITTED.

The sentence of dismissal in the case of Lieutenant Jason D. Smith, 44th New Hampshire Volunteers, has been remitted.

DISMISSALS REVOKED.

The orders of dismissal heretofore issued in the following cases have been revoked:

Lieutenant-Colonel John E. Bull, First Lieutenant James M. Bryant, Second Lieutenant Thomas Wood, 102d Illinois Vols.

Officers who have been previously discharged on tender of resignations, they having been previously discharged on tender of resignations.

RESIGNED TO COMMISSION.

The following officers will be relieved, as restored, with pay from the dates at which they again their rolls for duty, proceed to the commissions have been filled by the Governors of their respective States:

Captain R. B. Hagler, 40th Iowa Volunteers, and Lieutenant Gordon Winslow, 8th New York Veteran Volunteers.

CASHIERED.

Captain L. D. Rowell, Co. F, 2d Colorado Volunteers.

DISMISSED.

First Lieutenant Marcus De Groot, Co. I, 4th Cavalry, Missouri State Militia.

NAVY GAZETTE.

[OFFICIAL.]

REGULATIONS FOR THE ADMISSION AND ADVANCEMENT OF VOLUNTEER LINE OFFICERS IN THE U. S. NAVY.

Acting Master's Mates are to have attained the age of eighteen (18) and thirty five (35), and must serve three (3) years' service on sea, before they can be examined for promotion. They will be rendezvous and subsisted by the navy department at the navy yards, and pass examination as to—

Seamanship, pilotage, and navigation.

Commanders of squadrons, or of single ships acting independently, may fill any vacancies in the complement existing with their commands, subject to the approval of the Department.

Acting Masters are to have served for the space of twenty-one (21) and thirty-five (35), and have seen eight (8) years' sea service before they can be examined.

Aboard, vacancies in this grade may be filled by the Commanders of Squadrons and Single Ships, as in the case of Acting Ensigns.

Acting Masters, who have served as such at least six months, may be recommended to the Department, by Commanders of squadrons, for promotion to the grade of *Acting Volunteer Lieutenant* for highly meritorious services.

Acting Volunteer Lieutenants, who have served as such at least one year in command of a vessel, and received the special commendation of a Commander of a squadron or single division, for meritorious conduct in the presence of the enemy, and for having the vessel in an efficient state of discipline, may be promoted to the grade of *Acting Lieutenant Commander*.

Acting Lieutenants, who have served as such for the past two years, will be examined for the grade of *Acting Commander*, and a proper case, on the certificate of examining officers, Commanders will be advanced according to their record in the service, and the merit of their examination.

REGULAR NAVAL SERVICE.

Pooley, U. S. A., Surgeon J. H. Ledlie, Ninety-ninth New York Volunteers, Surgeon E. A. Clark, Illinois Volunteers, Surgeon

THE new fort, building upon the site of Fort Hale, to defend New Haven harbor, will be the largest fortification in Connecticut, and capable of withstanding the most serious naval attack.

THE Paymaster-General has issued instructions to paymasters, not to pay any but wounded officers, for the present.

VARIOUS NAVAL MATTERS.

THE Navy Department has received information of the arrival of the steamer Oneida, on the 26th of May, near the Brever, Fla. She had five bales of cotton on board, but no papers of any kind.

THE following is a list of naval prizes up to the list of July—schooners, 41; schooners, full; sloops, 2; barks, 29; brigs, 23; ships, 16; yachts and steamers, 152. Total, 1,727. The aggregate value is $17,-000, to be distributed among the naval captors.

THE Navy Department has received information of the arrival of the steamer Oneida, Lieutenant-Commander Harrell, off Carrabelle, Bravo River, on the 26th inst., of the Prussian schooner *Frederick II.* She had on the blockade off Mason River, in company with the Wissahickon and Kanawha, when the latter vessel was sent out to New Orleans for adjudication.

IN the 22d of May, the following vessels were on the coast of Mobile: *Hay Ship Hartford*, 26, steamer Richmond, 24; Cuyler, 13; Genesee, 10; *Metacomet*, 10; Monongahela, 14; *Oneida*, 10; *Seminole*, 6; Gemsbok, 4; *Adagio*, 2; and the following vessels, if reported, were duly looked for: *Monongahela*, 12; *Kanawha*, 9; *Penguin*, 1; *Port Royal*, 8; *Kansas*, 4. Some steamers have been ordered to prevent a surprise, by rebel rams, gunboats or torpedoes.

THE steamer *Marblehead*, 6, Lieutenant Brown commanding, arrived at Newport on Sunday from New York to undergo repairs for the Naval Academy.

THE following changes have recently taken place in the First Gulf Squadron: Commander Wm. E. Le Roy, detached from Oneida, and ordered to command the steamer Canandaigua; Master Charles H. Baldwin, detached; Lieutenant-Commander W. W. Low, of the Octorara, to command the steamer Kinsman, vice Le Roy, detached; Lieutenant Low has ordered to the command of the bark *Corinthian*, 6, at New Orleans; Acting Ensign Hall has been ordered to the Octorara; Acting Master's Assistant Commander J. G. Maxwell has been ordered to the Kanawha; Lieutenant-Commander Rutherford has been ordered to the command of the Oneida, vice Lieutenant-Commander George U. Morris, detached and ordered North.

MR. S. S. Stratton, of Brooklyn Navy Yard, has called on the 31st, inclosed on the list, as no longer in the North Atlantic Squadron. The Wissahickon, Lieutenant-Commander Gibson, was at present the Yard, sailed on the 8th, and quit returned to the 13th, leaking badly. The *Marshland*, Lieutenant-Commander Nye, and the Kansas, Lieutenant-Commander Ward, the schooner Oliver *H. Lee*, Acting Master Oliver commanding, left on the 6th. The *R. R. Cuyler*, Lieutenant-Commander Pope, and the steamer Sumpter, left the 7th. The *Merrimack*, Acting Master C. R. Rogers, left the 8th. The prize steamer *Chickamauga*, captured off Georgia by the U. S. steamer Sonoma, arrived on the 30th, Acting Master Corey commanding. The Senaca, Lieutenant-Commander Parker, arrived on the 8th. The bark *C. McVay*, commanded by Acting Ensign Hall, left the Gardiner for taking vessels to Fortress Monroe, and convoyed by Acting Ensign Ames, arrived on the 30th. The bark, Lieutenant Commanding Rutherford, went into Sonoma on the 8th. The *Shamrock* is lying at the Navy Yard for sale, awaiting orders.

A SURVEY has been received from Acting Volunteer Lieutenant-Commanding Budd, commanding steamer Seneca, West Pass, St. George's Sound, of Lieutenant-Commanding Sigsbee, and Acting Master's Assistant Swan, on expedition by which he succeeded in completely locating the designs of an expedition set up by Semmes, Maffitt, who had been making preparations for the capture of the U. S. steamer *Adela*. He says:—We found the light-draft launches of the steamer United Statesboro' *Chamberlain* were sent to land a detachment of troops, under command of Lieutenant Hunter, 120th N. Y. Vols., who proceeded to Apalachicola, to be in readiness to co-operate with the launches. The forces on the enemy were discovered near the town. They immediately returned, and the troops were taken on board the steamer Hunter, who supposed them to be our own, and would have been captured. The commanding officer of the rebel expedition, General W. Wing, escaped capture by the swiftness of his vessel. Their intention was to take the *Adela* into Mobile and burn her. Six of their boats, all told, were captured.

ACTING Assistant Paymaster G. W. Whitney, of the gunboat *Adela*, was recently drowned at Mound City, on the Mississippi River. He was in the habit of going down to swim in the city, and was just stepping from the ferry-boat to the flag-ship report to the Admiral, when Robert Gilpert and he were precipitated between the two boats. Some of the men on the flag-ship saw the fall, but did not know who it was. The alarm was given, and execution made to save him, but without success.

THE U. S. tug Sagamore was captured near Mobile Point, Alabama, on the morning of the 26th inst., by the rebels, and on the evening of the 28th ult. She had on board Captain Nichols, one lieutenant, and thirty soldiers, of Company B, Thirty-fifth U. S. Colored troops, late the 1st Louisiana Native Guards, and a party of Master Simmons, with three officers and a crew of twenty-three men. She was armed with two 12-lb. rifled guns. The rebels opened on her with a light battery, and a short slashing her rudder, she struck sheers, and was attacked by over two hundred men, who boarded her, and all on board, excepting three of the soldiers, who escaped and reached St. Augustine overland.

THE following prize cases have just been sent to the Secretary of the Navy for adjudication, and will be ready for payment ere long: Prize schooner *Lessie*, captured by the U. S. steamer Nereus, January 31, 1863. Appraised for distribution, $4,439 25. D. D. Farragut, Flag Officer. Prize schooner *Edward*, captured by the U. S. steamer Kanawha, February 22, 1863. Appraised, $1,000. Wesley Bailey, Flag Officer. Prize sixty-four Bales of Cotton, captured by the C. S. steamer *J. D. Davis*. Amount for distribution, $1,000.

THE U. S. steam Revenue Cutter Wyanda, from Washington, D. C., May 25th, via Newport, R. I., 31 inst. at 8 P. M., arrived at this port this morning. The U. S. Marshal informed of the six new vessels contracted for by the Secretary of the Treasury, a year ago. She is built in Baltimore, and is 150 feet long, 24 beam. The following is a list of her officers: Captain, J. A. White; First Lieutenant, J. B. Tompkins; Second Lieutenant, C. D. Hedges; Third Lieutenant, Thomas Ray; Chief Engineer, A. M. Cummings; First Assistant, Frank Pulsifer; Second Assistant, Thomas McClelland a. of 2. T. Pulsifer.

THE steamer *Bermuda*, arrived at Philadelphia on the 6th, from the West Indies and Aspinwall. She brings dispatches from Commodore Pearson, of the late United States ship *Hartford* on a cruise. Spoke at sea schooner *Dart* from New Orleans with 20 passengers, for Charleston and was boarded by the U. S. steamer Tioga.

BUT wheel steamer *Adela*, 6, Lieutenant Bodder commanding, blockading Apalachicola, was attacked, May 26, by eight boats, containing about two hundred men—who were beaten off. The attempt probably grew out to the Rebel report that a gunboat had been taken, and was on the way to Richmond.

THE Navy Department is in want of acting engineers. Applicants must have seven eight years of sea service, and be between the ages of twenty-five and thirty-five years.

BUT wheel steamer *Pembroke*, 21, was spoken on the 29th inst., off Barbadoes, cruising for the Rebel privateer *Florida*.

A LETTER from an officer on board screw steamer *Wyoming*, 11, of one thousand tons burden was off Arkansas in company with steamer Genesee Queen.

SCREW steamer *Wyoming*, 8, sailed from Batavia, April, to cruise.

THE steamer *Grand Gulf*, 11, left Fortress Monroe on the 6th inst., for the Wilmington blockade, also screw steamer *Shenandoah*, 10, and side-wheel steamer Connecticut, 11.

ON the trip of the steamship Queen Queen, from New York, with eight hundred passengers and two hundred bales of cotton, for Nassau, the cotton was found concealed, and terrible consequences were prevented only by the coal resolution of the officer who had them in charge—Lieutenant Commander Low. The cotton has been transferred from the army to the navy, and on the third day out from New York they came within sight of a vessel, and hove to, when they observed the crew to launch and leave the vessel, which proved to be the Rebel steamer *Chickamauga*, captured off Georgia by the U. S. steamer Sonoma, and sent to New York, Acting Master Corey commanding. The Sonoma, Lieutenant-Commander Parker, arrived on the 8th. Acting Master's Mate Morris, reported to the Gardiner for taking vessels to Fortress Monroe, and convoyed by Acting Ensign Ames, arrived on the 30th. The bark, Lieutenant Commanding Rutherford, went into Sonoma on the 8th. The *Shamrock* is lying at the Navy Yard for sale, awaiting orders.

A SURVEY has been received from Acting Volunteer Lieutenant-Commanding Budd, commanding steamer Seneca, West Pass, St. George's Sound, of Lieutenant-Commanding Sigsbee, and Acting Master's Assistant Swan, on expedition by which he succeeded in completely locating the designs of an expedition set up by Semmes, Maffitt, who had been making preparations for the capture of the U. S. steamer *Adela*. He says:—We found the light-draft launches of the steamer United Statesboro' *Chamberlain* were sent to land a detachment of troops, under command of Lieutenant Hunter, 120th N. Y. Vols., who proceeded to Apalachicola, to be in readiness to co-operate with the launches. The forces on the enemy were discovered near the town. They immediately returned, and the troops were taken on board the steamer Hunter, who supposed them to be our own, and would have been captured. The commanding officer of the rebel expedition, General W. Wing, escaped capture by the swiftness of his vessel. Their intention was to take the *Adela* into Mobile and burn her. Six of their boats, all told, were captured.

ACTING Assistant Paymaster G. W. Whitney, of the gunboat *Adela*, was recently drowned at Mound City, on the Mississippi River. He was in the habit of going down to swim in the city, and was just stepping from the ferry-boat to the flag-ship report to the Admiral, when Robert Gilpert and he were precipitated between the two boats. Some of the men on the flag-ship saw the fall, but did not know who it was. The alarm was given, and execution made to save him, but without success.

THE U. S. tug Sagamore was captured near Mobile Point, Alabama, on the morning of the 26th inst., by the rebels, and on the evening of the 28th ult. She had on board Captain Nichols, one lieutenant, and thirty soldiers, of Company B, Thirty-fifth U. S. Colored troops, late the 1st Louisiana Native Guards, and a party of Master Simmons, with three officers and a crew of twenty-three men. She was armed with two 12-lb. rifled guns. The rebels opened on her with a light battery, and a short slashing her rudder, she struck sheers, and was attacked by over two hundred men, who boarded her, and all on board, excepting three of the soldiers, who escaped and reached St. Augustine overland.

THE following prize cases have just been sent to the Secretary of the Navy for adjudication, and will be ready for payment ere long: Prize schooner *Lessie*, captured by the U. S. steamer Nereus, January 31, 1863. Appraised for distribution, $4,439 25. D. D. Farragut, Flag Officer. Prize schooner *Edward*, captured by the U. S. steamer Kanawha, February 22, 1863. Appraised, $1,000. Wesley Bailey, Flag Officer. Prize sixty-four Bales of Cotton, captured by the C. S. steamer *J. D. Davis*. Amount for distribution, $1,000.

THE U. S. steam Revenue Cutter Wyanda, from Washington, D. C., May 25th, via Newport, R. I., 31 inst. at 8 P. M., arrived at this port this morning. The U. S. Marshal informed of the six new vessels contracted for by the Secretary of the Treasury, a year ago. She is built in Baltimore, and is 150 feet long, 24 beam. The following is a list of her officers: Captain, J. A. White; First Lieutenant, J. B. Tompkins; Second Lieutenant, C. D. Hedges; Third Lieutenant, Thomas Ray; Chief Engineer, A. M. Cummings; First Assistant, Frank Pulsifer; Second Assistant, Thomas McClelland a. of 2. T. Pulsifer.

BRADLEY—At London, N. Y., on May 31st, WILLIAM LANGFORD BRADLEY, late commander in the U. S. Navy, aged 72 years.

BUSINESS NOTICES.

MORTON'S GOLD PENS are now sold at the same price as before the commencement of the war; this is entirely owing to the Manufacturer's Improvements in Machinery, and the Large Retail Business done on the Cash-in-Advance System; for, until he commenced advertising, his business was done on Credit and Commission, at Wholesale.

The Morton Gold Pens are the only ones sold at 50 cents, as the merits of all other gold pens advertised for premium on the Gold, Government Tax, &c., but Morton has in no case changed his prices, Wholesale or Retail.

Of the great numbers sent by mail to all parts of the world during the past few years, not one in a thousand has failed to reach its destination in safety, showing that the Morton Gold Pen can be obtained by any one, in every part of the world, at the same reasonable rates as charged.

Reader, you can have an enduring, always ready, and perfect Gold Pen, exactly adapted to your hand and style of writing, which will do your writing vastly cheaper than Steel Pens; and at the present almost fabulous Gold Premium Price of every article, you will have a Morton Gold Pen cheaper, in proportion to the labor spent upon it and material used, than any other Gold Pen in the World. If you wish one, send the "Pen Is Mightier than the Sword," to another column.

ADVERTISEMENTS.

Advertisements of three agate nolines in the columns of the JOURNAL will be inserted, by a limited number, at twenty cents a line each insertion. Advertisers are requested to make their favors as select as possible.

UNITED STATES TREASURY, NEW YORK, June 3, 1864.
UNDER INSTRUCTIONS FROM the Secretary of the Treasury, notice is hereby given that interest at the rate of 6 per cent. per annum in coin will be allowed on all drafts paid after the date on account of Temporary Loan.
JOHN J. CISCO, Assistant Treasurer, N. Y.

THE GOVERNMENT LOAN OF

$200,000,000.

The Loan is authorized by Act of Congress of March 3, 1864, which provides for its REDEMPTION IN COIN, at any period not less than ten or more than forty years from date, at the pleasure of the Government.

Until its Redemption five per cent. interest is to be paid semi-annually IN COIN.

Subscriptions to the Loan are received by the National Banks in United States notes, or in such currency or other funds as are taken by them on deposit at par.

In Exemption from State or Local Taxation also from one to three per cent. per annum in its value.

The Rate of Interest on this loan, although but five per cent. in coin, is as much greater in currency as the difference between the market values of currency and gold.

As a Rule, the five per cent. specie securities of all solvent governments are always par or above, and currency now founded in the National Loan will be worth its face in gold, besides paying a regular and liberal premium to the holder.

The authorized Amount of this loan is Two Hundred Million Dollars. The amount of subscriptions reported to the Treasury at Washington, up to June 4, has been

$67,017,650.

Subscriptions will be received by the TREASURER OF THE UNITED STATES at Washington, and the ASSISTANT-TREASURER at New York, Boston and Philadelphia, and by the

ANTHRACITE COAL FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF EQUIPMENT AND RECRUITING,
May 16, 1864.

Sealed proposals for furnishing Anthracite Coal for the Navy, to be delivered during the fiscal year ending 30th June, 1865, will be received at this Bureau until 12 o'clock, 18th June, 1864.

These proposals must be endorsed, "Proposals for Anthracite Coal for Steamers," that they may be distinguished from other business letters.

The offer must be for the delivery of 100,000 tons, of 2,240 pounds.

The coal must be of the best Buck Mountain or Black Heath, or of a kind equal to them in all respects, of the largest lumps known in the market, to be ascertained by a Board appointed by the secretary of the Navy, whose decision shall be final.

The coal must be such as proposed or to have been so stated in the offer.

It must be delivered in lumps of suitable size for naval purposes—clean, of uniform quality, without dirt, slate or rubbish, smoke-dry when delivered, and tar will be required to furnish such evidence as will be satisfactory, and be subject to such inspection as to quality and quantity as the Department may direct. It will be required in all respects to conform to the inspector or inspectors, to be appointed by the Bureau, who will have the right of rejection at any time.

The coal is to be delivered on board vessels, at such place in the port of Philadelphia as may be designated by the Bureau, and in such quantities and at such times as, in the opinion of the Bureau, the exigencies of the public service may require; nominating when the vessel is reported ready to receive coal; furnishing, when required, with not less than 1,000 tons per day distributed to each vessel, as may be directed, until the whole shall be completed.

The party or parties to whom may be awarded the delivery of 50,000 tons of the same quality of coal, to be delivered at the port of New York, as above stated at Philadelphia.

In the case of failure to deliver the coal in proper quantity, or the proper quality, and at the proper time and place, the Bureau will reserve to itself, without the right to purchase herefrom, at the contractor's cost and expense, that which may be required to supply the deficiency.

Any forfeiture, or other charges to which the Navy Department may be subjected from delay in making the delivery of the coal by the contractors, will be deducted from their bills.

The coal must be the coal delivered on board vessels, on the terms and conditions above stated, to be measured by the Bureau, and the expense and charge of any kind.

Each offer is required by law, must be accompanied by a written guaranty, signed by one or more responsible persons, to the effect that, if the proposal of the tender or bidder will, if his or their bid be accepted, execute the contract, in due form of law, within the time specified, with good and sufficient sureties, to be named in the guaranty.

Proposals for less than the whole amount specified by each guarantor; and the Department reserves the right to reject all the offers, if considered by it for the interest of the service to do so.

Two or more proposals each to a sum equal to the amount specified to be paid, will be required to sign the guaranty as joint responsibility, to be approved by a United States District Judge, United States District Attorney or Secretary of State.

An additional and collateral security—twenty per cent.—will be retained from the amounts due for payments, which reservation is not to be paid except by authority of the Secretary of the Navy, after the contract shall have been in all respects complied with; and the whole remaining eighty per cent. of the amount may not be due upon each bill, with, when a partial delivery is furnished by the contractor and the bill approved by the Bureau, be paid by such warrant as the contractor may direct, within ten days after the warrants for the same shall have been issued by the Secretary of the Treasury.

It will be stipulated in the contract that if default shall be made in any of the terms of the contract, the Department may, at the cost and loss sustained by the Bureau—then, and in that case, the contract and its security shall be forfeited and become the United States, as liquidated damages, a sum of money not exceeding the contract price, which may be retained or covered from time to time, according to the cost of the delivery of that one provided.

Bidders whose proposals shall be accepted, and others also, will be notified to that effect, and, in addition, a contract will be transmitted to them, which they will be required to execute without delay, and upon its receipt at the post office or navy agency named by them.

The form of offer, guaranty, and certificate is hereto appended.

FORM OF OFFER.

I (or we), of ——, State of ——, hereby agree to furnish and deliver —— thousand tons of —— anthracite coal, of —— pounds to the ton, at the rate of —— per ton, of 2,240 pounds, amounting to ——— dollars, for the service of the Navy during the fiscal volume and terms of the advertisement of the 5th day of May, 1864, and in accordance with the requirements appended.

This offer, if or any offer be accepted, I (or we) request to be informed to ——, and that the contract may be forwarded to ——— for signatures and execution.

(Place.) (Signed), A. B.
(Date.)

FORM OF GUARANTY.

We, the undersigned, residents of ——, in the county of ——, and of ——, State of ——, bind ourselves jointly and severally covenant with the United States of America, that if the proposal of the bidder will, if his bid be accepted, execute a contract, in due form of law, within the time specified in the foregoing offer, with good and sufficient sureties, for the delivery of the coal mentioned in the foregoing offer, according to the terms of the advertisement of the 16th May, 1864, bereto annexed, and that it will fail to enter into the contract aforesaid, we engage to make payment of the difference between the offer of the said ——— and that which may be accepted.

Witness, ——, and of ——— (Signed), C. D.
(Place.) E. E.
(Date.)

I hereby certify that, to the best of my knowledge and belief, the above named guarantors, ——— are good and sufficient.

(Signed), G. H.

Each proposal, bid or offer must be signed with the full name of the bidder.

Each proposal may be obtained on application to the Navy Agents at Charlestown, Boston, Portsmouth, Brooklyn, New York, Philadelphia, Baltimore, and at this Bureau.

CANFIELD, BROTHER & CO.—229

Baltimore-st., corner of Howard-st., BALTIMORE,

Have a full stock of MILITARY GOODS, to which they invite the attention of Officers of the Army and Navy, such as Swords, Belts, Sashes, Epaulets, Shoulder Straps, Spurs, Hats, Caps, Buttons, Figures, Chevrons, Lace, Cord and Tassels, Gold Lace, Regulation Cloth.

PRESENTATION SWORDS, of fine designs, on hand and made to order, at short notice. Pistols, Cartridges, Caps, Holsters, &c.

Also, a large assortment of Navy description, and all articles for use and comfort, on favorable terms.

THE NATIONAL MILITARY JOURNAL,

OF THE

UNITED STATES ARMY AND NAVY JOURNAL

AND

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

Officers of the Army and Navy will find in the Journal the only paper in the United States exclusively devoted to Military and Naval affairs, and the only one in their interest which has ever received sufficient support and influence in this country to enable it to maintain so long felt, of an organ which should properly represent them in the Press. Starting under the most favorable auspices, enjoying the encouragement and aid of the best professional writers in the country, and every petition and partisanship of all kinds, and devoting its columns to the impartial discussion of military questions, and to the dissemination of professional information, it has, in less than six months, attained a position as the authoritative organ of military opinion and criticism in the United States. The high standard with which it has entered a circulation, hardly reached by that of any paper of its class in the world, and an eagerness with which it has been greeted in the Army and Navy, and by the more intelligent of civilians, are sure to the securing by it, in a short period, and after giving evidence that the effort to establish a paper of similar value will be futile in ability and completeness with the best of the military journals of Great Britain and France, has not been in vain. As a Gazette of Army and Naval matters, it is proving itself indispensable to every soldier and sailor; while to every friend and observer of the war it must be invaluable for its accurate and impartial discussion of the military and naval operations and discussions. Its articles are from the pens of the ablest military writers, and its special professional correspondence is unsurpassed in extent and value. Its editorials are characterized by the same ability that at any period ever issued in this country.

Of the numerous notices of the newspaper press we have room only for the following:

From Major-General GEORGE G. MEADE.

"I have received several numbers of the ARMY AND NAVY JOURNAL, and have been much pleased with them. I wish you success in your undertaking, and hope the number of purchasers of the publication may be sufficient to enable you to make it a permanent addition to the literature of the country."

From Major-General W. H. FRENCH.

"To say that the ARMY AND NAVY JOURNAL is conducted with ability, is but to say what is known to all persons of good military discrimination, in which I really think."

From Major-General JOHN NEWTON.

"Your JOURNAL meets with great favor in this army. I continually recommend it to officers of my command in this corps. I hope it may realize the success it deserves. I am sure it will deserve success."

From Commodore J. C. LONG, U. S. N.

"I think your JOURNAL will be a success. It is just one of the kind that has never been published that contains its class of matter."

From Major-General G. H. THOMAS.

"It will afford much pleasure to recommend the ARMY AND NAVY JOURNAL to officers of the Army and Navy. I have always thought that there was room for a paper which more promptly as to be a full history of military operations and discussions of military questions than any paper which has yet been published, and I hope that you will receive such a support as will enable you to make the JOURNAL the most valuable and interesting publication of the day."

From the New York Times.

"The ARMY AND NAVY JOURNAL has proved itself to be the newest, both regular and volunteer. It received an early and hearty welcome from the military profession, and has since maintained a high character for the ability with which it discusses, and the manner in which it presents, the various questions connected with the military and naval service. Its contributors are many of our Military and Naval officers, and its correspondence from the seat of war is unusually full and accurate. It is a valuable addition to the periodical press, and we hope that such a class of publications will meet with that support which its intrinsic value and merits demand."

From the Boston Post.

The new ARMY AND NAVY JOURNAL has proved a decided success. It is ably conducted, and is filled with matter of interest to the military and naval profession, and is also useful in its special line of journalism. Its subscription list is rapidly increasing, and its circulation is in great demands, and the paper has every prospect of entering upon a career of prosperity. Its editorials are able, and its correspondents are many of our Military and Naval officers, who are thoroughly posted in the matters of which they write. It is a valuable addition to the periodical press, and we hope that such a class of publications will meet with that support which its intrinsic value and merits demand."

From the New York Herald.

"It is very rare now-a-days that any special publication and its managers ever succeed in the daily papers before the public, but the ARMY AND NAVY JOURNAL has done so, and is daily advancing in public favor. It is a valuable publication, and always able, impartial, and independent. Its correspondence from the seat of war is very full and interesting."

Springfield (Mass.) Republican.

"We can honestly commend the publication; it is all we wish to keep themselves posted on the war. Its weekly issue of sixteen pages is filled with matter which is valuable and important. It is worth all the cost of paper and type to any person who wishes to keep posted on the war."

From our own Correspondent.

"The best military or military matter—*New York Times.*

"Contains nothing partisan or political about it, and is devoted exclusively to military and naval matters, and is very well conducted."—*Philadelphia Inquirer.*

"Will be found a valuable paper of the situation, diversified by all manner of military and naval details, and an instructive and entertaining publication."—*Philadelphia Evening Bulletin.*

"Is a valuable paper, and one which should be subscribed for and read in the service."—*Chicago Tribune.*

NEW MUSIC.—"THE DYING SOLDIER'S REMEMBRANCE," and other songs ever popular.

Just—Save you some to see your darling
Die upon the battle field,
Or from home so sad and lonely,
Have you come your boy to shield!
The Rebel Soldier Boy, Mt. Mother's very touching and beautiful song, suggested by seeing a soldier the last hand of his mother kneeling, and looking at her mother through her tears, said, "This hand is truly an mother."
The above songs are from the pen of the popular writer, Mrs. Chatfield, her prices are very low. Mailed free. HORACE WATERS, Music, No. 481 Broadway, New York.

BALTIMORE AND OHIO RAILROAD

RE-OPENED!

The great National thoroughfare is again open for FREIGHT AND TRAVEL. The cars and locomotives destroyed are being replaced by new running stock, with all recent improvements; and the whole road, track are again in substantial condition for the efficient operation of this Road for SPEED, SECURITY and COMFORT, will be more than sustained under the administration of Mr. Garrett. The Company has unequaled attractions of natural scenery heretofore unknown to this route, the recent troubles upon the Border have associated numerous points on the Road, between the Ohio River and Harper's Ferry, with painful but instructive interest.

At the Ohio River, with Cleveland and Pittsburgh, Central Ohio, and the Ohio and Mississippi Railroads, and through them with the whole Railway System of the Northwest, States, and Southwest, and at Washington Junction, with the Washington Branch for Washington, and the Lower Potomac, and Baltimore with four daily trains for Philadelphia and New York.

Two Express Trains additional, via Through Tickets of Baltimore or the Northern Cities, give the privilege of visiting the Battle Fields of Antietam and Harper's Ferry.

This is the ONLY ROUTE by which passengers can secure tickets at low rates through tickets to WASHINGTON CITY.

J. H. SUTHERLAND,
General Western Agent, Bellaire, O.

PROPOSALS FOR ANCHORS AND KEDGES.

NAVY DEPARTMENT,
BUREAU OF EQUIPMENT AND RECRUITING,
WASHINGTON, May 17, 1864.

The Bureau of Equipment and Recruiting will, until the 14th of June, 1864, at 12 o'clock A.M., receive proposals for the manufacture and delivery at such Navy Yards as may be designated, the following iron anchors and kedges:

25 of	2,668 pounds.
60 of	1,600 pounds.
60 of	1,500 pounds.
60 of	1,400 pounds.
60 of	1,300 pounds.
60 of	1,200 pounds.
60 of	1,100 pounds.
60 of	1,000 pounds.
60 of	900 pounds.
60 of	800 pounds.
60 of	700 pounds.
60 of	600 pounds.
60 of	500 pounds.
60 of	400 pounds.
60 of	300 pounds.

The above weight is exclusive of the stock, which will be in the usual proportion, and they are to be made of the best scrap iron, of the form, dimensions, and finish of those made for the naval service, and the subject to such inspection as the Bureau may direct.

The number, weights, &c., of each of the 25 anchors, 1,668 to 300 pounds inclusive, must be delivered in one hundred days from the date of the notification of the award of the contract, and the remainder in one hundred and sixty days from the same date.

The conditions of the contract will be similar to those used in the Navy.

The bids must be accompanied by the guaranty required by law, and, if awarded, the contract will be executed forthwith.

Separate proposals must be endorsed, "Proposals for Anchors," and be addressed to the Bureau by mail or otherwise, and be addressed to the Chief of the Bureau of Equipment and Recruiting, Washington, D. C.

THE CAMPAIGN IN VIRGINIA.

SINCE the campaign opened, there has not been so long a lapse in marching and fighting, as that which succeeded the battle of June 3d, at Cold Harbor. The respite was as much needed, and as beneficial to the troops, as that briefer lull in battle at Spottsylvania. After a week of comparative quiet came the great movement, which has given a new aspect to the entire campaign, and closed up one chapter in our record of operations. Before proceeding to this, however, it is proper to describe the days intervening.

Four successive night engagements followed the great assault of Friday. And for a week after its occurrence there was pretty constant skirmishing by day. The hostile lines, it will be remembered, were separated by distances varying from fifty to two hundred yards. This proximity made the picket firing very deadly, and many of our best men escaped the terrible carnage of a dozen pitched battles, only to fall by the casual bullet of some Rebel sharpshooter, after the roar of the contest was over. This desultory firing of marksmen varied in intensity at different parts of the line, and on different days—at sometimes it being fatal to display one's figure above the entrenchments. Staff officers, the signal corps and artillerymen necessarily suffered considerably from the necessity of exposure. Cannonading was also kept up for several days, the artillery duelling being often designed to prevent the construction of new works, or to hinder changes of position. These casualties from shelling have been comparatively insignificant, as might be expected from the shortness of range, and the accuracy of deliberate aim. Of course, not only the skirmish lines, but corps headquarters have frequently been under fire.

But, here and there along the lines, there has occurred a curious sort of mutual and a tacit armistice, whose effect has been to quiet the useless and inadvisive fire which only kept both parties on the *qui vive*, and created trouble and annoyance. From suspension of hostilities, in some quarters, the opponents got so far as the exchange of salutations and rude jests, and even of coffee and tobacco. It was found, however, that information was also leaking out from time to time, amongst those who had the fighting and not the planning to do, and the amicable intercourse had to be stopped. And without this prohibition, also, occasionally the jesting got to be so pointed and cutting as to suggest an answer not an angry shot; though, in the main, the amenities and etiquette fitting to the negotiators of peace, were strictly preserved.

Meanwhile the quieter scenes once described at Spottsylvania were repeated—busy work at Whitehouse and on the roads therefrom to camp—the forwarding of supplies of all sorts and ammunition—the caring for the wounded, and their transportation from the field—the various labors of commissaries, quartermasters and surgeons. Reinforcements of new troops and of convalescents began to fill up a little the depleted ranks. New assignments and organizations were necessary, in divisions, brigades and battalions. Regiments out to fragments by a score of bloody frays were to be consolidated, and the whole Army got again into fit condition for a hot campaign which might not allow another protracted pause. On our side new earthworks were constantly built, extending along the course of the Chickahominy, far towards White-House, and everywhere the enemy built out parallel with us, and but a few hundred yards distant.

On Tuesday afternoon, the 7th, there was an attack on the Ninth corps, our right, very similar to that already recorded as occurring at the same time and the same point, on the previous day. There had been but little firing till about 4 o'clock, when several batteries opened briskly from concealed positions, and soon our skirmish line was driven in. As the enemy approached in pursuit, the artillery and infantry received them with rapid discharges, under which they fell back, abruptly terminating their reconnoissance. But the firing was kept up briskly here and farther down towards the left, for an hour or more.

At six o'clock in the evening, the armistice arranged for by flag of truce, before referred to, took place, lasting two hours. None but medical officers and their attendants, the pioneers and stretcher-bearers, were allowed to go upon the field. The dead and wounded were carefully removed, while the opposing forces stared curiously over their entrenchments, and watched each other and the quiet work with unwonted impunity. No sooner was the white flags withdrawn and the truce over, than, at some points, the marks' men proclaimed their knowledge of the fact by a few shots from their rifles. But the night was more amicable than usual, and the influence of the truce seems observable since.

Before dawn of Tuesday morning, GRIFFIN's and BUTLER's division of the Fifth corps moved rapidly down towards Sumner's Bridge on the Chickahominy, which is situated nearly south of Cold Harbor, and a little northwest of the point where the Richmond and York Railroad cross the river. The enemy, however, was on the alert, and in force, and opened heavily with pieces of considerable calibre on our column as it approached. Our own artillery briskly rejoined. The 18th Massachusetts in a brisk skirmish drove in the enemy's pickets, and swept the Rebels from the bridge. But they still commanded it with their artillery. Our men extended down to the railroad crossing, occupied the region between the bridges, on the northerly bank, and quietly commenced entrenching, opposite the enemy's earthworks on the further bank. During the afternoon, the enemy moved a heavy piece of ordnance, mounted on a truck, or plated car, along the railroad, which is here in good order, and threw six-inch shells among our men in their entrenchments. The usual picket firing commenced at night. A barricade was thrown across the railroad below, near Dispatch Station, and the latter point formed the terminus of our left wing.

On Wednesday, comparative quiet prevailed till towards evening, when brisk skirmishing took place on the left, with artillery exchanges in the region of the Second corps. The firing continued at intervals through the night, and at portions of the line, on Thursday. But there was no change of position on those days. On Thursday, a part of the cavalry, which, under GREGG and TORBERT, protect our left flank, moved out further to the left, indicating new movements in that direction. During the night there was a little artillery firing in a part of the line.

On Friday afternoon, a few companies of Rebel cavalry dashed on our cavalry videttes on the extreme right, where WILSON's division covered that flank, and swept off a few of them. FERRERO's infantry division of BURNSIDE's corps, next adjoining, was put into motion to repel them, but the enemy was probably on a simple reconnoissance, and did not seek a further skirmish. During Friday and Saturday, entrenching was not wholly suspended anywhere, but both armies seemed anxious to creep out to the east, in anticipation of the old movement against the enemy's left flank. The enemy kept pace with us, confronting us as far down as Bottom's Bridge, and fortifying there, and thence throwing out picket lines southerly towards the James. And now on Friday it began to be noticed that the railroad, so carefully and busily repaired of late, between our base at White-House and the Army was as busily and carefully tearing up again from Dispatch Station casterly, the rails and ties being carried to White-House and there placed on barges. Nothing was landed at the latter point, it was observed, except supplies and forage for the immediate use of the Army.

On Saturday, WILSON, on our right flank, being annoyed by the demonstration of the previous afternoon, sent a part of MCINTOSH's cavalry brigade to reconnoitre the enemy's position. MCINTOSH drove back their pickets, and passed over the entrenchments of their skirmish line. About a mile west of Bethesda Church, MCINTOSH came upon FIELD's division of infantry, and there ended his reconnoissance. Our loss was 16 killed and wounded. Meanwhile, the two other cavalry divisions, save the force which still held our left, were away on a long circuit to the north and west, breaking up the railroads between Richmond and Washington, and sweeping off to communicate with HUNTER.

THE MOVEMENT TO THE JAMES.

At length, preparations for one of the most momentous changes in the campaign had been completed. It was no less than the transfer of operations to a new line, a change of base, another "flank movement" in the face of the enemy." Indications had already been sufficiently frequent and palpable that White-House was to be abandoned as a base, and that henceforth the region north of the Chickahominy was to hold only a subordinate part in the tactics of the campaign. Frequent reconnoissances by the enemy had shown his uneasiness at the quiet of our lines. But when the time for the movement had fully come, so brilliantly was it accomplished that its execution, at least, has not a little of the merit of a surprise.

On the night of Sunday, June 12th, the Army began to march. It will be remembered that the enemy's line extended along the Chickahominy as far as Bottom's Bridge, where it was entrenched. Our forces lay north of the enemy, in a line generally parallel, and were also well entrenched opposite his right. Of course, Bottom's Bridge could not be used for crossing. The next two bridges below are Long Bridge and Jones's Bridge—the former six or seven miles from Bottom's Bridge, and the latter ten or twelve miles. On Sunday night, WRIGHT's Sixth corps and BURNside's Ninth marched to Jones's Bridge, crossed the Chickahominy, and moved rapidly thence to Charles City Court-House, a mile from the James River, and about nine miles distant from the bridge, a little west of south. At the same time, HANCOCK's Second and WARREN's Fifth corps moved to Long Bridge, crossed there, and took the road to Wilcox's Wharf, on the James, about twelve miles by road due south, and a

little west of Charles City. Meanwhile, SMITH's Eighteenth corps marched to the White-House, there took transports to Fortress Monroe, and, without pausing, passed directly up the river to Bermuda Hundred, which lies opposite City Point, and just above the Appomattox, on the south side of the James. At this latter point, other troops had been previously sent, and, as is well known, GILLMORE's Tenth corps was in the same region, it being the headquarters of General BUTLER's Army. The place designated for crossing the other four corps to the south side of the James, was Powhatan Point, and near Wilcox's. General BUTLER had carefully prepared pontoons for the crossing. At three o'clock on Sunday afternoon, General MEADE's headquarters were moved from Cold Harbor south of Summit Station, near Long Bridge, and at six the next morning, headquarters were in the saddle on the march.

The whole movement was conducted with consummate skill. The men moved cautiously from their entrenchments, which, for miles, as we have already said, lay under the Rebel guns. And only a few shells thrown at the rear, as it moved off, betokened that the enemy had taken the alarm. All night and all day Monday the troops moved forward with but little interskirmishing or impediment than that of their first march from Culpepper to Chancellorsville. On Monday evening the advance had reached Wilcox's Landing, where also headquarters were. Before noon of Tuesday, our forces were all up, having made their movement in perfect security, and the only fighting being a little cavalry skirmishing at the rear. On Tuesday, the crossing was commenced, our Army was transferred to the south side of the James, and the admirable change in position fully consummated.

BERMUDA HUNDRED.

IN General BUTLER's department, the most important move of the week has been the demonstration against Petersburgh. Preparations to operate in that direction were made some time since by preparing a bridge to be thrown across the Appomattox, and sending the gunboats exploring up the river. During the night of June 5th, the pontoons were laid down near Point of Rocks, and about midnight the movement was commenced. The expedition was in charge of General GILLMORE, who led the infantry column, made up from his Tenth corps. General KAUTZ commanded the cavalry of the expedition. General HINKS and Colonel HAWLEY commanded the two infantry brigades. It had been frequently reported by deserters that Petersburgh had been largely depleted of troops in order to reinforce LEE in front of Richmond. It was determined that General GILLMORE should take the turnpike road and assault the city on that side, while General KAUTZ, making the circuit of the place, should attack on the southerly or southwesterly side, and, the movement being simultaneous, both forces might enter the city together. The city would thus be captured, and, if not held, at least all its supplies and ammunition could be destroyed. On his part, General BUTLER was to have a strong demonstration made against the "Clifton Battery."

At midnight of Monday, June 6th, KAUTZ's selected cavalry, 1,400 strong, clattered over the pontoon bridge. They were followed quickly by HAWLEY's brigade of GILLMORE's corps, and these latter, on crossing the Appomattox, were joined by a brigade from HINKS's (colored) division, under General HERRON in charge. The whole force was about 4,900 strong, about 3,500 being under charge of General GILLMORE.

Before eight o'clock of that morning, FOLLETT's battery was brought up in front of the woods near Point of Rocks, and commenced shelling the Rebel lines in the vicinity of "Fort Clifton." The gunboats *Commodore Perry* and *General Putnam* opened fire on the same position, and, until noon, our gunboats and land batteries both kept up a brisk demonstration. Afterwards, the enemy brought down a battery and three thirty-pounder shells at General WEITZEL's signal station; but this was quickly silenced. While General BUTLER was thus diverting the enemy's attention, the cavalry and infantry columns pressed on, made the detour of the Clifton Battery, to avoid its fire, and continued towards Petersburgh. The infantry encountered no serious opposition till within about two miles of the city, when they met the enemy's skirmish lines, and briefly drove it back, in a short contest. Having arrived in front of the city, where the fortifications could be critically examined, General GILLMORE found them too strong for the force at his command to attempt, and accordingly withdrew about noon, and returned to camp the same evening.

Meanwhile, General KAUTZ had forced the enemy's entrenchments and actually reached the city streets and briefly engaged Rebel troops. The Rebels concentrated against him with what force they had, and he was compelled to retire, bringing away with him forty prisoners. His loss was only about a score of men in killed and wounded, and General GILLMORE's was still more trifling. General BUTLER's dispatch to Washington, on this subject, was as follows:

"Yesterday General KAUTZ charged the enemy "works at Petersburgh, and carried them, penetrating into the town, but not being supported by General GILLMORE, who had withdrawn his forces without conflict, General KAUTZ was obliged to withdraw "without further effort." The terms of this dispatch would seem to imply some dissatisfaction at the infantry support, probably on the ground that the enemy was not kept occupied by the latter. Of course, at this distance, it is not for us to criticise without possession of the facts. But it may be remarked that the *strength* of the Petersburgh defences would not come into the question. The instructions for the infantry were "engage" them, and not to "carry "them if practicable;" or in similar terms.

With the exception of a casual Rebel shell now and then thrown at the signal station, there has been no hostile demonstration since the Petersburgh affair. Only since cavalry scouts have returned, one having captured a Rebel station and the men on Chuckatuck Creek, which runs into the south side of the James, near Nansemond River, and the other, a hundred horses and a few Rebels in Currituck County, N. C.

GENERAL HUNTER'S OPERATIONS.

FROM the Shenandoah Valley, the news is all good, it being chiefly the amplification of last week's record. On Sunday, the 5th, General HUNTER met the enemy under General JONES near Mount Crawford, twelve miles north of Staunton, and totally routed them, after a spirited battle. 1000 men and 60 officers were taken on the field, and subsequent captures increased the number of prisoners to 1500. There were also taken 3000 stand of arms, three (some accounts say six) pieces of artillery, and a very large quantity of stores. General JONES was killed. The enemy made a rapid retreat, and, having to fall back south to Staunton, found he should be cut off by moving to the southeast on Waynesboro, they left for the latter point, under command of General VAUGHN. The movement was brilliant, and not expected by the enemy. Our Army quickly moved down to the important town of Staunton, capturing more stores, and, on the 7th, effected a junction with the forces of CROOK and AVERILL. The enemy's foundries and some factories of cloth and shoes were destroyed at Staunton, and both east and west the Virginia Central Railroad, on which the town is situated, was broken up, and all the Rebel government property captured or burned, for considerable distance. An expedition also penetrated to Waynesboro, and destroyed some railroad bridges.

The occupation of Staunton is quite important, if followed up by similar successes. Stretching easterly a few miles to Waynesboro, which is a small place, of no importance to the Rebels, it will probably be found that the enemy have already retreated there. Our forces may then easily pass through the Blue Ridge by Rockfish Gap, following the railroad, and advance on Charlottesville, which is more important. But even here, we doubt if the enemy can make a successful stand. Charlottesville taken, our forces threaten two of the most prominent points in Virginia, west of Richmond—Gordonsville on the north and Lynchburgh on the south. Whether an advance shall be made on Gordonsville, may be quickly determined, as it is not twenty miles from Charlottesville. But if our forces proceed southerly, to Lynchburgh, the infantry column will require more time.

It is an important question how much force the enemy has in the valley. The forces under JONES were whipped so quickly that it was evident the greater part of BRECKENRIDGE's old command had gone with him to reinforce LEE. Staunton was entered without resistance, the old men and boys being its only defenders. The region has been pretty thoroughly swept of men. But at Lynchburgh there ought to be more resistance. Lynchburgh we judge to be, in the first place, a general or a partial rendezvous of the wounded of LEE's army, because they can find better accommodations and supplies there than in Richmond. LONGSTREET himself is there. Out of his convalescents and slightly wounded he could patch up quite a respectable army for defence, and there must be, besides, a considerable force of good fighting material in the vicinity, including JONES's command. It is possible, also, that LEE will risk weakening himself temporarily for the sake of saving Lynchburgh, if not by sending back any of BRECKINRIDGE's men, then at least by some of FITZ HUGH LEE's or HAMPTON's cavalry. The consequences of losing Lynchburgh would be serious, they being no less than breaking railroad communications between Richmond and the South and the West, besides the capture of supplies and the control of the region of supplies.

It seems now to be well understood that that SHERIDAN's cavalry, after destroying railroad between Richmond and Washington, have continued their march in the direction of Staunton headquarters. It is quite probable that SHERIDAN will appear in the neighborhood of Charlottesville. Meanwhile, HUNTER's column, with the cavalry commands of CROOK and AVERILL, moved on easterly on the morning of the 10th, in the same direction. LEE's cavalry are put reported to be in the full chase in the same direction, and may endeavor to piece out the Rebel infantry force. This latter is under the command of General WADE. We should judge him to be the same officer who figured in East Tennessee under LONGSTREET a greater part last year. He opposed General SHERMAN's cavalry at Morgantown, on its way to relieve Knoxville, but soon gave way from SHERMAN's decisive advance. Altogether, there is a chance for interesting combinations in Central Virginia.

OPERATIONS OF GENERAL SHERMAN.

WE left General SHERMAN last week at the close of his movement by the left flank, from Dallas to Acworth—on the railroad, some fifteen or sixteen miles northwest of Marietta by rail, and two-thirds that distance by common road. Here he was on the 7th, in sight of the Rebel signal stations at Lost Mountain, on the direct road from Dallas to Marietta, seven miles from the latter place—and Kenesaw, ten miles from Lost Mountain a little east of north from it, on the railroad. These two points were subsequently developed as the right and left of the Rebel position, which was found to be along the hills between the two. By a dispatch, dated at General SHERMAN's headquarters on the afternoon of the 14th, it appears that a movement was then being made against the enemy's position at Kenesaw.

The movement of General SHERMAN from Dallas to his present position has proved one of the most difficult of any of his advances. Being in a rugged and wooded country, possessing superior advantages for defence, ignorant, in a great measure, of its topography, he is compelled to advance with the utmost caution in the face of an active enemy, watching to take advantage of his superior acquaintance with the features of the country. Though there has been a considerable open movement since that of the 28th of May, our Army has been harassed by the almost incessant skirmishing with which the enemy has sought to disconcert its movements. The incessant picket firing by day, interspersed with the shelling of our camps, batteries and trains, has been succeeded by frequent night attacks, which have taxed our troops with less of sleep, making a still further drain upon energies exhausted by marching and the fatiguing duties of the campaign. Fortunately, the supplies continue abundant, the possession of the railroad enabling General SHERMAN to bring up supplies largely in advance of his actual necessities. One purpose of his delay in front of Marietta has been, doubtless, to establish a dépôt in the neighborhood of Allatoona Pass, where he can shut the door in the face of a movement on his rear, while he pushes still further on. We have hints of large movements in inception which will, no doubt, reach their development before another week.

OTHER OPERATIONS.

THE movements in the Mississipi States are of considerable importance. MORGAN's raid in Kentucky, to which allusion has been made, proved quite

an exciting affair. MORGAN entered the State with a large force of from two to three thousand cavalry, through Pound Gap, about the 29th of May. The 1st of March was from Pound Gap to Paintsville, Floyd Green, Owingsville, Flemingsburg, Maysville and Mount Sterling, dividing into scouting parties, gathering up horses, money, provisions, forage, and all practicable plunder, and destroying railroads and bridges also. Paris, Georgetown, Cynthiana and Williamstown were successively captured in the same manner, and the same series of plunder were enacted. A train of cars was next captured on the Louisville and Frankfort railroad, but no systematic attempt was made to rob the passengers, who were completely in the power of the guerrillas. The cars were then burned. The horses belonging to the passengers was not interfered with. Lexington was next entered, the depôt burned, some stores plundered, and citizens robbed.

On the 11th of June, MORGAN attacked and defeated two Ohio regiments at Cynthiana, under command of General HOBSON, and captured the entire force, about 1,000 men, and a fine, started during the fight, in order to dislodge our troops, consumed a large part of the town. The next day, however, General BURBRIDGE, who had been on MORGAN's track, from Virginia through Kentucky, came up with him near the same place, and completely routed him, after an hour's sharp fighting, with a reported loss of three hundred killed and wounded, and as many prisoners. General BURBRIDGE says his cavalry marched "thirty miles in twenty-four hours," and then defeated MORGAN. Our own loss was about one hundred and fifty. A thousand horses and nearly a hundred men of HOBSON's command were recaptured, and the enemy driven off in the confusion. The victory thus appears to be decisive. One of our daily contemporaries states that General BURBRIDGE is not a Kentuckian. Our understanding is that BURBRIDGE is a Kentuckian, was born in Kentucky, and educated in the State Military School. He raised one of the first if not the first, Union regiments in Kentucky, and has been prominent in the State ever since.

Frankfort, the capital of Kentucky, was visited by the enemy on the 10th and 11th, and the garrison was demanded to surrender. This demand was refused, of course, and some firing took place on both days. Then the siege was raised. There has been much loss by plundering, and much destruction of material, and the Rebel raids still continue at Newcastle, Princeton, &c. But our forces seem now to have the ascendency and to be driving MORGAN before them.

In Arkansas, Mississippi and Tennessee, our troops have been harassed and the towns pillaged, by FORREST, RODDY, LEE and WHEELER, with their own commands, aided by guerrilla forces. WHEELER, on the 10th, appeared at Calhoun, and tore up the railroad between Chattanooga and our Army, and blew up a train with a torpedo, doing no damage though injuring few of the troops who were in it. The most serious disaster of the week, however, took place in a battle near Guntown, Miss. Our force was 3,000 cavalry and 5,000 infantry, with eighteen pieces of artillery, under General STURGIS. With an equal force, RODDY and LEE, aided by FORREST, would have thoroughly defeated our men, capturing nearly or quite all the artillery and ammunition, and the entire wagon train. Our loss in men was reported at more than a thousand. FORREST and WHEELER's operations continued, might make grave work for a time with SHERMAN's communications. But the latter general is not to be easily overcome, and could quickly repair twice as great a disaster. He has already taken the first steps in that direction, by appointing General A. J. SMITH, of Fort De Russey and Red River celebrity, to the command of the forces operating against FORREST.

MURMADUKE has been blockading the Mississippi, both below and above Greenville, and other guerrilla operations have been troublesome. But on the 6th of June, General A. J. SMITH met two regiments of the enemy, and drove them back, near Columbia, Ark. Our forces advanced to the enemy's second position, and a brisk artillery duel was kept up, until, under heavy fire, our men ceased using their guns, and dashed into the enemy's lines, and drove him back. Loss about 125 on each side. General MOWER was conspicuous as usual in the assault. MARMADUKE being thrice off, our forces once more took possession of Mississippi River. We shall hear of General SMITH again further northeast.

From Hilton Head there is news of several small expeditions. On the 22d of May, a reconnoitering force proceeded towards Seessionville, and, at Battery Island, Colonel HARTWELL's 55th Massachusetts (colored) regiment handsomely charged and drove the enemy from their breastworks. Our troops were then withdrawn. The gunboat *Water Witch* was surprised and destroyed by Rebels on the Georgia coast by eight armed boats from Fort McAllister. No excuse for the carelessness has been suggested. The *Water Witch* was one of the best blockading vessels in the squadron and was of 378 tons burthen.

On the whole, while matters look well enough before Richmond and Atlanta, and in Virginia, most of the recent operations apart from these two main points, have not lent much to the prowess of our arms. The defeat of MORGAN and MARMADUKE, however, must be put on the credit side.

BATTLE MONUMENT AT WEST POINT.

DEDICATION OF THE SITE.

In accordance with the notice published last week, the ceremony of dedicating the site for the Battle Monument to the officers and enlisted men of the Regular Army who have fallen in this war, was observed at West Point, on Wednesday, the 15th inst. In addition to the officers of the Army brought together by their interest in the ceremonies of the occasion, the proceedings were witnessed by thousands of civilians, who came, moved by curiosity or by anxiety to see and hear one so widely known as the orator of the day—General McCLELLAN. Every effort was proposition, and though the clouds gathered ominously during the delivery of the oration they fortunately passed away before developing into a storm.

An interesting feature was added to the day by the presence of the battle-worn veterans of the Third and Seventh Cavalry, who came up from the forts in New York harbor to act as military escort on the occasion. It was expected that General DIX would accompany them, but he was, from some cause, unable to be present. The absence of Lieutenant-General SCOTT was also the cause of much disappointment, but his presence was confidently counted upon. But though stopping at Cozzens, close by, he was too feeble to undergo the fatigue of sitting through the ceremony. Among the officers present were Brigadier-General ROBERT ANDERSON, who officiated as Grand Marshal, Major-General MEADE, Brigadier-General HASTINGS, Brigadier-Generals HAYES, KILPATRICK, MEAGHER, General BARLOW, Colonels WRIGHT and RAYMOND, formerly of General McCLELLAN's staff, and others well known to the Army. The Governors of all the loyal States were invited, but none were present except Governor SEYMOUR, of New York, who was accompanied by Adjutant-General SPRAGUE.

The platform upon which the ceremonies took place was placed near the flag-staff, in the midst of the guns on Trophy Point, facing the parade ground. About it seats were erected among the trees. These were reserved for the ladies, who, in numerous assembly, graced the occasion. The procession was formed in front of the Academy building, shortly after noon, in the following order, the right resting on the Library:

1st—Military Academy Band.

2d—Battalion of Cadets.

3d—Detachment of troops stationed at or visiting the post.

4th—Carriage containing the President of the Executive Committee and Chief Marshal, and the Orator of the day.

5th—Senior members of the Executive Committee, and Chaplain.

6th—The Executive Committee.

7th—Academic Board, Board of Visitors, Academic Staff, and Strangers and civic officers.

8th—Officers of the Army and Navy.

As the procession started, a National salute was fired from battery KNOX. On its arrival at the platform the ceremonies were introduced with prayer by Professor FRENCH, who, at its conclusion, said:

"I am requested on behalf of the officers of the Army, and the local authorities and residents to make known their sentiments and wishes, and most earnestly to ask that these may be respected. To all of them the day is a solemn one. It is one for sorrow and reverence, but that all may enter into the spirit and motive of the solemn occasion which calls us here in reverence, before Almighty God, to set apart a portion of His footstool for the remains of those who shall fall in this war, in the defence of the Constitution, the Union, the welfare and the national honor of these United States."

The band then played Hail Columbia.

General ANDERSON then said:

"Fellow citizens, members of the Corps of Cadets, and brother soldiers: I have the pleasure of going through the form of introducing to you one who is better known to you than he who introduces him—the orator of the day, Major-General GEORGE B. MCCLELLAN."

General MCCLELLAN then came forward and spoke as follows:

GENERAL MCCLELLAN'S ORATION.

All nations have days devoted to the remembrances of joy and of grief. They have thanksgivings for success; fasting and prayers in the hour of humiliation and defeat; triumphs and pauses to greet the living and honor departed warriors. Historians, the national eulogies for the warrior, stain on the field of battle. Such is the duty we are to perform to-day. We are to commemorate, in the presence of multitude, all around with the clang of arms—they dwell rather upon tough deeds of war, than the gentle arts of peace. They have preserved to us the names of heroes, and the memory of their deeds, even to this distant day. Our own Old Testament teems with the narrations of the brave actions and heroic deaths of Jewish patriots; while the New Testament of our souls and suffering Saviour eloquently relates the soldier and his weapons to typify and illustrate religious heroism and duty. These sketches of the actions of the dead have frequently served, in the hour of need upon the armies of those whose fate was thus commemorated centuries ago. But, although we know not to-day the names of all the brave men who fought and fell upon the plain of Marathon, or in the defile of Thermopylæ and on the hills of Palestine, we have not lost the memory of their examples. As long as the warm blood courses the veins of man, so long as the human heart beats high and quick at the recital of brave deeds and patriotic sacrifices, so long will the heroes still incite generous men to emulate the heroism of the past.

Among the Greeks, it was the custom that the fathers of the most valiant of the slain should pronounce the eulogies of the dead gentlemen in honor of their brave great statesmen and soldiers to perform the mournful duty. Would that a new Demosthenes or a second Pericles could arise and take my place to-day, for he would find a theme worthy of his most brilliant powers, and his most lofty impulsiveness. I stand here now, not as an orator, but as a soldier Commander, and in the place of the fathers of the most valiant dead. As their companion in arms, hard-fought field against desperate and foreign foe—in early youth and mature manhood—moved by all the laws that bind the soldier to his comrade in the common cause for the mighty father and son who fell on Mount Gilboa. God knows that David's love for Jonathan was no more deep than mine for the kind friends of my youth and professional years. Some one must to be recorded upon the structure that is to rise upon this spot. Would that he more than mortal eloquence could grace my lips and be justice to the theme!

We have met to-day, my comrades, to do honor to our own dead; —brothers united to us by the closest and dearest ties, who have freely given their lives in the sacred cause of liberty, of law, and righteous, so long as its purpose is to crush rebellion, and to save our Nation from the infinite evils of its overthrow and dismemberment. Such an occasion as this should be observed with the most solemn and decent manner—pride, sorrow and prayer; pride that our country has possessed such sons; sorrow that she has lost them; prayer that she may have others like them, or that we and our successors may adorn her annals as they have done, and that when our parting hour arrives we, however weak however it may be—our souls may be prepared for the great change.

We have assembled to consecrate a cemetery, wh ch shall contain the remains of those who have fallen in the distant fields of fierce struggles in the days of the great rebellion. This monument is to perpetuate the memory of a portion only of those who have fallen for the Union. Its consecration is due—it is dedicated to the Officers and Soldiers of the Regular Army. Yet this is done in no close or exclusive spirit, and to the not be remembered with reverence and love by our comrades of the Volunteers, who have so gloriously fought and fallen by our sides. Each State will, no doubt, commemorate in some fitting way the services of its sons, who abandoned the avocations of peace and went forth to battle in the ranks of the Volunteers. How richly they have earned a Nation's love, a Nation's gratitude—with what heroism they have contested death, how many a bloody field from a six-fold front have illustrated defeat, it well becomes me to say, for it has been my lot to command them on many a sanguinary field. I know full well the feeling of the Volunteers when I award the high credit they deserve to their brave brethren of the Volunteers.

But we of the Regular Army have no States to look to for the honor due our dead. We belong to the whole country, and can neither expect nor desire the General Government to make a perhaps invidious distinction in favor of our force. We are but a member, a small band of comrades, united by peculiar and very binding ties; for with many of us our friendships were commenced in boyhood when we entered hand in hand upon the gentle life which took its form upon us where we stand; with others the ties of brotherhood were formed in more mature years—while fighting among the Indian tribes and the fierce valleys of the Sierras—within hearing of the eternal waves of the Pacific, or in the lonely grandeur of the great plains of the far West. With all, our love and confidence have been cemented by common dangers and sufferings, on the toilsome march, in the dreary bivouac, and amid the clash of arms, and in the presence of death, no sorrow of which is more delicate. West Point, with her large heart, adopts us all—graduates and those appointed from civil life, officers and privates. In her eyes we are all her children, jealous of her fame and eager to maintain her high reputation. Comrades and private soldiers, men who have cheerfully offered our all for our dear country, we stand here before this shrine, and we consecrate to our dead, to our brothers in the service of the common death which awaits us all—perhaps on the same field and at the same hour. Such are the ties which unite us—such the sentiments which exist among men; such the relations which bind us together—the closest of the sacred brotherhood of arms.

It has therefore seemed, and is it fitting, that we should erect upon this spot, so sacred to us all, an enduring monument to our dear brothers who have preceded us on the path of pain and of honor, which is the destiny of many of us to tread.

What is this Regular Army to which we belong?

Who were the men whose death merits such honors from the living?

What is the cause for which they have laid down their lives?

Our Regular or Permanent Army is the nucleus which, in time of peace, preserves the military traditions of the Nation, as well as the organization, science and materiel of war, and expands in a moment of emergency, as it naturally and instinctively expanded in modern times. It may be regarded as co-eval with the Nation. It derives its origin from the old Continental and State lines of the Revolution, whence, with some interruptions and many changes, it has attained its present condition. In fact, we may with propriety go even beyond the Revolution to seek the roots of our genealogical tree in the old French War for the Union of the Colonies, and in the Indian wars that were not confined to the "red men" sculping each other by the great lakes of "North America," and in the Spanish wars that therefore first participated as Americans in the large operations of civilized armies. Accustomed regiments then fought on the banks of the St. Lawrence and the Ohio, on the shores of the Atlantic and the Gulf, and in the Islands of the Caribbean and in South America. Louisbourg, Quebec, Duquesne, the Moro and Porto Bello attest the value to the Portland Head and in the other wars of the men who were trained by WASHINGTON, FARNUM, LEE, MONTGOMERY and GATES. These and many other names, like those of WAYNE and STEVENS, were the fathers of our permanent army, and under their auspices was acquired that discipline and steadiness which enabled them to meet upon equal terms and often to defeat, the tried veterans of Europe. Such was the case in the history of the Revolution, and a perusal of the dispatches of WASHINGTON will convince the most skeptical of the value of the permanent Army in achieving our independence and establishing the civil edifice which we are now fighting to preserve.

The War of 1812 found the Army on a looting far from adequate to the emergency, but it was rapidly increased to a large force as the operations of soldiers may proceed equal to the requirements of the occasion. Lundy's Lane, Chippewa, Queenstown, Plattsburgh, New Orleans—all these names are familiar to the American ear.

Then came an interval of more than thirty years of external peace, marked by many changes in the organization and strength of the Regular Army, and lessen at times to the minimum of a mere Indian war. Of these the most remarkable were the Black Hawk War, in which Lincoln gave his first military service as a volunteer, and far more destructive than the Indians—that terrible scourge, the cholera; and the odious Florida War, where for so many years, the Seminoles made use of the gun-boat attack now so common on our rivers, which were displayed such traits of heroism as that commemorated by gentler memories in DADE and his command, "when all fell, even unto the last man, struggling to the death in defence of the Lone Star." War, to replace Indian combats and the monotony of the frontier service, and for the first time in many years the mass of the Regular Army was concentrated, and the Regiments took part in the battles of that remarkable and romantic war. Palo Alto, Resaca and El Rio Grande are the achievements of the Regiments assisted, and as to the battles of Monterey, Buena Vista, Vera Cruz, Cerro Gordo, and the final triumphs in the valley, they were each and all won by the Regulars, and their fame was reflected from such men as TAYLOR, WORTH, HARNEY, BROOKE, TOTTEN and DERAGE.

There is a red letter day in the history of the Army moved many a heart, and often employed the poet's pen and painter's pencil. It is of an old man, now passing his war-gathered years in the service of the State as a warrior and a statesman, and who, more than any man in white and his locks thinly scaled scarce early his best form toward the grave, stands out in that whole period of the history of the Army as the result. He was Dogs of Veteran. Convicted of treason against the State, he had not, as the law, but subsequently to his conviction, by the war-power to him, as the same of Venice is remembered. The spot where his gallant young life was plucked from the field by the hand of patriots was traced with black, and there still remains the frame, with the bullet-hole through it, which marked this terrible scene. Treason will soon assume the full degree of its odious and illegitimate form!

Quite as much interest attaches to the name of Colonel of Marine Artillery and colonel from the history the names of those, once our comrades, who are now in command of the Army of the Union. Even though this is still in progress, we have the right to look back upon the path that fills our hearts when we look back upon the path that fills our hearts when we look back upon the path that fills our hearts when we

of course, with its acutest extremity, or bow? To my own apprehension, her immediate destruction would be absolutely certain; and I do not believe that a line would send under, unless similar conditions, even if the living force were most materially less in amount. Hence one of my reasons for suggesting cone-clad rams without guns, for mere harbor defence; and raising the *Dictator* heavenwards a decade of feet, and then letting her go by the run, as Mr. Emerson has brought people to do in the way of illustration, does not at all confound it. One hundred millions of feet pounds may be rendered by the mere fall of a degree of force as exhibited by one mobile instantaneously, as it were, but my advice to any one likely to be exposed to it with his ship, however great his strength, would be to keep out of the way.

Even a 20-inch gun, with a charge of one hundred pounds of powder, and at very close quarters, would not impart to the ball a living force of more than 1,000 tons, and a target such as the *Dictator*, and the knife-edge shape of her bow should be fully considered in regarding the destructive effect of one of her passing blows.

L. M. GOLDSBOROUGH.

WASHINGTON, June 10, 1864.

THE FIGHT WITH THE ALBEMARLE.

Note Editor of the Army and Navy Journal:

SIR,—I regret to see in your publication in your issue of May 28th, 1864, signed "Double-Ender," giving an account of the fight between the Union gunboats and the Rebel ram *Albemarle*, in Albemarle Sound, April 19th, 1864, in which another vessels of the fleet, we venture to correct a few of the errors of your correspondent. To the first place, we deny, if, but justice to the memory of the brave and heroic Flowers to impartially represent the crew of the *Miami*, many of whom have since perished in the service, especially in "Double-Ender's" statement, he says that the *Miami* fired one well-directed but "useless shot," thus leaving the impression that the only shot fired by the *Miami* was the one that was the only shot fired from the *Miami*. "Double Ender" should have seen one hundred and sixteen shots follow, nearly as well aimed, and more destructive than the one, as he makes mention of. Again, he states that when the *Sassacus* run on the ram, and her "consorts" came up to part her. This is not, in fact, the case, for when the *Sassacus* run alongside of the ram, the *Sassacus* had backed off and was retiring. Also, that the fire of the *Sassacus* was much less worse than "useless," as it would only have endangered the lives of those on board of the *Sassacus*. As regards her artillery practice, "Double-Ender" says that there was only one shot entered any of the ports of the ram, according to dearsay, and we have since learned that that shot ran from the pivot gun of the starboard side of the *Miami*, and struck the ram's side under the care of her able and gallant commander, we do not deny. Now, the other vessels of the fleet did equally as well, we wish to be understood. In his statement, "Double-Ender" awards the honor to the *Sassacus* of being the first to open to the *Mattabesec* or *Wyalusing*. Not one word is said in praise of the gallant Barnett, and his noble little craft, the *Whitehead*, who, in the face of the enemy's fire, ran around alongside of the iron monster and delivered shot after shot from her one hundred pounder Parrot rifle. Nor is there a word said of the *Commander Perry*, that of the Rebel vessels were gallantly handled, and rendered all the assistance in their power. Not one word is said of the Captain of the *Miami*, and rightly, in course. That "Double-Ender" gives a very eloquent account of the fight, we are willing to admit, but we trust that when he writes again he will give to others the credit they deserve.

RHANDE ISLAND, N. C., June 7, 1864. SALAMANDERS.

"WHY DON'T SEAMEN SHIP IN THE NAVY?"

To the Editor of the Army and Navy Journal:

SIR:—Will you allow an old veteran who has served under Commodore Perry, and Commodore the privilege of answering an article on the Navy Bubble in your issue of March 5th? The statements of R. S. I defy him to prove. If sailors have no more privileges than the Rebel vessels were gallantly handled, and rendered all the assistance in their power. Not one word is said of the Captain of the *Miami*, and rightly, in course. That "Double-Ender" gives a very eloquent account of the fight, we are willing to admit, but we trust that when he writes again he will give to others the credit they deserve.

RAINOKE ISLAND, N. C., June 7, 1864. SALAMANDERS.

ACCIDENT ON THE "ST. LOUIS."

To the Editor of the Army and Navy Journal:

SIR:—A sad accident occurred on board the U. S. ship-of-war *St. Louis*, at Cadiz on the 13th of May. While firing a salute with the Spanish squadron, in celebration of the birth-day of the King Consort of Spain, one of the guns exploded prematurely, killing Master's Mate, Jeffrey Mercy, completely cut the port into the water, mangling and burning his right hand and arm. Acting Master's Mate, Charles M. Tisdale (conswain), of Duxbury, Mass., though severely burned in his endeavors to stop the vent, immediately sprang to the gun, as did Wm. Leland, of Melrose, (seaman), of Cleveland, Ohio, who though on the sick list and on the berth-deck at the time of the accident, rushed up to the top-gallant forecastle, saw the pool of blood which marked the spot where the wounded man had disappeared, dove and brought him to the surface, where he was supported by a man at himself until a boat was sent to their assistance. These two brave men were publicly thanked by Commodore Hull for having saved the life of their unfortunate shipmate, whose shattered limb was subsequently amputated by the surgeon of the vessel. ANTONY was a native of Monterey, California, but had been reared in Lisbon, where he shipped on board the *St. Louis* in October, 1863. This is to be hoped that the Queen of Spain will bestow a pension on him.

On the 28th of April, Francis Dixon, claiming to be a native of Bath, Maine, was killed by the falling in the roof of the enlisted depôt at Lisbon. He was about thirty years of age, and held the rate of coxswain on board the *St. Louis* which vessel he had served for five days before while she was at Lotubal. He was on his way to Oporto, when he met with his untimely end.

TORPEDO ATTACK ON THE MEMPHIS.

To the Editor of the Army and Navy Journal:

SIR:—Having seen in the New York *Herald* of April 22d, an account—evidently the recent attack by a Rebel torpedo boat upon this vessel, on this river, which account does great injustice to myself and all concerned, allow me, through your columns, to correct its absurdities, and furnish the public with a true statement.

On the 6th of March, at about 1 A. M., the Quartermaster discovered a dark object in the water coming toward the ship, *against the tide*. This aroused his suspicions, and he reported of same to the officer of the deck, who, upon discovering the object, and seeing it rapidly approaching, was satisfied of its hostile intent, gave immediately orders to "slip," and called "all hands to quarters." The cable slipped at once, and, on backing clear of the buoy-rope, it is supposed by those who saw the "dead" under our counter, that the propeller of the torpedo boat struck the buoy-rope, and headed up stream. A boat was quickly lowered, and an armed crew sent after the scoundrels; but owing to the darkness of the night, and the swiftness of the Rebel torpedo boat, they succeeded in escaping. The true character of our antagonists was not known to us until morning came, when a refugee from this vicinity came on board, and reported that the torpedo boat was brought by water some thirty miles from Greenville, that he was to attack the vessels anchored on the beach near us, with horse and wagon, to pick up what might drift ashore; and that he heard the one in charge of the Rebel his master, say that he might have succeeded in blowing us up, but that the fools were wide awake and ready for them," and that "so severe a fire of small arms was opened on them that they escaped." The statement it is brief and correct a justification as I can pen, in contradiction to the statements made by the torpedo boats were butting this ship for half an hour, to the infinite amusement of her crew, who were not aware of their real character, and who supposed them to be acting at the same time to destroy our "consort," which is the more absurd, as we have had no "consort" since we arrived at this station.

R. D. Minor, Lieutenant Commanding.

U. S. S. Memphis, N. Ensign River, May 24th, 1864.

WHAT IS SEA SERVICE?

To the Editor of the Army and Navy Journal:

SIR:—As your valuable paper discusses all subjects which pertain to the military service, I am induced, therefore, to ask you to take up this one—"What is sea service?"

Does it imply merely to be on board of a vessel actually at sea, or does it imply service on board of a vessel while actually attached to a vessel and ready for sea?

Those who are on the blockade cannot but help contrasting their situation with those who are credited with sea service, living as they do, in the midst of the comforts and luxuries of home, some of whom have not been at sea for over a year, and yet, from the fact of their being on the books of a ship that is outside engaging in the blockading one-day out are credited on the Navy Register with sea service; which certainly does not appear right. Can you enlighten a large class of officers who are kept afloat? BLOCKADE.

THE FIVE YEARS MEN—AN INJUSTICE.

To the Editor of the Army and Navy Journal:

SIR:—Through the columns of your journal, I would call attention to the great injustice on the part of Congress towards the soldiers who have enlisted before the present Rebellion. Two years men, enlistments in 1860, and prior to that date, were for five years. Those men who enlisted then were excluded from all bounties, even the one hundred dollars. Those men who enlisted in the beginning of 1861, for five years, also come under the three years' act passed by Congress; and before some of them have served out their enlistments, they were allowed to take advantage of an order issued by the Superintendent of Recruiting, in favor of the Regular Army, whose term of service expired in 1864, to re-enlist and take advantage of the Government, State and County bounties—amounting to four hundred dollars—thereby severing nearly three enlistments to our one. Meanwhile we were left to serve five years with no remuneration except our monthly pay, for half of which we are indebted to the Government, on account of clothing lost in campaign.

Is this anything like justice? We are not given the same chance either now or in the recruiting and companies. It is hard to see men of our companies and regiments, who never saw as much as a month's service, with full purses in their pockets, while we, as I said before, are indebted to the Government for clothing lost in campaigning.

Many of us have served the country for nearly the term of five years' service—some in their tenth year—some even in their fifteenth year—and yet the Government has not seen fit to grant us a furlough. Long services are all forgotten and unapprecieted in this great country. Volunteers are all the rage, and regulars are nothing. All of the men who enlisted in our company in 1861, for three years, are now being discharged, with the bounty of one hundred dollars, with the privilege of re-enlisting and obtaining the bounties, amounting in the aggregate to one thousand dollars, and from these bounties the five years' men are entirely excluded—overlooked altogether. Vatly, legislation is an enigma to the soldier. Say something in the behalf of those men who are now, and have been continually in the service for the last ten and fifteen years.

FIFTH U. S. CAVALRY.

STAFF PROMOTIONS IN THE ARMY.

SECOND LETTER.

To the Hon. Henry Wilson, U. S. Senate:

SIR:—I have the honor to acknowledge under cover of your frank, receipt of Senate Bill No. 284, "to increase the efficiency of the staff of the Army."

Permit me to say that the passage of your bill, sir, has occasioned much gratification among officers of the staff corps serving in this Department; they deeming it a generous recognition of their services, and fully appreciating the kind attention which has secured for them this acknowledgment.

But goeseous as are the provisions of this Bill, I beg I may be allowed to submit for your consideration, sir, whether such staff officers as have general charge of the principal depôts of supplies for their respective departments, might not be placed on the same footing as are commissaries of musters? And, with your permission, I would respectfully state that probably no officer of the staff corps has more responsibility resting on him who has immediate supervision and control of a large depôt in the field. He has to give his immediate attention to the receipts and issues of the supplies for a large army from hours of the day and night; he becomes responsible for all the supplies so received and issued; the value of which not unfrequently amounts to millions of dollars, and for which I can attest, from actual fact,—in this respect a greater responsibility also devolves upon such officers than upon the same grade of rank, I would respectfully suggest, might be extended to such officers as are charged with the disbursement of large amounts of Government funds, for the more satisfactory accountability of which they are directly responsible.

If the views which I have had the honor of presenting thus briefly to your considerations shall meet your approval, sir—as I am persuaded to think they may—I would respectfully inquire if you will be pleased to submit the provisions of the act to those officers (than whom none would seem to have stronger claim to its benefits) to whom I have referred. Very respectfully, your obedient servant,

A STAFF OFFICER.

CHATTANOOGA, June 8, 1864.

CASUALTIES AMONGST OFFICERS.

To the Editor of the Army and Navy Journal:

SIR:—Having had occasion to transmit herewith for publication in your valuable paper, the following correct list of the casualties in the officers of Regular Infantry regiments, commanded by officers of the First Division, Ninth Corps Army of the Potomac, since the commencement of the present campaign in Virginia.

SECOND U. S. INFANTRY.

Killed—None.

Wounded—Major J. C. Robinson, Brigadier-General Volunteers; Lieutenants William Wort, William Falck, Robert Davis, Henry Sommer, Thomas Brown.

Missing—Lieutenant Charles L. Nagle, probably prisoner; Lieutenant Robert Sedgwick.

Killed and wounded—Captain Thomas Wilcox, Volunteers; Lieutenants D. D. Van Valzah, J. P. Wagner, August Sigerson.

Wounded and missing—Captain Edward McA. Anderson, Thomas S. Dunn, C. L. King and Henry C. Morgan; Lieutenants G. C. Egbert, Rudolph Ackhurst, Edward Ball and Jesse E. Pinkham.

Missing—Lieutenant William Mott, Noteworthy.

Killed—Killed, 4; wounded, 11; missing, 2.

FOURTEENTH U. S. INFANTRY.

Killed—1st Lieut. Rathbone Ashhurst.

Wounded—Colonel Henry Boyd, commanding regiment, Captains Hiram W. Kreer, William S. Armstrong, S. W. Burbank, missing; Lieutenants D. M. Benham, wounded, James S. Buckley, Thomas E. Collins, missing.

Missing—Captain David B. McKibbin, prisoner.

Killed—Killed, 1; wounded, 6; missing, 2.

SEVENTEENTH U. S. INFANTRY.

Killed—None.

Wounded—Captains J. S. Conner, N. Prime; Lieutenants W. W. Swan, George W. Smith, F. E. Hamilton, J. C. Dowell.

Killed—Killed, none; wounded, 5; missing, none.

Very respectfully, your obedient servant,

EVAN MILES,

First Lieutenant and R. Q. M. 2d U. S. Infantry.

CAMP COLD HARBOR, June 5, 1864.

List of casualties amongst officers in the One Hundredth regiment New York State Volunteers, during the recent operations in General Burnside's department: Captain Ayres, wounded; First Lieutenant Howell, wounded; Second Lieutenant Hoyt, killed; Second Lieutenant French, missing; First Lieutenant Jones, missing; Second Lieutenant Babbit, wounded and missing; First Lieutenant Ackhurst, wounded; First Lieutenant Wm. Ackhurst, wounded; First Lieutenant Brown, missing; First Lieutenant Vanoe, wounded; First Lieutenant Richardson, wounded.

Jere Jerker he died, the Rebel General Stuart gave his sword to a young son, and his golden spurs to Mrs. General Lee's as a dying memento of his love and esteem for her husband.

COLONEL James Dearing, of Lynchburgh, Va., has been made a Brigadier-General of the Rebel army, dating from the capture of Plymouth. He is about twenty-three years of age.

GENERAL H. G. Whiting, late in command at Wilmington, has reported, by orders, to General Lee for an active old command.

CALIFORNIA COAST DEFENCE.*

By kindness of Captain W. C. Little, we have received the Report of Adjutant-General W. C. Kibbe, of the military condition of California during the past year. It contains complete rosters of the Three Years Volunteers furnished to the Union, as well as those of the State Militia Contingent, called out by its own laws. The Report breathes a spirit of advance in military efficiency, and reprobates the conduct of those, who, for the sake of financial economy, would neglect putting the State on a proper war-footing. "A full purse," it says, "is the god of their adoration; but a noble country is not to be saved by offering" ing." The report advises the establishment of a State military academy, and sets forth a plan of organization and curriculum of instruction.

In the issue of this journal, dated April 9, 1864, the military topography of California was treated at length. It was there stated that "there can be no excuse for us if "we do not to season avail ourselves of the naval advantages we possess, by establishing extensive dock-yards on "the Pacific coast, and collecting the means of preparing "at the shortest notice, a fleet of armed vessels to answer "to the certain control of the Pacific and Indian Oceans."

In California, the question of home defence resolves itself chiefly into a question of the protection of its coast line. Its geographical position is such, that it has nothing to fear from an army in its rear. The need it has of is landing of a hostile army on its coast, designed to penetrate its interior. Such a design would contemplate too great cost in transportation, and too much risk of annihilation to be practicable. The possession of Vancouver and contiguous insular territory, however, would render this invasion as perfect as to incline the nation to break the command: "Thou shalt not covet thy neighbor's house." As it is, however, we have little fear of Pacific invasion. The ports of California are in the exposure to fleet attacks, and to the catastrophe of the utter destruction of its shipping and its seaport cities. The construction of the Pacific Railroad will be of invaluable importance in our communication with California. But, till the railroad is laid, the blockading of the Pacific ports will be a matter of great injury, as it would substantially interrupt our communication with a general line of coast defence, therefore, should be established, in systematic manner, and with works proportionate to the value of the roadsteads and rivers to be protected. It was stated in the Journal, at the time it was duly allotted to, that immediate attention should be given to the fortification of San Francisco, San Diego, Monterey, and the mouth of the Columbia, and afterwards one or two favorable points on Puget's Sound.

Not only, is it necessary to put ourselves on the defensive, on the California coast, but we should also be so thoroughly equipped for assuming the aggressive, in case of war with a foreign enemy. In other words, California should be our marine station, our grand naval base, for controlling the Pacific Ocean. We will not have a fleet there, capable of driving the commerce of our enemy from the Pacific seas. For this purpose, we must have naval stations and yards on the California coast, for complete refitting, as well as for building, a great navy.

At present, however, the necessity for defence is more pressing than that of offence. The military authorities of California seem to be alive to this necessity. Some earthworks have been thrown up, and batteries planted along the coast. The recent excitement about the reported presence of the Alabama off San Francisco, may have opened the eyes of its inhabitants to the necessity of more ample coast protection. But there is still very much to do—everything almost to do—in harbor defence, as the present fortifications would be small shield against an iron-clad, or perhaps, even against wooden frigates, with heavy batteries. In this part of our subject we will add the remarks of the Adjutant-General, entire:

> The necessity of rendering the harbor of San Francisco defensible against vessels-of-war of every description, is apparent to the citizens of the whole State. A single vessel of war once within range of this city, would be able to destroy property to the amount of millions of dollars, and, for many months it may continue, it is absolutely impossible to prevent the entrance of vessels of war. The Golden Gate, however, by all the rules of modern warfare, is known virtually captured that city. A single war steamer, three times the size of the Pensacola, could run past Fort Point and Alcatraz, with such rapidity that no State must surrender or be destroyed. The capture of New Orleans by Farragut, and the power our fortresses have to prevent the passage of even ordinary steamers of war. The range of stationary guns is about two miles; with a moving vessel, but it is a very poor gun that a moving vessel, but it is a very poor gun that a moving vessel is fit at all; and, the longer the range, the more accurate. If the attack should be made, however, by land forces, the strength of the city would be almost certain. I am sure that the Pre-sident, Secretary of War, and Congress, should not feel secure while San Francisco unbarred, in spite of the fortifications which defend it. Some two years ago, a commission was sent to the Pacific coast, for defence; nearly enacted, is clearly demanded. The new men called to instruct the militia of the coast, should add to their duties that of a weekly inspection for defence of the harbor of the principal seaport and gold exporting city of this State. The Golden Gate is the real point of defence; the passage here is about one mile in width. The mode of protect defence is, I believe, to be found in the revolving tower or turret, patented by Mr. J. B. Turner, of New York, in October, eighteen hundred and sixty-two. The plan expanded to contain twenty-five by fifty of San Francisco, is to construct a tower at Point Bonita, on the north, and another, near to the light house, on the Marin county shore. Each consists of an iron-plated tower, with a dome-shaped roof, resting upon a circular track. Each tower is intended to carry four guns; the turntables provided with enamelled

> gune; the tower to be one hundred feet in diameter, and to mount sixty guns—thirty to each tier. The walls may be of any required thickness, or, if more convenient, the interior of earth for a land fortress is of no practical consequence. The tower revolves upon friction rollers, by means of a steam engine below and beyond the foundation of the fort. As the tower revolves each gun in its turn is brought to bear upon the object of fire, and the current not in use is in one minute if desired; the whole on the principle of the turrets of the Monitor class of vessels. Each tower is to be armed with two guns of the largest calibre, and two guns further from the centre of the tower; the guns to be placed at certain distances from each other, so that while the one is being loaded, the other may be brought to bear by the windlasses, when required, to such a delection as to prevent the possibility of injury to the gun from the momentum of the recoil, and it would be at a point blank range upon the fire of the vessel. The guns should be placed in the lower story, second. The essential idea of a revolving tower is, that every gun can operate every way. In addition to the above land fortifications, only a mile of the guns can be used with effect at any one time. The Alcatraz Island, Fort Point, Lime Point, and Point Bonita, and other approaches to the city fortified, upon the plan already adopted by the Government, the native of the world could be kept out of that harbor.

Of the contribution of California to the Union armies, some of the cavalry force has fought its way even to the bloody battle-grounds of Virginia. But the infantry have been detained farther West by the difficulties and cost of transportation, as well as by the necessity of keeping a military force in that quarter of the country. In New Mexico, in the Indian campaigns of General Carleton, they have found occasion for considerable service. The militia establishment of California, until recently, has been too much neglected. But effort is making by encampments, drill, and discipline, to bring it into an efficient state. To few States is the military spirit more natural. It has come a matter of necessity, since in case of foreign war, California might for weeks be left entirely to self-protection, without the possibility of drawing aid from our Eastern shores.

NAPOLEON AND HIS GENERALS.

Some of the opinions elicited from Soult by Sir William Napier, in preparing his history, are very curious. Those relating to the Emperor, his brother, and his generals, have peculiar interest:—

"Ney!" he said, "was not a traitor; he was uncapable to his situation—that is to say, he could not command more than a few thousand men. I calculate (said Soult) the value of the Emperor's generals by the number of men they were capable of commanding. I name nobody; but there were among them men who were worth fifteen thousand, twenty thousand, twenty-five thousand, and even thirty thousand, even, in case of necessity, sixty thousand. The art of commanding armies becomes more difficult as the numbers increase. It is very difficult to command eighty thousand, and to command a hundred thousand. Place a hundred thousand, and the difficulty increases a hundred fold. Now Napoleon committed a great mistake in giving so many men to Grouchy. First—That general was not equal to the command. Secondly—The command was not sufficiently supported by the Emperor. But the Emperor seemed changed at times; there were moments when his genius and activity reappeared, as was proved at other moments he seemed apathetic. For example, he fought the battle of Waterloo like Marmont fought Hand's; he watched the enemy's position. He trusted to General Hand's report. In former days he would have examined and re-examined in person. In the same manner, in the campaign, he neglected his order at Quadre Bras, and again at Waterloo; he attacked Wellington's position beyond La Haye Sainte contrary to orders, and, in fact, on the whole, he was unfortunate. I do not like to speak of his errors."

Hogue—Soult knew him well. "I was with him (he said) when he died. He was poisoned by the Emperor. I thought so at the time. I think so still."

Napoleon—"Ah! that was the great Napoleon—the greatest genius of all the men France produced?" "Ah! bah! yes! there was no comparison." "Was he not a good and kind man also?" Here Soult raised his eyes to heaven, shrugged his shoulders, and exclaimed in an emphatic manner:—" Napoleon *a jamais gardé personne de son propre mouvement; jamais! jamais!* It was impossible; when anyone was known to him, to commit faults, nay, even crimes, over and over again, twenty, thirty times, before he could bring himself to punish him."

Joseph—"At the battle of Ocana, Joseph was at my side, and so nearly, that his knee touched mine in my pocket. After the battle was gained and that we had stopped, instead of conversing on the action and the war, he entered into a conversation about women against the Emperor, and told me that he had written to him a letter which he would show me. It was menacing, suspect, insolent; and his discourse went to accuse me upon exciting the army to resist Napoleon. I rose from my chair and addressed him thus:—'Sir, you have received a letter such a manner that you give me the right to treat you without reserve or ceremony, and first, it is fortunate for you that I choose to speak to you on my own account, and not on that of the army. What! you imagine that the *ésteé* of such a victory as Ocana secures you so dear to the French soldiers, and they will support your caprices and your weakness? Napoleon! Oh! Sire! you shock me.' (Here Soult put himself in the attitude, and used the same gestures he did to Joseph, and they were very striking; he seized his arm with one of his hands, and with the other seemed to repulse some horrid object.) 'Napoleon would never write such a letter.' 'Who are you?' what are you? who has made you?' 'You deceive; and you mean to him! Burn your letter, Sire, and think again.'

Marchan—"Marchan was clever and good, and of great promise; but he had little experience before he fell."

Mebeau—"No great things."

Augereau—Ditto.

Jenot—Ditto.

Govinon St. Cyr—"A clever man and a good officer, but deficient in enterprise and vigor."

Macdonald—"Brave, honest, too methodical; an excellent man, but not a great general."

Oudinot—"To extent of capacity; but he was unfortunate; he is dead."

Victor—"An old woman, quite incapable."

Jourdan—" Not capable of leading large armies."

Masséna—" Excellent in great danger; negligent, and of no goodness out of danger. Knew war well."

Magnont—" Understands the theory of war perfectly. History will tell what he did with his knowledge." (This was accompanied with a sardonic smile).

Regnier—"An excellent officer." (I desired this, and Soult explained that he was created Duke of Gaeta.) Soult replied that he was considered to be a better officer in France; but if what I said could not be controverted as to fact, he was not to be compared to Regnier, who was unmatched. (The facts were correctly stated, but Regnier was certainly disaffected towards Napoleon at the time; his unfaithful conduct might have been suspected.)

Desaix—" Clever, indefatigable, always improving his talents, full of genius, and would have made a great general officer, a noble character in all points of character, and amongst the greatest of generals by nature, but likely to become to be a great general by study and practice."

Kleber—"Knew him perfectly: colossal in body, colossal in mind." He was the god of war; Mars in human shape. He knew more than Desaix, more than Desaix; he was a greater general; yet he was idle, indolent, he would not work."

Berthier and Clarke—"Old women—Cadine. The Emperor knew them and their talents; they were fit for beds, made handsome aides-de-camp, fit for orders, and making arrangements according to rule; he employed them for nothing else. Bah! they were very poor. I could do their work as well or better than they could, but the Emperor was too wise to employ a man of my character at a high rank; he knew I could control and time wild men, and he employed me to do so."

ARMY AND NAVY IN CONGRESS

SENATE.

On Thursday, June 9th, the bill amendatory of the Enrollment act was taken up, and its consideration occupied a large part of the session. Amendments were adopted authorizing the drafting of men for one year's service, and carrying over to subsequent drafts credits for any excess of men furnished by a district. It was also made the executive's repealing the three hundred dollars commutation clause was not touched.

On Friday, June 10th, Mr. Howe made a report from the Committee of Conference on the Army Appropriation bill, with a considerable number of amendments. The main item the amendments in the section equalizing the pay of United States soldiers. Messrs. Sumner and Conness approved of the Committee's action.

On Saturday, June 11th, Mr. Foster reported a bill to amend the act granting pensions, which, among other things, would extend the benefits of the act to widows and children of the colored soldiers massacred at Fort Pillow.

Mr. Howe's report on the Army Appropriation bill then came up in order, and was agreed to. After it, as a sequence in, it identically the House bill, the section relative to the reinstatement of the troops being left to the decision of the Attorney-General.

On Tuesday, June 14th, the bill making appropriation for the Civil Expenses of the Navy, &c., for 1865, with the report of Conference Committee, was taken up. Some slight amendment providing $477,000 for the defences of California. The Senate adhered to its position in the matter of the reinstatement of the deserters, and, at the request of the House, a new conference committee was agreed to.

On Wednesday, June 15th, Mr. Wilson, from the Military Committee, reported favorably on the Senate bill to place every contractor, or his agents, furnishing steamer, vessel, munitions of war, provisions, clothing, or military and naval supplies of any kind, on the footing of persons in the Army and Navy, and liable to trial, by Court-Martial, for the non-delivery, fraudulent delivery, or any violation of law, or fraud, &c. A report from the Judiciary Committee was offered that, while the title of General Banks to a seat is doubtful, he is entitled to his pay as an M. C., having resigned his commission in the Army before the assembling of Congress. Mr. Grimes proposed to add to the bill to repeal the allowance of twenty-five thousand dollars for the Marine Hospital at Kittery, Maine, was referred.

HOUSE.

The House did very little at the end of last week. On Monday, June 13th, Mr. Stevens reported from a new select of the Senate on the disagreeing amendments to the bill to increase the soldiers' pay. A report from the Conference Committee on the Army Appropriation bill, granting full pay and bounty to negroes who were free previous to the passage of the act of July last, was concurred in. Claims was brought up, but no action was taken. The House refused to entertain a resolution in favor of Mr. Eaussen for damages by the iron-clad *Fortress* and the captured iron-clad *Partizan* at a valuation. Mr. Eaussen cannot profitably complete the vessels at the contract price, owing to the increase of wages of mechanics and the cost of materials.

Lieutenant-Colonel T. B Farleigh, of the Twenty-sixth Kentucky, has assumed command of the post of Louisville, Kentucky, vice Colonel S. D. Bruce, who is ordered to the front.

The Navy Department is offering large rewards for the arrest of persons defrauding our revenue by the apprehension and delivery at a naval station of Acting Third Assistant Engineer William J. Moffit, a deserter from the Steamer *Mississippi*, and who has since run from the steamer *Admiral* on the 12th of May at New York.

The sutlers' trade, under certain restrictions, has again been opened with the Army of the Potomac, General Patrick affording every reasonable facility to the officers and men to procure the luxuries of the season in the field. Captain Beckwith, of his staff, is temporarily in Washington, superintending the shipment of goods and examining passes. Despite the privileges granted the sutlers, General Patrick will employ every article to which the restrictions of the law, and scarcely a day passes without the seizure and confiscation of vessels and goods.

* Annual Report of the Adjutant-General of the State of California, for the year 1863.

ARMY AND NAVY PERSONAL.

COLONEL Marshall Lefferts, late commander of the 7th New York Regiment, National Guard, has been appointed a Brigadier-General by Governor Seymour.

MAJOR-General Franklin, having recovered from his wound in the late Red River campaign, resumes his command of the Nineteenth army corps.

THE report that the Veteran Reserve corps is to be reorganized is incorrect. No changes of its present organization are contemplated.

MAJOR-General F. J. Herron has assumed command of all the U. S. forces on the coast, and Rio Grande frontier of Texas, headquarters at Brownsville, Texas.

WILLIAM P. Webster has been appointed Volunteer Aide-de-Camp to Major-General Butler, and assigned to duty as Provost-Judge of Norfolk and Portsmouth, with the rank of Major.

SURGEON J. J. De Lamater, having reported to Brigadier-General Shepley for duty, is announced as Medical Director of the District of Eastern Virginia.

MAJOR Edwin S. Jenney, Third New York artillery and Judge Advocate, is announced as Provost Judge of the District of North Carolina.

LIEUTENANT-Colonel James H. Strong, First N. G. U. Volunteers, is announced as Acting Assistant Inspector General of the District of North Carolina, vice Captain Judson, A. A. G., relieved.

MAJOR-General Crittenden, accompanied by Major Burford, Captain Knox and Captain McCook, members of his staff, have left Washington to report to Major-General Sherman.

CAPTAIN Benjamin M. Platt, Assistant Adjutant-General, United States Volunteers, and Assistant Adjutant and Inspector General of the Missouri, is announced as a member of the Department Staff, to date from May 10th.

LIEUTENANT-Colonel Wm. Hall, Assistant Adjutant General, has been assigned to duty in charge of the Assistant Adjutant General's office, Headquarters Department of the Ohio, Cincinnati, Ohio.

LIEUTENANT-Colonel Samuel M. Quincy, Seventy-third U. S. Infantry, (colored,) formerly of the Second Massachusetts Infantry, has been appointed to the colonelcy of the former, May 21, 1864, vice Barrett, killed in action.

THE War Department has ordered the barracks at Camp Parole, Annapolis, Maryland, over the temporary occupation by slightly wounded officers and enlisted men, Colonel A. R. Root, Ninety-fourth New York, will command.

COLONEL W. W. Davis, of the One Hundred and Fourth Pennsylvania Volunteers, who left for the Department of the South by the *Arago*, after a short absence to the North, has returned to the scenes of his wife.

LIEUTENANT-Colonel Horace G. Wadlin, of the Eighth Massachusetts Volunteers, has resigned. On leaving that command the officers of the Thirtieth presented him with a service of plate.

GENERAL orders No. 14, issued by Major-General Sherman, prohibits the disinterment of the bodies of deceased officers or soldiers, unless, south of that latitude, until after the 1st of October next.

At the battle of Resaca Major-General Logan was struck by a spent ball, which caused a contusion of the leg. Subsequent to the action he was severely wounded in the arm, but not sufficiently to prevent attention to his duties.

LIEUTENANT-Colonel Horace Porter, of the 78th regiment, New York Volunteers, has resigned. On leaving that command the officers of the Thirtieth presented him with a service of plate.

GENERAL orders No. 14, issued by Major-General Sherman, prohibits the disinterment of the bodies of deceased officers or soldiers, south of that latitude, until after the 1st of October next.

At the battle of Resaca Major-General Logan was struck by a spent ball, which caused a contusion of the leg. Subsequent to the action he was severely wounded in the arm, but not sufficiently to prevent attention to his duties.

LIEUTENANT-Colonel Horace Porter, of the 78th regiment, New York Volunteers, has resigned. On leaving that command the officers of the Thirtieth presented him with a service of plate.

BRIGADIER-General Dow . . now at Chesapeake Hospital, unable to move hand or foot, and suffering great pain in every joint. His aide-de-camp, Payson, he adds, is also there, severely wounded by a musket ball in the thigh.

BRIGADIER-General William Birney, ordered to the command of the district of Florida, Department of the South has proceeded to Jacksonville, accompanied by Captain Young, A. A. G. of his staff. Brigadier-General Gordon, relieved by General Birney, was ordered to report at Washington.

BRIGADIER-General Judah, who has command of a division in Major-General Sherman's army, is at Staten Island on leave of absence for 30 days. He has undergone a surgical operation since his arrival there, and it is soon he also to take the field again. The statement that he was ordered for duty in Kentucky, was erroneous.

JEFF WEST, of Kentucky, a member of the army of the 1st regular cavalry, who is now on duty at Camp Stoneman, was fined at five times when near that post by a private of the 182d Pennsylvania regiment, who had charged him with a provost duty at the time. He served for some time in the Rebel army, but becoming incensed against his captain, shot him and deserted, after which he enlisted in the army. He is now in confinement.

DANIEL S. Smoot, a contractor for supplies for the army, having failed to comply with articles of agreement entered with Captain James A. Eakin, Chief Quartermaster, Cavalry Bureau, has been tried by a military commission, held in Washington, upon the charge of "wilful neglect of duty," in violation of the act of Congress approved July 17, 1862." The court honorably acquitted Smoot, but the latter proceeded to pay to the United States a fine of $10,000, and he retained as Fort Delaware until such fine is paid, provided such imprisonment shall not exceed six months.

BRIGADIER-General Leddle, commanding First division, Ninth corps, announces the following staff:—Lieutenant C. J. Mills, A. A. A. G.; Captain S. Hovey, Jr., A. A. I. G.; Captain J. B. Eaton, Twenty-seventh New York battery, Chief of Artillery; Surgeon M. E. Hogan, United States Volunteers, Surgeon-in-chief; Captain G. P. Liddi, Assistant Quartermaster; Captain T. Y. England, Assistant Commissary of Subsistence; Lieutenant J. Hovey, Jr., Aide-de-Camp; Captain D. E. Bruce, Aide-de-Camp; Lieutenant George M. Randall, Aide-de-camp; Lieutenant R. P. McKibbin, Acting Commissary of Musters; Lieutenant E. R. Lewis, Provost-Marshal; Lieutenant G. W. Leddle, Acting Orderly Officer.

A PHILADELPHIA newspaper says:—One of those slight but expressive and influential incidents which touch the universal heart and indicate the tide of feeling, transpired the other day in this city, and deserves, in consideration of all its surroundings, to be made known. Its import is heightened by the fact that it was a surprise where surprise was intended, and that its accomplishment was attended with no difficulty. The fact must be known to almost every city that Mrs. Meade was about removing from her residence. The knowledge suggested to a number of gentlemen who are personal friends of the general and his family that a home from which no removals would be necessary would be a pleasant acknowledgment of his services and a handsome memorial of the war. The idea was acted upon, and with no difficulty a very desirable house, on the southeast corner of Spruce and Locust streets, Rittenny Place, was purchased, together with its furniture, for the sum of thirteen thousand dollars. The whole was then presented to Mrs. Meade. The deed and the inventories of the house from which she had removed was advertised for sale, and Mrs. Meade, desiring to secure some portions of it, selected the sale. And when she was proposed to bid, the unconscious announced its sale. Mrs. Meade left, and when she reached her residence, lo! the furniture was there. It had been bought and sent in as a completion of the former purchase.

OBITUARY.

LIEUTENANT-COLONEL JOHN S. TYLER.

We have to record the death of one more gallant spirit of the Army of the Potomac. John S. Tyler was born in Brattleboro, Vermont, and though his father removed to Ohio while he was yet a boy regarded himself as a Green Mountain Boy. The ranges of Sumter removed him from his native's love of the mountains to the Second Regiment of Veterans Volunteers. Enlisting as a private, he came with promotion for his office of First Lieutenant of his company by the election of his commander. Remaining in the service after the three months' six months' regiment, Mc DOWELL'S disastrous advance to July, 1861. In the July first battle, Lieutenant TYLER considered himself in such a manner as to receive the commendation of his commanding officer. He was wounded, and he assumed command of the company, until he received his commission as captain in September of that year. Participating in all the battles of the Peninsular campaign, he was wounded at the battle of Fair Oaks, and at that of McCLELLAN, he was conspicuous for his valor on the bloody field of Antietam. Soon after he was promoted to Major, and was one of the officers on the staff of Fredericksburgh under SUMNER, when HOOKER was in the Wilderness.

Just before GRANT assumed command of the Army, he was promoted to the lieutenant-colonelcy, and was engaged in each of the opening battles of the present campaign. He had been in the thickest of all the fights, and yet unscathed; but at last a rebel bullet struck him in the leg, as he was leading a charge, and he fell, shot through on his arm. The Colonel was killed at the same instant. Lieutenant-Colonel TYLER was immediately removed to the field hospital, and sent after to Fredericksburgh and Washington. Every attention was given by some friends, and as soon as the surgeons pronounced it practicable he was moved to this city. While at the Metropolitan Hotel, the wound, which was not expected at first to prove fatal, became worse, and secondary hemorrhage resulted. He was no week to rally from the effects of the necessary operation, and died on Monday, the 23d ultimo, and his remains were conveyed to Brattleboro, Vermont, for interment in peace.

COLONEL ORLANDO M. MORRIS.

This gallant officer was shot through the heart in the battle at Cold Harbor on the 3d inst.

Colonel MORRIS was a son of General William L. Morris, and when the Rebellion broke out was a practising attorney in this city. He took a great interest in military affairs, and assisted in the organization of the Sixty-ninth New York Volunteers. He was commissioned its Major in November, 1861, and served with the regiment through the Peninsular campaign. Colonel PICKETT having resigned just before the first battle of Fredericksburgh, and the Lieutenant-Colonel (Byrne) being killed in that action, Major MORRIS succeeded to the Colonelcy. He led his regiment at Chancellorsville, acting during part of the engagement as Brigade-General, and subsequently was wounded while bearing a flag at the colors.

A few months ago the Colonel was the recipient of a valuable horse and equipments from the citizens men of his command, a handsome and appropriate testimonial of the appreciation of his many noble traits of character, and at the recent Metropolitan Fair in this city was presented with a sword and sash by his commissioned officers. When the present movement against Richmond began, Colonel MORRIS was on recruiting service, but immediately proceeded to join his regiment, which had reported at Alexandria for the purpose of belonging to Hancock's brigade, Barlow's division, of HANCOCK'S famous Second Corps, and had gained new laurels in the late severe battles under Lieutenant-General GRANT. In the charge which cost the life of the leader of the Rebel General JOHNSON and his division, this regiment was in the advance, and in the assault of the enemy's entrenchments at Cold Harbor on Friday, 3d inst., nearly every commissioned officer in action was killed or wounded. Sixty ninth has been engaged it has lost heavily in officers and men, but has now suffered its greatest bereavement by the death of its beloved commander.

Colonel MORRIS was twenty-nine years of age, and was a brave and high-minded Christian soldier and gentleman.

LIEUTENANT-COLONEL GEORGE S. MARSHALL.

LIEUTENANT-Colonel GEORGE S. MARSHALL, whose name has appeared in your list of killed, belonged to the 25th Massachusetts Infantry. His regiment was attached to the 3d Battalion Rifles, 15th Massachusetts Volunteer Militia, which was the nucleus of the 5th Massachusetts Infantry, 90 days. His first promotion was to a Corporal; from that to Orderly Sergeant. He fought with the 25th in all its engagements up to the second Bull Run, where he was severely wounded. In August, 1862, he was commissioned Captain of Co. G, 40th Massachusetts infantry, but did not join the regiment in the field in consequence of his wound until November. He was complimented in general orders for gallantry in Florida during the late campaign; was shortly afterwards promoted to the Majority of the regiment, and subsequently to Lieutenant-Colonel. Lieutenant-Colonel MARSHALL was a gallant soldier, a delightful man, and an officer who looked well to the comfort of his men, was brave to a fault, and has left an excellent record.

W. H. C.

CASUALTIES AMONGST OFFICERS.

We continue an alphabetical list of casualties amongst officers, and would warn our kind friends correspondents that they may expect to be referred to the lack of official reports.

KILLED.

Bennett, G. C., Colonel
Bertram, Wm., Colonel
Mefferts, H., Lieutenant-Colonel
Bradley, Wm. C., Major
Hooper, Chas. F., Lieutenant-Colonel
Marshall, George S., Lieutenant-Colonel
Morris, Orlando M., Colonel
Patten, Lieutenant-Colonel
Pierce, David, Captain
Russell, Daniel, Lieutenant-Colonel
Tyler, John S., Lieutenant-Colonel
Bell, Captain
Bell, Lieutenant
Bell, Lieutenant
Bell, Lieutenant

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, communications and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to technical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermasters', Paymasters', or other drafts, which should be made payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers will please address of their paper is changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in the columns addressed to the Journal.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 20 PARK ROW, TIMES BUILDING.

The editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 20 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JUNE 18, 1864.

SOUTH OF THE JAMES.

ONCE more in the shifting fortunes of the Rebellion, the fields of the Chickahominy have been fought out, and abandoned. The old battle plains, trampled and incrandined by a hundred thousand gallant soldiers, in that by-gone day whose memory is still so strangely commingled with the sad and the glorious, have now witnessed the beginning and the end of a second campaign of battles, no less illustrious and no less heroic.

In the conduct of the campaign, thus far, the leader of the Nation's arms has been equal to his word. He "purposed to fight it out on this line, though it should take all summer." The line he indicated was that overland from Fredericksburgh to Richmond. He *has* fought it out, and there is still a summer left wherewith to complete the campaign. The work has been skillfully and gallantly done. The marching has been of remarkable celerity; the fighting bloody and sometimes terrific; the changes of position to meet the exigencies of the moment, promptly conceived and executed. If the first series of operations against the enemy's capital have proved immediately indecisive, this resulted only from his Herculean and desperate efforts to drag his last man and his last gun into the sacred line of Virginia breastworks. It was GRANT's first intention to fall upon the enemy again and again from the Rapidan to the Chickahominy, till at last, when, weakened and distressed, he reached his capital, the city would prove an easy conquest for our legions, flushed and buoyant with victory. The scheme failed, not from lack of incessant marches or of desperate battles, but simply from the numerical strength of the enemy, aided by long-made positions. He was driven back and back from Mine Run to Mechanicsville, but, when our forces surged up against his farthest entrenchments, he was strong enough still to dash us from them. All this the momentous reconoissance at Cold Harbor revealed. It was our battle; and it was enough, as this journal then intimated, to control the future conduct of the campaign. It was our battle, and proved not only tentative but decisive. So much we felt privileged to say, but no more, of the course of events which was clearly inferable to the thoughtful spectator of the campaign. Now, at length, the new movement is accomplished, and already made known wherever telegraphic wires run.

The transfer of the Army of the Potomac to the southerly side of the James, is so judicious a movement, that it can be regarded only with entire satisfaction. This journal has so uniformly and repeatedly urged the adoption of the route on the south side of the James, as certainly the best, and probably the only practicable aggressive avenue to Richmond, that its present occupation is most cheering to us, as the augury of future success. In December of last year, in January of this year, and on many subsequent occasions, this view was explained, sometimes by reasons which it will not again be necessary to repeat. A fortnight since,—before the affair south of the Pamunkey—when the brilliancy of the preceding manœuvres had lent confidence to the notion that Richmond might be seized at once by a *coup de main* from the northeast, this journal stated its conviction that the proper route to Richmond in the order of their advantages, were first the one from Bermuda Landing on the south side of the James; next, that from Harrison's Landing, on the north side of the James; next, that from White-House on the Pamunkey. These opinions are reviewed, lest it may be surmised that a pardonable impulse to sustain the courage and the spirits of the people, is all that has due to advocate the new change of military base. This movement is not the *dernier resort* of a defeated general, but the disposition of skilful and judicious strategy.

The execution of the new movement was no less brilliant than successful. Four times now, in the brief Virginia campaign, has a great Army been coolly and deliberately marched across the right flank of an enemy strong and vigilant. If on its first two exhibitions, the manœuvre partook of the character of a pursuit, from the timely interposition of the enemy's presence in front of your advance, on the last two, at least, its execution has been so swift and energetic as to claim the merit of a surprise. That the column on the march has not been attacked in either of these two cases is not a little noteworthy. Its wide detour, its remarkable celerity, and the perfect philosophy, as of mechanism, in all parts and details of its movement, will furnish some explanation of its success. And perhaps the obvious inferiority in condition and strength of the enemy in open field, may account for his sluggishness to attack and thwart us. In either event, the bold and skillful generalship of GRANT has been made thoroughly manifest.

The second stage of the campaign will soon be undertaken by the National Army, strong as ever in numbers and as admirable in spirit. Six veteran corps threaten the long-harassed capital from a new and comparatively untried quarter. With faith in the cause and the Army, let us await the unfolding of events.

A NEW Government has been inaugurated in Mexico, and monarchy is now fairly established on the North American continent. The New World can at last claim equality with the Old, for it exhibits on either side of its Republican centre specimens of the pomp and pride of royalty. We do not know what is the order, numerically, of the Government of MAXIMILIAN in the long catalogue of those which have risen and fallen in Mexico; but circumstances may render its career as brief as its predecessors. Established only because the gigantic throes of our country prevent it from offering any interposition, the new Empire, with the Union Jack again triumphant, trembles before the march of united Republican armies. But at present MAXIMILIAN "keeps his state" in Mexico, and will for some time have peaceful leisure enough to surround himself with all the pageantry of royalty.

If Mexico will be obliged to pay handsomely for the honor of becoming a monarchy. By the convention agreed on between her provisional Government and France, the French troops in the country are to be reduced to 25,000, but the foreign legion is to remain six years, at the expense of Mexico, after the other troops are withdrawn. She is also to pay the expense of a monthly line of transports between France and Vera Cruz at the rate of $80,000 per voyage; she is to become indebted to France in the sum of $50,000,000 for war expenses, and, after the 1st of July, 1864, she is to support the army at the rate of $200 per annum for each man. Besides this, she is to pay $3,000,000 yearly, to indemnify French claimants in whose behalf the French expedition to Mexico was undertaken.

The 23th of May was the happy day when a genuine monarch landed at Vera Cruz. An immense assemblage of people collected to witness his arrival, but their reception of him was not enthusiastic, although the official authorities performed their parts in the ceremony of oration properly and with becoming adulation. The EMPEROR's proclamation is somewhat remarkable—coming, as it does, from a representative of Austrian absolutism—and shows he w the constitutional principles enjoined by our despised Republic have returned to our continent, after half a century of strife in Europe, in the mouth of one of that dynasty which has been their most arrogant and inveterate enemy. The new EMPEROR says to his subjects:

"The reliance that you place in me, and I in you, will be crowned by a brilliant triumph if we remain always inviolably united in courageously defending these great principles which are the only true and lasting basis of modern government—the principles of inviolable and immutable justice—the equality of all men before the law—equal rights for all—the attaching guarantee of personal honor, socially and politically—orderliness and well-defined persecution of the misdeeds, the prejudices and the passions—and the respect of all property—encouragement to the national wealth, progressive increase of resources, and material interests—the establishment of the great lines of communication for an extensive commerce—and, lastly, the development of intelligence in all that relates to public instruction."

This is very well uttered for an Austrian—for one of the nation which nided to place on the throne of his ancestors poor old LOUIS XVIII., who, when urged to govern according to a constitution, said "the constitution brings the monarch, not to the people"—doctrine religiously adhered to by the House of Hapsburg. We trust very sincerely that MAXIMILIAN will be faithful to his pledges, and that he will be able to improve his subjects—in all the departments of civilization and prosperity, for the time may come when we shall receive them as members of our own commonwealth, and it will be advantageous to us if their preliminary training has been successfully conducted.

By the reports received this week from General SHERMAN, it appears that after the series of bold flanking movements which have placed him in front of Marietta, twenty miles to the northwest of Atlanta, he is confronting JOE JOHNSTON's rearguard at the former place, in no apparent haste for a further advance. The policy of this delay is evident. Our operations in Georgia have reached a stage where it is safe to await the development of the cooperative movements against Richmond. If JOHNSTON purposes to make a serious fight in defence of Atlanta, we can scarcely doubt, he has come to a point that leaves him but little room for further retreat, and though he may gain something from delay, we can hardly afford to yet force him to battle, with the prospect that, in case of victory on our part, the remnants of his broken army will be thrown into the scale against us in Virginia.

Besides, it is part of General SHERMAN's plan to make sure of his position, by establishing depôts of supplies in his immediate rear, which will make him independent of a line of communications so exposed to raids as his is shown to be. On the capture of Resaca we are informed, the stores at Chattanooga were removed to that place, and the capture of Allatoona Pass, on the 2d inst., gave us a strong position for the establishment of a new depôt. Of this advantage has, no doubt, been taken, though the raid of WHEELER's cavalry upon the railroad at Calhoun, south of Resaca, may have temporarily interrupted the progress of our trains. With an efficient a body of cavalry as General SHERMAN is reported to have, he should be able to defend himself against any permanent annoyance from detached bodies of horsemen like this under WHEELER. Give him a little more time and he will be in a position to set independently of his communications north of Allatoona Pass.

MUCH unnecessary discussion has been expended in reference to the originality of General GRANT's ideas in the prosecution of his campaign, and especially in the selection of his positions on the Chickahominy. Those who always conceive of an army as merely an assemblage of men who have full power and liberty to move at any direction, will never be able to comprehend that neither General GRANT nor General MCCLELLAN can escape from the necessity of conforming to local circumstances. The similarity of the movements of the two Generals is attributable to these circumstances, just as the two movements made by LEE across the Potomac, and the marches of General POPE and General BURNSIDE to the Rapidan were, by the local characteristics of the country where these operations occurred, rendered almost entirely alike in every particular.

Local circumstances must, of course, control the position and operations of an army investing Richmond, and it happens that these circumstances are of a character highly favorable to the defenders of the city. The Chickahominy River is a barrier equal to a wall, not on account of its size, but because it happens to run at a distance in front of the city just far enough to be an outer defence, and because also its course is parallel to the front of operations which any army

must assume that attacks Richmond from the north-east.

The next circumstance of controlling importance is the position of the dépôt of supplies and of the communication with it. To any army investing from the quarter mentioned, the dépôt must necessarily be in the vicinity of White-House, which is near the head of navigation on the Pamunkey, and the use of a portion of the railroad leading from White-House to Richmond will be indispensable. Consequently the army must be so placed as to cover both the dépôt and the railroad.

Both Generals McCLELLAN and GRANT fulfil the figures of the circumstances mentioned, and hence it has happened that their Armies have occupied positions so nearly similar. General McCLELLAN, however, crossed the left of his Army over the Chickahominy at Bottom's Bridge, and connected it with his right by bridges built after the crossing was effected. General GRANT refrained from adopting this plan, having decided to keep his Army in one body. He therefore sought to cross the upper Chickahominy, where the stream is inconsiderable, and where a crossing, if effected, would have given him a strong position. Finding the enemy too strongly fortified to effect this, he passed on to execute his reserve intention, and moved by his left flank across the James. But while lying in the Cold Harbor position, his situation was, necessarily, through the influence of local circumstances very similar to that occupied in 1862.

THERE has been very much said about the *indecisiveness* of all the numerous battles of this war. But, in fact, there have been very many decisive battles. We may look at the decisiveness of field actions in three aspects: First, battles which are decisive simply of the *field*—of which we have a favorable example in Murfreesboro, and an adverse example in Fredericksburgh. Secondly, battles which are decisive of the war in large States, or over great surfaces of country—of which Fort Donelson, which ended the war in Kentucky—Pea Ridge, which ended it in Missouri, and Vicksburgh, which ended it on the Mississippi, are examples. Thirdly, battles which are absolutely decisive of the whole fortunes of the war and of the life of the parties or nations involved—of which latter class, in its largest aspect, we have perhaps not yet had an example. Professor CREASY, of England, wrote a book entitled the "Fifteen Decisive Battles of the World," and by decisive battles he meant such battles as effected the whole course of history, as regards the great combatants, and had they been gained oppositely to what they did, would have resulted in a condition of affairs permanently different from that which we now see or have seen. Fixing upon such battles by tracing up to them through the subsequent act intricate course of historical events, as CREASY does, we say we really cannot yet settle definitely whether or not such a battle has been fought. We cannot yet see events through the long perspective as our posterity a hundred years hence will be enabled to do, nor can we take in the full scope and bearing of actions that have already transpired or are now transpiring.

But may we not suggest that Gettysburgh was perhaps a decisive battle, even in the largest sense? Had the issue of that great day been defeat instead of victory to our arms, the National Capital would have fallen. Baltimore and Philadelphia would have fallen —and beyond this, what shall we conjecture, either as regards event or consequence? It may appear, when the history of this whole war can be fully surveyed, that that battle not only saved the North, but really broke the South—that it was the critical event of the war, the turning point in all its fortunes. And this by no means belittles the mighty work we now have in hand, or the mighty work we yet have to do.

ONE of the most noteworthy and creditable of recent American military publications, is a translation of BARON JOMINI's great Life of NAPOLEON. The intrinsic merits of the work are, of course, so well known as to render any reference to them entirely superfluous. But it must be remembered that, as the preface to this edition remarks, no English translation of the work has ever been published, and it is a matter of some difficulty to procure a copy in French. The present translation is from the pen of Major-General HENRY W. HALLECK, than whom we know of no person better fitted to undertake such a task. The translation is accompanied with a series of excellent notes, principally historical, from General HALLECK. The whole work is four volumes, while in a fifth is a series of sixty fine maps, from JOHNSTON'S Atlas. The maps illustrate the region of all the most important battles criticised, and the locations not only of the contending parties, but of each arm of the service engaged, are distinguished by different colors. The beautiful execution of the work, not only in its typography, but in its general style, is extremely creditable to Mr. VAN NOSTRAND. We can entirely commend the work to gentlemen interested in military studies.

Two soldier correspondents make an appeal in this issue of the JOURNAL, which we hope may yet be heard by the legislators at Washington. It is well known that in the year 1850, and previously, enlistments in the Army were for five years; that when the war broke out, and the volunteer force came into existence, three years was the greatest limit. Now, it happens that while a large number of the three years' men find their time expiring, and heavy bounties offered them for re-enlisting, those soldiers who were enlisted in the ordinary way, and for the ordinary term, in 1860, are compelled to serve without the encouragement of a single cent beyond their regular pay. It is, therefore, natural that they should grumble a little, when they see their comrades thus preferred of fortune, and that the thought should occur to them that they are neglected, ill-treated, and forgotten. These five years' men have done good service; they are veteran soldiers; they have the pride of all lovers of drill and discipline; and the fortunes of war have not left many of them to raise their just plaint. Surely, it is due to them that their case should not be overlooked.

THE full report we give of the eloquent address of General MCCLELLAN, at the dedication of the site of the Battle Monument at West Point, renders it unnecessary for us to say more here than a word in recognition of the dignity of the undertaking which the ceremonies of Wednesday inaugurated. The duty of commemorating their gallant services is one we owe not only to the fallen heroes themselves, but more to the people of which all derive stimulus to patriotic self sacrifice from the memories of the fortitude of this generation. In a utilitarian country, and an age of commerce, this Monument arises to tell to the future the story of kindly virtues. It will stand to mark the best period in the history of the Republic, a period of trial, and bloody war, but also of the display of those manly qualities which it is the pride and the strength of a people to have inherited.

IT must be very amusing to the personal friends of General GRANT and to his companions of the mess, to read the stuff which the newspapers are telling as indications of his character. To those who are privileged to know him as the genial, generous, candid friend, who, if he has secrets, hides them under the pleasant guise of entire freedom of conversation, it can but be surprising to hear that the Lieutenant-General clothes himself in mystery, and admits no partners of his thoughts. Yet it is undoubtedly true that GRANT does seem a miracle of reticences to inquisitive newsmongers and schemingpoliticians,—indeed, we imagine most say gentleman would so seem to them.

In describing military operations, we always suppose the reader to be provided with suitable maps, and to have acquired the habit of frequently consulting them. It is hardly necessary for us to say that unless the map be so consulted, it is impossible for any one to get an intelligent idea of the situation. Of the maps which are accessible to the public, the best we know are those published by the Coast Survey, which may be obtained at a cheap rate from bookseller generally.

DURING a recent discussion on ordnance, at the United Service Institution, Admiral HALSTED expressed himself very warmly against the ARMSTRONG gun, and said that after 3,000,000 of money had been expended in perfecting and manufacturing coil guns, Sir W. ARMSTRONG had not ventured to bring one of those guns to compete with Mr. WHITWORTH'S in the experiments now being conducted at Shoeburyness; but he had brought forward a different kind of gun that was lined with a steel tube. Captain SELWIN commented on the dissertations on naval warfare which had appeared in a leading London paper, advocating the exclusive adoption of long-range guns, the writer of which, he said, knew nothing practically of the matter, for though some damage may occasionally be done at a long range, all naval engagements must be determined by fighting at close quarters.

BY a circular to Navy Paymasters, which we publish in our Navy Gazette, it will be seen that the Secretary has ordered that in all cases, officers attached to a squadron by order of a Department, are entitled to sea pay while on duty under such order, though the commander of the squadron may occasionally employ them on shore duty, or assign them to duty on board store or receiving ships, or in hospitals.

THE PRESIDENT has accepted the resignations of the following officers of General FREMONT's staff:—Colonel ANSELME ALBERT, Colonel JOHN T. FIALA, Colonel CHARLES ZAGONYI, Lieutenant-Colonel JOHN G. PILSEN, Major LEONIDAS HASKELL.

WE noticed the fact that Captain COLES' turret ship, the *Royal Sovereign*, had fallen far short of the high promises made on her behalf by her self-confident constructor. By the last European arrival we learn that Mr. REED, chief constructor of the British Navy, has also been brought to grief. The *Research*, a vessel which was to demonstrate that all the *Warriors, Defiances and Minotaurs* of the British Navy, as well as the Monitors of our own, were costly blunders, while she was to prove that Mr. REED was the only ship-builder deserving the name, and that no one else understood the principles upon which iron-clads should be built—the vessel which was to do all that has been subjected to certain experiments, which prove that she is unable to stead the fire of unobstetted guns. Nor is this the worst of it. Mr. REED has in course of construction upon similar plans, no less than seven other vessels, which it is estimated will cost at least a million sterling. It is not very strange that the English journals should denounce the policy of appointing to such a responsible position as that held by Mr. REED, one "whose only exploits in the ship-building line have been in the pages of the Mechanics' Magazine." Mr. REED may be a very clever man in his way, but both he and Captain COLES may yet be able to get some ideas from the "old fogies," if they will be content to profit by our experience.

A BOARD, to consist of the following officers, has been ordered to assemble in Washington on the 10th inst., to examine into and report upon Professor R. N. Horsford's memorialon the army ration: Colonel Charles Thomas, Assistant Quartermaster-General; Lieutenant-Colonel John M. Cuyler, Medical Inspector; Lieutenant-Colonel Augustus C. Hamlin, Medical Inspector; Lieutenant-Colonel M. D. Simpson, Assistant Commissary-General of Subsistence; Lieutenant-Colonel George Bell, Commissary; Captain G. A. Pierce, Commissary.

FROM the 9th of May, 1864, to June 10 (one month), the Medical Department have sent to the Baton Rouge, Fredericksburg, Port Royal and White House, surgeons (volunteer, contract and regimental), nurses, medical students, and attendants, to the number of one thousand. The following recapitulation will interest those who are unaware of the military efforts of the Medical Department for the care of our sick and wounded: Number of physicians sent, 245; of which the Volunteer Aid Corps furnished, 194; Contract Physicians, 42; Regimental, 9; number of Nurses, Medical Students, &c., 755. Total, 1,000.

BRIGADIER-General Bragg has been relieved from the command of the Baton Rouge military district, Department of the Gulf, and is succeeded by Brigadier-General Benton, of the Thirteenth army corps. General Fitz Henry Warren has succeeded General Benton in the same command. General Bragg resumes command in the Nineteenth corps, and General Benton will take command of the Thirteenth corps at Carrollton.

COLONEL William Dulany, Lieutenant-Colonels Ward Marston, J. B. Reynolds and Major Isaac T. Doughty, of the Marine corps, have been retired. The first-named has been in the service over forty-six years, the second forty-four years, the third thirty-nine years, and the fourth thirty-seven years. Major Zeilin is now the senior officer. Captain P. H. M. Pontane has resigned.

FOREIGN MILITARY AND NAVAL MATTERS.

LIEUTENANT-COLONEL FLETCHER, of the British Public Guards, is engaged in preparing a history of the American war, bringing down the events to the Autumn of 1863.

The free city of Hamburg is constructing several gunboats for the defence of the Elbe, which are now nearly completed. Nine rifled cannon have already been delivered to her, also, from the famous manufactory of Krupp.

SINCE the summer of 1862, the Swiss army has been paying attention to its artillery, reducing its rifled batteries of six and eight pieces to batteries of four. Its total force of cannon now, is 102 pieces, nearly equalling, therefore, in number, the artillery force of the minor German States.

COLONEL RAMIN lately pleaded the cause of old retired officers before the French Chamber. Those whose cause he pleaded were few, and the youngest of them was 74 years old, for the 100,000 men who fought at Moscow only a few hundred now survived, and France could easily spare enough to allow them to pass their last days in comfort.

THE government of the grand duchy of Baden has at last rejected the heavy Prussian cap-helmet or *pickelhaube*, so long worn by them, for the light French *képi*, whose shape is familiar to our own soldiers in their fatigue or forage cap. Experience showed that both the Austrian and Prussian helmets were too heavily and clumsily capped. The narrow blouse with a single row of buttons has been displaced by the same government, for a larger one, with two rows of buttons.

TELIANOKOFF and DOLGOLENKO continue their work of relieving the harbor of Sebastopol from the ships which the Russians sank there during the Crimean war. Amongst those already taken up, more or less damaged, are the ships of the line *Twelve Apostles, Warsaw, Ourief, Tchesma, Empress Maria, Maria* and *Yagoudi*, the frigates *Flora* and *Kagoul*, the corvette *Pylade*, the ships *General* and *Silistria*. Nine more, at last accounts, remained to be raised, and preparations are made for rapid progress. The work reflects great credit upon the Russian skill and energy.

A MEDAL has been struck off commemorative of the French expedition to Mexico in 1862 and 1863. It is of silver, carrying on one side an image of the EMPEROR, and the words "NAPOLEON III. EMPEREUR;" on the other, the legend is, "Expedition of Mexico 1862–1863," and the inscription, "*Combres, Cerro-Borrego, San-Lorenzo, Puebla, Mexico*." The medallion is encircled with a wreath of laurel. It is to be awarded by the EMPEROR to those who are worthy, and will be worn on the left breast, suspended by a white ribbon, with a red and green band in the form of a cross, and on it, the Mexican eagle holding a serpent in its beak.

THE familiar custom in France of giving donations, made by generous founders of bequests, to encourage gallantry and good conduct in soldiers, and to reward length of service, appears now to be extending to brave women also. In a recent exchange, we notice that the Minister of War has been authorized to accept a subscription of one hundred francs, going toward the permanent foundation of a prize of one hundred francs, to be given each year to that *cantinière*—canteen-woman—of the army of the rhine, who shall be most distinguished in aiding the wounded under the fire of the enemy, or who, in time of peace, shall have risked her life in a generous action.

IN Austrian military circles it is said that Admiral VON TEGETHOFF would probably have been victorious in his recent encounter with the Danes had not the Reinsbrath refused to grant a part of the sum which was required by the government for the fleet. The representatives of the nation declined to furnish the Naval Department with the means of constructing new armor-plated vessels until those already built had been properly tested, and recent experiments have proved that they acted very wisely in so doing. The *Don Juan*, the best of the Austrian iron-clad vessels, shipped 60 tons of water at the first fire, and it is said that she was in some danger of going to the bottom. Twelve millions of florins were voted for the navy during the last session of the Austrian Parliament, but, unfortunately for the country, the deputies of the people had no means of reasoning the wood used in the construction of the fleet, for it is now found that frigates which are now lying in the port of Pola. The captain of an English man-of-war who some time ago examined the vessels in question, said that to his certain knowledge one-half of the wood used in the construction of the three iron-clad vessels last made was "green."

AT a late meeting of the British Association, Admiral BELCHER submitted a plan for readering ships unsinkable. The peculiar remedy he had suggested to his mind the propriety of bore-selling holes, or under-planking the hold-beams, and saving those spaces between them for the storage of light dry-goods above that deck (which was generally hot), and placing loose planks (indeed, as we were in the habit of hatching many of our logs of 366 tons and under) as a temporary deck. In the event of a vessel receiving shot or even a large hole being stove in the bows or bottom of a ship, he proposed securing the hatches from beneath to hatches above, screwed firmly in opposition to each other, and filled in by pitch from the upper or open hatch. Now, it would be apparent that if the ship was air-tight, the water could only enter so long as the air was compressible, and by inverting the pump-hoses and rendering them air-pumps, the leak would not only be stopped, but, by the continued action of the air, it would be expelled by the very orifice by which it entered. Therefore, the customary and continued labor and wear of the powers of the crew would not be necessary to the efficient, if at all, when once the necessary quantity of air had been forced in. He proposed to use iron plates forming air-tight cells in the hold, and, in fact, that a vessel constructed in his mode, even if run over by a ram, would not sink, but come up on the other side.

ITALY seems determined not to be behind her neighbors in the matter of iron-clads. All European nations to secure means of naval defence and aggression. A report on the marine budget for 1864 reports to the Italian Chamber of Deputies that the fleet of Italy is composed to-day of 99 war ships of all classes, of which 14 are iron-clads, 31 screw-steamers, 16 sail-steamers, and 38 sailing vessels. Two of these are of 900 horse-power; two, 800; five, 700; six, 600; three, 500; twelve, 400 to 450; the remainder, screw-sloops, of inferior power. This navy presents a force of 26,030 horse-power, 1,324 cannons, and of 21,930 men. They are constructing in France, for Italy, five frigates and two corvettes. Four are the *Maria-Pia, San Martino, Ancona*, and *Castelfidardo*. In our own country, as is well known, the line frigate *Re d'Italia* was burned by the retreating rebels, and the Italian Navy will be of creditable and formidable proportions.

IN the French Corps Legislatif, recently, M. DUPUY DE LOME gave some interesting details respecting the cost and the seagoing qualities of the French iron-clads. He said that the figures which he had given cost two millions to five and a half each. The *Couronne* cost more, because it was all iron, and in France building with iron is more expensive than building in wood. He also said that foreign frigates have cost more than the French; the English frigate *Warrior*, for example, having cost £400,000 sterling. He has been objected that our ships are smaller than those of other countries. That is true, and it is an advantage, as it combines greater facility of movement with equal resisting power. Then we are told that our frigates are not entirely covered with armor. This is a mistake; all our frigates are iron-clad, both fore and aft, and the armor-plates are laid on with great solidity and terribly. But the dispatches of Admiral PENAUD report that they behaved admirably, especially in one respect in the engagement, that of keeping their speed high. They might even sustain a comparison in point of rolling with the *Napoleon* or with the *Turenille*, which is of wider dimensions and constructed in that particular. The iron-clad ships *Magenta* and *Solferino* rolled, in fact, rather less than the *Tourville*, the frigate which was built for that purpose. As to the subject of the artillery of the marine, he (the speaker) would not hesitate to affirm that France was more advanced than any other country in rifled cannon. The guns, said M. DUPUY, in conclusion, capable of piercing iron plates have not yet been invented. It is, however, what he would propose to be by FRENCH —nor had he any doubt but that iron-clad vessels will have to be modified according to the advancement of science.

CAPTAIN SCOTT, R. N., has lately read a paper before the British United Service Institution "On the Progress of Ordnance Abroad." The American navy came in for considerable notice, and the failure of the cast-iron guns when fired at considerable elevations at Charleston he considered proved that cast-iron guns are not suitable for heavy ordnance firings, in which they can have unimpeded recoil. After describing the different kinds of guns used, and the successful wrought-iron guns of Mr. Whitworth, the general and very comfortable conclusion arrived at was that England is as far in advance as any other country in the manufacture of artillery as she now is in ironvantages attending it being that the gun can be easily sponged and cleaned after firing. He strongly condemned the plan of breech-loading, not only as being defective in principle, but as highly objectionable in practice, on account of its insecurity, which makes the gunners afraid of it, and in their nervousness they sometimes make mistakes in loading that greatly add to the danger. Captain SCOTT advocated the use of mild steel in the manufacture of guns, and he said that the sum of £10,000 had been paid to Mr. BESSEMER for a license to use that gentleman's process of manufacturing steel in America, for the purpose, principally, of applying it to the manufacture of ordnance. The coal plan of Sir WILLIAM ARMSTRONG met with no favor from Captain SCOTT, who spoke against the system of monopoly which had for so long prevented the advantage of free competition between different manufacturers.

OFFICIAL DISPATCHES.

FIFTY-SEVENTH DISPATCH.

WAR DEPARTMENT, WASHINGTON,
Friday, June 10—8 P. M.

Major-General DIX:

Owing to the break in the telegraph line, no dispatches were received yesterday from the army of the Potomac. Dispatches have arrived this morning with date to 8 o'clock last night. There were no fighting on Wednesday except by pickets. An armistice was agreed to for the purpose of burying the dead and bringing in the wounded, between which the killed and wounded were gathered in. There were but no movements yesterday.

A dispatch was came into our lines requests that Hunter's cipher or key should be sent him more complete than the following papers reported. He says that Hunter took 20 cannon, many prisoners, and a large quantity of stores. The enclosed figures were found in one of Breckinridge's command. General Hunter's reports have not yet been received.

EDWIN M. STANTON, Secretary of War.

FIFTY-EIGHTH DISPATCH.

WAR DEPARTMENT, WASHINGTON,
Saturday, June 11—3:30 P. M.

Major-General DIX:

Official reports from the Army of the Potomac, down to 8 o'clock yesterday evening, have been received at this department.

A dispatch from General Sherman, dated yesterday, states that our cavalry yesterday (Thursday) drove the enemy's cavalry into the works in a line along the hills from Kenesaw to Lost Mountain, and are now reaching by the left flank of the enemy.

A dispatch from General Butler, dated this morning, at 5 o'clock, reports that Kautz's cavalry, Wednesday, destroyed the Petersburg and Lynchburg railroad, from Ford's bridge, seven miles from Petersburg, to Burkeville, and captured three pieces of artillery, with one being secured by Gregg's cavalry, and the other two by Kautz. His force without a conflict, entered Keysville, where they destroyed the railroad depot, containing a large amount of stores, and a number of cars. The railroad was also destroyed for a long distance.

The dispatch further says that Wednesday night, June 8, says that General Kautz reports that a telegraph to Hunter's force to cross the Appomattox had been frustrated, the troops that had been crossing to have a large body of cavalry and artillery, and a large force of infantry captured.

General Sturgis, commanding in Kentucky, is in motion with seven regiments of cavalry, and a battalion of artillery, supporting a force at Newport, on the Big Sandy. I moved against Morgan's force in Virginia, as far as Greenville. Morgan, with 2,000 men, passed into East Tennessee by the rocky, via Mossburg. I pursued, and by marching ninety miles in twenty-four hours, overtook and attacked Morgan, killing, wounding, and defeated him. By stealing fresh horses he reached Lexington, Ky., 40 miles in advance of my command. I pushed on to Cynthiana, but this damage. He left here at 7 A. M. for Versailles. I start in pursuit with a force of 2,000 men.

No official report has yet been received from General Hunter.

EDWIN M. STANTON, Secretary of War.

FIFTY-NINTH DISPATCH.

WAR DEPARTMENT, WASHINGTON,
Sunday, June 12—10 A. M.

Major-General DIX:

A dispatch from General Hunter, dated at 8 o'clock in the morning of the 9th inst., at Staunton, reports that "We met the enemy at Piedmont yesterday morning, 8th inst., at 6 o'clock, and fought him until dark, and totally routing them after a battle of ten hours' duration. We took possession of Staunton this morning at 9 o'clock. We have also on the field of battle; also 2,000 stand of arms, three pieces of artillery, and a large number of caissons. We have also in our position with us Gen. Crook and Averill."

It is natural to suppose, unofficial, dated at Staunton, June 9, that "Our infantry is now engaged burning the rail bridges, and destroying the Government and railroad buildings which are burned at Staunton. We leave to-morrow.

"S. S. MCCABE, Operator."

A dispatch from General Grant's headquarters dated yesterday at 4 P. M., reports that evening's dispatches will be made a mile and a quarter from, near Leary House. Wilson this morning sent out a part of his command to destroy the railroad to the left. Their pickets were driven back, and their center line forced, the cavalry passing over the entrenchments. Wilson is with the rear of Sheridan. Gregg's division has met Field's division of infantry, and having accomplished the purpose of his reconnoissance. He is driving back and would have a number of miles in his progress, and brought away four or five prisoners. He had 10 men killed and wounded.

Dispatches from General Grant's headquarters, at Cold Harbor, 6 P. M., Saturday, have been received. They state that our lines are within 400 or 500 yards of the enemy, but no fighting yet.

EDWIN M. STANTON, Secretary of War.

SIXTIETH DISPATCH.

WAR DEPARTMENT, WASHINGTON,
June 13—12 midnight.

To Major-General DIX:

We have dispatches from the Army of the Potomac late as 8 o'clock this morning. They are dated at Cold Harbor. No fighting reported. No reports to-day from General Sherman.

The following dispatch from General Burbridge, commanding in Kentucky, has just reached here:

"LEXINGTON, KENTUCKY, 12 o'clock, midnight, Sunday morning.

"Gen. Sturgis, commanding the cavalry expedition, killed, three hundred and fifty. Morgan's scattered forces are flying in all directions; have thrown away their arms, abandoned their wagons, and are making for the mountains."

Dispatches from General Butler at 9 o'clock this evening indicate no fighting in his front.

No further intelligence has been received from General Hunter.

EDWIN M. STANTON, Secretary of War.

SIXTY-FIRST DISPATCH.

WASHINGTON, June 15—7 A. M.

Major-General DIX:

The movement of the Army of the Potomac to the south side of Richmond has been successfully effected, and the army is now in position far enough to attack the publication of some general lists without endangering important movements.

After several days of preliminary preparations the movement commenced on the night of the 12th. The Second corps, under command of General Smith marched to White House, and the Sixth corps and Reserve corps for Sumners Landing. General Wright in command. Both crossed by James' bridge, while the Fifth corps and the Cavalry division crossed by Jones's bridge, under General Warren. General Hancock and Wilcox's corps moved on the Chickahominy at Long bridge, and marched then to Wilcox's, on the James River. The James River was then open to the Army of the Potomac to Bermuda Hundred.

A dispatch from General Grant, dated Bermuda Hundred, 8 o'clock this morning, states that Lee's army, under Hoke and Beauregard, had reached that place, and would commence crossing the James River that morning. Gillmore and Butler were then in possession of the City Point that night—that no fighting was reported during the night—and much except a little cavalry skirmishing. Yesterday (Tuesday) After-

soon, at 1 o'clock, General Grant was at Bermuda Landing. In a dispatch from him, dated 9 o'clock that day, he says:

"Our forces effected a crossing of the James River to-day, the movement upon organs of you having brought troops to the south side of Hichmond. Our movement from Cold Harbor to the James River has been made with great celerity, and so far without loss or accident."

An unofficial dispatch, dated at General Butler's headquarters, 2:30 P. M., says: "That noble's corps was coming on, five thousand having already landed."

A dispatch from General Sherman's headquarters, dated at 3 o'clock yesterday afternoon, says: "Everything moves finely. Our troops are advancing but little to-day. Another unofficial dispatch, dated at 4 o'clock last night, says: "Our troops are all over the Kenesaw Mountain, has passed ground, and that the Rebel brigade is nearly surrounded. It further reported that Johnston's army, on the night of the 16th, was to be ready sent to Marietta. In another part of General Sherman's front Mc-Pherson still drives the enemy, and has a position within a mile and a half of Rebel complement commanders.

General Sherman, in his despatch, reports that the expedition, consisting of three thousand cavalry, five thousand infantry, and six pieces of artillery, sent out from Memphis to destroy the communications of General Forrest, encountered a large Rebel force on the 10th instant, under command of Forrest, at Guntown, Mississippi, and, pressing south from Guntown, after a severe fight, in which our loss is killed and wounded one hundred, and missing two hundred and fifty, the Rebels were driven in what at Collierville, returning toward Memphis. Dispatches state that, with the exception of the loss of the artillery, all is well.

Gen. Sherman also reports that the losses of Sturgis' defeat, reported to be one thousand, have been arranged, and the number reduced to two hundred General Sherman's dispatches, who will assume the offensive immediately.

No other military intelligence has been received up this department since my last telegram.

EDWIN M. STANTON, Secretary of War.

NAVY GAZETTE.

REGULATIONS FOR THE ENLISTMENT AND GOVERNMENT OF APPRENTICE BOYS FOR THE NAVY.

The Department having deemed it advisable to resume the enlistment of boys for the Navy, the following regulations will govern the same: Boys unless sooner discharged, as author ized by the act of Congress approved March 3, 1855, and following regulations, will be entered for the purpose of learning the object of the law, and will be observed by the following rules:

1. Boys will be entered between the consent of his parents or guardian, which consent shall appear by the certificate of the officer before whom the boy is entered, and by the written acknowledgment of consent made in duplicate in the presence of, and signed by, the parent or guardian of such boy, and attested by a witness. Boys will not be transferred in the Department, and those transferred, with the boy's consent, to the boy, to the vessel to which he may be ordered.

2. No boy will be enlisted who is less than fourteen or more than eighteen years of age, nor will any be enlisted without the consent of those to whom such duty shall be assigned, is found to have any personal defect or disease, or who has been convicted of any felony or infamous crime, or who has been convicted of any infamous crime or misdemeanor.

3. Two vessels, at suitable stations, will be properly equipped and fitted out as vessels of instruction for apprentice boys, and to these vessels will be duly officered and sufficiently manned, and to be kept ready for service, boys will be ordered to receive their first instruction, and, if necessary, to go from one port to another. The officers attached to them are to see that the boys are properly taught and cared for in a manner as enough the vessels were not crowded. All of them will be required to obtain such knowledge as may be necessary to enable them to the Department in relation to the boys.

4. Schoolmasters will be appointed to each school-ship, to teach the rudiments of education, including navigation; and a proper allowance of books and stationery, for the use of apprentices will be furnished.

5. Boys, on first presenting themselves on board the school ship to which they are ordered, will be carefully examined, without any regard to any previous examination. The examining officer will be careful to enter in this examination all the facts which may be necessary to impress upon him the necessity of keeping their persons clean, themselves tidy and their clothing, bedding, and hammocks in order, and to acquire order and cleanness them of the strictness of military discipline.

6. On being received on board the school ship, the boys are to be furnished each articles of clothing of Navy pattern, and other necessaries, as may be required by the Navy Regulations, the expenses of which articles will be charged to their pay. They are also to receive, free of charge, two suits of clothing each year, and a hammock. They are not allowed mess in the Navy ration.

7. The commanding officer of each school-ship is to institute a personnel board, consisting of the executive officer, or presidents, the line officers, and the surgeon, to examine the boys as to their progress in their studies and their relative conduct and fitness for duty, as they may present themselves on board, and, in addition thereto, to examine them in seamanship; including in their duties the exercise of the great guns, and the use of small arms, and in the manual of cutlass, and in the exercise of the great guns in their use, and the department with their deeds whether or not they have shown that they deserve it, will receive from the department a certificate, on pricebook, expressing its approval of their conduct, and stating the length of time they have served in such rating. And those to whom such certificates are granted will, in the boatswain's mess, be entitled to receive, if other qualifications be equal, be considered as having a prior claim.

GIDEON WELLES.

NAVY DEPARTMENT, May 27, 1864.

CIRCULAR TO PAYMASTERS OF THE NAVY.

TREASURY DEPARTMENT,
FOURTH AUDITOR'S OFFICE, May 19, 1864.

The following is the purport of three letters from the Secretary and Acting of the Navy, dated respectively May 14, May 16, and May 18, 1864, by which Paymasters of the Navy will be governed:

1. ALL ENLISTMENTS DISCONTINUED BY THE CARDOZO NOT TO BE RENEWED.

An allotment discontinued by the Cardozo during the term for which it was granted, must to be renewed during that time by him, except with the consent of the Navy Department and Fourth Auditor, upon satisfactory reasons adduced for so doing.

2. PAY AND ALLOWANCES NOT ATTACHED TO THE SHIPS OR RECEIVING SHIPS, OR ASSIGNED TO ACTIVE SERVICE.

"In all cases, officers will be entitled to pay by order of the Department are satisfied to pay while on duty under such order, though the commander of the vessel to which ordered may from time to time on duty, or assign them to duty on board state or receiving ships, or is employed."

THE INCREASED PAY OF A PROMOTED ENGINEER OFFICER—WHEN IT BEGINS

By a regulation of the Navy Department, THIRD ASSISTANT "must have served two years as such before he can be promoted to an acting appointment in the Navy, in actual service," before they are entitled to an examination for promotion.

SECOND ASSISTANTS must, in like manner, have served three years; and FIRST ASSISTANTS four years.

Under the act of July 16, 1862, and that of May 1, 1862, an officer of the Navy almost on duty would not be entitled to an examination, and from the date on which he passed such examination, to the increased rate of pay from the date when he should have received it had he been ordered to sea at the time he was actually ordered to sea.

The Honorable Secretary of the Navy has given the following construction to the law of July 16, 1862, and that of May 1, 1862, and will consider them as entitled to an examination on the expiration of the term of service of the Navy Department, and Fourth Auditor, upon satisfactory evidence of the fact, to the increased pay from that date if found qualified at that first examination after the expiration of the term.

If such Engineer Officer do not pass his first examination, but passes on a subsequent one, he will be entitled to the increased pay only from the date when he shall have passed such examination, and not from the date when he should have passed it had he been ordered to sea.

Engineer Officers, permitted to be examined for promotion *before they* have served the time required by law, are not entitled to pay only from the date when their commissions or warrants are signed.

The Secretary of the Navy has decided that the increased pay of promoted officers of the engineer Corps, is applicable to all *other officers* of the Navy holding corresponding grades, *and not exclusively* applicable to engineers.

STEPHEN J. W. TABOR, Auditor.
JOHN M. BODINE, Second Comptroller.
SECOND COMPTROLLER'S OFFICE, May 19, 1864.

REGULAR NAVAL SERVICE

ORDERED.

Third Assistant Engineer Francis C. Bouchet, to the *Juniata*.
Assistant Surgeon Edward B. Harris, to the Naval Hospital, Memphis, Tenn.
Paymaster Edward P. Carson, to the *Ohio*.
Assistant Surgeon Edward B. Matthews, to the Naval Asylum, Philadelphia, Pa., for special duty.
Second Assistant Engineer Thomas W. Pitch, to the *Don*.
Paymaster Edward Simpson, to the *Sonoma*.
Second Assistant Engineer Weyland Cuthbert, to the Naval Rendezvous, Port Royal, S. C.
Boatswain J. E. Bartlett, to the *New Hampshire*.
Commodore Charles H. Bell, ordered to assume duty under the direction of Commodore H. H. Bell, at New York.
Surgeon John M. Bodine, to the Naval Hospital, at New York.
First Assistant Engineer Edward Mansland, to Medical Survey, at New York.

DETACHED.

Gunner James M. Cooper, from the *North Carolina*, and waiting orders.
Lieutenant Commander Earl English, from the command of the Pembina, and ordered to the Naval Academy, to date May 31.
Lieutenant-Commander Walter W. Queen, from the *Wyalusing*, and waiting orders.
Lieutenant Commander John Lee Davis, from the command of the Memphis, and waiting orders.
Surgeon H. F. McSherry, from duty at the Naval Hospital, Memphis, Tenn., and ordered home.
Surgeon T. M. Potter, from the *Ohio*, and ordered to the *Niagara*.
Commander Charles H. Baldwin, from temporary duty at Washington, D. C., and ordered to command the *James Adger*.
Lieutenant Thomas Pickering, from the *Ohio*, and to the *Pontiac*, ordered at Cairo, Ill.
First Assistant Engineer Louis J. Allen, from the Naval Rendezvous at Port Royal, S. C., and ordered to the Naval Hospital.
Assistant Surgeon Edward S. Rogot, from the Naval Hospital at New York, and ordered to the *Kearsarge*.

ORDERS REVOKED.

Commander T. H. Stevens' orders to special duty at New York, and ordered to the command of the *Pontiac*.
Second Assistant Engineer Cipriano Andrede's orders to the *Shenandoah*, and ordered to the Naval Academy.

CONFIRMED.

Assistant Surgeon Horatio N. Rosamond, (from the 29th of April, 1864.)
Assistant Surgeon John H. Austin, (from the 16th May, 1864.)

APPOINTMENTS ACCEPTED.

Third Assistant Engineer Lewis Leeds, to the Naval Hospital, Norfolk, Va.
Third Assistant J. E. Bebbs, Naval Academy, Newport, R. I.
Assistant Surgeon Samuel W. Abbott, of the *Niagara*.
Third Assistant Engineer Thomas Parsons, to the *Ohio*.
Midshipman J. Dunkle Powell, at the Naval Academy, Newport, R. I.

VOLUNTEER NAVAL SERVICE

ORDERED.

Acting Master J. A. Grimes, to the *Santiago de Cuba*.
Acting Ensign Benjamin F. Clough, to the *R. B. Taylor*.
Acting Assistant Surgeon W. W. Howard, to take passage in the *Massachusetts* for duty in the South Atlantic Squadron.
Acting Assistant Paymaster R. F. Tuttle, to take passage in the *Massachusetts* for duty in the Gulf.
Acting Ensign William Bates, to the *Pandora*.
Acting Master H. Walton Grinnell, to the *Shamrock*.
Acting Volunteer Lieutenant Henry Hery, to the *Niagara*.
Acting Assistant Paymaster C. D. Harvey, to the *Marion*.
Acting Assistant Surgeon W. H. Hoyt, to the *Sonoma*.
Acting Ensign G. A. Wisner, to the *Sumpter*.
Acting Master Edward Hall, to proceed home, and to the South Atlantic Squadron.
Acting Assistant Paymaster Josiah F. Dunham, to the *Port Royal*.

Acting Assistant Paymaster Lynford Lardner, to the *Augusta*, Mediterranean.
Acting Ensign J. B. Farr, hild, to the *Monadnock*.
Acting Master Frederic F. Berry, to the *New Hampshire*.
Acting Assistant Paymaster Charles A. Cable, to the *Sumpter*.

DETACHED.

Acting Master's Mates James P. Knowles, William H. Sprague and William E. Black, from the *Pocahontas* and waiting orders.
Acting Master's Mates William H. Cushman and Alfred Moore, from the *Kansas* and waiting orders.
Acting Ensign Charles H. Flower, from the Mississippi Squadron and ordered to the Gulf Squadron.
Acting Assistant Surgeon William Glendenin, from the *Stars and Stripes* and waiting orders.
Acting Second Assistant Engineer Charles S. Fowler, from the Atlantic and ordered to take charge in the *Amaranth* in New York for medical treatment.
Acting Ensign Sturgis Custer, from the *Niagara* and ordered to command the *Sumpter*.
Acting Second Assistant Engineer Timothy McCarthy and Acting Third Assistant Engineer James B. McKenzie, from the *Commodore Perry* and a leave of absence for two weeks granted to the latter.
Acting Assistant Surgeon R. R. Waite, from the Washington Navy Yard and ordered to the *Shenandoah*.
Acting Ensign John S. Trout, from the Medals and ordered to the *Sumpter*.
Acting Master Charles H. Reynolds, from the Portsmouth Navy Yard and ordered to the Pawnbits.
Acting Ensign Edward Hall, from the Medals and ordered to the *Brooklyn*.
Acting Ensign E. C. Bowers, from the *Courier* and ordered to the *Santiago de Cuba*.
Acting Assistant Paymaster Sherman W. Adams, from the *Somerset* and ordered North.
Acting Assistant Surgeon F. H. Burton, from the *North Carolina* and ordered to the *Shamrock*.
Acting Assistant Surgeon John H. Austin, from the Philadelphia Navy Yard and ordered to the *Santiago*.
Acting Third Assistant Engineer Charles W. Rogg, from the Asylum and ordered to the *Sea*.
Acting Second Assistant Engineer Isaac L. Hench, from the Conemaugh and ordered to the *Ohio*.
Acting Third Assistant Engineer George L. Harris, from the Observer and ordered to the Cimarron.
Acting Assistant Paymaster Junius Roper Ferdinand E. Therlog, from the *Ottawa* and ordered to the Cimarron.
Acting Assistant Surgeon Charles Daniels M. Green, from the *Marquis* and ordered to the command of the *Louisiana*.
Acting Assistant Surgeon Charles Daniels, from the command of the *Louisiana* and ordered to the *Marquis*.
Acting Second Assistant Engineer F. W. H. Whittaker, from the North Carolina and ordered to the *Shamrock*, therefore, to.
Acting Second Assistant Engineer James Mitchell, from the *Shamrock* and ordered to the *North Carolina*.
Acting Master Frederick F. Berry, from the *South Carolina* and waiting orders.
Acting Assistant Paymaster Edward D. Hayden, from the Mississippi Squadron and ordered to the Gulf Squadron.
Acting Volunteer Lieutenant Henry C. Keeny, from the Pensacola and ordered to the Mississippi Squadron, to relieve Acting Ensign Sturgis.
Acting Master's Mate William H. Bradford, from the *Rodnack* and ordered North.
Acting Master's Mate John W. Thode, from the *Iroquois* and ordered to the *James Adger*.
Acting Assistant Paymaster D. C. Woods, from the command of the *Sea Foam* and waiting orders.
Acting Assistant Surgeon George P. Barker, from the Cahkill and ordered North.
Acting Assistant Surgeon Dwight J. Harris, from the North Carolina and ordered to take passage in the *Massachusetts* to Charleston, S. C., and to the South Atlantic Squadron.
Acting Master George W. Frost, from the *Marmora* and ordered to the *Sea Foam*.
Acting Assistant Surgeon William Pitt Prindell, from the *Home* and ordered North.
Acting Assistant Paymaster B. M. Rogers, from the *Sumpter* and ordered to settle accounts.
Acting Third Assistant Engineer John W. Hamilton, from the Cahkill and waiting orders.
Acting Ensign J. F. Winchester, from the command of the *Sarah Bruce* and ordered to temporary duty on the *Franconia*.
Acting Ensign Marcus Baird, from the *Union* and ordered to the *Genesee*.
Acting Ensign Marcus Baird, from the *Union* and ordered to the *Manhattan*.
Acting First Assistant Engineer Silas Reynolds, from the *Princeton* and ordered to the *Allegheny*.
Acting Ensign T. W. Peake, from the *Ethan Allen* and waiting orders.
Acting First Assistant Engineer D. A. Lockwood, from the *Sumpter* and waiting orders.
Acting Third Assistant Engineer Samuel C. Mellam, from the *Manhattan* and a leave of absence granted him for three weeks.
Acting Third Assistant Engineer Hallagher Campbell, from the Bostons and ordered to the *Manhattan*.
Acting Ensign Edward S. Marshall, from the *New Hampshire* and waiting orders.
Acting Third Assistant Engineer Frederick W. Baker, from the Mississippi Squadron and ordered North at Boston.
Acting Master John H. Gleason, from the *Nansemond* and ordered to the *Sea*.
Acting Master's Mate E. A. Butler, from the South Atlantic Squadron and ordered North.
Acting Master's Mates G. Stanhope and George Woodland, from the *Ethan Allen* and waiting orders.
Acting Master's Mate James F. Hughes, from the *Nansemond* and ordered to the *Ethan Allen*.
Acting Master's Mate William W. Greig, from the *Iroquois* and ordered to the *Ethan Allen*.
Acting Master's Mate John F. Sturgeon, from the West Gulf Squadron and waiting orders.

APPOINTED.

George W. Robertson, Acting Assistant Paymaster, and waiting orders.
Denale Coudry, Acting Volunteer Lieutenant, and ordered to duty at the Navy Yard, New York.
Timothy Woodruff, Acting Third Assistant Engineer, and ordered to the Naval Academy, Newport, R. I.
George Jones Smith, Charles W. Rogg and John W. Blake, Acting Third Assistant Engineers, and ordered to the Naval Academy.
Edgar W. Hamilton, Acting Third Assistant Engineer, and ordered to the *Fort Donelson* at Boston.
Robert L. Hartley, Acting Third Assistant Engineer, and ordered to the *James Adger* at Philadelphia.
Edward Hall, Acting Third Assistant Engineer, and ordered to the *Sumpter* at New York.
James F. Hughes, Acting Third Assistant Engineer, and ordered to the *Admiral* at New York.
Joseph Hendrickson, Acting Third Assistant Engineer, and ordered to the *James Adger* at Philadelphia.
John Wilson, Acting Ensign, and ordered to the *Shamrock* at New York.
John H. Austin, Acting Assistant Surgeon, and waiting orders.
W. P. A. Torbert and J. George Crum, Acting Assistant Paymasters, and waiting orders.
Frederick Peterkin, Acting Gunner, and ordered to the *Shamrock* at New York.
Robert E. Hartley and Benjamin F. Clough, Acting Third Assistant Engineers, and ordered to the *Santiago de Cuba* at Boston.
Samuel Lyons, Acting Master's Mate, and ordered to instruction at Newport, R. I.
Edward J. Hilling, Acting Assistant Paymaster, and waiting orders.
Abner C. Penton, Acting Ensign, and ordered to the North Atlantic Squadron.
Dwight James Harris, Acting Assistant Surgeon, and ordered to temporary duty in the *North Carolina*.
Charles W. Rogg, Acting Third Assistant Engineer, and ordered to the *Potomska*.
Thomas Hall Greenwood, Acting Third Assistant Engineer, and ordered to the *Cimarron*.
Thomas Hall Greenwood, William Frederic Eskenazo, Acting Third Assistant Engineers, and ordered to the *Shamrock*.

Charles H. Lockwood, Acting Assistant Paymaster, and waiting orders.

L. C. Robbins and J. Whitelaw Holmes, Acting Assistant Paymasters, and waiting orders.

Wm. Wallace, Acting Third Assistant Engineer, and ordered to the Sassacus.

Wilson Wyllie Fish, Acting Third Assistant Engineer, and ordered to the Ansbala.

John S. McKay and Wallace St. C. Hodgson, Acting First Assistant Engineers, and will remain in the Bureau of Steam Engineering.

William H. Mott and John W. Belger, Acting Third Assistant Engineers, and ordered to the North Atlantic Blockading Squadron.

Acting Third Assistant Engineer Benjamin Rawkins.

Acting Third Assistant Engineer James Lockhart, of the Wyalusing.

Acting Third Assistant Engineer David Costa, Miss. Squadron.

DISMISSED.

Acting Ensign Daniel W. Andrews, of the R. R. Cuyler.

Acting Master's Mate John D. Childs.

ARMY GAZETTE.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

TO BE MAJOR-GENERALS IN THE VOLUNTEER FORCE.

Brigadier-General Joseph Hooker, to rank from the 1st of July, 1863.

TO BE BRIGADIER-GENERALS IN THE VOLUNTEER FORCE.

Colonel Selden Connor, of the 10th Maine Vols., from June 11, 1864.

Colonel William F. Bartlett, of the 57th Massachusetts Vols.

TO BE ASSISTANT ADJUTANT-GENERAL.

John C. Tyler, with the rank of Lieutenant-Colonel, with the rank of captain, in the volunteer force.

TO BE ASSISTANT QUARTERMASTER.

Nathaniel A. Tucker, of Vermont, to be additional paymaster.

SENTENCE OF DESERTERS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, June 3, 1864.

General Orders, No. 226.

To avoid misconstruction, General Orders No. 76, of February 25, and No. 105, of March 19, 1864, are hereby modified:

No. 76.

The President directs that the sentences of all deserters who have been condemned by court-martial to death, and that have not been carried into execution, be mitigated to imprisonment during the term of the War, or during such others they will be sent, under such authority, by the Secretary of War.

The commanding officer will forward in each case proceedings of court-martial in such cases are submitted, in special cases, to the order to duty [illegible] and recommendation as to their judgment the service will be thereby benefited.

Original and duplicate copies of the foregoing instructions will be immediately forwarded to the Adjutant-General and to the Judge-Advocate-General.

No. 105.

General Orders No. 76, War Department, Adjutant-General's Office, February 25, 1864, commanding the capital sentences of deserters to imprisonment during the War at hard labor, the following is hereby amended as to direct the discharge from the service of the United States, with forfeiture of pay and allowances, of all persons to whom cause the provisions of the General Orders apply.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant-General.

NOTE—It is not intended by the foregoing instructions to relieve any of imprisonment at the Dry Tortugas during the war, but to add thereto discharge from the service at the end of the sentence.

The order applies to soldiers convicted only of desertion, and does not relate to persons convicted of other crimes. The latter class will be punished according to their respective sentences.

ORDER OF DISMISSAL REVOKED.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, May 31, 1864.

TO HIS EXCELLENCY the GOVERNOR OF NEW YORK, Albany, N. Y.

SIR—I have the honor, by direction of the President of the United States the disability resulting upon Ferdinand Jerry Leyendecker, late Major 20th Regiment, New York Volunteers, known as "Le Enfants Perdus," by reason of his dismissal from service, and that his commission will be immediately restored, and he may be recommissioned if your Excellency so desires. I am, Sir, very respectfully your obedient servant.

THOMAS M. VINCENT, Assistant Adjutant-General.

A CORRESPONDENT PUNISHED.

HEADQUARTERS ARMY OF THE POTOMAC, June 7, 1864.

General Orders, No. 104.

Edward Cropper, a correspondent of the Philadelphia Inquirer, having published in that paper of May 28, 1864, a letter containing matter on the Commanding General, calculated to impair the confidence of the troops in their commanders, and which the statement the said Cropper acknowledges to have been false, and to have been based on misinformation purposely given to deceive him, has been arrested and paraded through the lines of the Army with a placard marked "Libeller of the Press," and to-day put without the lines, and not be permitted to return.

The Provost-Marshal-General will see that this order is promptly executed.

As the Commanding General trusts that this example will deter others from committing like offences, and he takes this occasion to notify all correspondents that they will be treated with the same severity if they attempt to extend their every facility for acquiring facts, and giving circulation to them, they must not expect to receive favors which cannot be granted in instances like the above, where individuals take advantage of the privileges accorded to them to circulate falsehoods, and thus impair the confidence which the public and the Army should have in their generals and other officers.

By command of Major-General Meade:

E. S. WILLIAMS, A. A. General.

RESOLUTIONS tendering the thanks of Congress to Lieutenant, Colonel Joseph Bailey, of the fourth regiment of Wisconsin Volunteers.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the thanks of Congress be and they are hereby tendered to Lieutenant-Colonel Joseph Bailey, of the fourth regiment Wisconsin volunteers, acting colonel of the first brigade, second division, sixteenth army corps, for his gallant conduct in the recent campaign on the Red River, by which the gunboat fleet was relieved from imminent peril, and the army was saved from total destruction.

Sec. 2. And be it further resolved, That the President of the United States be requested to cause a copy of this resolution to be transmitted to Lieutenant-Colonel Bailey.

Approved, June 11, 1864.

DISMISSALS

For the week ending June 4, 1864.

Major J. R. Durkee, 1st Wisconsin Cavalry, to date May 25, 1864, with loss of all pay and allowances, for neglect of duty and absence, without leave, from his command, and for leaving the state of Louisiana whereby loss was occasioned to the United States.

Surgeon Daniel Brinsmade, 3d Iowa; and Lieutenant-Colonel E. Elmer Ellsworth, Maine Vols., to date June 2, 1864, for pasting and mustering into service recruit Edmund Burnham, who was mustered under the following duty.

Surgeon Josiah Carr and Lieutenant L. C. Stout, 38th Maine (veterans) Vols.; to date June 2, 1864, for passing and mustering into service recruit Edmund Burnham, who was mustered under the following duty.

Captain Collin B Ferguson, Assistant Quartermaster U. S. A., 1st Lieutenant 19th C. & Infantry, to date May 15, 1864.

Captain Wm. Hall Hamilton, 1st Kentucky Cavalry, U. S. Vols., to date May 30, 1864.

Corporal Wm. Reynolds, 12th Pennsylvania cavalry, to date May 9, 1864, for giving duplicate discharges to an enlisted man.

Private Joseph Hall, 1st Maine Cavalry, to date May 31, 1864, for desertion and duty, and for absence without leave to a furlough and discharge thereon.

The following officers, to date May 8, 1864, for the causes mentioned, having been published officially and failed to appear before the commissioner:

Drunkenness and absence without leave.

Captain Oliver S. Johnson, 8th New Jersey Vols.

Second Lieutenant Edward A. Warwick, 14th New York artillery.

Absence without leave.

Assistant Surgeon Frederick W. Simpson, 72d New York Vols.

First Lieutenant Edward Hall, 2d New York Vols.

Lieutenant Ernst Rasmus, 45th New York Vols.

DISMISSED REVOKED.

The orders of dismissal heretofore issued in the following cases have been revoked:

Captain John G. Fay, 2d New York Vols., to date May 31, 1864, for absence without leave and failure to join his regiment.

Captain Samuel P. Timmons, 42d Ohio Vols., to date September 8, 1863, for the unauthorized muster out of the 42d Ohio regiment at the policy of the Administration in arming negroes.

Captain Charles H. Bowen, 42d Ohio Vols., to date May 15, 1863, and Second Lieutenant Robert A. Crider, 1st West Tennessee Vols., to date May 12, 1864, for disgracefully deserting his command at the front on the 10th of May, 1863, in the face of the enemy.

Second Lieutenant Theodore Yager, 19th Wisconsin Vols., to date May 31, 1864, for disgracefully deserting his command in the face of the enemy on the 10th of May, 1863

of that satisfactory defense has been made in their respective cases by

Lieutenant H. R. Pugh, 13th New York Cavalry.
First Lieutenant Henry C. Wall, 1st Wisconsin Cavalry.
Second Lieutenant Jacob Hamilton, company F, 8th Veteran Reserve Corps.
Major George R. Davis, 2d Rhode Island Cavalry.

DISMISSALS

For the week ending June 11, 1864.

Lieutenant-Colonel James M. Sanderson, Captain Commissary Subsistence, United States Volunteers, to date June 6, 1864.
Major Orrin M. Cushing, 1st New York Cavalry, to date June 12, 1864, for having tendered his resignation while charges of a commissioned character were under consideration, and in case of his return from absence without leave, were known and entertained.
Captain Chandler Freeman, 2d Regiment Infantry, United States Colored Troops, to date June 6, 1864.
Captain Charles A. McKnight, 7th Michigan Volunteers, to date May 10, 1864, for conduct unbecoming an officer and gentleman.
Captain John Noyes, 7th Kansas Cavalry, to date June 16, 1864, principally on account of his absence from his command without authority, and also from inability to appear and pass given him by the Lieutenant-Colonel commanding the Seventh Kansas Volunteers, to date June 6, 1864, for drunkenness, refusing to show his pass when required by proper authority, and disorderly conduct while under improper character while traveling in a railroad car.
First Lieutenant Samuel Wilson, 105th Pennsylvania Volunteers, to date May 16, 1864, for absence without leave.
First Lieutenant Thomas Bell, 13th Pennsylvania Cavalry, to date June 16, 1864 for absence without leave, contempt of authority in signing his pay without permission, and for making a false statement to the Adjutant-General of the Army relative to his absence.
First Lieutenant Charles H. Smith, 1st, to date June 16, for absence without leave, having been published officially, and failed to appear before the commission.
First Lieutenant Joseph Dreshbinger, 99th Pennsylvania Volunteers.
First Lieutenant Lyman E. Hinson, 9th Regiment, Corps d'Afrique.
The following officers, recently mustered out United States Army, have been dismissed as declared to the Government:
Major Thomas Hamilton, 2d U. S. Cavalry, to date May 16, 1864.
Major Will on Rosenstein, to date November 8 1863.
Major George C. Wilson, to date November 30, 1863.
Major W. W. Sherman, to date January 4, 1864.

DISMISSALS CONFIRMED.

The orders of dismissal published in the following cases have been confirmed:
Colonel Lewis Zeh, 1st 1864 New York Volunteers, to date May 1, 1864 for carelessness of his command in face of the enemy at the battle of Hanover, 1863.
Lieutenant-Colonel M. C. Murphy, 175th New York Volunteers, to date May 16, 1864, for absence without leave, and wrongly in duce without any authority whatever.
Captain Ephraim Hall, 2d Ohio Volunteers, to date May 23, 1864, for long continued absence without leave.

DISMISSALS REVOKED AND CONFIRMED.

The order dismissing Captain John F. Kieg, 6th Connecticut Volunteers, to date June 4, 1864, on account of having been convicted by a civil court of manslaughter, is, in face of the court, has been confirmed.

DISMISSALS REVOKED.

The orders of dismissal heretofore issued in the following cases have been revoked:
Colonel O. H. Moore 25th Michigan Volunteers, (captain 5th U. S. Infantry,) to date June 6, 1864, on account of having been ordered Brigadier Volunteers, on account of physical disability, has been accepted as to date June 6, 1864, and he is honorably discharged, not as captain 5th United States Infantry, for the same cause.
Lieutenant-Colonel Charles Ewing, 55th Illinois Volunteers, to date June 6, 1864, on account of having been discharged, on tender of resignation, as of the date of dismissal.

RESTORED TO COMMISSION.

Captain H. B. White, 16th Ohio battery, heretofore dismissed, has been restored to his command, the charges against him having been withdrawn, provided the vacancy has not been filled by the Governor of the State.

DISABILITY REMOVED.

The disability to receive pay military service arising from dismissal heretofore, in the case of Assistant Surgeon Andrew McIntosh, late of the 76th New York Volunteers, has been removed.

CASHIERED.

Cashiered and to forfeit to the United States all pay and allowances that now are or may hereafter become due to him, to have the stripes and buttons cut off in the presence of the regiment to which stationed, and be drummed out of service, with the ignominy of "Coward" upon their backs.
Captain Wm. Frist Lieutenant and Adjutant, 188th Pennsylvania Volunteers.
Captain William Bodger, Co. D, 4th New Hampshire Volunteers, and Captain David E. Cavanagh, Co. K, 4th New Hampshire Volunteers.
Captain Christopher Gross, Co. D, 166th Regiment New York Volunteers, and Acting Commissary of Subsistence, and to remain at hard labor, with ball and chain attached and wear the coat and dry coats ($3,177 00).

MEDICAL DEPARTMENT.

ASSIGNMENTS.

Surgeon Thomas R. Boche, U. S. V., as Surgeon in Chief General Hospital, Chester, Penn.
Acting Assistant Surgeon Leon Brockman, to the General Hospital, Adrianville, Indiana.
Surgeon N. P. Clark, U. S. V., as Surgeon-in-Chief U. S. forces, Yorktown, Va.
Surgeon G. R. Weeks, U. S. V., as Surgeon-in Chief District of Little Rock, Arkansas.
Surgeon R. Mcminniger, Second N. C. V., as Surgeon-in-Chief of Cavalry Division, Newbern, N. C.
Surgeon Wm. Thomson, U. S. V., as Surgeon-in-Chief of sub-district of Newbern, N. C.
Surgeon Daniel D Turner, U. S. V., as Post Medical Director, Murfreesboro, Tenn.
Assistant Surgeon C. B. Hood, U. S. V., Surgeon in charge Division U. S. General Hospital, Murfreesboro, Tenn.
Surgeon William H. Forwood, U. S. V., as Chief Operating Surgeon Nashville, Tenn.
Surgeon Jas. French, U. S. V., as Superintendent of Hospitals at Nashville, Tenn.
Surgeon W. Hemrichl, U. S. V., as Surgeon in charge Barracks Hospital, Gallatin, Tenn.
Hospital Steward H. W. Bignall, U. S. A., to Little Rock, Ark.
Surgeon R. L. Bayne, U. S. V., General Order No. 5, 3d Division Sedg. C. S. V., to temporary duty at White House, Va.
Surgeon J. H. Brinton, U. S. V., to Headquarters Milner, White House, Va.
Surgeon R. A. Schaeffle, U. S. V., as Assistant Medical Purveyor, Department of the Gulf.

PROMOTIONS.

Assistant Surgeons J. V. Caldwell, William J. Wadley, H. E. Goodman, and B. W. Harris, U. S. Army, to be Surgeons of Volunteers.

MISCELLANEOUS

Lieutenant Colonel John Wilcox, Medical Inspector U. S. Army, will report in person to Major General Dix, at Hospitals in the Northern Department.
The Barracks at Camp Parole, Annapolis, Maryland, will be turned over to the Medical Department, for temporary occupation by sixteen hundred officers and soldiers. Maj. Gen. A. E. Burn, Fifty-fourth New York Volunteers, will cede the command, and organize the troops selected for duty at the Barracks, and will report the organization of records, and prompt return to duty can be secured.
Medical Inspector Charles Smart, stationed at West Point, does not receive the pay of Medical Cadets in the U. S. Army.
By the Secretary of War, Hospital Stewards Hospitals are not entitled to commutation of Fuel and Quarters.
The Barracks at Camp Parole, Md., are now occupied by troops, will shortly be turned over to the Medical Department, for Hospital purposes.

VARIOUS NAVAL MATTERS.

U. S. CORVETTE *St. Louis*, arrived at Tangier Bay, May 18th.

SCREW STEAMER *Penobscot*, 20, arrived at Boston Navy Yard, on Sunday, from Port Royal.

THE United States steamer *Bermuda* sails from the Navy Yard, Philadelphia, for the West Gulf Squadron, on Saturday, June 18.

THE United States steamer *Lancaster*, Admiral Bell, and sloop *St. Mary's*, were at Hampton Roads, May 20th, on the 19th of the *Potomac*.

THE Navy Department has been informed that on the 2d instant the United States steamer *Hornado*, stationed at Georgetown, S. C., chased a schooner which ran ashore and finally proved to be the *Star*, of Leedes, with an assorted cargo. After further effort to get the *Star* afloat, she was destroyed.

A CORRESPONDENT of the Memphis (Tenn) *Telegraph* (Rebel) writes from Matagorda that on the 12th of May the Federal gunboats *Alabama* and *Estella*, attacked the Confederate States gunboat *J. F. Carr*, and drove her up the Matagorda bay, where she was subsequently captured. The *Alabama* was struck twice the water line and retired in a sinking condition. The story is doubtless much exaggerated.

THE Port Royal *Commercial* of the 26th of April 15 says that a Portuguese man-of-war had arrived in St. Simon's Bay from Mozambique, with news that the Livingstone expedition has been heard from. Both Livingstone and Baker are well. The *Bonita* and *Lady Myra*n, in tow of the *Gorgias* and *Ariel*, for Bombay, and would return to England overland. The mission party but also abandoned and the slaves in the hands of Bishop was at Quilimane, awaiting an opportunity of coming down.

THE U. S. steamer *Lake Hopk*, arriving at the Brooklyn Navy Yard on the 16th, with a prize schooner in tow, which proved to be *Anetis arrie*. up on the 11th, left on the day following, the 12th. The tug was bound *Union, Belle*, and the *Glide*, arrived on the 14th. The steamer *Queen* on the 15th. On the 16th arrived the tug *Boston*. The *Emma Dermott Hanshaton* and *Lake Hopk* on the 11th. The *Verbena* has been taken to Whitlock's Wapo, foot of Gold street, Brooklyn, for repairs. The *Ella* has been taken to the same place for the purpose having her coiled, and otherwise preparing for sea, and on active service.

THE Peruvians are busy with preparations to resist the Spanish fleet. The steamer *Rimac* is being fitted out as a transport and has a ram, to be covered with railroad iron. The frigate *Callao* is also to be trans-formed into an iron-clad. She is to have two turrets and a ram. Two vessels are building in England, one to be also a monitor carrier is in the hands of two experienced Americans (Messrs. Herston & Crosby, and the government has already made an appropriation for the work. The other is a double-turreted monitor on the beach at Callao a craft that is termed a *Monitor*. She is to have a turret and ram, and her propelling power is to be a screw.

THE United States steamer *Shawshen*, in the Rebels on board the United States steamer *Shawshen*, in the James River, some weeks since—The capture, Acting Ensign Charles Rigot, was brought to this city on board the steamer *Ella*. Pilot, Jeremiah Evans, was wounded and taken to the hospital. Charles Ritey, Third Assistant Engineer; B. C. Marrow, Third Assistant Engineer; Wm. Rathman, Master's Mate; Wm. Hewitt, Master's Mate; E. D. Swift, Paymaster's steward; W. C. Farley, officers' steward; Thos. Colbert, seaman; Edward Fitzpatrick, landsman; Wm. Hawkins, landsman; Wm. Johnson, landsman; George Grainge, landsman; John Jackson, seamn; Wm. Hackard, seaman; John Welsh, do; Thos. Hamilton, seaman; Wm. Woods, seaman; Maurice Kennedy, seaman; Richard Brown, seamn; James C. Prichan, seaman; George Whitehouse, quartermaster; Wm. Bowden, quartermaster; Wm. Hartington, seaman; Wm. Bowcher, runner's mate; John Harrington and Michael Murphy were killed on board.

ACTING VOLUNTEER Lieutenant W. B. Eaton, commanding the U. S. steamer *Admiral*, writing from on board that vessel, off Velasco, Texas, under date of May 28, informs the Navy Department of the destruction of the rebel steamer *Rebel* by the fire of that vessel. At that time, while attempting to run into the port of Galveston the *Rebel* is a steamer of much notoriety, having made upwards of twenty successful trips between Galveston and Havana, with cotton and clothing. The chase between the *Admiral* and the *Rebel* was an arduous one. The night being dark, it was with great difficulty the *Rebel* could be kept in sight, and the commander handled her with great skill and desperate courage, not surrendering until he had received two broadsides at short range, every shot hitting his vessel, and the second one from the starboard gun completely disabling the steamer with the wheel. One of the *Rebel's* crew was badly wounded, and it was found necessary to amputate his left arm and three fingers of his right hand. The *Rebel* was one of the fastest steamers which ran out from Galveston on the night of the 28th of April last. She had a cargo of powder, arms, percussion caps and medicines. During the chase she threw overboard 200 bales of cotton.

From the fleet off Charleston we have some items: The *Keokuk*, which sank off Charleston, April 6, 1863, the day following the first attack on Sumter, under Rear-Admiral Dupont, will shortly be raised, the arrangements being now nearly perfected. The project for raising the iron-clad *Weehawken*, which went down so suddenly off Charleston during the storm of December last, is understood by those most competent to judge. The iron-clad *Montauk* has been lying in Station creek for three weeks past, undergoing repairs. She was to go North in a few days. The gunboat *Wyoming*, which recently came to Station creek for repairs, is now commanded by Lieutenant-Commander Stone, late of the *Chippewa*, Lieutenant-Commander Weaver being relieved at his own request. The new *Pawnee* is coming to Port Royal to relieve the supply ship *Fernow*, which goes North for repairs. The *Wabash*, *Sonoma*, *Ottawa* and *Chippewa* are also to go North for repairs. The steamer *Governor*, commanded by Acting Master Mantell, is now lying at Station creek for repairs. Two naval general courts martial have been sitting in this harbor for some days—one on board the Flagship, the other on board the *Canandaigua*. The blockers engaged in the late attack on Sumter were the *Nahant*, *Nantucket*, *Sangamon* and *Patapsco*. The *Patapsco* received a shot through the boiler, and the blockers the *Nantucket* and *Sangamon* have already been repaired at their stations off Charleston. The *Nantucket*, Lieutenant-Commander Nicholson, has experienced quite a number of changes of officers within a short time. Lieutenant-Commander Bryson was sent North on account of ill health. Lieutenant-Commander Nicholson succeeded him, and after a short time he, too, was relieved. Lieutenant-Commander Gibson, late of the *Sonoma*, succeeded Lieutenant-Commander Bunce, and he still is commanded. The *Nantucket* has been lying at Port Royal Station creek for three weeks past, undergoing repairs, had returned to her station with the other Monitors off Charleston. In the late engagement, with the rebel batteries on Sullivan's Island the Monitors received some damages, which, however, have been fully repaired. She is at present commanded by Lieutenant-Commander Fillebrown, who recently relieved Lieutenant-Commander Miller. Lieutenant-Commander Rowan is to be relieved by Commodore Radford, at Philadelphia, on the 1st prox. The Commander-in-Chief has ordered Commander Mr. Charles H. Colman, has been appointed acting assistant paymaster, but will remain with the present chief of the vessel reaches Philadelphia. The reported capture of the new and powerful rebel iron-clad ram Albemarle by armed boats, under the command of Lieutenant-Commander Cushing, and

THE Count de Paris has been married to his the Princess Isabella of Spain by the Rev. Doctor Orsol, Roman Catholic Bishop of Southwark, England. The ex-Queen of France, widow of Louis Philippe was present at the ceremony, and afterwards presided at a *fete* at which the most brilliant company of royalty and beauty seen for many years in Europe were assembled.

BRIGADIER-General Prince, Commander of the District of Cairo has made Columbus his headquarters. Lieut. J. L. Phillips, A. A. G. has been relieved by Captain Geo. S. Parsel.

MARRIED.

[ANNOUNCEMENTS of marriages should be paid for at the rate of *fifty cents each.*]

PIKE.—At Alexandria, Va., June 11th, Colonel Edward Pike, of the 25th N. Y. S. Vols., in the 44th year of his age, from wounds received in battle on the 3d inst.

BAILEY.—On Thursday, June 9th, of wounds received at the battle of the Wilderness, on the 5th inst., while in command of his regiment, Captain Charles H. Bailey, 6th U. S. Infantry, in the 29th year of his age.

BUSINESS NOTICES.

MORTON'S GOLD PENS are now sold at the same price as before the commencement of the war. The aim is entirely owing to the Manufacturer's improvements in machinery, his present large Retail Business and Cash-in-Advance Trade, and to the discontinuance of advertising, his business was done on Credit and *strictly with the Trade.*

The Morton Gold Pens are the only ones sold at said prices, as the makers of all other gold pens charge in Proportion to the Gold, consequently, as that of Mr. Morton has in no case changed his prices, Wholesale or Retail.

Of the great numbers sent by mail to all parts of the world during the past few years, not one in a thousand has failed to reach its destination in safety; showing that the Pens are liked by the many as much as by any one, in every part of the world, at the same price, postage only accepted.

Readers, you are busy or enduring, always ready and reliable Gold Pen, exactly adapted to your hand and style of writing, which WILL NEVER vary while you pay cheaper than Steel Pens; and at the present almost universal High-Pressure Price of everything, you can have a Morton Gold Pen cheaper, by comparison, than the labor spent upon it and material used, than any other Gold Pen in the World. If you wish one, send the "Pen is Mightier than the Sword," in another column.

ADVERTISEMENTS.

Advertisements of a character unfit for the columns of the JOURNAL will not be inserted, on any terms, at any price at the risk of the publisher. Advertisers are requested to make their favors as short as possible.

NEW MUSIC.—"THE DYING DRUMMER," one of the sweetest songs ever published.

Hear—Have you seen your darling

Die upon the battle field,

Far from home and kindred,

Have you cause your boy to shield?

"The Maid Mariner's Song," Mother," a very pleasing and beautiful song, suggested by seeing a little boy take the last letter from his mother, and tell her mother through her tears, said, "This hand was struck me, mother."

The above songs are from the pen of the popular composer, Wm. Fairbrother, and are printed on fine, white paper. Mailed free. HORACE WATERS, Manufacturer, No. 481 Broadway, New York.

BALTIMORE AND OHIO RAILROAD

RE-OPENED!

This great National thoroughfare is again open for FREIGHT AND TRAVEL. The cars and machinery destroyed are being replaced by new running stock, with all recent improvements; and as the bridges and tracks are again in substantial condition, the welcomed reputation of this Road for SPEED, SECURITY AND COMFORT, will be more than sustained under the reorganization of its business. In addition to the unequalled facilities of the Company heretofore conducted to this route, the recent troubles upon the border have necessitated numerous points of local interest on the Ohio River and Harper's Ferry, with painful but instructive interest.

TICKET OFFICES

At the Ohio River, with Cleveland and Pittsburgh, Cincinnati, Dunkirk and Cleveland, and Chicago, and through them with the whole Railway System of the North-west. At Harper's Ferry, connecting with Old Dominion Line, with the Washington Branch for Washington City, and the Loudoun Valley for Baltimore with four daily trains for Philadelphia and New York.

TWO DOLLARS additional on Through Tickets to Baltimore via Harper's Ferry, for the privilege of visiting WASHINGTON CITY en route.

This is the ONLY ROUTE by which passengers can procure through tickets and through checks to WASHINGTON CITY.

FIRST NATIONAL BANK OF PHILADELPHIA,

DESIGNATED DEPOSITORY AND FISCAL AGENT OF THE UNITED STATES.

10-40 LOAN.

This Bank is prepared to receive subscriptions to the

NEW GOVERNMENT LOAN,

issued under authority of an Act of Congress, approved March 3, 1864.

The Loan is redeemable after ten years, at the option of the Government, and matures in forty years in coin, and bears interest at the rate of

SEVEN CENT. PER ANNUM.

REGISTERED BONDS will be issued of the following denominations—$50, $100, $500, $1,000, $5,000 and $10,000.

COUPON BONDS will be issued—$50, $100, $500 and $1,000.

INTEREST IS COIN

will commence from date of subscription, or the accrued interest from the list of March; can be paid in coin, or Five Twenty bonds, U. S. notes or certificates of National Banks, adding (50) fifty per cent to the interest thereof.

Coupon Bonds ready for delivery.

C. H. CLARK, President.

THE GOVERNMENT LOAN OF

$200,000,000.

This Loan is authorized by Act of Congress of March 3, 1864, which provides for its REDEMPTION IN COIN, at any period not less than ten nor more than forty years from its date, at the pleasure of the Government.

Until its Redemption five per cent. interest is to be paid semi-annually IN COIN.

Subscriptions to the Loan are received by the National Banks named above below, or in such currency or other funds as are taken by them on deposit at par.

Its Exemption from State or Local Taxation adds from one to three per cent. per annum to its value.

The Rate of Interest on this loan, although not five per cent. in coin, is as much greater in currency as the difference between the market value of currency and gold.

As a Rate, the five per cent. specie securities of all solvent governments are always par or above, and currency now funded in the National Loan will be worth its face in gold, besides paying a regular and liberal percentage to the holder.

The unexercised Amount of this loan is Two Hundred Millions of Dollars. The amount of unsecurity does reported to the Treasury at Washington, up to June 4, has been

$67,017,850.

Subscriptions will be received by the TREASURER OF THE UNITED STATES at Washington, and the ASSISTANT TREASURERS at New York, Boston and Philadelphia, and by the

THE CAMPAIGN IN VIRGINIA.

ANOTHER week of general activity finds the Army still lying in the neighborhood of Petersburgh, having persistently endeavored to break through the enemy's lines at several different points, but thus far without success. Sunday and Monday of last week were not distinguished by any fighting near the city, and the latter day was especially quiet; but, at other portions of the line there were noticeable operations. The enemy continued to entrench on the west side of the Appomattox as busily as our own forces on the east side. Having recovered from immediate apprehension of losing Petersburgh, the enemy turned his attention in other directions. The old lines in front of Bermuda Hundred had been hastily deserted, as has been said, by BEAUREGARD, in his hurry to reinforce Petersburgh. And before the leading division of LONGSTREET's corps could reach the entrenchments, the Tenth corps had got into them and cut the Petersburgh and Richmond Railroad. They were driven back, however, his former works relocupied by the enemy, and the railroad, after a day's delay, put into perfect repair. From these lines as a basis, the enemy began to make slight demonstration in front, and also raiding movements in the neighborhood of the James. On Sunday night, the 19th, he succeeded in destroying the wharves at Wilcox's and Westover landings, and sent squads along the river to do what injury might be practicable. He also threw up earthworks near Turkey Bend, but was easily shelled out by gunboats.

Early on Monday morning, the 20th, a strong cavalry force, with some artillery, swept down upon White-House, where General ABERCROMBIE, with about 3,000 men, of whom a third part were convalescents, was guarding SHERIDAN'S wagon train, till the latter should return from his raid. The wagons were parked behind breastworks. Our skirmishers in the region of Cold Harbor were driven in, and, on the enemy's approaching White-House, our gunboats in the river and two field batteries, opened on him. The shelling and subsequent skirmishing lasted during the day. In the afternoon SHERIDAN'S forces arrived, and the enemy drew off. The losses were comparatively trifling on both sides. The enemy's cavalry continued for some days to infest the Pamunkey.

TUESDAY, THE 21ST.

On Tuesday, the 21st, active movements were again commenced by the main Army, and once more by the inevitable process of extending the left flank. The general design of the new manœuvre was to sever the enemy's southern railroad communications. The first road south of the James is the Petersburgh and Norfolk, of course in our possession. The next, running due south from Petersburgh to Weldon was the one to occupy and destroy. Accordingly, on Monday night, the Second corps, which, as will be remembered, occupied the right centre of the line, moved out from its entrenchments to the left—the Ninth and a part of the Eighteenth corps extending to close up the gap. These manœuvres caused some commotion during the night, and sharp picket skirmishing broke out thereupon as usual; for hardly a guard can be relieved without receiving a few shots from riflemen.

On Tuesday morning, the Second corps, under BURNEY, struck across the Petersburgh and Norfolk Railroad, and marched in a southerly direction as rapidly as possible, under an intense sun and in stifling and blinding dust. The corps pushed on with the same intrepidity of movement which has characterized the previous marches by the flank in the enemy's presence, while GRIFFIN'S division of the Fifth corps was detached to follow in the same direction, and the Sixth corps also moved out in support. Before noon, the main column halted; and BARLOW'S division, in the course of the afternoon, with the Second sharpshooters skirmishing in advance, was sent forward, and struck upon the enemy's lines in the neighborhood of the Jerusalem Road, which bisects into nearly equal parts, the region between the Norfolk Railroad and the Weldon Railroad. The division was halted and put into position, and skirmishers advanced. They met a stout resistance from the enemy's dismounted cavalry pickets, and further penetration developed infantry in force and artillery planted in earthworks. It was evident, therefore, that the enemy had not neglected to defend the Weldon Railroad, and resistance must be expected. Our advance was not only checked, but a counter-attack was received, and a severe skirmish ensued. General BARLOW'S advance line was, therefore, prudently withdrawn, and rejoined the rest of the column. GIBBON at the same time had reconnoitred towards Petersburgh, without result. Our loss in this encounter of the afternoon was something over a hundred. A few of the enemy were captured, including the Colonel and Adjutant of the Third North Carolina. So threatening was the enemy's aspect on the extreme left that CROWNINSHIELD'S squadron of First Massachusetts cavalry were sent round to protect that flank, and the corps was retired to form position for the night, with BARLOW on the left, MOTT in the centre, and GIBBON on the right. Beyond GIBBON was GRIFFIN'S division of the Fifth corps. The Sixth corps was designed to be posted between the Second and the Weldon Railroad. RICKETT'S division was soon brought up on BARLOW'S left, and the other division followed. The cavalry on the extreme left had some skirmishing, and the Rebels made a slight dash with cavalry scouts in the evening towards our position. But, with the engagement of the afternoon and the resumption of line of battle, the day closed. The affair took place about three miles below the city on what is known as Davis's Farm, and within about a mile from the railroad.

In the lines east of Petersburgh, the day was comparatively quiet. Early in the morning the Rebels opened towards the headquarters of the Sixth corps, which had not moved and that until there was more or less firing during the day, especially towards the right. The bridges across the Appomattox between Petersburgh and Pocahontas had now begun to endure a daily process of shelling from our batteries. The accuracy of the fire on the railroad bridge has greatly interfered with the travel of cars; and the annoyance of the enemy is testified by their concentrated fire on our own batteries. Since the affair at Cold Harbor the enemy has made frequent and accurate use of mortars, and no longer relies so exclusively as before on a direct fire of artillery. Our own forces are bringing siege guns into positions, and the booming of artillery will gradually become very heavy.

On the extreme right of the line, or, rather, on the north of the line, there were simultaneous important movements. Early Tuesday morning, FOSTER'S division of the Tenth corps crossed the James River by a pontoon bridge laid by General WEITZEL the previous evening, to a point between Aiken's Landing and Four Mile Creek. Briskly advancing towards the Kingsland road, FOSTER drove in the enemy's pickets and entrenched himself. The locality is called by the Richmond papers Deep Bottom, from the depth of the river in this vicinity. On the Chesterfield side of the river, and six miles from FOSTER, is the enemy's battery at Howlett's. FOSTER is about ten miles from Richmond, and holds a strong position, flanked by gunboats. The Rebel rams are on the west side of Dutch Gap, almost within shelling distance of our men. From their covert, they sallied forth on Tuesday to make an ineffectual attack on our iron-clads, but of course speedily retreated. The batteries off Howlett's House took part in the encounter, but the whole affair, like all the naval engagements on the James hitherto, was, of necessity, very insignificant. The heavy Dahlgren guns of the Monitors soon silenced the enemy's batteries, and, in the evening, opened on the enemy in front of FOSTER. This latter force consisted, probably, of Richmond City regiments, afterwards reinforced somewhat from LONGSTREET'S corps, with cavalry support. It held a position near Chaffin's Farm. The day following, there was more cannonading, and some manœuvring of the enemy near FOSTER was noticeable. But he has continued to hold his position without molestation, and still threatens to some extent the southeasterly approaches to Richmond.

While this division marched to the north side, the Eighteenth corps, on the other hand, left their old camps near Bermuda Hundred, crossed the pontoon bridge, once more struck out for Petersburgh, and took the position vacated by the Sixth corps, now marching southerly. It will be seen, therefore, that not only was Tuesday a day of much marching, but the different corps of the Army were at one time considerably separated. On Tuesday night, however, the position of the various commands was as follows:—First, FOSTER'S division of the Tenth corps was north of the James at Deep Bottom. Next, the rest of the Tenth corps was with General BUTLER at Bermuda Hundred. Thirdly, the entrenchments east of Petersburgh were held by the Eighteenth corps on the right, the Ninth in the centre, and the Fifth, except GRIFFIN'S division, on the left. Finally, three or four miles south, were the Second and Sixth corps, with GRIFFIN of the Fifth, posted as already indicated. On this same day, Tuesday, PRESIDENT LINCOLN visited Generals GRANT and BUTLER.

WEDNESDAY'S DISASTER.

Early on Wednesday, the movement against the Weldon Railroad was resumed. It had resolved itself into an attempt to secure a severance of communications below Petersburgh, now that the capture of this city had been despaired of for many days to come. It was intended to take the enemy unawares if possible. But he was perfectly aware and ready long before our men arrived. It had been arranged, however, that WILSON'S and KAUTZ'S cavalry should make a détour to the south, and cut the railroad ten miles south of Petersburgh. This was handsomely accomplished on Wednesday morning, although the damage will undoubtedly be but temporary. Meantime, the Sixth corps, which had all come up during the night on the left of the Second, prepared to move directly against the railroad, in conjunction with the Second. The

march was conducted with something of that cool dash and *insouciance* which has characterized many movements in the campaign. The position of the Second corps before the start was directly on the left of the Jerusalem plank-road, with GIBBON resting his right on the left of the road, and GRIFFIN of the Fifth corps on the further side. GIBBON was found to be well up already to the enemy's works in this vicinity, and needed only to go into position and entrench; an advance further advance by him would bring on a general engagement before our line was properly established. An advance was therefore ordered for the left of the line, consisting of the Sixth corps, and BARLOW and MOTT of the Second. The advance was to have been made by daybreak. But, unaccountably, neither corps marched, both BIRNEY and WRIGHT seeming each to be waiting for the other to lead off. At length each corps got orders to advance at once, independently of the other, each being cautioned to protect his flank in case connection was not made by the other. The line had been deployed in quite open style, covering a broad extent of ground, and it was considered well to mass more closely in the difficult and intricate country and in the presence of the enemy. Accordingly, BARLOW on the left of the Second corps, pressed well in to the right, and threw MILES's brigade and another into reserve, while the remainder of his troops formed the advance line.

No sooner had he struck into the thick woods, than he began to open a gap between his left and the right of the Sixth corps, and accordingly disposed flanking regiments so as to protect himself at the break. MOTT, meanwhile, had moved directly to the position indicated for him, having difficulty in finding where it, and had begun to entrench. GIBBON was already in position. BARLOW having moved forward sufficiently, was about to entrench also, when he was suddenly startled by firing on his flank, quickly spreading towards his rear. The enemy, HILL's corps, advancing to check our movement on the railroad, was swiftly approaching in several solid columns. BARLOW ordered hard on a dense cloud of skirmishers. At this time, the Sixth corps was far distant on the left and rear, and a gap made in our advancing line, like that which occurred between the Fifth and Second corps in the Wilderness. With more success in the present case than before, the enemy took advantage of the error. One entire division, with MAHONE's brigade in advance, came driving through the interval. BARLOW's skirmishers were of course quickly overcome, and with a quick appreciation of his advantage, and an impetuous rush sweeping all before it, the enemy's column pierced diagonally between the two corps, struck BARLOW's flank with great force, and almost instantaneously rolled it up, capturing several hundred prisoners. The sudden recoil of BARLOW's division under this most dangerous of all attacks, a movement on the flank and rear, quickly uncovered the left flank of MOTT, and exposed him to the same disadvantage. In this turn, MOTT fell back also, with the loss of several hundred prisoners, and thus exposed the left of GIBBON. Meanwhile, the other troops from HILL's corps had joined the assault, and, having captured MOTT's entire line of entrenchments, now pressed GIBBON not only in front but in the rear. His right brigade was kept the comparatively trifling assault. But his left brigade were also soon encircled by fire. MCKNIGHT's four-gun battery of the Twelfth New York Artillery opened and was briskly and handsomely fought. But the troops in support were driven back, and the enemy had already carried GIBBON's entrenchments. In a word, in the sudden shock and confusion, several whole brigades were swept off and captured, without the chance of anything like stout resistance. MCKNIGHT's battery was then surrounded and captured entire, though most of the horses and caissons and some of the men succeeded in escaping to the rear. At this point, Capt. PATTEN, commanding the Twenty-sixth Massachusetts regiment, which was found incapable of breaking, executed a change of front with his small force, and by coolness, courage, and skill, and the admirable gallantry of his men, checked the triumphant and very dangerous advance of the enemy. It is only matter of regret that this distinguished regiment had been so sadly cut up by previous exploits, as to have only the remains of its former strength with which to withstand the enemy.

At length, the broken corps was rallied. MILES's reserve brigade of BARLOW's division was brought up. CLARK's New Jersey battery on the right of the Jerusalem road successfully resisted the heavily concentrated fire of the enemy. What was left of GIBBON's division was also rallied, and our men had now the beginning of a new line formed. But the enemy had already been exhausted somewhat by his own exertions, and had been also checked by the regiment before mentioned. An attempt at this time once more to break through GIBBON's front troops in GIBBON's former front, was handsomely repulsed. Towards evening General BIRNEY ordered GIBBON to attempt to retake the captured battery. A sharp fight followed, but the enemy was able to maintain himself. A little later, General MEADE, having now got his troops well in hand, and thinking that the whole force of the enemy was entirely unable to cope with our own, if the latter were only properly disposed, sent the Sixth and Second corps forward. The Sixth found but little resistance, and brought up its line to a position similar to that which would have been of advantage, if practicable, earlier in the day. The Second corps this time penetrated the woods by strong skirmishing lines, and, after considerable firing and persistent endeavor, regained a part of the ground from which they were driven in the morning. Here they went into entrenchments and passed the night in throwing up works and protecting the line with batteries. Field batteries, mostly, our front had been having passed only when close on the enemy. GRIFFIN's division of the Fifth corps, which had cooperated during the day, with some loss, came up and covered the right. At daylight, a reconnoissance and advance disclosed the fact that the enemy was strongly entrenched on the line of the railroad.

The affair seems to have been not only unfortunate, but in some respects unskilful. Our loss was about 2,000 prisoners, including between fifty and sixty officers; four guns; and some colors. Probably half this loss fell on GIBBON's division of BIRNEY's corps. In killed and wounded probably five hundred will cover the loss. Among the killed of the enemy were nearly the whole of PIERCE's brigade, which was one of the best in the Army. They had hardly a chance to fire a shot. The Sixth corps, which was on the left and rear, was also attacked on its left flank by a division of HILL's corps, and its advance line driven back in the morning, still further increasing the gap between the two Armies. Among the enemy here also made some prisoners, though how many is not stated. Probably the number was small. In the afternoon the corps entrenched, and, in the evening, advanced again, as already stated. RICKETT's division was on the right, nearest the Second corps, with RUSSELL and WHEATON (now commanding the division of General NEILL, lately ordered to report to General BUTLER) on the left.

After nightfall, the enemy, pausing for a while on our left, opened briskly on the troops in the centre, or on the east of Petersburgh. The attack was chiefly in front of the Sixth corps, and consisted of a very hot fire both of artillery and musketry, to which our own troops responded, new in volleyed musketry and now with batteries, a great part of the night. There had been picket firing during the day, but nothing so elaborate as at night. No advance was attempted on either side. The terrible heat of this day and of the succeeding days, was overly trying and fatal to our wounded, and not a little so to our men even when not engaged in fighting.

THURSDAY.

On Thursday, the 23d, there was a slight advance on the left, which proved that the enemy were strong, and would defend the Weldon Railroad. This latter, however, had been successfully cut by WILSON and KAUTZ, who had now swept across to perform the same operation on the Danville Road. But WRIGHT, swinging round on the extreme left, found that the enemy had not yet extended so far, and sent out a small reconnoitering force on the railroad. This reached it unopposed, cut the telegraph, and at once reported these facts. The Third, Fourth, and Eleventh Vermont regiments, comprising the Vermont brigade, were instantly dispatched to the railroad, to hold it. Hardly had they reached it, when ANDERSON's division came down on their flank in force and turned their position at once, repeating the manœuvre of Wednesday, and repulsing the brigade with severe loss. Several hundred prisoners were captured, and some loss suffered in killed and wounded. The whole affair was rather mortifying, and the loss of Thursday, as of Wednesday, was altogether out of proportion to that sustained by the enemy. The latter, flushed with success, pressed our men completely back to the main body, and then attacked right and left. Our line was withdrawn, towards evening, to the cover of breastworks, and operations ceased.

In BIRNEY'S front, little of importance occurred. Skirmishing there fired at each other all day and night, with the usual loss, including also a Colonel and a Lieutenant-Colonel. No formidable demonstrations took place. Soon after noon, the troops which massed subsequently against the Sixth, were observed to move down, and two batteries opened on them, as they passed. There was considerable firing also in BUTLER's front, and, on the north side, Foster's troops were attacked by artillery on Thursday afternoon, as well as on the previous night. But the enemy were speedily silenced, and no damage done at either point.

FRIDAY TO TUESDAY.

Friday opened with a cannonading of extraordinary fury for more than one hour, in front of the Eighteenth corps. At its close a charge was made by a brigade of HOKE's division on STANNARD's division of the Tenth corps. The attack fell chiefly upon Colonel HENRY's brigade. Colonel HENRY charging into the force opposed to him was quite small, and drew in his skirmishers. The enemy immediately ran over his rifle-pits. He then opened on them with the Fortieth Massachusetts, armed with the Spencer repeating rifle, and artillery in flank easily separated the skirmishing line from their reserve. About 150 prisoners fell into Colonel HENRY's hands, including five officers. The troops captured were from South Carolina. Our own loss was trifling.

Along the line, the noise of the cannonading spread rapidly, and was echoed by other batteries. But there were no important movements except in STANNARD's front.

On Friday evening, the enemy attacked SHERIDAN's cavalry while marching from the White House to regain the main Army. The affair was very bloody, and SHERIDAN's rear guard was badly handled. A brigade of infantry was sent to his relief. He succeeded in beating the enemy off at length, after the loss of four or five hundred men, and saved all his train. SHERIDAN's cavalry of late have not been fortunate, but his command is now ready for other important movements. His men were all ferried across the James at Powhatan.

On Saturday, the chief demonstration was against BURNSIDE's Ninth corps at night. A heavy artillery fire was opened, at the end of which, the enemy pushed a strong skirmish line up to our breastworks. They were easily repulsed. Similar demonstrations, of less importance, in BURNSIDE's front, have since been made. Sunday was an unusually quiet day, all along the line. And since the operations already recorded, there has been comparatively little of importance. The whole Army is suffering greatly from heat, which is almost intolerable. The dust also is choking and stifling, and a great need is experienced of rain. The long drouth is especially severe upon the wounded. Water is difficult to obtain. Through all these trials, however, and in spite of the recent disasters, and the general failure to push the enemy further, the spirit of the troops remains heroic and invincible. In it consists the promise of the future.

GENERAL SHERMAN'S OPERATIONS.

It is impossible to maintain any very connected narrative of General SHERMAN's operations, on account of the gap which necessarily intervenes between the hasty telegraphic reports of late movements and the details of previous operations arriving by mail. Thus, we have as our latest news this week the dispatches from General SHERMAN, published elsewhere, under date of June 27th, informing us of his repulse in an attack on the Rebel position at Kenesaw Mountain; but we must await further information before we can fully establish the relation between this attack and the previous successful operations, of which we have details down to the 20th of June. By the advance on the 19th of June, the enemy were forced back upon their fortified position, extending from Kenesaw Mountain on their right to Lost Mountain, six miles to the west. These two mountains are described as detached peaks, overlooking the plain be-

road, and connected by a ridge, or series of low hills. Kenesaw Mountain, the larger of the two, rises to an elevation of 1,839 feet above the sea-level, extending some 900 yards on its summit from northeast to southwest. It is situated two and one-half miles northwest of Marietta, and directly upon the line of the railroad, which here makes a bend to the East, to escape the mountain. Lost Mountain, whose isolated situation explains its name,—lies ten miles west southwest of Marietta, directly north of the railroad running from that place to Dallas.

At the close of our advance on the 15th, the Rebels held their position in front of our lines with their right, as we have said, on Kenesaw Mountain; the left on Lost Mountain, and the centre advanced to Pine Hill, three or four miles beyond their flanks to the north.

Since the battle of the 15th ult., in which HOOKER'S men were so severely engaged, says the intelligent correspondent of the Cincinnati *Gazette* on the 21st:—

"We have had no fighting, save skirmishing on the most extended scale. But our skirmishing is of a kind fatally destructive to human life; and when continued from day to day, as this is being continued, wastes the energies of an army as much as a pitched battle.

"The enemy seems to have marked out this whole country, from the Allatoona Mountains to the Chattahoochie, in line after line of hills, and at each one prepares for fortifications. No sooner do we take possession of one formidable line of works than another confronts us; and each one is to be carried by storm or by flanking.

"All day on the 16th we skirmished incessantly with the Rebels, exhibiting no disposition anywhere. On the 17th, we advanced everywhere, chasing the enemy from long lines of secondary works, and forcing him back on what is finally hoped were his last entrenchments this side of the Chattahoochie.

"Perhaps I should say we advanced everywhere except upon the centre of our line. That portion of it composed of parts of the Fourteenth (PALMER'S) and Sixteenth (DODGE'S) Corps were in a manner *stationary*, representing the hub of a wheel, the rest of the lines the circumference. Of course, the further any portion of the spokes were from the hub, the further and more rapidly they were obliged to move.

"On the 18th, our right, HOOKER and SCHOFIELD, gradually forced the enemy back till they had established themselves in such a position as seriously to threaten the enemy's left, while HOWARD and PALMER had come so close to his entrenchments, that the Rebels could not show their skirmishers at all, but fired at our pickets from behind their principal works. All day long the incessant rattle of musketry and the roar of artillery from the centre continued. We lost heavily, for in many places we were constructing opposing works under fire. Sometimes, by a ruse the enemy's sharpshooters; but from the excess left to the extreme right we had driven in the Rebel skirmishers, had full command and sway of them, and had captured several hundred prisoners."

Finding their position at Lost Mountain in danger of being enveloped, the Rebels seem to have thought it prudent to draw in their left flank, and concentrate in their position on Kenesaw Mountain, shortening and consolidating their lines. They accordingly fell back on the night of the 18th, "in the midst of darkness and storm," taking up their new position with the apex on Kenesaw Mountain, and their flanks drawn in, the right behind Noonday Creek, a small stream to the north of Marietta, and east of the railroad, and the left behind Moses or Noses Creek, which runs across the Marietta and Dallas road, and covers the forces in place. Their position, as it would seem, an attempt was made to dislodge the enemy, but without success, our troops being repulsed in an attack on the 17th ult. The loss in this affair is given by General SHERMAN at 2,500, but a statement purporting to come from his medical director places it at but 1,500. The position the Rebels then took in front of Marietta is undoubtedly a strong one—too strong we fear for assault. As soon as the roads are in a better condition for moving, General SHERMAN may be able to flank them from it, holding his position meanwhile on the railroad to the north of Marietta, to make sure of his communications.

OTHER OPERATIONS.

GENERAL HUNTER'S expedition against Lynchburgh has come to an end, our force having retired from that place on the 19th, after the reconnoissance, if it was a reconnoissance, on the 18th, which demonstrated that the place was a stronger one than General HUNTER cared to assail. The details we receive of the movement of our columns in retreat are so meagre that it is difficult to even surmise the line of retreat.

It appears, however, to have been westward, along the line of the Virginia and Tennessee Railroad, as we have a story that a party of Rebels attacked two of our batteries in a delile near Salem, some sixty miles west of Lynchburgh, drove off the men, cut the wheels and and took off one hundred and twenty horses. Seven cannon out of twelve were left behind, ruined, we are told, together with seven caissons and carriages burned by the explosion of the former. Six were killed and ten wounded of the Second Virginia cavalry. From the Rebel papers it would appear that considerable damage was done by General HUNTER in his retreat, destroying bridges from his command tearing up the railroad west of Lynchburgh, and burning the bridges of that road in the vicinity of Liberty and Salem. The fight which resulted in the retirement of our forces is described by the Lynchburgh *Republican* of the 20th, as occurring on the Salem turnpike, about two miles southwest of the city. From the details given, however, it does not appear to have been more than a reconnaissance, our loss being given by the Rebels themselves at but two hundred and fifty or three hundred, including twenty captured. The loss during the entire movement is stated at six hundred killed, wounded and missing, with one hundred prisoners, seven cannon and one hundred horses captured. Among the killed is Adjutant TOMKINSON, Twelfth Ohio, wounded, Colonel JOHN A. TURLEY, Ninety-first Ohio, and Lieutenant C. ROBEUTS, of the General's staff.

By a dispatch from Mr. STANTON it will be seen that our cavalry operations against the Danville Railroad are meeting with some success, General WILSON having destroyed a train of cars loaded with provisions and burned the depôt buildings, &c., at Burkesville, and destroyed some of the track. Burkesville is at the junction of the Richmond and Danville and Southside railroads, fifty-two miles west of Petersburgh.

General PALMER, the active commander of our forces in North Carolina, has broken the bridges of communication by movements by rapidly on his communications. On the morning of the 18th, the Rebel General WHARTON, commanding a brigade of 2,500 men, crossed the railroad between Kingston and Dalton, capturing and burning five freight trains laden with supplies. On the 20th, Captain GLOVEN made a raid on the railroad from Nine Mile Reaves, and captured two freight trains with supplies.

Lafayette, the capital of Macon Co., Tennessee, fifty-five miles northeast of Nashville, was attacked on the 25th of June by a force of Rebels under General PILLOW, estimated at 3,000. A demand for the surrender of the town was refused. As General PILLOW is reported to have left 100 dead and wounded on the field we presume the Rebels were repulsed, though we have no information to that effect.

MARCHING OF TROOPS IN LARGE BODIES.

No. I.

FIGHTING is the grand final object of the discipline and training of a soldier, but in order to have the opportunity to fight well, outside of a fortification, it is indispensably necessary to march well. When the deficiencies of the march are made up by excess of blood poured out in the combat, the fighting may be desperate, but is not good. Good marching is the only thing which can bring troops to the battle-field comparatively fresh; the only thing which can keep them within the line of attacking distance; and the only thing which will enable them when once arrived to commence attacking the enemy with the least possible delay.

Suppose, as so often happens, that infantry, while still in movement, come within good musket range of the enemy. It is of the utmost consequence to open fire immediately, and also that in doing so, every musket shall tell. Is there now a man for whom, from overcrowding, there is no room? —a number of bullets are lost from the fight. Is there a gap?—from that point no fire whatever can receive or give. By the Tactics all is so arranged that when marching by a flank, every man on fronting fits into his place, or when marching by companies or platoons, these divisions swing upon their guides into a space exactly their size; for in the latter case, as in a wall consisting of a long line of doors, although these doors may all be swung open, yet if their door-posts remain in place, the wall will be perfect when they are again closed; so when the sub-divisions of a column at full distance wheel in, the line will be perfect if the guides have kept their distances.* The importance of the preservation of distances when time is to be formed on the *battle-field* by these means, from either form of march, is thus too obvious to need further illustration; the glaring necessity of promptness and of bringing every musket into a correct line on such an occasion, wakes every one up to it. But it would seem, that on the *route march*, where, for two reasons, *first*, that such a march may at any time end at a battle-field; and *second*, that the loss of distances is a killing circumstance in all efforts to avoid extreme fatigue for nine-tenths of the men, it is almost as much a sine qua non for victory as on the battle-field; and the importance of this preservation of distances is little realized in our Army.

A battalion of 800 men would form a column of ten sub-divisions by companies, of twenty by platoons, and of *two hundred* sub-divisions when marching by a flank, after doubling the files. Let each sub-division be one foot more distance than it should; then, when the column is formed by company, the rear sub-division of the battalion will be nine feet behind its proper place; when the column is formed by platoon, it will be nineteen feet; when the column is formed by doubled files, it will be *one hundred and ninety-nine feet*, and this must be regained before the line can be again formed! If, in the same case, there be ten battalions, the rearmost sub-division of the last battalion would be *three* each battalion must add what errors it makes to the sum of these considerable gaps in front. Let each sub-division feet too far back in column by companies; one hundred and ninety-nine feet in column by platoons; and *nineteen hundred and ninety-nine* feet, or considerably more than one-third of a mile, in column by doubled files.

This is a serious matter in the presence of war, all other than flank-marches, such *in* the nature of the country, may as well be thrown out of consideration; it is but seldom a front of more than four men can be long maintained. As to the question whether wheeling into column by sections of four, and then marching by sub-divisions of two or more is preferred for cavalry dismounted, would not be an improvement on doubling the files and thus marching with sub-divisions of only one rank, we give the note below. We must, however, express a preference for doubling the files; and this on the ground that the distances by four as one can be allowed to the rear ranks, since, unless they keep closed up, the front rank of the succeeding fours has no stable point to march by, and, if they open out to forty-four inches, it is the same thing as doubled files. On the other hand, to supply the place of the rear ranks, the plan of the company "or platoon" column is used to insure one stable point, is obviously out of the question.†

We will now consider more fully the bad effects which arise from loss of distances, and the measures by which the evil is prevented. In the first place, when the files may be perfected; namely, by which distances may be kept, and the sum total of *general* fatigue for the column brought to a minimum.

The *first* essential of a march, which will produce the least general fatigue, is a *steady, regular, forward movement*, permeating the whole column. Nothing produces such wear and tear on body and mind as the continual Halt! Forward! Halt! Forward! which commonly characterizes the route marching of our armies. In fresh and active men the Halts demoralize, and the field artillery instructions urge special care to prevent the necessity "for frequent check-

* The comparison to a line of doors holds perfectly good when, as is still sometimes practiced in the English army, column is formed by a wheel backward into line, and then by a wheel to the front into column, the sub-divisions not what may be the relative fronts of the sub-divisions, for each regains its place in column exactly, which, on the contrary, in the case of a column in order to form all movements made to be formed, or changed, in front, are changed. In opposite cases, each sub-division swings into the space vacated by its neighbor; then the whole column may be by the same movement moved back by the rear rank; in then more or less takes his neighbor's place, unless by leaving intervals the distance of the two wings is allowed. Intervals for this the changing of one of his own shoulders into the place vacated by the other. This holds good in the case of a column of fours, whether files be doubled or not, and the varying breadth of men's shoulders will not affect the matter, although if the files be not doubled or the ranks be very loose.

† The Duke of WELLINGTON in Portugal, where the roads were, at that time, very much what ours now are, ordered his men to wheel into column by sections of four, and this, although the regiments of the British Army were all known in the British army; indeed, to this day the Duke of WELLINGTON is spoken of with the British as he was at one time the regimental movement, it was abandoned "as soon as the circumstances of active campaigning made it more convenient" and as being, from the determinature of ranks, precarious and dangerous for the rear rank men. Cavalry, however, were always wheeled into and deployed into column by sections of four. The British commander seems to have considered that in the case of cavalry the danger to the rear rank men was less than to the front rank men, and the field artillery instructions for subsequent order. The following is the order:

"HORSE GUARDS, 15th March, 1811.

"The commander of the forces requests that the officers of dragoon regiments will practice their regiments when they wheel off in threes into column by sections of four. This will be found useful on occasions when the column is to be formed directly to the front, or when the column is to be formed by threes and each stand in column of three one in front of the other, the number as the greater number of three one in front of the other, the number as the greater *proportion of the regiment, perhaps still oldest.* This front can easily be increased or diminished, as circumstances may render expedient.

"The commanders of the forces refers the officers particularly to his orders respecting the march of companies or smaller divisions through narrow or any difficulty; *the subsequent march with* such *considerations if they are obliged or allowed to close up* to wheel the companies may occasion by running.

"The same instructions are given to the cavalry."

SIR GEORGE'S Theory of Infantry Movements.

The Regulations for Cavalry, and for the Russian cavalry when by threes instead of fours, which last is the common movement for the American, French and United States cavalry.

ing and urging the horse." Next in its disastrous consequences as to fatigue comes the double quick, *in order to regain* distances. This latter would not be so bad, were it not that distances are almost always lost from the rear, sub-divisions having been impeded by the imperfect marching of those in front; but, as at a halt caused by irregularities in the marching of the various files, no man knows how long he may rest, whether one minute or one hour; so at double quick, when it is to make up distances lost for the same reason, no one knows how long it will continue, or how much it may be required. Every time a very long column by doubled files is started by a successful movement of its parts, there is a disjointing twitch throughout its sub-divisions similar to that which takes place between the successive cars of a train of railroad cars moved by an unskilful engine-driver; and, as when checked, the cars run one on the other, so the files come on each others' heels when they are met by the uncertain wave of stoppage, which ever and anon causes rolling from the front. Perhaps we cannot find a better illustration of the strength-consuming method of marching prevalent in our armies, every private looking out for his own ease, and the file-closers indulging their own wearied hostility by passing over little liberties taken in the ranks, and only arousing themselves when flagrant disorder occurs, than is given by such a train of cars. Suppose one such, half a mile long, and that the engine driver instead of (as the preliminary) stretching the couplings throughout, *pulls* off at full speed from the first revolution.* How many a time can we recall the memory of others caught up in such a similar way; what a strain on the coupling of cars when so started, but they are of iron, and perhaps they all stand it; our distances are of air, and the will and attention which might keep them are very likely weakened by miles of difficult road already passed over; "double quick" for the rear must restore them.

So much for the too usual way of moving off the heads of the longest columns; but, once under way, do they move evenly and regularly throughout? It may seem ridiculous to mention one of the first causes of irregularity of course, but it is nevertheless striking. Almost every man among American troops must *spit* not long after his first step. This he might, with a little care, do in such a manner that the movement of the column were none the worse for it, but never having been trained to turn or move the head without affecting the body, he lowers the head and shortens his step in doing so, if indeed, he do not actually stop for an instant; then hunches up his knapsack and moves on. Forty-four inches (counting in their own depth from breast to knapsack) is the last standard of the space of a man's file, but he and probably all of them have now taken fifty, and so soon as this has occurred throughout an infantry column of 10 battalions of 800 men each, the rear has at once nine hundred and ninety-five feet, not far from one-fifth of a mile, to make up by double quick. "It may be said" the files can close up at the next halt;" this might answer were it not that the cause of losing distance just mentioned is one of the slightest which occur. Let a column march on for an hour, each man taking his little self-indulgences and having all lost distances to be made up at the hourly halt, where does any officer who has marched with our volunteers suppose his men would be? how far would ten minutes' halt go toward restoring order? and how long would the rear have for rest? The fact is, these losses are in some measure made up on good roads, and by steady and fatiguing temporary accelerations of pace, and even then but little of the ten minutes' rest belongs to the rear of the column.

There is but one remedy for all this, a remedy which may seem harsh, and which makes the march a *business*, a work, a continued exertion of attention on the part of the men, and above all, on the part of the file-closers; but which, nevertheless, produces a steady, even movement of the files, so that when the column halts it *rests*, and when it makes double-quick, ground is actually gained, not made up.

In another article we will endeavor to give some particulars in regard to the remedy.

NEW PUBLICATIONS.

CAMP AND OUTPOST DUTY FOR INFANTRY. By Major-General Daniel Butterfield. New York: Harper & Brothers. The high recommendation of this treatise from Generals McClellan, Kearney, and Hooker, and from Prof. Mahan, which are published in the preface to the volume, will dispense with the necessity of any comment from us. It has already been of great practical use to the Army.

FIELD TACTICS FOR INFANTRY. By Brigadier-General Wm. H. Morris. New York: D. Van Nostrand. We have here a neat collection of Battalion Movements and Brigade Evolutions, designed to promote simplicity and celerity, with the least fatigue to the men. It supposes some knowledge of Light Infantry Tactics in the reader, omitting some of the details found in Hardee and Casey. One of the most valuable parts of the little book is its explanations of certain general tactical rules for company and battalion commanders.

THE WOMAN IN BLACK. By the author of "The Man in Gray." Philadelphia: T. B. Peterson & Brothers. After the success of Wilkie Collins' "Woman in White," it was of course a necessity that some female in contrary attire should appear as quickly as possible to glean from such part of the public curiosity as had been excited, and yet not satisfied, by the former sensational personage. After Uncle Tom's Cabin, of course we had to expect Aunt Chloe's Cabin, and then Uncle Tom's Log House, and then Aunt Chloe's Log House, &c., &c. It being, therefore, a necessity to have a Woman in Black, we can conceive of no more appropriate one than the author (or the author-ess or authoress) of the "Man in Gray." People of other colors will probably be forthcoming in due season.

The same house furnishes one more novel from the prolific Mrs. Emma D. E. N. Southworth, entitled "The "Bridal Eve."

THE STEAM ENGINE INDICATOR. By Paul Stillman. New York: D. Van Nostrand. The object of this book is to explain the use and the advantages of the Steam Indicator, and also of an Improved Manometer, the latter of which has been recently patented by the author.

CORRESPONDENCE.

THE MONITOR AND THE 15-INCH GUN.

To the Editor of the Army and Navy Journal:

SIR:—In these days of progress in everything relating to the material of war, it is not surprising to be astounded by results of special successes, made absolute in their application by interested parties or by the habit, so common to our people, of generalizing and jumping to conclusions. This is especially true in regard to guns and the appliances for working and carrying them. The "heavy batteries" of the American Navy lunched upon the Rebels in the early history of the country, and it has always been the policy of the Government to keep the Navy in naval armament. Up to the year 1858 it had no competitors. Our new frigates of the *Merrimac* and *Minnesota* class, with their tremendous batteries of 10-inch guns, the *Niagara* and *Merrey* and others of her pattern, and England, by at once increasing the caliber of her guns, showed she was determined to equalize the advantages—the Navy Department, in the assessment of the present war, we could not laugh as we once did at the English pop-guns.

Suddenly, by the application of Roman's invention, we developed a gun of such enormous proportions that we were unable to realize them. The Rebels got hold of one of the Monitors so completely revolutionized our own and the navies of the world, we never thought of the 15-inch gun being mounted except in the *Passaic* class on board of a ship. The Monitors solved the problem, and placed us again for in advance of the rest of the world in the capacity of our ordnance. The 15-inch gun placed in the *Passaic* and it appeared as if nature had ordered the combination, so fitting and appropriate was the gun to the vessel and the vessel to the gun. It was found that the monster could be trained with an ease and precision, hitherto unattainable even with ordinance of much smaller caliber, and we congratulated ourselves on the climax we had reached both in weight of gun and facility of pointing. The failure to capture Charleston led us to seek a victim among the elements employed in the attack; the Monitors and the 15-inch guns now suffered the extreme of condemnation, as they had before received the extreme of praise. The attack on Charleston was not decisive of the merits either of the Monitor or the 15-inch gun. We expect a series of fortifications like those around Charleston to fall before the unsupported attack of a few Monitors was simply absurd. And yet the Monitors and the 15-inch guns sustained for a little injury, and those lately built would have passed through the fire unscathed. An attack on Charleston by vessel of the *Tecumseh* class, with heavy iron-clad plating and their two 15-inch guns, mounted in turrets whose ports admit of high elevation, would, if properly supported by ironclads and gun-boats, have given a different result from that which followed the short demonstration of the 7th of April last before the Charleston forts. The *Canonicus* and *Genesdops*, now lying in the James River, show so many improvements over the original Monitors that a comparison between them can hardly be made. With the exception of the *Onondaga*, they have a speed of nearly nine knots in smooth water, and with their sharp stems and great strength forward, they can plow through a heavy sea with a midship vessels about. With their 15-inch guns throwing a solid shot of nearly 500 lbs., with its powder, which the Navy will be soon, an iron-clad will not stand long before them. The *Atlanta* was captured after one or two volleys from the 15-inch guns of the *Passaic*, and it will require but one or two such blows to destroy any other ironclad now afloat. It is doubtful whether the turrets of these same vessels would withstand the plating now used to stand such crushing blows. The English guns with their increased charges and lighter projectiles cannot penetrate the heaviest armor, although more penetration is all they can claim. It is now a fully established fact in action between iron-clads that the crushing effect of a 15-inch solid shot is infinitely superior to the rifled projectile with its high velocity. The rifled ball at best only makes a hole in the plating, and in the case mentioned above, the heaviest armor, but the 15-inch solid shot will at once crush in the side of the vessel, plates, timbers and all. As an element of warfare at close quarters it can hardly be over appreciated. The principal objection to the 15-inch gun of the Navy pattern is that the ranges are short. This, even if true, is not an absolute but only a comparative objection. Every one who has seen firing with rifled guns at long range knows how exceedingly inaccurate is the fire and how little dependence can be placed in the aim. A range of four miles is claimed for the Parrott 100-pounder, but at this distance an enemy may lie all day without fear of injury. With the 15-inch gun at 2 deg. elevation a range of 5,720 yards has been obtained, and at 10 deg. a range of 12,000 yards, and at either of these it is as easy to point the gun on account of deficiency of range. It requires attention, and in the *Worhawken* class of Monitors the port admitted of but little.

Now, in the *Tecumseh* class the elevation is considerable, and vessels can easily be built of this class to admit of greater. The practice made by these guns, and mentioned, sog the limited operations of the Monitors in the James River, and the experience of the Navy Department, all show there is but one opinion now on the kind of ordnance best adapted for the turreted iron-clads. The target practice spoken of has been at an extreme range. The Rebel ram by the Rebels on a high bluff commanding Trent's Reach, and the entire encampment of the fleet, and the wooden vessels with Parrott rifles and 9-inch shell guns spent an afternoon in vain attempt to stop its progress. The Rebels paid but little attention to the fleet and worked away like beavers in the face of our guns, although many of the shells lodged in the works and the practice was very good. On the next day the monitor *Sonpee* opened fire from the 15-inch. Everything was favorable for target practice, the water perfectly smooth and the vessels almost motionless. The result was as a distance of 2,000 yards, and a solid shot of 440 lbs. The Rebel ram would not come believed would carry the distance, and the fire was opened with precipitancy as an experiment. The guns were pointed with the utmost deliberation, and the first shot was fired exploded away beyond the entrenchments. A few shots proved the elevation required to be about 8 deg., and with this and a 7 sec. fuse, three out of every four burst in the works. The Rebels were compelled to evacuate them. The success of the gun was complete. The drift of the 15-inch smooth bore is nothing, and perfect dependence can be placed on the shot and shell going where it is pointed. This is not the case with the 100-pounder Parrott and 9-inch guns. The bursting of a 15-inch shell with its 350 lbs. of metal is too much even for Rebel desperation. No men can work a battery against which they are fired. The fact that the Rebels stood to their guns at Fort Wagner, but the firing then was at disadvantage which we do not labor, under in the operations of the James River squadron and the Monitors. There were but few 15-inch guns brought to bear on Fort Wagner, only three or four being then mounted in the entire fleet.

In ricochet firing, so valuable in throwing shells behind the parapets of fortifications and in the sea-coast forts, we depended upon in every instance. On the water, its result is equally good, and the ranges thereby increased for equal charges. The experiments made in this matter with the 15-inch gun with irresistible effect against armed boats or repaired troops, and it will require but few Monitors to sweep the Rebels from the banks of the James River. With the loading on the improved Monitors each gun can be fired once in five minutes with ease, and aimed at any point on the whole circle. The 15-inch gun is the most powerful and the most manageable. The turret can be turned entirely around in less than one minute, and the guns can be fired when required in the circle. The 15-inch or even a larger gun is the one properly adapted to the turreted iron-clads. The rifled projectile is useless in fact, and the modern system of arming a large number of guns, but the Navy Department has acted wisely in giving fifteen-inch guns to the Monitors. As regards the number of guns to be placed in the Monitors, we find the ventilation better in all parts of the vessel than on the wooden steamers. With the bettle hatches and decks protected by a bandage of iron, and the ventilation, which these can always be kept off in harbor unless in expectation of attack, and the fact that in heavy seas the hatches, the boiler plates and hatches on, as is necessarily the case at sea or in action, no one can deny that the Monitors are exceedingly healthy compared with other vessels. Under some conditions are of short duration, and the term of service in this class of vessels is limited. The Department has adopted the judicious principle of relieving promptly both men and officers. To sum up, the Monitors are sufficiently comfortable for all practicable purposes, except at sea, where they can only remain a few consecutive many days, and they have well proven their efficiency wherever properly tested in action. If a number were constructed for service on Fort Darling this summer, the Rebels will find in these vessels something different, both in attack and defence, from the wooden vessels heretofore sent to the front with the 11-inch guns, and the useless *Galena* with her 10-inch guns.

MONITOR

HOW TO RECRUIT OUR ARMY.

To the Editor of the Army and Navy Journal:

SIR:—Permit me to offer a few suggestions under this heading, in view of the necessity of the most immediate evils that a regimental commander has to contend with.

A colonel starts from the place of rendezvous with his regiment and is assigned to some brigade. He and it are assigned to some brigade for duty. Almost the first order he receives commences with, "You will please detail," this it and that officer from the ranks of your regiment as a whole. He is called on for details for everything; quartermaster, commissaries, hospitals, provost guards, clerks and orderlies. Every carpenter or blacksmith, clerk or accountant is soon found out, and is as soon ordered to report somewhere,—it makes but little difference to the regiment where he has gone from them. I fully believe that 10 per cent. of all the forces of the United States are disposed of in this way. I know that the per centage is larger in some cases.

Now, may we not stop this evil. Order all of these men back to their regiments, fill their places with civilians or men recruited for such purposes, who may not be fit especially to go into the field, or who do not care to go where

the bullets are too thick? Do this and you have added to the effective force of the Army more men than months of bank recruiting could do.

I do not refer, of course, to temporary details for an emergency, or to details in the regular line of duty and which are strictly military, but to other work that does not belong to the soldier, and for which he should not be used.

How much too would be gained on the other hand, if each of these men had appointments had their own men, and were not obliged to change every time a regiment moved from one Department to another. Surgeons and corps of nurses, for instance, were recruited; say, from men who were a little too old to go into the field, but who would gladly do service there for two years or more, and who, like her hour of need; men who have families, who know something of sickness, and how to take care of a sick man. What a blessing this would be to our sick and wounded in hospital, who are now nursed in by far the larger number of cases by men who are not thoroughly skilled in their duties, and who would prefer to be in the field.

Amongst officers the evil is hardly less. Details for staff are limited to a very small proportion of the number of officers, but *succeed* by sheer love of display and a desire to surround themselves with a large and brilliant cortege, selecting for that purpose the most efficient officers from the several regiments. Court-martial too use up a large number, and in many cases with but little good result; unfamiliar with the last particular branch of duty, officers are usually selected that render invalid their proceedings, and the criminal escapes, much to the disgust of the service and the injury of discipline. Why could not a permanent court be established at each corps or division headquarters, organized from those officers who have distinguished themselves in service are no longer fit for the field, but who would be glad of employment by the Government instead of a pension. They would soon learn by their daily practice the legal points to be correctly made out, and criminals would be sure of their punishment.

I offer these suggestions through your columns, where they will meet the eyes of those who have the power to remedy these great evils. J.

NEGRO TROOPS.

To the Editor of the Army and Navy Journal:

SIR:—The writer of this article has never been connected with negro troops, and therefore has no special interest in refuting the statements made in the New York *World*, of June 6th; but those statements, if allowed to remain uncontradicted, would give to the public an erroneous impression in regard to the services rendered by negro troops during this war, that some notice of them may not be deemed inappropriate.

Although it is probably true that they are not as "brave" as white troops, it is not true that they proved cowardly in the war, nor if true, does it sustain the conclusion that "the army of negroes has been one of the many hideous blunders of this war." It is not true that they are not, as yet, in their capacities in the field. By keeping them for garrison duty, as I admit, has generally been done, we are declining to submit them to the test. But, we have not always done so. They took part, amongst others, in the engagements at Port Hudson, Milliken's Bend, Poison Spring and Olustee. The result of the assaults on Port Hudson is well known. Upon an examination of the ground, after the surrender of the fort, it was found that the whole front of the works attacked by the colored troops was impregnable. It was the strongest part of the enemy's entire line running from the river—the artillery commanding the whole plane beneath. White troops gave way before weaker parts of the works.

At Morris Island, they, as well as the white troops, were led up in the face of Battery Wagner, and, like the white troops, were compelled to fall back.

At Milliken's Bend, fought, I believe, principally by colored troops, the result has been the same as in much the safer of frequent remark; and at the unfortunate battle of Olustee, I have not heard of their having been more panicstruck than the white troops, or other troops engaged during the Red River campaign they did not take part in any action. Therefore, I say, their capacities have never been fairly tested.

But, granting that they are not as good as white troops, does that prove that they are not worth a trial? If so, the employment of colored troops, if it does nothing else, places more white troops at our disposal. Garrison duty must be performed, and if colored troops are not to do it, do the white must. But the colored troops are made use of freely for this purpose, and, with the exception of Fort Pillow here it, I believe, with no more than the want of white troops has been felt.

Negroes have been used to great advantage in vessels of war, and naval officers seem willing to give them the credit, which is their due. They have supplied the place of white troops in numerous instances, and they did much of the work on the now celebrated Red River dam. They have been used as guards for trains, as in the Red River campaign. In fact they have served in all conditions, and accomplishing every sort of work, which though not possessing so much of the danger and glory, is just as necessary and bears as important a part in the suppression of the rebellion as the actual fighting.

The statement of the correspondent of a New England paper, quoted in the *World*, in regard to their physical qualifications, will not, I think, bear the test of examination. I have seen much admired and much abused troops at Port Hudson after the surrender of that place, having partly to the suffering they had undergone, and partly to their own neglect of themselves, but principally to the change of diet. Sickness from such a cause was an infallible result, but not one without a remedy, as, I think, experience has since shown. Perhaps the best test as to their physical qualifications, will be found at Fort Jackson and Fort St. Philip, Louisiana, garrisoned both by white and black troops, the sick reports of the white troops being proportionately about four times greater. The statement in relation to the correspondent of the Springfield *Republican* correct, it would only prove that the troops, to which he refers, did not receive proper attention, because there can be no reason why negroes should not enjoy as good health, with a less amount of work and the resources of the country at the command of the Commissary Department, as they did when employed much more laboriously upon plantations and in the same climate.

As to the great expense of keeping colored troops, what are the facts? In the first place, they receive no bounties, whereas no sum seems to be too great to secure the enlistment of a white man. They receive less pay than the white soldier, and, out of that pay a certain sum is assigned for clothing. The Pay Department keeps the whole of their pay goes for clothing. Without data it cannot be said whether "the loss by wear and tear such as the expense of keeping up the proper appearance on review, of camp and garrison equipage and all kinds of military stores and property," is greater with colored troops or not. I have seen more colored regiment whose arms and equipments and uniforms would have done credit to any regiment in the service.

Discipline among them can be made excellent. Perfectly docile, anxious to do their duty well, they only require officers who understand their characters to encourage their aspirations. I have seen colored troops march and perform the manual of arms with the greatest precision, and I have seen them march and perform picket duty better and with such evident pride in their knowledge, than man who be not long ago were picking cotton on Louisiana plantations.

Why should we refuse to this race, fighting by our own side and for our own interests, the privilege of knowing that they are assisting in the great work and not without the thanks of the country? Surely, when they are daily offering up their lives, we need not be the ranks of their detractors. The Rebellion, once crushed, there will be honor enough for us all. We can spare them a little.

J. E. D.

SPEECH OF MAJOR-GENERAL McCLELLAN.

MAJOR-GENERAL MCCLELLAN was serenaded during the evening of June 26th at Elkton, William Henry Hotel, Lake George, and made his appearance on the balcony amid cheers. Order having been restored, he was introduced to the large assemblage by Judge Brown, and spoke as follows:—

I thank you, my friends, for this welcome and pleasing evidence of your regard. It is a most happy termination of the delightful week I have passed in the midst of this beautiful region among warm and friendly hearts. When men come as you have done, some many miles, from the mountains and valleys, it means something more than the ordinary courtesy. At all events, I so regard it, and understand the sudden gathering of men, who live in truth the mountains and valleys, as intended to show your love and gratitude to the gallant men who have so long fought under my command, and as evidence to any one who may doubt, whether abroad, at home or in the rebellious States, that the people of this portion of the country intend to support to the last the Union of our great nation, the source of its constitution and laws against whoever may attack them. I do not flatter myself that this kind demonstration is a personal compliment to me, but that it means far more than that. You add to the cogent arguments afforded by the deeds of your sons and brothers in the field the unanswerable weight of your opinion in favor of the justice and vital importance of the real cause for which we are fighting, and the cause which should never be perverted or lost sight of. The memorable seven days of battle that commenced just two years ago to-day. It is only just that I should thank you now for the valor and patriotism of your sons and brothers, who were with me in the Army of the Potomac, from Yorktown to Antietam. I can also assure you that they have been and patriotic; for they first saw the light amid scenes classical in our earliest history, and sprung from ancestors who won and held their mountain homes by deeds of combate against the Indians, the French and the English, after a gallant defence of the now ruined ramparts of William Henry. The blood of many of your progenitors moistened the very ground on which you now stand in a battery permitted by the cruel apathy of Montcalm, when, after a heroic defence, suffered for his treason in the great battle under the walls of Quebec, where others of your ancestors bore a most honorable part. Between Lake George, Saratoga, are all names made sacred to you by the bravery of your fathers, who there made illustrious the name of American troops. In this spirit of the revolutionary war you and yours have proved worthy of the reputation of your predecessors. And whatever sacrifice may yet be necessary I am confident that you will never consent willingly to be citizens of a divided and degraded nation; but that you will so support the actions of the general government in the field that we shall be victorious and again have peace and a reunited country; when the hearts of the North and South shall again beat in unison as they did during the glorious old times of the Revolution; when our Union and Constitution shall be as firm as the mountains which encircle this lovely lake, and the future of the Republic shall be as serene and pure as the waters of Horicon when no breeze ripples its surface."

AN AFRICAN BATTLE.—The King of Dahomey, not to be outdone by paler and more civilized monarchs, has been indulging in a war. His enemy was a neighboring tribe indulging in a war. His enemy was a neighboring tribe which the latter thought proper to defeat he expected to enrich himself with human booty, to supply his slave markets and the Royal purse. But his strategy has failed him; he has been utterly routed; his attendants captured, his wives torn from him, and his stores seized by the victorious Egbas.

On Monday, the 10th of March, the Dahomian army, with the king at its head, encamped at Owiwi, which is about 12 miles from Abbeokuta. Before 6 o'clock on Tuesday morning, the frequent reports of a gun fired at Ake, one of the five gates of Abbeokuta, gave warning to the Egbas that the Dahomians were in sight. The Abaseboun, or principal chief, had made every preparation for the defence of the town. The Dahomians approached big enough. They had seven brass field six-pounder pieces bearing the inscription on the breech of "Mexico, 1815." They advanced in a column of 3,000 strong to within fifty yards of the wall of Abbeokuta, then suddenly deploying their flags, extended their lines, and marched rapidly towards the wall. The Egbas immediately opened a tremendous fire on the carried lines, and arrested them at once. In the advancing column were Amazons, who fought desperately desperately. Many of these heroines climbed the wall, which is more than fifteen feet high; but, as soon as they had reached the top, the Egbas threw them over on the other side. One Amazon had cut off her hands cut off in her efforts to clamber over the wall, discharged her musket with the other hand and shot an Egba. She secured one of the guns, and, with it, made a backward into the trench. The Dahomians were utterly defeated. Let the Egbas be ever so much exhausted such a defeat could even in 1851. They lost upwards of 1000 in killed and the number of prisoners is said to exceed 2000. The whole strength of the Egbas is said to have been 10,000 men and women. The Dahomians fled in two divisions. In front of the division which took first to flight was the doughty King himself. The Egbas pursued both divisions and slaughtered the fugitives without mercy and without pause. Seeing the discomfiture of the King, the inhabitants of the neighboring crooms turned out and joined heartily in the general massacre. Out of his three field pieces the King had the misfortune to lose two in the good humor of the Egbas. The wall of Abbeokuta is 15 miles in circumference, and the population is scarcely less than 200,000 souls.

THE MILITARY AND NAVAL ACADEMIES.

THE MILITARY ACADEMY.

BELOW is a list of the cadets who graduated at the West Point Military Academy at the close of the recent examination. Out of the twenty-seven members (arranged according to merit) the first fifteen were assigned to the Engineer Corps, and ordered to the field :—

1. Garrett J. Lydecker, New York.
2. Arthur H. Richardson, Massachusetts.
3. Amos Stickney, New York.
4. James W. Clary, Georgia.
5. Alexander Mackenzie, Illinois.
6. Oswald H. Ernst, Ohio.
7. David P. Heap, Pennsylvania.
8. William Ludlow, New Jersey.
9. Charles B. Phillips, Massachusetts.
10. William H. Sage, Illinois.
11. John T. Cantwell, New York.
12. Andrew Pierce, Massachusetts.
13. C. Dundas Watterson, Pennsylvania.
14. Vanderbilt Allen, New York.
15. Charles J. Allen, New York's
16. Cullen Bryant, Illinois.
17. Martin L. Poland, Vermont.
18. Alexander S. Cleaves, Maine.
19. E. Van Arsdale Andrews, New Jersey.
20. William Ward, Pennsylvania.
21. John Elliott, Pennsylvania.
22. Henry W. Merriam, New York.
23. Isaac M. Macomb, New York.
24. Benjamin C. Howell, Kentucky.
25. William H. Bell, New York.
26. Edward D. Wheeler, Ohio.
27. Samuel H. Ramsey, Utah.

THE NAVAL ACADEMY.

THE examination just concluded at the Naval Academy at Newport was very thorough, and the number found deficient and permitted to resign, or be subject to be dropped from the list of Midshipmen in the Naval service was twenty-nine. We give below the names of the five most distinguished, and the total number in each class:

FIRST CLASS—5 MEMBERS.

1. Albert G. Caldwell, Indiana.
2. Caspar F. Goodrell, Connecticut.
3. Samuel H. Baldwin, Arkansas.
4. Bowman H. McCalla, New Jersey.
5. Thomas H. Stevens, California.

SECOND CLASS—54 MEMBERS.

1. George A. Converse, Ohio.
2. Fremont M. Hendrix, Missouri.
3. Francis M. Bunce, Florida.
4. Royal B. Bradford, Maine.
5. Bernard Kossuth Stewart, Missouri.

SECOND DIVISION SECOND CLASS—35 MEMBERS.

1. Albert L. Kimberly, Wisconsin.
2. Richard M. Gatta, District Columbia.
3. Edward Simpson, New Jersey.
4. William T. Russell, Massachusetts.
5. Winchester Marcy, Maryland.

THIRD CLASS—55 MEMBERS.

1. William M. Little New York.
2. Franklin Leonard, New York.
3. Maunsell B. Field, New York.
4. John H. Pell, New York.
5. James R. Adams, New York.

SECOND DIVISION THIRD CLASS—18 MEMBERS.

1. Edward W. Sturdy, Maine.
2. George H. Cooper, New Jersey.
3. Walter Goodwin, Maine.
4. Harry Knox, Alabama.
5. Fernando P. Gilmore, Ohio.

FOURTH CLASS—102 MEMBERS.

1. Albert R. Coudon, Utah Territory.
2. William M. Peel, Massachusetts.
3. Charles P. Plaw, District Columbia.
4. William H. Jaques, New Jersey.
5. Lewis R. Stirling, Ohio.

The Practice Ships were unable to sail until Tuesday morning last, and then went out in regular order, the *Macedonian* in advance, the *Dale*, *Cumberland*, *Constitution* following. They will cruise in the Atlantic Ocean to the northward of the capes of Delaware, making Gardner's Bay, L. I., the rendezvous, until the 30th of September, when they will return to Newport.

COLONEL GUY V. HENRY.

COLONEL GUY V. HENRY, 40th Mass. Vols., and First Lieutenant First U. S. Artillery, recently in command of a light brigade of regulars in the Department of Virginia, has been transferred to the Army of the Potomac, and now commands the 3d brigade, 1st division, 18th corps.

FOREIGN MILITARY AND NAVAL MATTERS.

LUMLEY'S patent rudder, which is said to possess a remarkable power of reducing the time and space occupied in turning a ship, is gradually being introduced into the British Navy, and much more rapidly into the merchant service.

IN a paper recently read before the Royal United Service Institution, Major BEIL suggested improvements in nearly every part of the British soldiers' equipment the paper being divided into three portions of the accoutrements he would substitute for those at present in use, the objections to which were forcibly pointed out. The dress proposed was a flannel shirt with a loosely-fitting collar, a short tunic, and knickerbockers, with short boots fastened with straps in front. It was proposed to substitute a waterproof belt to hold the cartridges instead of the powder pouch, the knapsack to be flexible and differently shaped, and each soldier to be provided with a sheet of waterproof instead of a blanket.

CAPTAIN F. J. BOLTON, 12th Regiment, F.R.G.S., and Commander COLOMB, R.N., are engaged, under directions from the Government at Hamburg, in carrying out a series of experiments on the south coasts of England, with a view to perfect a system of telegraphy for naval and military purposes, which shall be one system for the use of the Army and Navy in the line of the several and different systems now in use. St. Catherine's Down, on the south side of the Isle of Wight, is the present scene of operations, and where temporary stations are being erected from which signals by day and by night will be sent across the channel, a Government steamer affording the nearest means of communication.

THE *Memorial Diplomatique* says that complete organization of foreign troops in the service of Mexico will form a force of the following force of men, comprising as follows:—8,000 French, 6,000 Austrians, and 2,000 Belgians. The corps will assume the title of "The Foreign Legion," and the command of the whole will be a French general, having the grade of a lieutenant-general. He will receive his orders direct from the Emperor of MEXICO, and will only have to refer to the Ministry of War upon administrative affairs. The Foreign Legion will be divided into several regiments, which will bear the titles of "Emperor MAXIMILIAN," and "Empress CHARLOTTE." The last will be reserved to the regiment of Belgian soldiers.

BREECH-LOADING rifles are the subject of a late paper read before the Royal United Service Institution. The author, Lieutenant WALKER, urged the superiority of breech-loaders over ordinary rifles, referring to the experience of the Prussians in this remark to show how much more destructive the Prussian needle-gun had been in practice than the gun with which it is known as a rival. He stated that a soldier expert in the use of a breech-loading rifle can load and fire five or six times in a minute, and in close fighting this is an enormous advantage, giving the soldiers so armed more than twofold superiority over those armed with common rifles. One of the great advantages was stated to be, that the soldier was by no so much exposed to fire in loading their guns held horizontally as when standing up ramming down the cartridge; and the further important advantage is gained in that mode of loading, that a line of men five or six deep can be firing at the same time, the first rank lying down, the second kneeling, the third standing, and two or three standing, their bayonets being fixed during the firing. Lieutenant WALKER expressed satisfaction that the British Government had determined to try the arm experimentally, and had issued 2,000 breech-loading rifles for the purpose. On the table were exhibited various specimens of breech-loading rifles, the action of which was explained by General BOLLEAU, including a Prussian needle-gun; also rifle by experimentalists by the Government made by Mr. WESTLEY RICHARDS, of Birmingham, and a rifle made on the plan invented by Mr. GREEN, which formed a general portion of the Army. Lieutenant WALKER advocated the explosion of the charge by means of percussion applied directly to the cartridge, as in the Prussian needle-gun, in which, on pulling the trigger, a point penetrates the cartridge and explodes the powder without requiring the fixing on of any cap. He alluded to further advantages which may be anticipated in the use of breech-loaders, from the application of gun cotton as a substitute for gunpowder, as there is no fouling of the gun, nor any recoil with gun-cotton.

INVENTOR OF THE PRUSSIAN NEEDLE GUN.

THE following is the substance of an account given by the *Neue-Preussische-Zeitung* of VON DREYSE, the inventor of the breech-loading needle-gun:

Jorge Nicholas Von Dreyse is proprietor of the small-arms factory at Sommerda, near Erfurt, and was recently ennobled by the King of Prussia on account of the valuable service rendered in the Danish-German war by his invention. He is the son of a respectable locksmith of Sommerda, where he was born in 1787. In 1809 he went to Paris, where he obtained employment in several large mechanical workships, and among others the arms factory of Pauli. He returned to his native town in 1814, having acquired considerable practical experience in the mechanical arts. There he occupied himself at first in making improvements in his father's lock-smithy, and with constructing needle machines. In 1824 he joined a man named KNORRINGER, and set up an iron manufactory. About this time attempts were made elsewhere to adapt the percussion principle to the old flint-lock in hunting weapons. He now made experiments in explosive compounds, and in 1824, in conjunction with a partner named COLLENBUSCH, he took out a patent for percussion caps. In the following year he carried out the idea he had lately conceived of transforming the cylinder gun from the exterior to the interior of the gun. For the firing of the cartridge inside the barrel it appeared to him that the needle was the only means, and he tried every possible plan to effect this object. In 1828 he succeeded, and became the first constructor of a needle gun for which a patent was granted him. The same year the attention of the Minister of War was drawn to the value of this weapon for military purposes. DREYSE's perseverance was rewarded by a commission from Government to manufacture a large quantity of the so-called grape and cylinder guns. Experiments were also made with them by him to make many improvements in his invention. In 1836 he submitted his first breech-loading infantry needle-gun to the Prussian War Office. After making further improvements in this weapon he obtained an order for several hundred guns, which were tried at Spandau and Coblenz in 1838-40. The result of this trial proved perfectly satisfactory, and FREDERICK WILLIAM IV. ordered them to be used first of all in the Guard regiments, and gave the inventor the means for establishing a manufactory for arms and ammunition on a large scale. From 1841 to 1863 DREYSE supplied to the Prussian Government 300,000 guns, besides a vast quantity of cartridges. He not only armed the entire Prussian force, but also supplied the troops of nearly all the German States with his weapon, the best breech-loading needle-gun. He has since endeavored to perfect his weapon in precision and range, and its excellence has been amply proved by its effect in the Schleswig campaign.

ARMY AND NAVY IN CONGRESS.

SENATE.

ON Thursday, June 23d, Mr. WILSON reported back the House bill to amend the act to provide for the payment for horses and other property destroyed in the military service. Passed. Mr. COWAN reported a bill granting the duties for the Chicago Sanitary Fair, which was passed. Mr. TRUMBULL reported a bill for bail in certain cases of military arrests, with an amendment limiting the taking of bail to the several courts of the United States. The original bill included State courts. In this regard severely that bail to provide for claims against the Government for injury and destruction of property by the Army or by military authority during the Rebellion. The motion to reconsider the bill passed on Wednesday, the 22d, to prevent military interference in elections, was taken up. The evening session was devoted to discussing the \$500 commutation clause. The House joint resolution making provision to fill the deficiency in the appropriation for payment of soldiers in the Western Department was adopted.

On Friday, June 24th, Mr. HALE introduced a bill to amend the act regulating the grade of line officers in the Navy. The bill authorizing the Secretary of the Treasury to have published and sell to shipmasters, at cost, maps, coast charts and nautical books, was passed. A resolution was adopted inquiring of the President whether authority has been given by the Government to any person to induce men to emigrate from Ireland or Canada for the purpose of entering our Army or Navy. The Library Committee was instructed to report on the expediency of having compiled a catalogue of all publications in reference to the Rebellion, Mr. HALE, who introduced the bill, also introduced a resolution of inquiry in regard to the progress made in the construction of the gunboats ordered in 1862.

On Saturday, June 25th, Mr. FOSTER reported a bill to regulate the distribution of prize money, stating that it considered the subject fully, on the subject, and had the approval of the Navy Department.

On Monday, June 27th, a petition was presented for the extension of the Homestead act to the forfeited estates of Rebels. A report was presented in favor of the publication of an edition of the Revised Army Regulations, containing the names of all officers, both regulars and volunteers, who have been in the service since the commencement of the Rebellion, to be sold to the people at cost. It was agreed to. An adverse report was made from the Military Committee on the petition to allow Congressmen to visit without restraint the military forts and prisons in their respective States. A bill was passed for a commission to report the most suitable location on Western waters for a navy yard, which is a House substitute for the original bill to establish a navy yard at Cairo. A long debate ensued on the bill providing for bail in certain cases of military arrest, but no vote was reached.

On Thursday, the 28th, the House bill for the relief of the officers of the Fourth and Fifth Indian regiments, who were commissioned by the War Department, but not mustered into the service, was passed.

On Wednesday, the 29th, the resolution directing inquiry as to the progress made in the construction of gunboats, constructed for 1862, was agreed to. The House bill granting a pension to the wife of ISAIOH KELSEOE, who was executed at Richmond as a spy, was passed. A bill extending to the wives and children of colored soldiers the benefits of the pension act, was passed. The bill to reimburse Pennsylvania for expenses in repelling the Rebel invasion last year, was amended so as to include the expenditures of all the States engaged in that campaign. The House Enrollment bill was taken up, and several important amendments adopted. The period allowed for recruiting to all quotas was reduced from sixty to forty days; States shall recruit only within their own limits; a tax of five per cent. on incomes of over six hundred dollars is levied to pay soldiers' bounties. Finally the bill was passed.

HOUSE.

On Thursday, June 23d, a resolution was adopted directing the Military Committee to report a bill giving the officers allowed by existing laws, as clerks or volunteers in the cashier part of the war for less than three years, and not less than sixty days' service.

On Friday, June 24th, a protracted debate took place on the Senate bill to establish a navy yard depôt at or near Cairo, Ill. The House adjourned without action on the bill.

On Saturday, June 25th, the proposition to repeal the \$300 commutation clause in the Enrollment act, came up, and occupied the remainder of the day. Further discussion came up, as well as the question of the war and the means of carrying it on. The debate was exciting, and occasionally acrimonious and personal. Mr. FERNANDO WOOD addressed a little by members while denouncing the war. Mr. BLAIR, of Missouri, and Mr. ODELL, of New York, spoke in favor of the draft commutation. Mr. ODELL, of New York, subdivided in the policy of it. Other members took part in the discussion, which was not reached.

On Monday, June 27th, a resolution in favor of giving disabled soldiers such appointments as are in the gift of the House was adopted. A bill for the public building, ing the extension of the Navy Department building was reported. The Senate amendments to the bill exempting from duties goods imported for the late Chicago Sanitary Fair were concurred in. A long debate then ensued on the proposition to repeal the three hundred dollars draft commutation, which, on being put to a vote, was again defeated, but this time by only two majority, showing the firm opposition to the draft commutation clause. Different amendments and substitutes were offered, but a vote on the entire bill was not reached.

On Thursday, June 30th, the vote rejecting Mr. SHERMAN'S substitute for the Enrollment bill was reconsidered by 83 to 64, and the substitute was rejected by 76 to 71. It authorizes the President, at his discretion, at any time, to call for any number of volunteers for one, two or three years, or in case of a draft any number of militia for one year. It applies to any district, toward filling the quota of which he may have volunteered or been drafted.

Every volunteer substitutes, who may be accepted for one year, unless sooner discharged, shall be paid a bounty of \$200, for two years \$300, and for three years \$400, to be paid at stated intervals.

In case of the death of the volunteer or substitute, the bounty remains due to his heirs. The Governors of States or legal representatives, and in case of honorable discharge by reason of wounds, such volunteer or substitute shall receive the full bounty.

In case the quota of any town shall not be filled in sixty days after the President's call, he is authorized to order a draft for one year's service. Persons drafted or who may thus tender payment of money shall be accepted or received by the Government to release any enrolled or drafted men from military service.

It is made lawful for the Executive of any State to receive in the volunteer service.

Minors under eighteen years of age, enlisted without the consent of their parents or guardians, shall be discharged.

Persons in the draft districts who have volunteered during the present Rebellion, are to be credited to the quota by reason of their being in said service, and not enrolled prior to February 1st.

An amendment was offered, but rejected by 47 to 110, that hereafter persons between the ages of forty-five and fifty years shall be enrolled and held liable in the same manner as persons between twenty and forty-five.

Mr. SPALDING offered an amendment that the law with regard to persons conscientiously opposed to bearing arms shall not be altered or affected by this act, except so far as it regards the amount of money to be paid for exemption. The amendment was agreed to—Yeas, 79; Nays, 63. The bill passed by 79 against 75.

The Senate bill, with amendments for the better organization of the Quartermaster's Department, and the bill facilitating Admiralty cases in New York, were passed.

Mr. VALLANDIGHAM offered a Democratic amendment to the bill regulating prize proceedings and the distribution of prize money as agreed to. The bill to organize and equip into the engineer corps in the regular and volunteer Army was passed.

THE following promotions and assignments are announced in a special order from the headquarters of the Rebel Army:—Major-General Ewell, temporarily commanding Hood's division; Brigadier-General Wm. G. Lewis, temporarily to Hoke's brigade; Brigadier-General Lilly, temporarily to Pegram's brigade; Brigadier-General Zebulon York, temporarily to Hay's and Stafford's brigade; Major-General Ramseur, temporarily to Early's division; Major-General Mahone, temporarily to Anderson's division; Lieutenant-General R. H. Anderson, temporarily to Longstreet's corps; Lieutenant-General J. A. Early, temporarily to Ewell's corps.

THAT portion of Maryland between the Potomac, the Chesapeake and Delaware Bays and Mason and Dixon's line, including the Prisoner's Camp, at Point Lookout, is added to the Department of Washington.

ARMY AND NAVY PERSONAL.

BRIGADIER-General Meredith has taken command at Cairo, Ill.

MAJOR Charles F. Davis is announced as Chief Paymaster, Department of the South.

BRIGADIER-General Getty has relieved Brigadier-General Ames from the command at White House.

BRIGADIER-General T. Kilby Smith has been on a brief visit with his family at Yellow Springs, Ohio.

BRIGADIER-General Francis Fessenden is getting on finely. His wounded limb, we hear, heals nicely.

PAYMASTER Assistant Surgeon Edward S. Matthews has been ordered to the Naval Academy at Newport, R. I.

MAJOR-General Hitchcock, though remaining in the field, has not recovered sufficiently to be able to resume command of his corps.

MAJOR George B. Drake, United States Volunteers, has been appointed Assistant Adjutant-General upon the staff of Major-General Banks.

LIEUTENANT-Colonel C. C. Bartlett, One Hundred and Eighth New York, has been ordered to the Department of the Ohio as Inspector-General.

GENERAL Joseph B. Carr's command will consist of the corps troops now under command of Major-General Hanks, who retires from the field on account of the nature and continued severity of the several wounds he has received in battle.

BRIGADIER-General Neil, commanding for a time the Second division, sixth corps, has been detached from the sixth corps and ordered back to Major-General Butler. Brigadier-General Frank Wheaton assumes command of the division temporarily.

SURGEON Benjamin Swett, United States Army Medical Director, Department of the South, has been relieved and ordered to report as Medical Director of the Department of the Northwest. Surgeon Madison Clymer, United States Volunteers, succeeds him.

MAJOR-General Hancock has resumed command of the Second corps. His wound having closed, he is ready again for active service in the field. Major-General Birney, who has had temporary command of the corps, returns to the command of his old division.

MAJOR-General Hancock has resumed command of the Second Corps. His wound having closed, he is ready again for active service in the field. Major-General Birney, who has had temporary command of the corps, returns to the command of his own division.

SECOND Lieutenant Amos Stoughton, Fifty-second Pa. Volunteers, tried by court-martial at Hilton Head, S. C., for conduct unbecoming and officer and gentleman, and found guilty, has been sentenced to be dismissed. Proceedings approved by Major-General Foster.

THE President has nominated Major Jacob Zeilin, now in command of the Marine Corps, Washington, D. C., to the position of Colonel-Commandant of the Marine Corps, made vacant by the death of Colonel John Harris. Major Zeilin has been in the service forty years.

FIRST Lieutenant John T. Potts, Sixth regiment, Veteran Reserve Corps, has been promoted to be captain from June 9th in the same regiment, vice Captain Thomas Sherlock, whom William H. Tyrrell, of the same corps, to be First-Lieutenant, "as a reward for faithful discharge of duty."

CAPTAIN Thomas Sherlock, Sixth regiment, Hancock's staff, who was wounded in the battle of the Wilderness, having entirely recovered from his wound, has returned to duty in the field. Captain Conrad, now Assistant Adjutant-General to Gen Brownson's duties, has been appointed colonel of an artillery regiment.

WE have received a copy of special orders No. 59, Headquarters Army of the Potomac, March 5, 1864, stating that Surgeon T. C. Wallace, Sixty-first New York Volunteers, having handed in his resignation on account of his physical debility, he is honorably discharged the military service of the United States.

JAMES H. Eddby is the name of the engineer of the United States steamer *Sassacus*. This officer stuck to his post amid the most trying circumstances. Even after the hull boat was cleared of the enemy, and escaping from a shot-hole in the boiler, he stood by and worked the ship out of the reach of the enemy.

BRIGADIER-General Kilpatrick has lately received the degree of M. A. from Rutgers College, at Brunswick, N. J. General Kilpatrick was present during the commencement exercises, and has the satisfaction of hearing read the venerable treatise of the institution that they voted him the degree, and the President conferred it upon him on the spot.

BRIGADIER-General N. C. McLean has been ordered to an important position in Kentucky, and will make his headquarters at Lexington. He has been assigned by the following general assignments to his staff: Captain Oscar Minor, A. A. G.; Captain Stagg, A. D. C.; Lieutenant Reilly, A. D. C.; Captain Gallup, A. D. C., and Lieutenant Hall, A. D. C.

FIRST Lieutenant Edmund Butler, United States 5th Infantry, tried at Albuquerque, New Mexico, before a general court-martial, on charges of conduct unbecoming an officer and gentleman, and disobedience in office, has been found guilty of all the charges and specifications preferred against him. Approved by Brigadier-General Carleton.
